> Actually, my quick take is about 8%.
>
> Some background:
> When Flint left, the annual revenue profile for the Water System was initially reduced by $12.5 million, However, we immediately recalculated the rate for Genesee County (recognizing their higher demands), to effectively "claw back" about $2 million of the reduction, so the net Flint

impact is ~ $10.5 million, or just under 2.5% of the (reduced) Water System rate revenue. Assuming that same amount could be replaced, and all else being equal, the "system rate increase" could be reduced by about 3 percent, with a bit more of the reduction occurring in the suburban wholesale rate structure. Safe to say that (again, absent any other changes) the average suburban water rate increase would be closer to 8 percent compared to the current 11.1%.

Hope this helps . . .

> Nikki / Bart – don't need a hard and fast number on this. However, it would seem to me that in a fixed cost system such as water, if Flint were to be hooked up again at the $847K / month cited in Ms. McCormick's January 12th memorandum and after the release of the rates yesterday, bringing Flint back would – on a marginal cost basis – serve to mitigate the wholesale (suburban) customer rate increase of 11.1% cited in yesterday's presentation. Without going into a whole lot of detailed calculations (unless necessary), what would the impact of the inclusion of Flint starting say on July 1, 2015 (hypothetical date) be on the rate increase presently now in the public? A revised increase of what – 10.6% - looking for a high level sensitivity analysis here. Can you help? RJD

CITY OF DETROIT
WATER AND SEWERAGE DEPARTMENT
OFFICE OF THE DIRECTOR

735 RANDOLPH STREET
DETROIT, MICHIGAN 48226-2830
WWW.DETROITMI.GOV

February 19, 2015

The Honorable Joshua M. Freeman, Councilmember
City of Flint, Michigan
1101 S. Saginaw Street
Flint, Michigan 48502

Dear Councilman Freeman:

Regarding: Your letter of February 3, 2015

Thank you for your letter of February 3, 2015 in which you seek additional information related to the Detroit Water and Sewerage Department's ("DWSD") offer to resume supplying drinking water to the City of Flint. Specifically, you have asked several follow-up questions related to the nature of the long-term arrangement I referenced within my letter, as well as some technical questions regarding rates and the method for reconnection in light of changes Flint has made to its system in the interim timeframe.

I will attempt to provide as much clarity as possible through this response. For starters, the rate quoted in my January 12, 2015 letter is related to the current rate year ending June 30, 2015. As new rates are adopted each year, the relative methodology as is applied to current DWSD wholesale customers would also be applied to Flint (and Genesee County) and will impact your rates, accordingly. In other words, rates will change in accordance with DWSD revenue requirements each year that Flint (and Genesee County) receives water from DWSD. That is why my prior letter only quoted a specific rate through June 30, 2015. Our Board of Water Commissioners has not yet adopted rates for the 2015-2016 rate year.

Secondly, you have asked if the rates described in the January 12, 2015 letter are exclusive to Flint or if they also would cover the Genesee County Drain Commissioner ("GCDC"). I certainly envision that the rates associated with Flint would also be available to the GCDC, as the two entities have utilized service pursuant to a single contractual arrangement in the past. To that end, DWSD is open to the possibility for a contract to be entered into by either Flint or GCDC on behalf of both customers, depending on the intricacies of the connections that you referenced with respect to Flint's recent sale of pipeline to GCDC. As noted previously, entering into a contract is not required to reinstitute service to Flint during the current emergency situation, in anticipation of further discussions toward a future service relationship.

Additionally, you have asked about short-term as compared to a long-term contractual relationship in light of Flint and GCDC's combined intent to utilize KWA for long-term service as early as 2016. DWSD operates pursuant to long-term contracts with its customers. As you may be aware, our model contracts are for a period of thirty years.

However, in light of the work already done by Flint and GCDC in preparation to receive raw water from KWA, DWSD is open to exploring a long-term contractual arrangement in which DWSD provides full service to Flint (and GCDC) until such time as KWA is operational, and then a back-up service arrangement, thereafter. The specific terms of that back-up service arrangement would require some further negotiation, but I would assume that such an arrangement would be mutually beneficial in light of the concerns with utilization of the Flint River as a primary or secondary water source.

You have also asked a technical question about the steps necessary in order for Flint to convert back to DWSD for receipt of water service. While I agree that it is not as simple as flipping a switch, I do not believe that this conversion would be a significant obstacle for Flint and GCDC to overcome. In fact, there should not be any actions required of DWSD in order to resume service, since we are currently providing full service to GCDC through the GN-01 meter (formerly the FL-01 meter).

Finally, you have asked if the anticipated assumption of DWSD's wholesale operations by the Great Lakes Water Authority ("GLWA") will impact the proposal that has been made. In short, the answer to your question is that it would not, depending on the timing of the signing of a new contract between the parties. Under the terms of the GLWA Memorandum of Understanding and Articles of Incorporation, it is envisioned that the GLWA would assume all wholesale contracts of DWSD. Therefore, the GLWA would be bound by the contractual terms that are agreed upon between DWSD and the City of Flint and/or GCDC. Nevertheless, as the GLWA Board has now been seated and has a regular schedule of meetings, I would certainly anticipate advising the GLWA Board of the terms of any proposed contract between the parties, and to seek their input or listen to any concerns or suggestions that they might have. In any event, resumption of service in the short term to address Flint's current needs, remains available immediately under existing published rates, and requires no action by either Board.

I look forward to the continued discussions, and hope that there is a viable solution that can be reached for the benefit of all parties.

Sincerely yours,

Sue F. McCormick

Thanks, Tom, I did receive a copy. What I see is confirmation that we could rejoin on a short term basis on the financial terms outlined in the original letter while we (or presumably KWA) attempts to negotiate a long term back up agreement. And the quoted rates are only good til July 1, at which time (from the media I read) they will increase. Am I missing something?

Rejoining on a short term basis would increase Flint's costs by at least $1 million a month....not possible without a significant rate increase (more than 25%) or a monthly gift of that amount from somewhere.

Does someone really want Flint rate payers to send $1 million per month to DWSD or GLWA when our water supply is (by our internal testng today) within EPA/MDEQ guidelines and we are taking steps every day to improve water quality?

J

February 27, 2015

To: Wayne Workman,

From: Jerry Ambrose, Emergency Manager, City of Flint

As the Emergency Manager for the City of Flint, I am charged with restoring the City government to financial solvency, and working to assure that the City moves forward on a financially sustainable basis. The steps taken over the past three years have been difficult. Taxes and fees have been raised, services and workforce reduced, and ongoing costs, including legacy costs, have been constrained.

The current controversy surrounding the provision of water, and the path for resolution, has a potentially significant impact on the progress that is being made. I am satisfied that the water provided to Flint users today is within all MDEQ and EPA guidelines, as evidenced by the most recent water quality results conducted for MDEQ. We have a continuing commitment to maintaining water safety and to improve water quality, and have dedicated resources to assure this commitment will be made.

The oft-repeated suggestion that the City should return to DWSD, even for a short period of time, would, in my judgment, have extremely negative financial consequences to the water system, and consequently to the rate payers. By the most conservative estimates, such a move would increase costs by at least $12 million annually, with that amount achieved only by eliminating virtually all budgeted improvements in the system. For a system with Unrestricted Assets of only $740,745, according to the June 30, 2014 audited financial statements, the only recourse within the City's control would be to raise rates. And in my judgment, such a rate increase would minimally be in the 30% range.

This direction of discussion also deviates from what, in my judgment, should be the focus: How can we not only operate and maintain a system to assure the delivery of safe and quality water dependably, but significantly reduce the cost of water and sewer to the users? At an average of $149 per month for a residential user, the cost for this service is extremely high in comparison to surrounding areas, as well as most areas across the state, and creates a significant financial burden for many users. In my judgment, we should all be concentrating on how to reduce rates by 50% or more! Unfortunately, there are no easy or evident answers, and continuation of the status will be an impediment to the sustainable recovery of the City of Flint. It is a conversation that we will have with the recently created Water Quality Advisory Committee.

My reasoning for this conclusion is as follows:

One of the decisions made in the context of beginning to eliminate deficits and to restore financial stability to the City of Flint was to increase water and sewer rates significantly – the only choice available to financially stabilize a system that as of June 30, 2012, had a deficit of $8,758,091. Another was to leave DWDS for the KWA because it offered the opportunity to lower future rate increases. A third decision was to utilize the Flint River on an interim basis when DWSD unilaterally terminated the City's contract for water purchase. That decision was made because it also offered an immediate cost savings opportunity which translated into the ability to upgrade the Water Treatment Plant without having to seek financing. It was a reasonable decision because of our experience in using the river in a back-up capacity, including test runs on a quarterly basis for several decades.

Unfortunately, the switch to the river as a primary source was more challenging than anticipated, and the harsh winter of 2013-2014 resulted in much more damage to the aging water infrastructure than in previous years. The result was the issuance of required notices that water exceeded established guidelines for safety as it could affect certain vulnerable populations, and some users of the system experienced unpleasant odors and discoloration. Some users appeared to have had some negative reactions to the new source of water. However, as soon as the test results were known, City staff took immediate actions to address the concerns. These actions are evidenced today by the fact that MDEQ has certified that our most recent testing shows water from all testing sites to be within acceptable guidelines. Additionally, the City is continuing to taking the necessary actions to assure that the water supply remains safe and that water quality continues to improve.

As the City has moved to address the situation, the suggestion has been made that the City should re-engage with DWSD and purchase water at least until the KWA pipeline Is supplying water. As evidenced by the most recent letter from DWSD, such a decision would immediately increase the City's cost by $846,700 per month, or $10,160,400 per year, just for the fixed cost portion of the price. The actual purchase of water would be in addition, and dependent upon the quantity purchased. We estimate the actual water purchase cost to average more than $1 million per month, for a grand total of approximately $22 million. Finally, the DWSD offer is conditioned upon the City (or presumable its partners in KWA) agreeing to negotiate a long term contract (30 years) for back-up.

The $22 million annual estimate of increased costs to purchase water from DWSD would be minimally offset by an approximate $3 million in reduced operating costs, and could be further offset by an additional $9 million, but only if all funding for capital improvements to the system are eliminated. To eliminate all funding dedicated to repairing, stabilizing, and improving the system would be totally irresponsible and would have long term negative consequences to the City and to future rate payers.

As you are aware we have recently brought in outside expert assistance to evaluate the steps we have taken to assure that the water is safe and to continue to improve water quality. We are expecting specific recommendations within the next few weeks, and are committed to implementing those recommendations in a timely manner. Many steps have already been taken. I am confident that implementing their recommendations will assure a continuing supply of safe water as well as improved quality, and at far less cost than re-engaging DWSD.

We have also created a 40 member Water Advisory Committee and a 15 member Technical Advisory Committee to assure two-way communication with the public and users of the system. Those committees will begin to meet within the next week, and we look forward to answering their questions and receiving their input.

It is unfortunate that problems and concerns with quality have arisen, and we are working every day to address the issues created them. Maintaining safe water and improving quality is a top priority as we work to make the City of Flint an attractive place to live, work, study, and play.

CITY OF FLINT

Dayne Walling
Mayor

Mr. Jerry Abramson
White House, Executive Office of the President
Director of Intergovernmental Affairs
1600 Pennsylvania Ave. NW
Washington, DC 20500

February 23, 2015

Dear Mr. Abramson

I am writing to request the support of the White House for improving the City of Flint's water quality and infrastructure. The President, Vice-President and White House have been highly engaged in seeking solutions for Flint challenges around public safety, neighborhood stabilization and economic development. We are very thankful for President Obama's leadership and dedicated support being provided through the Sustainable Communities, Choice Neighborhoods, Justice Innovation, and Strong Cities Strong Communities initiatives.

Now residents are most concerned about the safety and quality of the drinking water that is being treated from the Flint River. This is my top priority and work is being done every day to secure drinking water that is 100% safe according to the standards. As with other challenges, it is essential that we have a coordinated effort among Local, State and Federal agencies. To this end, I am requesting participation from the White House and Environmental Protection Agency on a City of Flint Technical Advisory Water Committee. The committee is expected to meet regularly through the transition to the new Karegnondi Water Pipeline and will include governmental, hospital, university and business sectors.

I welcome any technical assistance you are able to coordinate including expertise on water quality and public health, best practices with water treatment, and improving distribution system infrastructure. Thank you again for the valuable partnership. I look forward to working with you and Federal partners as we transform Flint into a sustainable 21st Century city with new jobs, safe neighborhoods, strong infrastructure and great schools.

Sincerely,

Dayne Walling
Mayor, City of Flint

CC: Mark Linton, Director, Strong Cities Strong Communities, White House Domestic Policy Council
Dr. Susan Hedman, Great Lakes Regional Administrator, U.S. Environmental Protection Agency
Mark Rupp, Deputy Associate Administrator for Intergovernmental Relations, U.S. EPA
U.S. Congressman Daniel T. Kildee

Recent Tests Show Flint Water within EPA Guidelines

Flint, Michigan – February 27, 2015 – The Michigan Department of Environmental Quality (MDEQ) Testing lab has provided results to the City of Flint showing that test results for TTHM levels for the month of February are well within EPA guidelines for safe water. All eight testing sites showed levels of TTHM ranging between 14.9 and 28.5 micrograms per liter (µg/L), well below the Maximum Contamination Level of 80 (see chart below).

The testing results confirm the progress made by the City to address concerns regarding the safety of its water supply and corroborates findings by the City and independent tests by other organizations that the water today is safe. "Flint's water supply is meeting all safety guidelines set forth by the EPA," said DPW Director Howard Croft. "Today's findings by the MDEQ reinforce the progress we have made, and should help rebuild confidence in the safety of Flint's drinking water. We still have work to do to improve water quality and are committed to being vigilant to assure that water safety is maintained."

These results also show that the four month average for test results is now within EPA guidelines for five of the eight testing areas in the City. However, because EPA regulations require that the four month average for all testing sites be within guidelines, the City of Flint will still be considered to be out of compliance by MDEQ. The City expects to receive notice within the next few weeks indicating non-compliance, and system users can expect to receive official notice of non-compliance in the month of March.

Emergency Manager

Dayne Walling
Mayor

Meanwhile, the City continues to work on maintaining water safety and improving water quality. While steps are being taken daily to improve quality, the City is expecting a formal set of recommendations from its water quality experts within the next few weeks.

The detail of the study results, a report of the progress being made and preliminary recommendations from Veolia will be shared with the newly formed Water Advisory Committee and Water Technical Committee, whose first meetings are scheduled for next week.

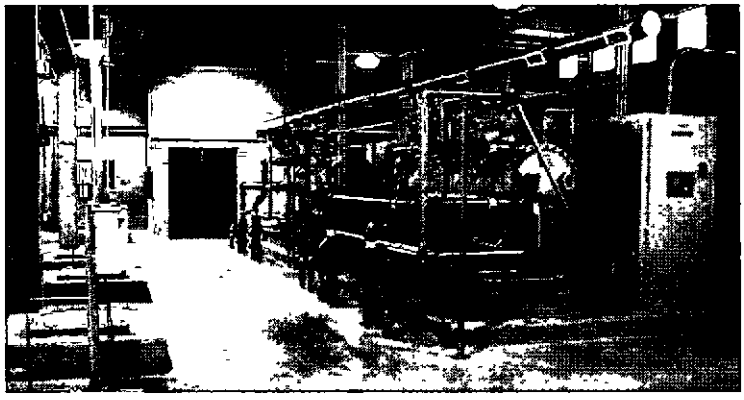
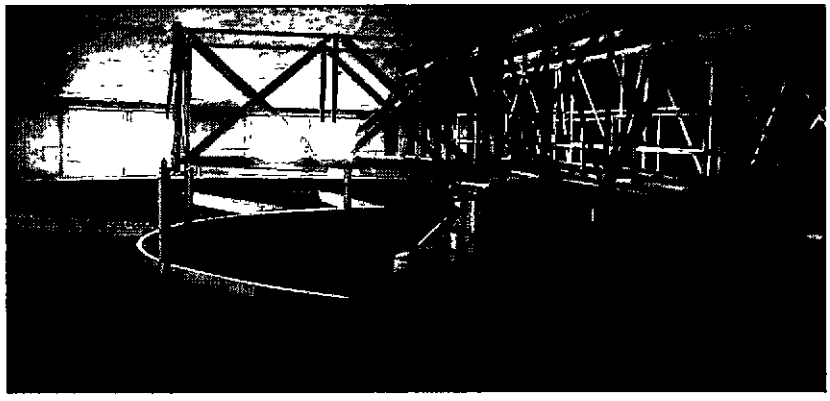
Operational Evaluation Report
City of Flint

FINAL

Trihalomethane Formation Concern

February 27, 2015





Lockwood, Andrews & Newnam, Inc.
A LEO A DALY COMPANY

EXECUTIVE SUMMARY

Environmental Protection Agency (EPA) and Michigan Department of Environmental Quality (MDEQ) regulations require that public water suppliers test drinking water quarterly throughout the distribution system for disinfectant by-products (DBP's). Two categories of DBP's, tri-halomethanes (THM) and halo-acetic acids (HAA5), are regulated and must be tested for. The City of Flint began operation of their water treatment plant (WTP) full time with the Flint River as the source on April 25, 2014. Since that time, four quarters of samples taken have resulted in an annual average violation for total THM. Prior to the first violation (Nov. 2014), the City hired Lockwood, Andrews & Newnam, Inc. (LAN) to complete this Operational Evaluation Report (OER) in conformance with EPA guidelines with the goal to determine the cause(s) of high levels of THM and evaluate possible solutions.

The EPA promulgated the Stage 2 Disinfectants and Disinfection By-Products Rule (DBPR) in January 2006 which set maximum contaminant levels (MCLs) for total trihalomethanes (TTHM) and HAA5 based on an annual running average, tested quarterly, for a given sampling location. The City of Flint reports levels from 8 sampling test locations. Of the four quarterly sampling cycles since Flint began operating the WTP full time, HAA5 levels have been acceptable but TTHM levels were high at 4 sampling sites following the third sampling cycle. Average THM levels exceeded the MCL at 3 sites following the fourth sampling cycle.

A number of issues have been identified as possibly contributing to the high THM levels measured.

1. Inefficient ozone system functionality which has resulted in increased chlorine feed.
2. Upstream source influences in terms of increased chlorine demand.
3. Bypass stream around softening contributed to chlorine demand and increased total organic carbon (TOC) levels in the effluent.
4. Unlined cast iron pipes in the distribution system contributing to chlorine demand.
5. High water age in the distribution system due to:
    a. Broken valves causing less than ideal flow patterns.
    b. Inefficient pump station pressure zones
    c. Water storage volumes in excess of that needed for today's demands
    d. Oversized water mains
    e. Low water demands
6. High chlorine demand in filters.
7. High THM formation potential (THMFP) in source water.
8. Less than optimal removal of THM precursors

A graphical representation of how the factors above relate to the timing of THM compliance sampling is shown as Table 1. Compliance sampling dates are hatched. Each row in Table 1 describes a factor than can lead to increased THM levels and the table defines when each of those factors applied. Note the convergence of nearly all factors around the second sampling period on August 21, 2014 to create what appears to be a worst case scenario. The table also shows that the factors listed as those that the City can control have been addressed prior to the February sampling period. Monthly operating report data up to February 1,2015 is depicted on the Table.

TABLE 1 - SUMMARY OF NEGATIVE INFLUENCES ON THM COMPLIANCE SAMPLING

FACTOR	2014 May	June	July	Aug	Sept	Oct	Nov	Dec	2015 Jan	Feb
Softening bypass stream over 20% of plant flow										
Ozone system not feeding optimally										
Using full water storage capacity of WSR & CSR										
Chlorine feed at WTP 7.0 mg/l or more										
Ferric chloride feed rate less than 10 mg/l Fe3+										
Raw water temp 23 degrees C or more										
Raw water TOC levels above 8.0 mg/l										
Raw water coliform over 5000 counts/day										
Positive bactena test in dist. system (boil water notice)										
Water demand less than 15 mgd

ACTION PLAN

The City of Flint has signed an agreement with the Karegnondi Water Authority (KWA) to purchase raw water drawn from Lake Huron. The KWA system is currently under construction and expected to be operational by late 2016. The water supply from Lake Huron will have entirely different water quality characteristics from the Flint River and those characteristics are expected to yield drastically reduced DPB formation. With that, non-structural options to help reduce THM levels are much preferred over solutions requiring new construction. Therefore, two categories of actions have been devised: Stage 1 being actions that can be completed relatively quickly without major construction and Stage 2 consisting of either long term actions or solutions requiring major construction. The City is actively working to complete Stage 1 actions as soon as possible. Stage 2 actions are to be implemented only if Stage 1 actions are ineffective in adequately reducing TTHM levels and therefore Stage 2 is contingent upon the outcome of Stage 1. As of the date of this report, status updates for action items are shown in red.

Stage 1 – Immediate Actions

- *Hire third party water quality expert to complete independent 'water audit'*
  - The City hired Veolia Water to review all water quality related operations, procedures, actions taken and planned responses. Recommendations from Veolia are expected by the first week in March 2015.
- Obtain an in house THM analyzer to allow regular operational monitoring of THM levels
  - THM analyzer was installed 2/17/15.
- Hire ozone system manufacturer to troubleshoot ozone system
  - Manufacturer and controls programmers performed on site evaluations in January 2015.
- Bench scale jar testing
  - Match existing process and assess possible areas of improvement
    - Existing process was simulated and an evaluation of existing chemical feed dosages has been completed by LAN.
    - Existing process TOC profile was developed by Veolia.
  - Simulate potential modifications to treatment process
    - Soda ash softening evaluation completed and PAC feed testing completed by LAN.
  - Evaluate coagulation and flocculation polymer aid feeds to assist with TOC removal
    - Evaluations of polymer aids completed by LAN and PVS Technologies.
- WTP operational changes
  - Discontinue softening bypass stream to reduce chlorine demand
    - Operational directive has been set to soften no less than 80% of flow.
  - Disinfection of filter beds to reduce chlorine demand
    - Utility Service Group contracted by City and condition assessment completed. Controls improvements have been completed.
  - Begin coagulation and flocculation polymer aid feeds to assist with TOC removal if bench scale test results are positive
    - Jar testing completed to date has not indicated a useful benefit to feeding coagulation/flocculation polymer aids. Increased ferric doses have been implemented at the WTP based on positive jar test results.

- Increase water main flushing efforts to minimize stagnant water
  - Flushing efforts are ongoing as weather permits.
- Water system modeling to identify areas with high water age and potential solutions
  - The water model has been improved and preliminary results, including system wide water age, have been produced. Water demand updates and reconciliation with operator's data are scheduled for March 2015 to complete water modeling analysis.
  - Cedar Street Pump Station potential recirculation
    - Water model analysis to be completed in March 2015.
  - West Side Pump Station potential recirculation
    - Water model analysis to be completed in March 2015.
  - Storage tank volume use
    - Operating levels of West Side and Cedar Street reservoirs have been lowered to reduce water age
  - Possible broken closed valve locations
    - Model has been updated with known broken valve locations. Model results are being evaluated for indications of other possible broken valves. City has also initiated valve assessment program.
  - Locations in need of flushing
    - High water age areas have been identified in the water model. Further evaluation forthcoming to determine most effective flushing points.

Stage 2 – Contingent Actions

- Fix ozone system
  - Repairs have been made to gauges and programming and the system is producing proper ozone and functioning under manual operation. Further minor repairs are planned for the 1st quarter 2015 to allow automatic operation.
- Start feeding coagulation and flocculation polymer aids to lower TOC, if not completed in Stage 1
  - Polymers evaluated by LAN did not demonstrate notable benefit.
  - PVS Technologies evaluated a proprietary polymer that showed little benefit.
- Convert to lime and soda ash softening
  - Cost effective analysis to be developed, if necessary, based on routine operation THM level monitoring.
- Change disinfectant to chloramine or chlorine dioxide until KWA
  - Cost effective analysis to be developed, if necessary, based on routine operation THM level monitoring.
- Install pre-oxidant feed at intake to optimize ozone disinfection
  - Permanganate feed at intake was evaluated by Veolia the week of 2/16/15 and recommendations are expected by the first week in March 2015.
- Replace filter media with granular activated carbon (GAC) media
  - Cost effective analysis to be developed, if necessary, based on routine operation THM level monitoring.
- Implement advanced treatment for THM precursor removal
  - Cost effective analysis to be developed, if necessary, based on routine operation THM level monitoring.
- Increased main flushing based on water modeling results
  - Water model analysis to be completed in March 2015.

- Continue valve replacements with water model assistance
    - Water model analysis to be completed in March 2015.
- Emphasize cast iron pipes on water main replacement priority list
    - Flint has bid replacement of over 2 miles of 24" cast iron pipe along Dupont and Bishop Streets to be completed this coming construction season. The water main section is considered a critical transmission main, and is expected to contribute to decreases in water age when complete

THM samples have been taken and tested 5 times since the City began using the Flint River for supply. Four sets of samples were taken for official regulatory compliance and one set of samples was taken by the City for operational monitoring. Samples were taken in May 2014, August 2014, November 2014, January 2015, and February 2015. THM levels at all sample sites have declined from August 2014 to February 2015. The average of all sample sites in August was 142.1 ug/l and the most recent average of samples taken in February 2015 was 19.8 ug/l. The MCL defined by the EPA is 80 ug/l.

I. BACKGROUND

The City of Detroit Water and Sewer Department (DWSD) has historically provided drinking water for the City of Flint and Genesee County. In the late 1990's growing concern regarding the reliability of the DWSD supply prompted the City of Flint to upgrade their existing water treatment plant (WTP). Those improvements, defined as Phase I, were completed in 2005 and were intended to allow the Flint WTP to operate, using the Flint River as the source, for an extended period of time in the event that supply from the DWSD was temporarily interrupted. Additionally, the Phase I improvements set the stage for Flint to break free from dependence on the DWSD supply and water charges over which they had no control.

A. WATER SUPPLY TRANSITION

1. Detroit Water and Sewer Department (DWSD)

Until recently the Genesee County and Flint region had been provided drinking water by the DWSD. However, due to excessive cost increases and reliability issues with the DWSD system other options had to be explored.

2. Karegnondi Water Authority (KWA)

In 2010 the Karegnondi Water Authority (KWA) was formed for the purpose of developing a new water supply from Lake Huron to serve the region in lieu of the DWSD supply and the City of Flint elected to join. The KWA expects the new system which is currently being constructed to become operational by the fall of 2016.

3. Flint River – Interim Period

With a renewing water supply agreement between Flint and the DWSD being terminated by the DWSD (effective April 30, 2014) and the KWA system not expected to be operational until late 2016, the City of Flint decided to initiate operation of the existing WTP full time utilizing the Flint River as the interim water source. A variety of WTP improvements were necessary for the Flint plant to become a full time plant. For purposes of this report, Phase II improvements to the Flint WTP are improvements intended to allow the plant to operate full time with either the Flint River as the source or the KWA supply as the source.

B. TTHM VIOLATIONS

The EPA and MDEQ method of determining if TTHM sample results exceed the MCL uses a locational running annual average (LRAA). Flint's first TTHM violation was cited by the MDEQ following the third cycle of sampling completed in November 2014. Of the 8 sampling sites, 4 were in violation. At that time the MDEQ used the following calculation for determining if the MCL had been violated:

(2 x current quarter value + previous 2 quarter values) / 4 = Operational Evaluation Value

Flint has now completed tests for 4 quarters and a straight annual running average applies. Based on samples taken on February 17, 2015 the number of sites in violation of the THM MCL limit has decreased to three. The City also conducted a round of sampling on January 27, 2015 in order to internally monitor the progress of actions taken to address the THM issue. It is worth noting that each round of sampling since August of 2014 has indicated a significant drop (improvement) in THM levels. Test results are tabulated in Table 2. HAA5 sample results are shown in Table 3, of which Flint has had no violations.

C. WATER TREATMENT PLANT RECENT IMPROVEMENTS & STATUS

1. Phase I WTP Improvements

Since 1965, the Flint WTP has remained a secondary or backup supply system to the DWSD primary supply. Typically the secondary supply for a public water system is expected to be needed only during emergency situations and normally is designed for short term operation such as providing the average daily demand for a few days. Conversely, Phase I improvements were designed with the intent to upgrade the Flint WTP in order to allow for an extended short term period (6 weeks) because of the perceived high risk that the DWSD supply would fail and remain out of service for an

extended duration. Regardless, the Flint WTP was still intended to serve as a standby plant and as such the Phase I improvements lacked redundancies that would be required for a primary supply WTP.

2. Past Pilot Study & Testing

During design of the Phase I improvements a treatability study was completed by Alvord, Burdick & Howson, LLC (AB&H) in 2002. The Treatability Study evaluated the current treatment processes that are in place at the Flint WTP today with the Flint River as the source. The report recommended the following:

TABLE 4 – 2002 WTP TREATMENT RECOMMENDATIONS

Treatment	Purpose	Point of Application	Dosage (mg/l)
Sodium permanganate	Zebra mussel control	Intake	0.3
Ozone	Taste & odor removal, disinfection	Diffusor basin	1.5
Ferric chloride	Coagulation	Rapid mix	40
Coag aid polymer	Turbidity & TOC removal	Rapid mix	2.0
Floc aid polymer	Turbidity & TOC removal	Floc basin	0.05
Lime	Softening	Softening basin	175
Soda ash	Softening	Softening basin	52
Carbon dioxide	pH adjustment	Recarb basin	37
Media filters	Filtration	N/A	Na
Chlorine	Disinfection	Filter effluent	1.0

Of the recommended items, zebra mussel control, coagulant and flocculation polymer aids, and soda ash feed have not been incorporated into the treatment process.

3. Phase II WTP Improvements for Full Time Operation

Phase II WTP improvements are those needed to convert the Flint WTP from a back-up supply to a primary supply plant. A number of improvements have already been constructed as they were necessary to operate full time when treating water from the Flint River. The improvements under the title of Phase II that have been completed or are nearly complete include installation of the future raw water feed connection point and valving for the KWA supply, upgrades to the lime sludge lagoon, the lime sludge lagoon decant and disposal system, decant pump station and force main, installation of mid-point chlorination before filtration, and upgrade of the electric feed sub-station.

Additional improvements to the Flint WTP that are to be completed to become part of the normal treatment process using water supplied by the KWA are:

- New oxygen and nitrogen storage facilities for the ozone system (under construction)
- New coagulant feed system
- Electrical
  - Pump Station #4 upgrades (under construction)
  - SCADA and controls upgrades
  - Filter transfer pump station feeders
- Pump replacements and VFD installation in the low and high service pump station (under construction)
- Filter transfer pump station to Dort Reservoir
- Facility security improvements

II. SOURCE WATER EVALUATION

A. DATA ANALYSIS

Based on past data collected and the 2002 Treatability Study by AB&H, the Flint River water quality varies seasonally with higher hardness and alkalinity experienced in the winter. Higher magnesium concentrations are also experienced in the winter, adding difficulty to the settling process due to neutrally buoyant floc. General water quality average characteristics recorded for the 2002 Treatability Study as compared with average characteristics recorded in 2014 are shown in Table 5 below.

TABLE 5 – FLINT RIVER WATER QUALITY CHARACTERISTICS

Period	Turbidity NTU	TOC Mg/l	Alk. Mg/l	Hardness Mg/l as CaCO3	pH	Total Col. Count/day	THMFP Mg/l
2001 Apr–Oct	7.9	9.4	215	272	8.1	870-1230 (7300 max)	410
2014 May–Oct	8.3	10.3 5/22/14	207	252	8.2	1900-9000 (48,300 max)	187

The Flint River characteristics do not appear to have changed significantly over the past 10+ years. Note that further investigation by City staff revealed a sewer leak upstream of the plant that may have contributed to the total Coliform count. The leak was subsequently repaired.

B. CONCLUSIONS

Considering the minor changes in Flint River water quality, much of the information contained in the 2002 Treatability Study by AB&H remains relevant today. Data from that report assumed to be consistent today include the following:

- Flint River is influenced by groundwater from a dolomitic aquifer
- Hardness varies seasonally with higher hardness and alkalinity in the winter
- Hardness, alkalinity, magnesium concentrations tend to be reduced by run-off

In development of the 2002 Treatability Study, processes were simulated which resulted in low THM levels. Therefore, information contained in that report will be used to assist with establishing a baseline jar testing procedure as discussed further in Section III.

III. TREATMENT PROCESS EVALUATION

A. EXISTING PROCESS DESCRIPTION

The existing WTP consists of an intake with screening from the Flint River, low lift pumping, ozonation, rapid mix, flocculation, settling, softening, recarbonation, filtration, storage and high service pumping. A process diagram is shown as Figure 1.

1. Intake

A 72" diameter pipe draws water from the Flint River through 2 traveling screens to the low lift pump structure. No chemicals are currently fed for Zebra mussel control or pre-oxidation as recommended by the 2002 Treatability Study. Manual removal of zebra mussels is more economical than installation of chemical feed equipment considering the short term need.

2. Ozone

There are 2 ozone generators designed to provide adequate ozone for a WTP flow of up to 36 mgd. There are 3 ozone contact basins. The ozone generators were designed to produce 900 lbs/day at 10% concentration and up to 1300 lbs/day at 6% concentration each. Prior to recent repairs, readings indicated a production rate of approximately 700 lbs/day at 4% concentration. It is possible that before the recent improvements the ozone feed might not have been optimized. In fact, it is known that less than optimal ozonation previously led to increased chlorine feed which would have contributed to THM formation.

3. Rapid Mix

East and West rapid mix chambers allow chemical feed prior to the flocculation basins. Each rapid mix chamber is equipped with a 5 hp mixer.

4. Coagulation / Flocculation

The WTP contains two equally sized flocculation basins, east and west, and each basin provides tapered or gradually slowed mixing from inlet to outlet. There are fifteen 2 hp mixers for each basin with VFDs to control mixing speed. The 2002 Treatability Study recommended feeding both coagulation and flocculation polymer aids. Neither polymer aid is being used today because turbidity and TOC removals have been sufficient to meet regulatory requirements.

5. Settling

Primary clarification takes place within 3 basins containing plate settlers. The settlers are operating as designed.

6. Softening

Again, there are two basins for softening: east and west. Each basin is 120' in diameter and contains a solids contact softening unit. Each softening basin/unit has a design capacity of 18 mgd. The east clarifier has an effluent weir imbalance that the City intends to fix when low demands allow for construction. Low lift pumping limitations, flow control to the basins, control restrictions on residuals removal, and fluctuating demands have made it difficult for WTP staff to stabilize the softening process. Softening is accomplished by feeding lime. The decision was made by the City not to feed soda ash in order to remove non-carbonate hardness because acceptable hardness levels could be achieved with lime feed only and softening is short term until Lake Huron water becomes available. Lime and soda ash softening is a possible consideration to assist with TOC removal and thus reduce THM formation.

7. Recarbonation

Recarbonation for pH adjustment is accomplished in east and west recarbonation basins between and to the north of the softening basins. Carbon dioxide storage and feed equipment is located west of the recarbonation basins.

8. Filtration

Filtration is accomplished with 12 dual media filters, equally sized and designed to filter 3.0 mgd each. Media consists of 12" of sand and 18" of anthracite. The filters have been operated intermittently over the years due to the standby nature of the WTP and until recently, chlorine injection took place downstream of the filters. It is possible some microbial growth had developed in the filters leading to increased chlorine demand. The City recently hired a contractor to upgrade the electrical controls for the filters and that work has been completed.

9. Disinfection

Disinfection is provided by ozonation and by feeding chlorine. Ozonation occurs at the front end of the WTP. Chlorine is fed prior to filtration and prior to finish water storage / high service pumping. The intermediate chlorine injection location was recently constructed under the Phase II, Segment 1 contract.

10. Clear Well & Pumping

The pump building sits adjacent to a 3 MG clear well and contains both low and high service pumps.

B. JAR TESTS / EXPERIMENTS

1. Approach

There are several well practiced methods by which DBPs can be reduced. First, the disinfectant can be changed to an alternate that has a lower tendency to form DBPs. Second, additional treatment systems such as activated carbon or air stripping (depending on the nature of the precursors) can be added to remove DBP precursors. Lastly, the existing treatment processes can be optimized to remove as much DBP precursor as possible. Of these options, optimizing existing treatment processes is the only strategy that does not require the construction of new and expensive facilities. It is anticipated that Flint will be receiving Lake Huron water in approximately two years and this water will have a completely different chemistry from the Flint River. Major process changes instituted to address THM levels using Flint River water are likely to be unnecessary for Lake Huron water and may even be inappropriate. Therefore, those options which require addition of new treatment processes are undesirable at this time. In recognition of this upcoming change in water source, efforts for this study have concentrated on improving the existing processes, rather than adding new ones. New treatment processes will only be recommended if operational changes to the existing treatment train prove ineffective.

Recent sample test results suggest that most of the DBPs are formed in the distribution system rather than within the treatment plant. Therefore, the most logical approach is to reduce the DBP formation potential (DBPFP) rather than simply lowering the levels of DBPs leaving the plant. During bench scale testing, formation potential (FP) levels were the primary indicator of success or failure of proposed process modifications.

2. Protocol

Bench scale pilot testing is intended to reflect actual plant operating and hydraulic conditions so the bench scale treatment units were sized based on various dimensionless factors to ensure the pilot treatment matched the actual system. Bench

scale ozonation was not practical due to time and cost limitations. Therefore, water samples were withdrawn from the plant ozone basin effluent. These samples were transported to the laboratory and dispensed into square testing jars. The jars were used to simulate rapid mix, three-stage flocculation, and settling. Rapid mix and flocculation conditions were matched to the plant based on "Gt" values. The "G" value is a measure of the mixing intensity and is a function of mix time, viscosity of the liquid, and mixing power applied to the water. "Gt" then, is a size scaling factor where time has been accounted for. Settling time was scaled to match the shorter settling depth of the testing jars. After settling, samples were decanted from the test jars. The decanted samples were then lime softened; softening conditions were similarly matched on the basis of "Gt". Carbon dioxide was sparged into the samples to reduce the pH. The water was then vacuum filtered through filter paper, sized to simulate the plant's dual media filters. The samples were dosed with excess chlorine and allowed to react for seven days at 25° C before testing for DBPs to determine the formation potential.

The following conditions were applied during testing to properly match small scale testing to actual plant processes.

TABLE 6 – BENCH SCALE TEST MIXING INTENSITIES

Process	G	Duration	Mix RPM
Ozonation	Plant	-	-
Rapid Mix	200	44 sec	160
Flocculation, Stage 1	50	9 min	55
Flocculation, Stage 1	25	9 min	30
Flocculation, Stage 1	12	9 min	19
Settling	N/A	10 min	-
Softening	TBD	10 min	-
Recarbonation	N/A	N/A	-

The primary variables during testing were chemical additions and chemical dosages. Specific chemicals and dosages used for initial testing conditions were selected to reflect current plant usage and the recommendations of the 2002 Treatability Study:

TABLE 7 – BENCH SCALE TEST CHEMICAL FEED RATES

Chemical	Current Usage	2002 Study	Test Values
Ozonation	4.66 mg/l	1.5 mg/l	
Ferric Chloride	7.7 mg/l Fe3+	40 mg/l Fe3+	7.7 – 80 mg/l Fe3+
Coagulant Aid Polymer	Not used	2.0 mg/l	1 – 2 mg/l
Flocculation Aid Polymer	Not used	0.05 mg/l	0 – 0.05 mg/l
Powdered Activated Carbon	Not used	N/A	20 – 100 mg/l
Lime	120 mg/l	175 mg/l	120 – 175 mg/l
Soda Ash	Not used	52 mg/l	0 – 52 mg/l
Cationic Softening Polymer	3.13 mg/l	Not used	3.13 mg/l
Anionic Softening Polymer	0.88 mg/l	Not used	0.88 mg/l
Fluoride	0.45 mg/l	1 mg/l	Not used
Carbon Dioxide	32 mg/l	37 mg/l	Fed to reach pH of 7.5 +- 0.3
Chlorine	6.3 mg/l	1 mg/l	10 mg/l

3. Considerations

The 2002 Treatability Study did not note significant formation of DBPs. This may be a function of different Flint River water chemistry at that time. However, recognizing the considerable differences in chemical usage and dosages between that study and current operations, those differences in chemical use and dosage are an obvious starting point for optimizing treatment to prevent DBP limit exceedance.

Although it is believed that optimization of current treatment can correct the DBP issue, should optimization of present treatment prove insufficient, alternate residual disinfectants (chloramines and chlorine dioxide) will be investigated as additional treatment measures.

4. LAN Test Results

Two rounds of jar testing were completed by LAN during the weeks of December 15, 2014 and January 26, 2015.Detailed test data is included in Appendix A. Testing results can be summarized as follows:

- Increased dosages of ferric chloride resulted in higher reduction of THMFP.
- The currently utilized feed rate of lime at 120 mg/l is appropriate
- Softening with soda ash in addition to lime resulted in minor additional THMFP reduction – in the range of 0% - 10%.
- The benefits of using a cationic polymer during softening at a dosage range of 0.31 - 3.13 mg/l to help reduce THM's are unclear
- The benefits of using an anionic polymer during softening at a dosage range of 0.09 – 0.88 mg/l to help reduce THM's are unclear
- Feeding PAC was ineffective in reducing THMFP within the dosage range of 20 – 100 mg/l.

5. Testing by Others

In addition to jar testing completed by LAN, the chemical supplier who provides ferric chloride for the City, PVS Technologies, ran tests using their recommended flocculant polymer aid. Plus, Veolia Water completed jars testing of their own the week of February 16th to analyze other process details and current WTP parameters. Experiments completed by PVS Technologies showed very little TOC removal beyond that obtained with straight ferric chloride feed.

6. Conclusions

Increasing the dose rate of ferric chloride is an operational change that can easily be implemented without the need for any additional equipment. Test results show that *over 40% THMFP removal can be obtained with a dosage of 60 mg/l Fe3+ or higher.* Increased dosing of ferric chloride would be most ideal coupled with regular raw water TOC monitoring so that TOC levels would dictate the appropriate ferric chloride feed rate.

Softening with soda ash in addition to lime is another option the City should consider if increased ferric chloride doses are not adequate to maintain THM levels under the MCL, particularly during warmer months. Again, monitoring of TOC in the raw water could provide useful information of when lime/soda ash softening is necessary.

IV. DISTRIBUTION SYSTEM EVALUATION

EPA guidance for the distribution evaluation portion of an OER is focused on identification and isolation of a specific portion of the distribution system that led to the exceedance. The circumstances of Flint's apparent pending TTHM exeedances are unusual in that a new supply has been implemented which clearly corresponds to the high TTHM sample results. Although the new source is one element in increased TTHM levels, value remains in evaluating the distribution system since water age is also a critical factor. Additionally, there may be distribution improvements that can be made to help alleviate the problem.

A. INFRASTRUCTURE

1. Piping

According to the most recent MDEQ Sanitary Survey, the distribution system is estimated to contain 70% cast iron, 20% ductile iron, 2% concrete and 8% steel water mains. Unlined cast iron pipe can become pitted, allowing colonization sites for microorganisms leading to chlorine demand. Additionally, much of the piping in the system is aged and in poor condition. Increased chlorine demand could be resulting from biofilm in older pipes and from main breaks/repairs. The extent of contribution is not known but any water main replacement project will decrease chlorine demand somewhat if constructed properly. Unfortunately, water main breaks may also assist with decreasing water age by providing unintentional flushing. All things considered, it is impossible to quantify the impact existing piping has on THM formation.

The City utilizes City Point software and GPS equipment to document main breaks and prioritize replacements. However, main break information is more pertinent to rusty water complaints and has little relevance to THM levels. Areas that have been targeted for main replacements include the transmission main from the WTP west to Dupont and south to the West Side reservoir, Fenton Road, Atherton Road, Dort Highway, Averil Street, and Boulevard Drive.

2. Storage

There are 4 finish water storage tanks and 1 raw water tank as tabulated below:

TABLE 8 – STORAGE TANKS

Name	Type	Water	Volume (MG)	Operating		Absolute	
				LWL	HWL	Bottom	OF
Dort Reservoir	Ground	Raw	20	-	-	730	750
WTP Tank	Elevated	Finished	2	883.0	896.0	863.0	898.0
WTP Clear Well – PS #4	Ground	Finished	3	11′	15′	708.5	726.0
Cedar Street Reservoir	Ground	Finished	20	-	11′	737.2	757.2
Westside Reservoir	Ground	Finished	12	-	12′	761.8	779.0

The MDEQ typically recommends providing a minimum finish water storage volume of 1/3 the maximum daily demand (MDD). According to the 2013 MDEQ Sanitary Survey, the 5 and 10 year MDDs are 21.57 mgd and 30.05 mgd respectively. A common rule of thumb for clear well storage volume at a WTP is 10% of the design flow rate. Another general guideline for reliability is to provide total storage to allow for 2 X the average daily demand plus fire flow demand. For this analysis, fire flow is assumed to be 2,500 gpm for either one industrial fire (2,500 gpm) or a combination of one residential (1,000 gpm) and one commercial (1,500 gpm) fire at a 4 hour duration which results in a total volume of 600,000 gallons. These go-by

approximations are summarized below with the applicable flow rates and are compared to the existing storage volumes currently being utilized.

Common Practice	Flow Rate	Recommended Volume by ROT	Volume In Use
Clear well 10% of Design Flow	18 MGD	1.8 MG	3.0 MG
Finish Storage = 1/3 MDD	30.05 MGD	10.0 MG	37 MG
Total Storage = 2 * ADD + FFD	13.87 MGD	28.3 MG	57 MG

Based on the values above, it appears the storage volume used in the Flint system could be decreased without negatively effecting reliability. The appropriate volumes of individual tanks will be further evaluated using the water system model and discussed in Section V (C).

All reservoirs have baffling to minimize stagnant water. Also, all tanks have been maintained and are in reasonable condition. The Westside reservoir has an exposed roof that is in need of rehabilitation, but its current condition has no influence on THM formation.

3. Pump Stations
All pump stations are in good condition but pumps are generally oversized. As an independent consideration, oversized pumps are not a contributing factor to high THM levels. Control of pumps and pressure zones are discussed in detail below.

B. OPERATIONS AND MAINTENANCE

1. Pump Station & Storage Operations
Pump stations and storage tank levels are controlled as shown in Table 9.

TABLE 9 – PUMP STATION CONTROLS

PS Name	Control Point	On Point	Off Point
PS No. 4 Raw	Operator	-	-
PS No. 4 Finish	Match plant flow	-	-
Westside	System pressure (elevated tank)	22.5'	33'
Cedar Street	System pressure (elevated tank)	22.5'	33'
Torrey Road	Distr. – Brown/Bradley	< 45 psi	> 45 psi

Cedar Street and Westside pump stations are operated as needed and they are alternated. Typically, Cedar Street is run in the morning and Westside is run in the evening and reservoirs for each are filled during low demand periods at night.

Westside, Cedar Street and Torrey Road pump stations are used to boost system pressure when high demands warrant it, but there are not well defined pressure zones within the system. Therefore, the possibility exists that water is being recirculated allowing for increased water age.

2. Booster Disinfection Practices
Booster disinfection is provided at the Cedar Street and Westside pump stations. When sustained residuals are not provided by chlorine feed at the WTP, sodium hypochlorite is applied at the reservoirs while being filled.

3. Changes in System Demands

Water demands in the City have been declining since the 1960's as the population has dropped. As a result, many of the water system components are oversized including storage tanks and water mains which both increase the time for water to reach the user.

From a short term perspective, Flint demands tend to increase in summer as is ordinarily expected but also in the winter due to water main breaks. The MDD for Flint often occurs in winter. Regarding THM formation, with lower temperatures and higher flows in the winter, THM levels taken at the distribution sample points are expected to be lower than at other times of the year.

C. WATER SYSTEM HYDRAULIC MODELING

As part of this report, the City provided a hydraulic water model, originally developed by Potter Consulting, for LAN to update. Thus far, LAN has modified the model to be capable of extended period simulations, modified controls to reflect current operations, revised the piping to include known broken valve locations, and developed preliminary water age results throughout the entire system. Water age shown in the updated model corresponds well to TTHM levels at 6 of the 8 sampling sites. However, LAN has also identified several deficiencies within the model that require further adjustments to allow for usable and reliable results. Those model deficiencies include outdated demands, improperly located appurtenances, and incorrect flow patterns. Preliminary water age results are presented in Table 10. Revised results will be provided when the hydraulic model has been fully updated.

TABLE 10 – PRELIMINARY WATER AGE FROM WATER MODEL

Sample Point	Location	Address	Water Age (Hrs)	Aug 2014 THM (ug/l)
1	McDonalds	3719 Davison	23	145
2	BP Gas Station	822 S. Dort Hwy	18	112
3	Liquor Palace	3302 S. Dort Hwy	15	127
4	Taco Bell	3606 Corunna	128	181
5	Univ. Market	2501 Flushing	178	196
6	Salem Housing	3216 MLK	50	112
7	Rite Aid	5018 Clio	78	144
8	N. Flint Auto	6204 N. Saginaw	71	118

It is anticipated that topics shown below in italicized font will be detailed after the model is updated in March 2015.

1. Simulation of Existing System

Match existing conditions. Chlorine and THM data may be used to verify model results. We have chlorine feed data at plant and residuals at 10 locations in each MOR, May 2014 – January 2015.

2. Identification of Water System Deficiencies

Specific issues to look at:

Worst case at minimum daily demands
Water age in entire system
Recirculating water through pump stations
Use of storage tanks – volumes in particular
Indications of broken valves
Effectiveness of booster disinfection

V. RECOMMENDATIONS TO MINIMIZE FUTURE OEL EXCEEDANCES

A. SOURCE

The City of Flint has already committed to the change from the Flint River as the water source to Lake Huron under the KWA system, planned for late 2016. The risk of future TTHM limit violations will decline substantially with the use of water from Lake Huron due to much lower DBP precursors. It is important to recognize that the Flint River will become strictly an emergency supply when the KWA supply becomes available and any investments toward the Flint River should be contemplated accordingly. Recommendations discussed below in this section apply to the Flint River as the source.

Reverting to supply from the DWSD until the KWA supply is available as an option. However, based on information provided by the City of Flint, the annual cost to receive water from the DWSD would be at least $16,000,000/year or $1,333,000/month. Therefore, utilizing the DWSD for interim supply is cost prohibitive under the terms defined by the DWSD.

1. Watershed Management

A volunteer group entitled the Watershed Coalition performs various tasks related to managing the Flint River watershed such as spring cleanups and annual benthic studies to evaluate the river 'health'. No additional action is recommended at this time.

2. Monitoring

The City documents daily raw water flow, pH, alkalinity, carbonate and non-carbonate hardness, chloride, temperature, turbidity and coliform count as part of standard preparation of Monthly Operating Reports (MOR). It is recommended to add raw water TOC and plant tap THM values to daily documented measurements which would provide staff the data needed to establish correlations to predict distribution system THM formation.

3. Intake Operations

The 2002 Treatability Study recommended pre-oxidation in the form of sodium permanganate as a feed at the intake. It is possible the addition of a pre-oxidant such as hydrogen peroxide or some type of permanganate could enhance the ozone process. Veolia evaluated permanganate demand during jar testing the week of February 16th, 2014 and further recommendations will be incorporated when results become available.

4. Seasonal Strategies

Past data indicates the Flint River is influenced by groundwater and in particular, dolomitic spring water. The result is hard water with high concentrations of magnesium and sulfate. Also, hardness and alkalinity are higher during the winter. Upon initiation of supply from the Flint River, the City made the decision to soften with just lime to focus on removal of carbonate hardness. One potential modification that could assist with TOC removal and thus decrease THMFP would be lime and soda ash softening. A temporary caustic soda feed system is recommended to be put in place in case the need for optimized softening arises.

5. Upstream Contamination Issues

Upstream contamination issues are extremely difficult to prevent and even if detected are difficult to locate. Evaluation of raw water data collected for MORs is the easiest

manner in which to detect upstream contamination issues because the data is already collected for treatment purposes. In fact, high total Coliform readings signaled a potential issue recently that the City identified and removed.

An upstream monitoring and warning system could be established to attempt to detect water quality issues or spill event type contamination early enough to adjust treatment procedures or cease intake prior to the contamination reaching the WTP. However, given the imminent conversion to the KWA supply, the period of full time use would likely be far too short to achieve payback on the capital expenditures.

B. TREATMENT PROCESS

1. Operational Recommendations

- Increase ferric chloride dosage: Previous testing in the 2002 Treatability Study, jar testing completed by LAN, and a review of 2014 ferric chloride dosages compared to THM levels leaving the WTP support that increasing the ferric chloride dosage would help reduce THM formation.
- Increased monitoring: Currently, the MDEQ does not require daily reporting of raw water TOC or finished water TTHM levels. However, daily tracking of such levels would allow the City to develop a correlation between the two, thus providing a predictive tool to help manage TTHM levels.
- Coagulation and flocculation polymer aids: The 2002 Treatability Study suggested the use of coagulation and flocculation polymer aids. These polymer aids were shown in the 2002 Treatability Study to increase TOC removal and thereby reduce THMFP. Further evaluation will be completed during jar testing.
- Discontinue softening bypass: The City was previously bypassing a portion of flow around the softening basins because hardness levels did not warrant softening of the full stream. However, this practice was discontinued because it was believed the bypass stream was contributing to chlorine demand and preliminary data has supported that belief. Chlorine demand dropped 0.5 – 1.0 mg/l following elimination of the bypass stream in early November 2014.
- Soften with lime and soda ash: Research has shown that enhanced softening with both lime and soda ash may provide additional TOC removal. The efficacy of this option will be evaluated during jar testing.
- Disinfection of filter beds: In case there has been microbial growth it is recommended the filters be 'shock' treated with chlorine and rinsed. A chlorine injection point was added upstream of the filters during the first segment of Phase II so future growth in the filters should not be an issue.
- Optimization of all existing treatment processes: Depending on bench scale testing conditions and results, slight modifications to all treatment processes might in order to replicate lower DPBFP.
- Discontinue or adjust softening anionic polymer feed: Some anionic polymers have been found to increase TOC. Veolia evaluated the anionic polymer currently being fed during their jar testing and depending on the results, when available, the softening anionic polymer feed should be adjusted accordingly.

2. Infrastructure Change Recommendations

- Fix and/or replace faulty ozone equipment: Since the ozone equipment was installed it has not been used extensively so the hope is that major components remain in good condition and the system can be easily modified to restore proper functionality. The City has scheduled the equipment manufacturer to field inspect the system on December 15, 2014.
- Replace filter media with GAC media: GAC media could help reduce THM levels by reducing both TOC and chlorine demand. For this consideration, the recommended approach would be to first complete small scale testing to verify efficacy. Upon positive results, the next step would be replacement of media in a fraction of the filters following by sampling to measure water quality. Those results would determine the need to replace media in additional filters.
- Change disinfectant to chloramine or chlorine dioxide: If other options prove to be ineffective, conversion to another disinfectant should be fully evaluated. Various characteristics of chloramination indicate an advantage over chlorine dioxide, but a full analysis would provide clarity as to which would be preferred.
- Install pre-oxidant chemical feed: Hydrogen peroxide or a form of permanganate as a pre-oxidant can enhance the activity of the ozone. Chemical feed could be installed at the intake structure or low service pump station, depending on the reaction time required. Use of a pre-oxidant at the intake might also provide the additional benefit of disinfection credit for ozonation with the MDEQ if an ozone residual can be obtained at the ozone process effluent as a result.
- Repair upstream sewer leak: a sewer leak upstream of the WTP intake was discovered and has already been repaired by the City.

C. DISTRIBUTION SYSTEM

Potential distribution issues related to water quality issues discussed in Section IV included old cast iron pipe, oversized infrastructure, and remote storage/pump station locations and operations that might be less than ideal. Recommendations to address those issues are offered in this section.

1. Manage Water Age

a) Storage Tanks

Considering the excess storage capacity discussed in Section IV, in the short term it is recommended that operational changes be implemented immediately to reduce the overall volume of water stored to decrease water age. Immediate operational recommendations include lowering high water levels of reservoirs other than the elevated tank, to reduce the total system wide usable storage volume to 30-36 MG.

In the long term, LAN recommends development of the most ideal options for water model evaluation. Excess storage volume and tank locations within the water system afford Flint numerous options to reduce the amount of storage volume utilized. As a starting point, two recommendations are presented below.

Option 1
- Take West Side reservoir and pump station out of service
- Cut storage volume used in half at Cedar Street reservoir
- Reduce the utilized storage volume of the WTP clearwell from 3 MG to 2 MG
- Adjusted system wide storage volume would be 34 MG

Option 2
- Take Cedar Street reservoir and pump station out of service
- Reduce the utilized storage volume of the WTP clearwell from 3 MG to 2 MG
- Adjusted system wide storage volume would be 36 MG

b) Residence Time in Pipes

Completely redesigning and replacing the water system to match today's demands is not feasible financially and would be a waste of infrastructure with remaining useful life. Going forward, it is recommended that any future main replacement projects be evaluated for possible downsizing. When the water model is fully updated, it will provide a valuable tool in determining which mains can be downsized and to what extent. Replacement of broken valves and valve exercising are also recommended, which are programs that have already been implemented into Flint's regular operations.

Operationally, hydrant flushing is recommended as needed to minimize water age in low flow areas. Again, the updated water model should be used to locate high water age areas and optimal flushing points.

2. Reduce Disinfectant Demand

Recommendations to reduce disinfectant demand are similar to those described above to reduce water age. Replacement of old cast iron pipes would lead to a reduction of disinfectant demand on the distribution side, but realistically can only be accomplished over a prolonged period of time. In the meantime, hydrant flushing is the most viable means of reducing disinfectant demand in piping. From a storage standpoint, all reservoirs and tanks should be regularly inspected and maintained to prevent entrance of any outside contamination that would contribute to disinfectant demand.

3. Water Modeling of Recommendations [yet to be completed]

Determine best flushing locations to reduce water age
Evaluate changes in storage tank operations to reduce water age
Valves to close/add to improve pressure zones, reduce recirculation
Optimization of pump station use – smaller pumps? Shut down?
Evaluate booster disinfection

D. BOOSTER DISINFECTION

Decreasing chlorine feed at the WTP and adding booster disinfection in the distribution system is an alternative intended to reduce the reaction time at higher concentrations of chlorine to reduce DPB formation. Extensive looping and branching within the existing system complicate how to best implement and utilize booster disinfection. Water system modeling is recommended to gage the effectiveness of existing feed point locations and dosages. Further discussion and details will be provided when the distribution evaluation results are available.

E. CATEGORIZATION OF ACTIONS

Considering that the Flint River is being used as the water source only until the KWA supply is available (expected late 2016), options to address high THM formation that require new construction or extensive time to implement are not preferred. On the other hand, the City understands THM sample results to date dictate that some action is necessary. Two categories have been developed to assist the City in prioritizing actions to take. Stage 1 consists of actions that can be completed relatively quickly without major construction and Stage 2 actions are either long term actions or solutions requiring major construction. Stage 1 actions are to be completed first followed by evaluation of the results prior to consideration of Stage 2 actions. Grouping of actions are shown in the table below.

TABLE 11 – ACTION PLAN

	Action	Purpose
Stage 1	Hire water consultant to complete 'water audit'	Third party review of actions and operations to make sure no options are being missed
	Increased water quality monitoring – obtain THM and TOC analyzers	Provide information needed to adjust WTP operations to match changing raw water quality
	Troubleshoot ozone feed system	Reduce chlorine feed and increase TOC removal
	Bench scale jar testing	Optimize treatment process and evaluate possible modifications
	Discontinue softening bypass	Reduce chlorine demand
	Disinfect filters	Reduce chlorine demand
	Increased water main flushing	Reduce water age / stagnant water
	Water system modeling evaluation	Determine areas with high water age and reasons
	Implement coag. & floc. polymer aids, if appropriate	Increase TOC removal
	Modify booster disinfection feeds, if appropriate	Decrease water age
Stage 2	Repair ozone system	Reduce chlorine feed and increase TOC removal
	Continue increased water main flushing	Reduce water age / stagnant water
	Convert to lime and soda ash softening	Increase TOC removal
	Continue valve replacements based on water model	Reduce water age / stagnant water
	Replace filter media with GAC	Reduce TOC and chlorine demand
	Change disinfectant to chlorine dioxide	Reduce THMFP
	Install pre-oxidant feed at intake	Optimize ozone disinfection, reduce chlorine
	Place priority on replacing cast iron water mains	Reduce chlorine demand

Samples were taken the week of February 16th for the 4th round of quarterly testing. The City has implemented many of the Stage 1 actions and THM test results have significantly improved (decreased) each time samples have been taken since August 2014. In addition to the regular compliance monitoring, the City performed a round of sampling on January 27, 2015. All sampling results are shown on Chart 1.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system was recently found to be in violation of a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at **ANY** of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 ug/L. The location reporting the highest TTHM level was 99 ug/L; thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, you may be at increased risk and should seek advice about drinking water from your health care provider.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015.

For more information, please contact Mr. Brent Wright or Mike Glasgow at 810-787-6537 or the Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F1 53 WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules. Reminder to water supplier: This notice/ certification must be sent to the DEQ.

Michael Glasgow ASSISTANT SUPERVISOR 1/2/15

Tom,

This is the email that I sent to Dan following our meeting in Flint on October 29. As I said, I have yet to hear anything back. I will reach out to him as follow-up to the attached.

Thanks for your help.

Good Morning Director Wyant:

I wanted to take just a moment to thank you and your team for travelling to Flint Wednesday to meet with me, the Mayor, and the Utilities Department staff.

Everyone on our end appreciated the opportunity to meet directly with you and your key staff at the DEQ. We all felt it was a very productive discussion of the many difficult issues facing the City of Flint not only during this transition, but as its own long-term, sustainable water supply and distribution system, leading towards full implementation of the KWA project. As you know Flint is slated to convert to the KWA water source well within the next 18 month timeline. Until that happens however, I think you would agree that we have an excellent opportunity here to send a good, positive message about how the City is managing its water services, and working very closely with your office in the process.

As we discussed, an initial media hit from your office fairly soon would also help us build public confidence through stronger communication on how we are responding to the challenges we encounter, your department's support of our efforts to resolve them, and the resultant potability of the current water source. If there are other next steps you need from us regarding such a media release, please don't hesitate to contact me.

We look forward to our continued partnership in addressing these and other matters critical to environmental quality in the City of Flint and the State of Michigan!

Sincerely,

Darnell Earley, ICMA-CM, MPA

City of Flint Wednesday 9:00am Phone Conference Agenda

January 7, 2015 1-888-[redacted] Access code [redacted]

		Last Report	Status
1) Public Safety Update – FPD, MSP, (FFD, if needed)			
	a) FPD	* The final draft reports for the evaluation of both the Police and the Fire Departments have been received. The study will be presented to City Council at the Public Safety Committee on January 22, 2015.	UPDATE
		* SRMS MOA has been signed, project charter development is underway. Last item for which Flint needed to provide a sign-off has been completed.	UPDATE
	b) FFD	City applied for $999,103 grant from the FEMA Assistance to Firefighters Grant Program to purchase a new aerial truck.	No Action Needed
	c) Other update from Chief Tolbert and MSP		
2) Governor's Office Update – R. Baird, H. Hollins, B. Clement			
	a) District Court Consolidation	County Commissioners voted on 12/10/14 to approve "pursuant to the terms and conditions set forth in a MOU to be approved between City of Flint and Gen. Cty."	UPDATE
	b) Local Income Tax Initiative	No action was taken during the lame duck session. Additional source of funds still needed for City.	UPDATE
	c) Other		

		Last Report	Status
3) Finance and Administrative Update			
	a) Firefighters Contract	City Council sent an alternative contract to the Emergency Loan Board on December 17, 2014. Prompt action necessary on IAFF contract - this is delaying the valuation of the pension system by MERS. Decision needed by end of January.	UPDATE
	b) Financial Ordinances	City Council approved first reading of Fund Balance Policy, OPEB, BSF and strategic planning processes ordinances. Purchasing Ordinance still to be moved.	UPDATE
	c) City Administrator Hired	Natasha Henderson was announced as new Flint City Administrator on December 22, 2014. Start date: Feb 23, 2015	NEW
	d) Management Vacancies	A search firm will be contracted to identify Treasurer, HR Director and Finance Director.	NEW
	e) City Clerk Supervision	Can EM establish supervisory oversight of the City Clerk; change priorities, activities of Clerk?	NEW
4) City Council Update			
	a) Vacant Council Seats	Three candiates have been sent to City Council for consideration for Ward 3 and Ward 6. Special meeting held Jan 5, 2015. Kerry Nelson and Herb Winfrey selected.	NEW
5) Water Issues			
	a) MDEQ Violation Notice	Violation notice received 12/16/14 maximum contaminant level for TTHM exceeded. Public notice required. Notices sent out Jan 5, 2015. Most recent readings in compliance.	NEW

		Last Report	Status
6) 9-1-1 Reconsolidation Plan			
	a) Tower Transfer to Consortium	Tower built with C-GAP funds. Procedure necessary to transfer asset to Consortium? Need to have assessment of value?	NEW
7) Transition Activities			
	a) Planning Workshop	Off-site workshop for Council, Dept. Heads, and new CA scheduled for Jan. 10, 2015. Transition activities and budget prep. Cancelled temporarily.	NEW
	b) Council Meeting Schedule	Council President has asked to return to regular Council meeting schedule and committee meetings with new dates and fewer restrictions.	NEW
	c) Council/Mayor Compensation	What happens to salary for council and mayor when the EM leaves? As budgeted or back to old levels?	NEW
	d) Update of Transition Management Plan	See attached.	NEW
8) Other Items			
	MDNR and Purchase of CSX rail area	Assistance needed to change allowable purchase price of Grand Traverse Greenway trail from CSX.	NEW

For Immediate Release

Emergency Manager Statement on Residents' Flint River Water Concerns

Flint, Michigan – January 9, 2015 – The City of Flint's Emergency Manager Darnell Earley today released a statement regarding residents' Flint River water safety concerns following the distribution of the total trihalomethanes violation letter:

"Suggestions have been made that the City of Flint should return to using water purchased through the Detroit Water and Sewerage Department (DWSD). For many reasons, financial and otherwise, the City of Flint can ill-afford to switch courses at this point. Thus, we will continue to follow the guidelines and directives of the Michigan DEQ in the implementation of our water quality plan and operational report, until the KWA water source is available. The estimated cost to go back to the water provided by the DWSD is approximately $1 million per month and the City expects to be using the Karegnondi Water Authority (KWA) Lake Huron water within the next eighteen months. It is not financially prudent to spend $18 million to purchase water that meets the same DEQ standards as the water now available from the Flint River.

-CONTINUE-

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
DARNELL EARLEY
ICMA-CM, MPA

However, because of the concerns raised by the public, as well as the city council and our state legislative delegation, we want to make sure that the Flint water treatment operation is doing everything it can to address the challenges outlined in the recent violation notice issued by the State Department of Environmental Quality (DEQ). We will be seeking river water management consultants with extensive treatment expertise to work with the Flint Utilities Department staff to assure that best practices are being used for treatment and distribution of the Flint River water. This is a much better use of the City's limited funds than trying to pursue a course back to DWSD."

RE: **Water Questions**

DATE: January 13, 2015

Prelude

The decision to switch to the Karegnondi Water Authority as the City's permanent water source was made following extensive research and in-depth engineering studies. After entering into a contract with KWA and the subsequent termination of the existing water service contract by the Detroit Water and Sewerage Department, the same diligence was given in determining what source water to use while waiting for the community supported KWA water to arrive. The City concluded from this work that the Flint River presented a safe and financially responsible alternative water source. The decision to use the Flint River as an intermediate water source was approved by state regulatory officials in 2014 whereby the City was permitted by the Michigan Department of Environmental Quality to proceed with treatment of water from the Flint River.

The following questions were presented by concerned citizens, and the City's responses follow. This document will be put on the City's website for public viewing within the next several days.

1. What was the process by which the decision was made to switch from Detroit water to Flint River water? Who was responsible for what decisions?

On March 25th, 2013, after evaluating **cost comparisons** for a permanent water source, the Flint City Council, with support from the Mayor, voted 7 – 1 approving a resolution to purchase water from the Karegnondi Water Authority (KWA). On March 29th, resolution 2013EM041 was signed, authorizing the City of Flint to enter into a contract with the KWA.

On April 16th, 2013, then Emergency Manager Ed Kurtz, signed the contract effectively purchasing 18 MGD of capacity from the KWA.

On April 17th, 2013 Detroit Water and Sewerage Department (DWSD) sent a letter terminating the existing water service contract between the City of Flint and Detroit. With the termination set to take effect 12 months later on April 17th, 2014, a gap was created between the end of the DWSD contract and the start of the KWA.

On June 29th, 2013, following many preliminary discussions on how the City would fill the interim gap, a formal, all day meeting was held at the Flint Water Plant with all interested parties including City of Flint Officials (COF), representatives from the Genesee County Drain Commissioners Office (GCDC), the Michigan Department of Environmental Quality (DEQ), and the design engineers from the previous plant upgrade Lockwood, Andrews, and Newnam (LAN).

The purpose and agenda of the meeting was to determine the feasibility of the following items:

1. Using the Flint River as a Water Source
2. The ability to perform the necessary upgrades to the Treatment Plant
3. The ability to perform quality control
4. The ability for Flint to provide water to Genesee County
5. The ability to meet an April/May 2014 timeline
6. Development of a cost analysis

The conversation was guided with focus on the engineering, regulatory, and quality aspects of each item listed. The resulting determinations were made.

1. Yes, the Flint River would be more difficult to treat but is viable as a source.
2. Yes, it was possible to engineer and construct the upgrades needed for the treatment process.
3. Yes, with support from LAN engineering which works with several water systems around the state, quality control could be addressed.
4. No, the Flint treatment plant would not have the capacity needed to treat and distribute sufficient water to meet the documented needs of Flint and Genesee County.
5. Possible, it was determined that many obstacles needed to be overcome but completion by the April/May 2014 target was reachable.
6. Next steps from the meeting were for LAN to present the City with a proposal that would include engineering, procurement, and construction needs for the project along with cost estimates.

As a result of extensive evaluation, discussions with the professional engineers, and consulting the state regulators, the Department of Public Works along with the Finance Department recommended utilizing the Flint River as a temporary water source while waiting for the KWA to come online. The plan to accomplish this was accompanied with a **construction timeline**, a needs analysis for resources, and an FY 14 spending plan to complete the project.

2. Was it known prior to the switch that there would be problems managing total coliform and fecal coliform bacteria levels in the water?

It was understood that the Flint River would be subject to temperature variations, rain events, and have higher organic carbon than Lake Huron water and would be more difficult to treat. These facts were balanced against a licensed staff, LAN engineering's extensive experience in this field, advanced equipment that Flint has for treatment, and support from the DEQ.

3. What were the projected costs and benefits of the switch, and what have been the actual costs and benefits?

The engineered costs for upgrading the Flint Plant to treat KWA water from Lake Huron were projected to be ~$9,000,000. These upgrades need to be in place prior to KWA water reaching Flint and are coupled with an additional ~$3,500,000 in annual operational expenses for workforce additions, electricity costs, and process equipment for a total of ~$12,500,000

The final year that the City of Flint purchased water from DWSD, the cost was $12,400,000 and that cost was projected to rise to ~$14,400,000 in 2014 and increase to ~$16,000,000 in 2015.

The financial benefit for switching to the river was the opportunity to divert that revenue towards capitalizing the upgrade expenditures needed to run the plant and the development of a capital improvement program for the aged infrastructure without a significant increase to the water bill. This aspect was figured into the cost analysis at the time of the recommendation.

Based on the current DWSD rate structure, it appears that the actual costs to purchase water this year would have been higher than projected, The fixed cost would have been ~$5,100,000 and the additional commodity or water costs would have resulted in another ~$11,000,000 given the City's current water usage. This would result in an estimated ~$16,000,000 in this year alone.

The upgrade expenditures stayed close to the engineered projections The improvements at the water plant cost ~$7,000,000, the remediation and development of Bray Rd for lime disposal cost ~$1,700,000 and the increased operational costs so far this year are below the estimates and on target to finish the year at ~$3,000,000. These changes come to a total of ~$11,700,000 of necessary expenditures in the first year.

In addition to the ability to capitalize the upgrades, switching to the Flint River has allowed us to develop a Capital Improvement Plan for the Utility Department that will begin replacing pipe underground this spring and will account for overdue maintenance concerns such as valve replacements, and pipe lining extending the useful life of the system and allowing us to deliver better quality water.

It would have required close to a 30% raise in the water and sewer bill to accomplish this without using the Flint River as a source.

4. What were the causes of increased levels of trihalomethanes? Have those causes been sufficiently addressed? If not, what needs to be done to prevent this from occurring again in the future?

Just as low levels of chlorine can produce coliforms, high levels of chlorine can result in Disinfectant Byproducts (DBP) generating increased levels of trihalomethanes (TTHM). The DEQ requires this testing to occur once every three months at each of the testing sites and looks at an average over four quarters (one year) to determine the level to compare against the maximum contaminant level (MCL).

Research by the Science Advisory Board, the National Academy of Sciences, and the USEPA's Carcinogen Assessment Group predicts **risk estimates** associated with high levels of TTHM at an incremental risk of 3 to 4 people out of 10,000 that consume 2 liters of water over the MCL daily for 70 years.

The required remedy for this violation is to present the DEQ with an **Operational Evaluation Report** that assesses what caused the violation and what the proposed remedy is. The City generated a report to the DEQ in November 2014, which assesses each area of the Flint water system including water source, treatment process, and distribution system. The evaluation was complete with short and long term recommendations to optimize each area and the belief that the items listed would correct the violation and give Flint an increased ability to manage the system. Continued repairs on valves and colder temperatures have created a more consistent chemical footprint, and we have been producing a more consistent water quality.

5. What were the causes of increased levels of total coliform and fecal coliform bacteria levels? Have those causes been sufficiently addressed? If not, what needs to be done to prevent this from occurring in the future?

What we discovered is that as water travels through the 600 miles of the City's distribution mains it will, at times, reside in the system for up to 3 or 4 weeks. Water purchased from DWSD is drawn from Lake Huron, chlorinated, and then travels over 80 miles to reach the City. By the time the water reaches Flint it is stable and capable of withstanding this type of residency time within the system. Water drawn from the Flint River, specifically in summer months when the temperature is fluctuating, is more susceptible to being impacted by variables such as high residency times and increased chemical reaction.

The DEQ requires that a minimum of 100 tests be performed monthly for chlorine residuals at various locations throughout the system. When residual levels are too low, it creates an environment in which bacteria such as fecal coliform can grow. After switching sources, we encountered testing sites in June, 2014 that were consistently returning low residual levels. Several of these sites became areas that total coliform was eventually detected and ultimately boil water notices issued.

Low residual levels can sometimes trigger a positive test result for total coliform which is an indicator of a poor water environment but does not generally require a boil water notice. The normal course of action in these situations is to flush hydrants and introduce fresh water into the defined area. In certain areas this was successful and in other areas it was not. In a second course of action, the EPA also allows for water systems to increase the residual disinfectant, including chlorine, to a level and for a time necessary to protect public health. This information can be found in the EPA manual **(40 CFR 141.65 & 141.130(d))**. In contending with the low residual levels which represent a more immediate health concern along with the potential for tier 1 violations and boil water notices, we increased the chlorination treatment at times in order to combat the low residuals. This was also was an unsuccessful remedy and only after we located and replaced valves that were broken in the closed position on major transmission lines in these areas did the residual levels return to normal and have remained that way since.

There is still one test site, in the 2500 block of Flushing Rd. where we continue to experience low residual levels and we are actively pursuing efforts to locate more expected valve failures. The development of a hydraulic model of the system and the ability to use unidirectional flushing are tools that will assist us in mitigating areas where low residuals surface. Both of these are in progress of being developed by the engineering firm LAN and Potter Consulting who was also the author of our Water Reliability Study.

6. What are the public reporting requirements for these sorts of problems, and has the City met those requirements? What can be done to communicate in a more timely manner useful information about a public health threat such as the presence of cancer-causing chemicals in our drinking water?

The EPA 2010 **"Revised Public Notification Handbook"** has a specific breakdown of the elements required in public notifications and includes usable templates. The EPA has three different tiers associated with community water systems (CWS), each with specific timeframes and requirements that trigger upon issuance of the violation.

- Tier 1. CWS must provide public notification within 24 hours of a violation and continue this as directed by the primary agency.
- Tier 2. CWS must provide public notification within 30 days of a violation and continue this every three months until the violation is resolved
- Tier 3. CWS must provide public notification within one year and the EPA recommends repeat occurrences be provided in an annual notice

The **current EPA violation** is classified as a tier 2 violation and was issued December 16th, 2014.

Moving forward, the City of Flint is striving to increase communication with the public in a variety of ways.

- The city's new website will have current news and information updated on a regular basis.
- Increased data collection will be transitioned into real time ability to communicate with the residents through the Public Works area of the City's new website.
- Timely reporting of current test results on the new City website.

The establishment of these tools is in progress and expected to be implemented in the near future along with evaluating other avenues of communication.

7. **Is there any reason to think that these or similar problems will continue even after the shift is made to water from Lake Huron?**

The water coming from Lake Huron via KWA will be more consistent in temperature, have lower organic carbon, and will be less susceptible to variations but will have its own chemical footprint. The construction upgrades to the Flint Treatment Plant give us the ability to draw water from either source and should provide Flint the opportunity for testing and thereby streamlining the treatment process to match the Lake Huron chemical footprint before fully introducing it into the distribution system.

In addition to new source water, following the recommendations contained in the Operational Evaluation Report and the City's **Water Reliability Study** is the roadmap to being able to provide quality water.

Continuing to identify integrity issues and making preemptive repairs within our antiquated infrastructure are needed to maintain and provide a healthy system. Leak detection which is scheduled for the spring, hydraulic system modeling which includes unidirectional flushing is in progress now and will give us the information and tools to accomplish these goals.

8. **Who is responsible for making sure we don't have these sorts of problems, and did that person or those people fail to meet their responsibilities?**

The Utility Department is a Division underneath the Department of Public Works. The Public Works Director along with the Utilities Administrator will continue to work hand in hand with professional engineers, consultants, and the state regulatory agency DEQ in order to manage increased public communication and address any issues that arise going forward.

The DEQ requires that public water systems with population over 20,000 must have an F-1 state licensed operator in charge that oversees the operation of the treatment process. This license is the highest classification in the state that specializes in "complete treatment" The City of Flint has such a person on staff at the water plant and that person's responsibility is to determine the correct levels of chemical treatment, monitor the system, submit official test results to the state regulatory agency, and make necessary adjustments when contaminant levels are breached. All of these steps were followed and acknowledged by the DEQ.

The following is the list of supporting documents that will be available on the City's website for public viewing.

Mayor, City of Flint

Gerald Ambrose
Emergency Manager

EM SUBMISSION NO.: 2013EM041

PRESENTED: 3-28-13

ADOPTED: 3-29-13

BY THE EMERGENCY MANAGER:

RESOLUTION TO PURCHASE CAPACITY FROM KAREGNONDI WATER AUTHORITY

The Karegnondi Water Authority (KWA) is a governmental consortium of cities and counties in southeastern Michigan that was created to build a water pipeline that will provide water from Lake Huron to interested communities in Sanilac, Lapeer, and Genesee counties. The incorporating bodies that created the KWA are Sanilac County, Lapeer County, Genesee County, the City of Flint, and the City of Lapeer.

The City of Flint is currently in a year to year contract with the City of Detroit for the purchase of water. A study was conducted that projected that staying with Detroit will cost the region $2.1 billion over the next 25 years. In contrast, if the region builds its own pipeline, the projected costs are $1.9 billion over the same period. After the initial 25 year period, the projected costs would be less then 25% of the projected water costs from Detroit.

In order to build the pipeline, the KWA needs commitment from its members regarding the capacity that each member will purchase in the pipeline. The KWA is allowed to withdraw 85 million gallons of water per day. Capacity is available to members in increments of 1 million gallons per day known as units. For each unit of capacity that a member purchases, the buyer shall pay to the KWA a one time fee of $32,300.00. Additionally, the buyer shall pay to the KWA not less then $32,300.00 per unit per year until such time as water is made available to the buyer. After water is made available, the buyer shall pay to the KWA an estimated amount not to exceed $355.300.00 per unit per year until such time that the bonds are paid in full. If it is determined that the costs per unit will exceed $355,300.00 the buyer has a right to cancel the contract.

The purchase of capacity along with the payment of other costs necessary to operate the pipeline gives the member a right to water for sale to its customers. The buyer has a right to resell capacity and water rights. Each party entering into a capacity contract shall also be entitled to appoint additional board members equal to the party's percentage share of the total capacity under contract.

It is in the long term best interests of the City of Flint to enter into a contract with the KWA to purchase up to eighteen (18) units of capacity.

IT IS RESOLVED that City officials are authorized to enter into a contract with KWA to purchase up to eighteen (18) units of capacity.

IT IS FURTHER RESOLVED that the City Administrator is authorized to provide KWA information needed to administer the contract and, with approval of the Chief Legal Officer. to make minor (non-material) modifications to the contract.

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

APPROVED AS TO FINANCE:

CITY OF DETROIT
WATER AND SEWERAGE DEPARTMENT
OFFICE OF THE DIRECTOR

735 RANDOLPH STREET
DETROIT, MICHIGAN 48226-2830
WWW.DETROITMI.GOV

January 12, 2015

Mr. Darnell Earley, Emergency Manager
Mr. Dayne Walling, Mayor
City of Flint
1101 S. Saginaw Street
Flint, Michigan 48502

Dear Messrs. Earley and Walling:

Regarding: Re-establishing Detroit Water and Sewerage Department Water Service

I was recently referred to a report in MLive in which there was reference to the City of Flint (City) potentially re-visiting its decision to utilize Flint River water as a water source prior to the completion of the KWA pipeline. Within that report, there appeared to be some incorrect assumptions about the cost of water service from the Detroit Water and Sewerage Department (DWSD). I write to you today to express the willingness of DWSD to resume delivery of drinking water to the City and its residents. We have monitored the water quality issues that have troubled the City since May, 2014, and understand that many of the difficulties stem from the limited access to source water. Please know that DWSD is ready, willing and able to resume service to the City if you so desire.

If the City is interested in a long term arrangement with DWSD, with this goal in mind, we offer that the City can immediately reconnect to the DWSD system at no additional charge to the City and at the same "expired contract" rate that the City was paying in April, 2014, modified to reflect the 4% increase experienced by all other wholesale customers in July, 2014. The resulting rate structure is a fixed monthly rate of $846,700 and a commodity rate of $14.92/Mcf. In order to facilitate contract negotiations, DWSD is willing to extend this rate to the City (and to Genesee County as the City's partner and former customer) until June 30, 2015.

We at DWSD take very seriously the matter of drinking water quality, and we are as concerned as you must be by the continued quality issues faced by the City. We are confident that DWSD can provide you with a solution for reliable, safe, high quality water on an expeditious timeline. Please contact me directly at (313) 224-4701 if you wish to discuss this offer further.

Sincerely yours,

Sue F. McCormick
Director

All,

We saw this just before I left. We maintain that the cost to reconnect to DWSD amounts to approximately $1 million a month for a period that would amount to 18 months. These numbers were also the numbers presented to us by the Genesee County Drain Commissioner whom Jerry, Mayor Walling, and I met with before my departure.

Perhaps DWSD has made some adjustments in those numbers that the four of us are unaware of.

Subject: City Water Quality

Dear Campus Community,
You may be aware of the recent announcement by the City of Flint that the water system was in a non-emergency violation of a drinking water standard. The full announcement from the City is attached.

Both the City and the Genesee County Health Department have reassured citizens that it is safe to use city water and that corrective actions are not necessary. Regular testing of the water supply continues to take place to ensure usability and consumption is safe for citizens. The City has indicated that there is nothing individuals need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, they recommend that you may be at an increased risk and should seek advice about the drinking water from your health care provider.
The University will be conducting monthly tests of the water that is used on campus. If there are any issues that are found as a result of the testing, that information will be communicated to the campus.

Generally speaking, there are no immediate actions that need to be taken by individuals regarding the safety of water in the City. In conversations that the UM-Flint Office of Environment, Health, and Safety (EHS) has had with the Genesee County Health Department, there are a few recommendations that one might follow if concerned about total trihalomethanes (TTHMs):

1. Use bottled water or

2. Install point-of-use home water treatment systems on delivery lines in the house (faucet mount, pour through pitcher style, and plumbed-in units)

3. It is important to note that when selecting/purchasing any water filter device that it is certified by National Sanitation Foundation (NSF), Underwriters Laboratories (UL) or the Water Quality Association (WQA) to remove TTHMs (look for the seals on the box). The filters could be a pitcher style or a point of use treatment filter that can be mounted to the faucet, under the sink or on the counter top. These treatment devices are widely available for purchase at houseware or hardware stores.

If you have further questions, the EHS in collaboration with our campus student environmental club, Future Urban & Environment Leaders (F.U.E.L.) plan to host a brownbag luncheon discussion in the near future. All faculty, students, and staff are welcome to attend. Additionally, please feel free to contact the City of Flint or the County Health Department directly, if you so choose.

CITY OF FLINT

jlorenz@cityofflint.com

For Immediate Release:

City of Flint Takes Proactive Measures to Improve Water Distribution System and Address Compliance Issues

Flint, Michigan – January 2, 2015 – The City of Flint's Department of Public Works has been actively working to address upgrades and repairs to the city's water distribution system. These actions appear to have corrected several long time concerns with the system as well as known compliance issues with the system, including a recent temporary increase in the maximum contamination level (MCL) of trihalomethanes (TTHM) found in water samples collected from the system during a testing period which ended November 30, 2014. The public was notified of the violation as a precautionary measure as required by the Michigan Department of Environmental Quality (MDEQ).

TTHM is a common by-product of the water chlorination process. Increased levels in some water samples collected in the city were an indicator of weaknesses in the distribution system and treatment process, which were due to years of deferred repairs and upgrades to a very old system. The City of Flint's DPW is and has been pursuing a comprehensive plan to make critical upgrades to its water distribution system for the long term health and operation of the system and to mitigate any future issues.

–CONTINUE–

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
DARNELL EARLEY
ICMA-CM, MPA

The levels of TTHM in the water were elevated marginally above the MCL in some samples, resulting in a less urgent "Tier 2" Environmental Protection Agency notification. This means that the EPA believes there is no immediate risk to consumers and/or the system may have already returned to acceptable levels by the time the notice was issued. Although TTHM is considered to be an environmental pollutant that can be carcinogenic, it can only be hazardous if consumed in water containing the elevated levels at a rate of two liters per person, per day for 70 years. The City of Flint wants to assure the public that according to the MDEQ the water is safe for drinking and all other purposes.

The City of Flint worked closely with the MDEQ to correct the issue by flushing hydrants and replacing key valves in the distribution system. These measures have shown to be effective in not only lowering the TTHM levels in the system, but have also improved the overall health of the system. The Michigan DEQ has acknowledged and appreciates the progress of the City's preemptive evaluation of operations which identified the deficiencies and the corrective measures being taken. The latest round of testing has shown a significant decrease in levels across the board, with most samples falling well below the MCL. It is expected that all sample levels will be well below the MCL in the next round of quarterly scheduled testing in March of 2015.

Flint's DPW welcomes the rigorous review of the MDEQ to ensure steady progress is made on this important issue. "Our proactive plan of replacing valves, flushing hydrants and making other adjustments to the system has shown both promising short term

–CONTINUE–

results as well as strengthening our water distribution capability in the long term," said Flint DPW Director Howard Croft. Both the City of Flint and the MDEQ expect the corrective measures being implemented will resolve the issue by early 2015.

The improvements in MCL levels also mirror the increased consistency being seen in chlorine residuals, flow rates, and overall water quality within the city. As part of the DPW strategic plan and Capital Improvement Plan, there are additional improvements coming to the 600 miles of distribution main including, pipe replacements, leak detection, hydraulic modeling, and enhanced asset management features. The Department of Public Works will continue to provide public education and communication about the quality, the process, and the continual improvements occurring within the system as part of the overall management of the water system.

–END–

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system was recently found to be in violation of a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 ug/L. The location reporting the highest TTHM level was 99 ug/L; thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, you may be at increased risk and should seek advice about drinking water from your health care provider.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015.

For more information, please contact Mr. Brent Wright or Mike Glasgow at 810-787-6537 or the Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F1 S3 WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules. Reminder to water supplier: This notice/ certification must be sent to the DEQ.

Good afternoon,

Please find attached a memo from Emergency Manager Jerry Ambrose outlining some of the upcoming activities as the City continues to prepare for transition.

Also attached is a communication outlining current activities with respect to addressing water concerns, and a notice of a public water presentation which will be held next Wednesday evening.

Please feel free to contact Mr. Ambrose if you have questions or comments.

Thank you.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Gerald Ambrose
Emergency Manager

TO: President Joshua Freeman, Flint City Council
Flint City Council Members

FROM: Jerry Ambrose, Emergency Manager

DATE: January 16, 2015

RE: Update

As the new Emergency Manager of Flint, I look forward to working with you over the next several months as we continue progress towards a sustainable and financially secure city government. As I stated at the time of my appointment, my focus over the next several months is to transition the city from oversight by an Emergency Manager to home rule under the guidance of a Receivership Transition Advisory Board. This will be done by continuing to achieve the expectations set forth in the Seven Point Transition Plan. Assuming those expectations are met, I currently expect such transition to occur sometime during the month of April, 2015.

The progress which has been made is detailed in the attached status report. While progress has been made, there are numerous steps yet to be taken. Many will involve the City Council, including:

- Final adoption of the Capital Improvements Plan
- Final adoption of ordinances regarding planning, budgeting, fund balance, deficit elimination, purchasing, and others which are necessary to establish the organizational structure upon transition
- Completion of training requirements for Council members
- Adoption of an updated Strategic Plan from the FY15/FY19 Plan to the FY16/FY20 Plan
- Adoption of budget priorities for development of the FY16/FY17 budget

I will be working with the City Council, Mayor Walling, City staff and the new City Administrator Natasha Henderson to assure that we can achieve these, and other necessary steps.

There are other issues which we will all continue to address. One primary issue, of course, is the issue of water quality. We all know it is a very serious concern, and our staff is working every day to improve water quality. The plan articulated by former Emergency Manager Darnell Earley, which does not include reconnecting to DWSD, remains in place at this time. This week, as promised, the City released an RFP to secure the services of a firm with experience in improving water quality where the source of water is a river. We also posted on the City's web site answers to some questions which have been raised in the community. We will continue to add information as it becomes available. We are also planning on an informational meeting next week to continue addressing citizen concerns.

Another issue is the low level of resources available to address public safety issues in the City. As you know, we commissioned an independent study of our police and fire organization in order to assess our capacity and to determine how to best organize our police and fire departments in light of their diminished resources. The results of that study are being presented next week at the Council's Public Safety meeting, and will provide guidance as we consider the upcoming FY16 and FY17 plans and budgets.

Finally the issues surrounding water and public safety emphasize the tenuous financial situation of the City – one which, while significantly improved, will remain tight. The five year financial projections done last year, and the adopted budgets for FY15 and FY16, showed financial stability for FY15 and FY26, but projected a very significant gat between revenues and expenses for FY17. Regardless of whether or not the City remains under the control of an Emergency Manager, balancing the FY17 budget in a financially responsible manner will be a challenging task. If decisions become necessary to further reduce the workforce and service levels, they will be very difficult, as there are no easy answers. Likewise, responding to demands for high levels of service and lower costs in the form of water rates or taxes will also be difficult.

Achieving our objectives will take time and effort for all involved. In the next week, the Finance Committee will be meeting on Wednesday to review the second quarter Progress Report on the Strategic Plan, and the same evening will be a City-sponsored forum on water issues. Next Thursday, the Public Safety Committee will meet to review the results of the ICMA Police and Fire study. The following Monday, January 26, will be the regular Council meeting, where the FY14 audit will be presented and where the Council will consider adoption of the Capital Improvement Plan, as well as second reading and final adoption of the strategic planning and budgetary ordinances.

Looking further forward, the Council will be engaged in updating the Strategic Plan, beginning with a workshop on Wednesday, January 28th. It is anticipated that a special Finance Committee meeting will be necessary for February 4th, in order that Council can consider adoption of the framework of the updated Strategic Plan on Monday, February 9th.

Over the next several weeks I will be working with City staff to develop a tentative calendar of events which will guide the budget preparation process and other items which I feel need to be completed prior to transition.

This is an aggressive agenda for all of us. I believe it is critical to have in place the many pieces necessary to both prepare for a successful transition, and more importantly, so that the City of Flint continues on a path of sustainability and financial stability.

For Immediate Release

City of Flint Will Hold Public Water Presentation Wednesday, January 21, 2015 at 7:00pm in the City Hall Dome

Flint, Michigan – January 16, 2015 – The City of Flint will be hosting a water presentation on Wednesday, January 21, 2015 at 7pm. That presentation will be held in the City Hall Dome and will feature information detailing water treatment, water distribution and the steps being taken to ensure that citizens get water that meets all regulatory safety and quality standards. "We want the residents, businesses and visitors of Flint to know that the water in Flint is safe and that we are working every day to make improvements to our system to ensure that," said City DPW Director Howard Croft. "Our goal is make sure we get people the information on our efforts and assure them that we are on the right track with them."

DPW Director Croft and Utilities Administrator Daugherty Johnson will be joined on a panel by representatives from the Genesee County Drain Commissioner's office, the Michigan Department of Environmental Quality and LAN engineering. Written questions from the audience will be collected during the presentation and answered by the panel after the presentation.

–END–

Addressing Flint's Water Concerns

Recent events have raised concerns among many as to the safety and quality of the water provided by the City's utility system. The City is and continues to be committed to assuring that residents and visitors know that the water is safe and that those responsible for providing water are working every day to improve the quality of the water. The quality of the water does need improvement, but that is not to be confused with safety of the water. The recent notice by MDEQ clearly stated that the water provided by the utility system is safe to drink, but cautioned that some vulnerable groups may want to consult with their health care provider if they have concerns. The City remains committed to their efforts to assure that the water is safe for everyone and that quality is both improved and improving.

To date, the City has taken the following actions:

- As an integral part of the transition to the Flint River on a temporary basis, the MDEQ was consulted about the City's plans, and ultimately issued necessary permits to proceed. The City also engaged the services of the LAN engineering firm to guide the city in installing the necessary equipment to treat the water on an ongoing basis. This resulted in the development of a comprehensive drinking water plan.

- The City monitors its water quality on a daily basis to assure that water quality remains within established guidelines. With the variances in water temperature and the leakage and infiltration problems arising as the result of failure of parts of the distribution system, water quality did exceed, for a time, some of the established guidelines. This resulted in the issuance of the recent notices to the public. Upon receipt of information that some guidelines were exceeded, the City's priority focus was to bring water quality back within guidelines. Efforts taken to address non-compliance included increasing water flow through valve replacements and hydrant flushing and optimizing treatment processes.

- The City has committed to increasing communication with the public in order to inform water users factually of the issues which have arisen, to alleviate unnecessary concern and to identify the steps being taken to address the issues. This is being implemented through detailed and easy to understand educational materials being made available both online and at City Hall, as well as through ongoing public informational meetings.

- Most recently, in light of recent concerns raised by resident groups over the quality and safety of water, Department of Public Works Director Howard Croft and his staff collected questions from citizens during a recent public meeting. After reviewing these questions, DPW Director Croft and his staff set out to answer them in concise detail; the result of that work is a full Water System Questions and Answers document is available online. Along with the detailed information within, the document also contains links to other source documents and regulatory statutes found online which were used as reference. **"We want the residents, businesses and visitors of Flint to know that the water in Flint is safe**

and that we are working every day to make improvements to our system to ensure that," said Croft. "Our goal is make sure we get people the information on our efforts and assure them that we are on the right track with them." More documentation, including regular water quality monitoring reports, will be made available.

- Additionally, a number of public meetings have and will continue to take place. Two of the most recent of these took place at the Antioch Baptist Church and the Mott Community College Regional Technology Center. These meetings were held by concerned neighborhood groups and were attended by Mayor Walling and DPW Director Croft. At both meetings, citizens voiced their concerns and asked questions about water quality and the recent violation notice. Director Croft offered detailed answers to common questions, but also offered to investigate specific water issues raised by residents in which the City could offer assistance. Those in attendance came away with a better understanding of the issues surrounding the drinking water in their community.

- The City of Flint will be hosting a water presentation on **Wednesday, January 21, 2015 at 7pm. That presentation will be held in the City Hall Dome** and will feature information detailing water treatment, water distribution and the steps being taken to ensure that citizens get water that meets all regulatory safety and quality standards. City DPW Director Howard Croft and Daugherty Johnson, Utilities Administrator, will be joined on a panel by representatives from the Genesee County Drain Commissioner's office, the Michigan Department of Environmental Quality and LAN engineering. Written questions from the audience will be collected during the presentation and answered by the panel after the presentation.

- The City of Flint has also determined that in light of the serious concerns raised, it will secure the services of an external firm with expertise in managing drinking water quality to assess the steps that the city has taken, to make recommendations as to other steps to be taken, to oversee their implementation, and to monitor operations until the City's water source becomes the KWA. A Request for Proposal was issued on January 15, 2015, with proposals due back on January 26.

The DWSD Question:

As a result of the concerns raised, several community members have suggested that the City reconnect to the Detroit Water and Sewer Department (DWSD). DWSD has advised that they would be willing to allow such a reconnection without a hook-up fee. However, the City would be obligated to pay a fixed monthly charge of $846,700 plus the $14.92/Mcf cost of water itself and agree to a long term arrangement. The City's analysis of the DWSD proposal concludes that the City's cost would increase by more than $12 million per year at the proposed rates, and could increase even more as proposed rates are subject to change after July 1, 2015. This increase in costs would not be in the best interests of the City or its water users, as the City is committed to assuring safety and improving water quality by following its current plan, and reconnecting to DWSD would likely require deferment of existing capital improvements or an additional increase in rates.

RE: **Water Questions**

DATE: January 13, 2015

Prelude

The decision to switch to the Karegnondi Water Authority as the City's permanent water source was made following extensive research and in-depth engineering studies. After entering into a contract with KWA and the subsequent termination of the existing water service contract by the Detroit Water and Sewerage Department, the same diligence was given in determining what source water to use while waiting for the community supported KWA water to arrive. The City concluded from this work that the Flint River presented a safe and financially responsible alternative water source. The decision to use the Flint River as an intermediate water source was approved by state regulatory officials in 2014 whereby the City was permitted by the Michigan Department of Environmental Quality to proceed with treatment of water from the Flint River.

The following questions were presented by concerned citizens, and the City's responses follow. This document will be put on the City's website for public viewing within the next several days.

1. What was the process by which the decision was made to switch from Detroit water to Flint River water? Who was responsible for what decisions?

On March 25th, 2013, after evaluating **cost comparisons** for a permanent water source, the Flint City Council, with support from the Mayor, voted 7 – 1 approving a resolution to purchase water from the Karegnondi Water Authority (KWA). On March 29th, resolution 2013EM041 was signed, authorizing the City of Flint to enter into a contract with the KWA.

On April 16th, 2013, then Emergency Manager Ed Kurtz, signed the contract effectively purchasing 18 MGD of capacity from the KWA.

On April 17th, 2013 Detroit Water and Sewerage Department (DWSD) sent a letter terminating the existing water service contract between the City of Flint and Detroit. With the termination set to take effect 12 months later on April 17th, 2014, a gap was created between the end of the DWSD contract and the start of the KWA.

On June 29th, 2013, following many preliminary discussions on how the City would fill the interim gap, a formal, all day meeting was held at the Flint Water Plant with all interested parties including City of Flint Officials (COF), representatives from the Genesee County Drain Commissioners Office (GCDC), the Michigan Department of Environmental Quality (DEQ), and the design engineers from the previous plant upgrade Lockwood, Andrews, and Newnam (LAN).

The purpose and agenda of the meeting was to determine the feasibility of the following items:

1. Using the Flint River as a Water Source
2. The ability to perform the necessary upgrades to the Treatment Plant
3. The ability to perform quality control
4. The ability for Flint to provide water to Genesee County
5. The ability to meet an April/May 2014 timeline
6. Development of a cost analysis

The conversation was guided with focus on the engineering, regulatory, and quality aspects of each item listed. The resulting determinations were made.

1. Yes, the Flint River would be more difficult to treat but is viable as a source.
2. Yes, it was possible to engineer and construct the upgrades needed for the treatment process.
3. Yes, with support from LAN engineering which works with several water systems around the state, quality control could be addressed.
4. No, the Flint treatment plant would not have the capacity needed to treat and distribute sufficient water to meet the documented needs of Flint and Genesee County.
5. Possible, it was determined that many obstacles needed to be overcome but completion by the April/May 2014 target was reachable.
6. Next steps from the meeting were for LAN to present the City with a proposal that would include engineering, procurement, and construction needs for the project along with cost estimates.

As a result of extensive evaluation, discussions with the professional engineers, and consulting the state regulators, the Department of Public Works along with the Finance Department recommended utilizing the Flint River as a temporary water source while waiting for the KWA to come online. The plan to accomplish this was accompanied with a **construction timeline**, a needs analysis for resources, and an FY 14 spending plan to complete the project.

2. Was it known prior to the switch that there would be problems managing total coliform and fecal coliform bacteria levels in the water?

It was understood that the Flint River would be subject to temperature variations, rain events, and have higher organic carbon than Lake Huron water and would be more difficult to treat. These facts were balanced against a licensed staff, LAN engineering's extensive experience in this field, advanced equipment that Flint has for treatment, and support from the DEQ.

3. What were the projected costs and benefits of the switch, and what have been the actual costs and benefits?

The engineered costs for upgrading the Flint Plant to treat KWA water from Lake Huron were projected to be ~$9,000,000. These upgrades need to be in place prior to KWA water reaching Flint and are coupled with an additional ~$3,500,000 in annual operational expenses for workforce additions, electricity costs, and process equipment for a total of ~$12,500,000.

The final year that the City of Flint purchased water from DWSD, the cost was $12,400,000 and that cost was projected to rise to ~$14,400,000 in 2014 and increase to ~$16,000,000 in 2015.

The financial benefit for switching to the river was the opportunity to divert that revenue towards capitalizing the upgrade expenditures needed to run the plant and the development of a capital improvement program for the aged infrastructure without a significant increase to the water bill. This aspect was figured into the cost analysis at the time of the recommendation.

Based on the current DWSD rate structure, it appears that the actual costs to purchase water this year would have been higher than projected, The fixed cost would have been ~$5,100,000 and the additional commodity or water costs would have resulted in another ~$11,000,000 given the City's current water usage. This would result in an estimated ~$16,000,000 in this year alone.

The upgrade expenditures stayed close to the engineered projections. The improvements at the water plant cost ~$7,000,000, the remediation and development of Bray Rd for lime disposal cost ~$1,700,000 and the increased operational costs so far this year are below the estimates and on target to finish the year at ~$3,000,000. These changes come to a total of ~$11,700,000 of necessary expenditures in the first year.

In addition to the ability to capitalize the upgrades, switching to the Flint River has allowed us to develop a Capital Improvement Plan for the Utility Department that will begin replacing pipe underground this spring and will account for overdue maintenance concerns such as valve replacements, and pipe lining extending the useful life of the system and allowing us to deliver better quality water.

It would have required close to a 30% raise in the water and sewer bill to accomplish this without using the Flint River as a source.

4. What were the causes of increased levels of trihalomethanes? Have those causes been sufficiently addressed? If not, what needs to be done to prevent this from occurring again in the future?

Just as low levels of chlorine can produce coliforms, high levels of chlorine can result in Disinfectant Byproducts (DBP) generating increased levels of trihalomethanes (TTHM). The DEQ requires this testing to occur once every three months at each of the testing sites and looks at an average over four quarters (one year) to determine the level to compare against the maximum contaminant level (MCL).

Research by the Science Advisory Board, the National Academy of Sciences, and the USEPA's Carcinogen Assessment Group predicts **risk estimates** associated with high levels of TTHM at an incremental risk of 3 to 4 people out of 10,000 that consume 2 liters of water over the MCL daily for 70 years.

The required remedy for this violation is to present the DEQ with an **Operational Evaluation Report** that assesses what caused the violation and what the proposed remedy is. The City generated a report to the DEQ in November 2014, which assesses each area of the Flint water system including water source, treatment process, and distribution system. The evaluation was complete with short and long term recommendations to optimize each area and the belief that the items listed would correct the violation and give Flint an increased ability to manage the system. Continued repairs on valves and colder temperatures have created a more consistent chemical footprint, and we have been producing a more consistent water quality.

5. What were the causes of increased levels of total coliform and fecal coliform bacteria levels? Have those causes been sufficiently addressed? If not, what needs to be done to prevent this from occurring in the future?

What we discovered is that as water travels through the 600 miles of the City's distribution mains it will, at times, reside in the system for up to 3 or 4 weeks. Water purchased from DWSD is drawn from Lake Huron, chlorinated, and then travels over 80 miles to reach the City. By the time the water reaches Flint it is stable and capable of withstanding this type of residency time within the system. Water drawn from the Flint River, specifically in summer months when the temperature is fluctuating, is more susceptible to being impacted by variables such as high residency times and increased chemical reaction.

The DEQ requires that a minimum of 100 tests be performed monthly for chlorine residuals at various locations throughout the system. When residual levels are too low, it creates an environment in which bacteria such as fecal coliform can grow. After switching sources, we encountered testing sites in June, 2014 that were consistently returning low residual levels. Several of these sites became areas that total coliform was eventually detected and ultimately boil water notices issued.

Low residual levels can sometimes trigger a positive test result for total coliform which is an indicator of a poor water environment but does not generally require a boil water notice. The normal course of action in these situations is to flush hydrants and introduce fresh water into the defined area. In certain areas this was successful and in other areas it was not. In a second course of action, the EPA also allows for water systems to increase the residual disinfectant, including chlorine, to a level and for a time necessary to protect public health. This information can be found in the EPA manual **(40 CFR 141.65 & 141.130(d))**. In contending with the low residual levels which represent a more immediate health concern along with the potential for tier 1 violations and boil water notices, we increased the chlorination treatment at times in order to combat the low residuals. This was also was an unsuccessful remedy and only after we located and replaced valves that were broken in the closed position on major transmission lines in these areas did the residual levels return to normal and have remained that way since.

There is still one test site, in the 2500 block of Flushing Rd. where we continue to experience low residual levels and we are actively pursuing efforts to locate more expected valve failures. The development of a hydraulic model of the system and the ability to use unidirectional flushing are tools that will assist us in mitigating areas where low residuals surface. Both of these are in progress of being developed by the engineering firm LAN and Potter Consulting who was also the author of our Water Reliability Study.

6. What are the public reporting requirements for these sorts of problems, and has the City met those requirements? What can be done to communicate in a more timely manner useful information about a public health threat such as the presence of cancer-causing chemicals in our drinking water?

The EPA 2010 **"Revised Public Notification Handbook"** has a specific breakdown of the elements required in public notifications and includes usable templates. The EPA has three different tiers associated with community water systems (CWS), each with specific timeframes and requirements that trigger upon issuance of the violation.

- Tier 1. CWS must provide public notification within 24 hours of a violation and continue this as directed by the primary agency.
- Tier 2. CWS must provide public notification within 30 days of a violation and continue this every three months until the violation is resolved
- Tier 3. CWS must provide public notification within one year and the EPA recommends repeat occurrences be provided in an annual notice

The **current EPA violation** is classified as a tier 2 violation and was issued December 16th, 2014.

Moving forward, the City of Flint is striving to increase communication with the public in a variety of ways.

- The city's new website will have current news and information updated on a regular basis.
- Increased data collection will be transitioned into real time ability to communicate with the residents through the Public Works area of the City's new website.
- Timely reporting of current test results on the new City website.

The establishment of these tools is in progress and expected to be implemented in the near future along with evaluating other avenues of communication.

7. **Is there any reason to think that these or similar problems will continue even after the shift is made to water from Lake Huron?**

The water coming from Lake Huron via KWA will be more consistent in temperature, have lower organic carbon, and will be less susceptible to variations but will have its own chemical footprint. The construction upgrades to the Flint Treatment Plant give us the ability to draw water from either source and should provide Flint the opportunity for testing and thereby streamlining the treatment process to match the Lake Huron chemical footprint before fully introducing it into the distribution system.

In addition to new source water, following the recommendations contained in the Operational Evaluation Report and the City's **Water Reliability Study** is the roadmap to being able to provide quality water.

Continuing to identify integrity issues and making preemptive repairs within our antiquated infrastructure are needed to maintain and provide a healthy system. Leak detection which is scheduled for the spring, hydraulic system modeling which includes unidirectional flushing is in progress now and will give us the information and tools to accomplish these goals.

8. **Who is responsible for making sure we don't have these sorts of problems, and did that person or those people fail to meet their responsibilities?**

The Utility Department is a Division underneath the Department of Public Works. The Public Works Director along with the Utilities Administrator will continue to work hand in hand with professional engineers, consultants, and the state regulatory agency DEQ in order to manage increased public communication and address any issues that arise going forward.

The DEQ requires that public water systems with population over 20,000 must have an F-1 state licensed operator in charge that oversees the operation of the treatment process. This license is the highest classification in the state that specializes in "complete treatment" The City of Flint has such a person on staff at the water plant and that person's responsibility is to determine the correct levels of chemical treatment, monitor the system, submit official test results to the state regulatory agency, and make necessary adjustments when contaminant levels are breached. All of these steps were followed and acknowledged by the DEQ.

The following is the list of supporting documents that will be available on the City's website for public viewing.

Cost Comparisons (the ROWE Study)

Addressing Flint's Water Concerns

Recent events have raised concerns among many as to the safety and quality of the water provided by the City's utility system. The City is and continues to be committed to assuring that residents and visitors know that the water is safe and that those responsible for providing water are working every day to improve the quality of the water. The quality of the water does need improvement, but that is not to be confused with safety of the water. The recent notice by MDEQ clearly stated that the water provided by the utility system is safe to drink, but cautioned that some vulnerable groups may want to consult with their health care provider if they have concerns. The City remains committed to their efforts to assure that the water is safe for everyone and that quality is improved.

To date, the City has taken the following actions:

- As an integral part of the transition to the Flint River on a temporary basis, the MDEQ was consulted about the City's plans, and ultimately issued necessary permits to proceed. The City also engaged the services of the LAN engineering firm to guide the city in installing the necessary equipment to treat the water on an ongoing basis. This resulted in the development of a comprehensive drinking water plan.

- The City monitors its water quality on a daily basis to assure that water quality remains within established guidelines. With the variances in water temperature and the leakage and infiltration problems arising as the result of failure of parts of the distribution system, water quality did exceed, for a time some of the established guidelines. This resulted in the issuance of the recent notices to the public. Upon receipt of information that some guidelines were exceeded, the City's priority focus was to bring water quality back within guidelines. Efforts taken to address non-compliance included increasing water flow through valve replacements and hydrant flushing and optimizing treatment processes.

- The City has committed to increasing communication with the public in order to inform water users factually of the issues which have arisen, to alleviate unnecessary concern, to identify the steps being taken to address the issues. This is being implemented through detailed and easy to understand educational materials being made available both online and at City Hall, as well as through ongoing public informational meetings.

- Most recently, in light of recent concerns raised by resident groups over the quality and safety of water, Department of Public Works Director Howard Croft and his staff collected questions from citizens during a recent public meeting. After reviewing these questions, DPW Director Croft and his staff set out to answer them in concise detail; the result of that work is a full Water System Questions and Answers document which has been made available online. Along with the detailed information within, the document also contains links to other source documents and regulatory statutes found online which

were used as reference. "We want the residents, businesses and visitors of Flint to know that the water in Flint is safe and that we are working every day to make improvements to our system to ensure that," said Croft. "Our goal is make sure we get people the information on our efforts and assure them that we are on the right track with them." More documentation, including regular water quality monitoring reports, will be made available as they become ready for distribution.

- Additionally, a number of public meetings have and will continue to take place. Two of the most recent of these took place at the Antioch Baptist Church and the Mott Community College Regional Technology Center. These meetings were held by concerned neighborhood groups and were attended by Mayor Walling and DPW Director Croft. At both meetings, citizens voiced their concerns and asked questions about water quality and the recent violation notice. Director Croft offered detailed answers to common questions, but also offered to investigate specific water issues raised by residents in which the City could offer assistance. Those in attendance came away with a better understanding of the issues surrounding the drinking water in their community.

- The City of Flint will be hosting a water presentation on Wednesday, January 21, 2015 at 7pm. That presentation will held in the City Hall Dome and will feature information detailing water treatment, water distribution and the steps being taken to ensure that citizens get water that meets all regulatory safety and quality standards. City DPW officials Howard Croft and Daugherty Johnson, Utilities Administrator, will be joined on a panel by representatives from the Genesee County Drain Commissioner's office, the Michigan Department of Environmental Quality and LAN engineering. Written questions from the audience will be collected during the presentation and answered by the panel after the presentation.

- The City of Flint has also determined that in light of the serious concerns raised, it will secure the services of an external firm with expertise in managing drinking water quality to assess the steps that the city has taken, to make recommendations as to other steps to be taken, to oversee their implementation, and to monitor operations until the City's water source becomes the KWA.. A Request for Proposal was issued on January 15, 2015, with proposals due back on January 26.

The DWSD Question:

As a result of the concerns raised, several community members have suggested that the City reconnect to the Detroit Water and Sewer Department (DWSD). DWSD has advised that they would be willing to allow such a reconnection without a hook-up fee. However, the City would be obligated to pay a fixed monthly charge of $846,700 plus the $14.92/Mcf cost of water itself. The City's analysis of the DWSD proposal concludes that the City's cost would increase by more than $12 million per year at the proposed rates, and could increase even more as proposed

rates are subject to change after July 1, 2015. This increase in costs would not be in the best interests of the City or its water users, as the City is committed to assuring safety and improving water quality by following its current plan, and reconnecting to DWSD would likely require deferment of existing capital improvements or an additional increase in rates.

FYI...I was not aware that the Mayor was sending this. He had been very engaged in our work to address the water quality issues, including participation in public forums addressing the issue. However, it did not include a plan to request to formally request state assistance, nor did it include a plan for water amnesty.

Dear Governor,

There is nothing more important in Flint right now than fixing the water problems. Attached is a letter outlining a plan with my request for your support. I urge you to work with all of us in the Flint community to implement solutions.

Sincerely,

Mayor Walling

RE: Flint Water Improvement Plan

Dear Governor Snyder:

On behalf of the Flint community, I am writing to convey serious concerns about water quality and to request your support for my proposed Flint Water Improvement Plan. Access to safe and clean water is a basic human right, and, therefore, policy and budget decisions need to ensure that water is affordable and secure for everyone in Flint and all across Michigan It is essential there is City, State and Federal cooperation to address the challenges here and to meet the needs of vulnerable populations.

The Flint Water Improvement Plan is focused in five areas: safety, quality, access, investment and education. The plan puts safety and quality first because this is fundamental. It is designed to be a sustainable solution for the City of Flint and the community as we move towards a new permanent water supply from Lake Huron through the Karegnondi Water Authority. My plan offers new ideas and also builds on successful models of utility, energy and assistance programs at the State and Federal levels.

<u>Safety & Quality</u>

- 100% Safety is the standard
- City of Flint reports testing data to the public to assure safety and expands testing sites and frequency
- Bring on experienced river water treatment operational management in the City of Flint

<u>Access</u>

- Announce an amnesty program for Flint water service turn-ons and reduce the turn-on fee
- Develop a revised affordable payment plan policy to encourage customers to return
- Design Federal and State partnership to establish new Drinking Water Emergency Assistance Fund for the elderly and vulnerable families

<u>Investment</u>

- Accelerate water system improvements outlined in the City of Flint Capital Improvement Plan through Federal and State Investments
    - State approves City of Flint's Distressed Cities Fund applications

    - Federal and State support for replacement or forgiveness of payment to the Drinking Water Revolving Loan Fund due to Flint's status as a distressed community
    - Federal and State grants for infrastructure improvements in alignment with the Flint Master Plan
- City Water Department implements budgeted FY15 projects including leak detection, valve repairs, new pipes and meter replacements

Education

- Develop a community partnership with universities to provide household and business customers with information on testing and conservation
- Ongoing partnership with Michigan Department of Human Services, United Way, Salvation Army and community organizations to provide information and water assistance with the Keep the Water Flowing Fund and support services
- Expand youth energy initiative to assist households with conservation and efficiency (piloted in summer 2014 with Northwestern High School students, EcoWorks and Consumers Energy)

It is also critical to restore the public confidence in Flint Water. The implementation of this plan must be accompanied by extensive community engagement including local elected officials. My objective is to work with you and your appointed officials, State Senator Ananich, State Representatives Phelps and Neeley, Congressman Kildee, community groups, businesses, churches, foundations, the Flint City Council, and all of the City of Flint and government personnel.

It is imperative that we communicate better and provide residents more information. I understand representatives from the Michigan Department of Environmental Quality will be joining a public forum this week at City Hall. This engagement going forward is vital so thank you for supporting their efforts. I think this issue of transparency is important for communities all across the State. I recommend a review of the applicable laws and policies and, at a minimum, a new requirement that water testing data be reported publicly no less than quarterly by law in all Michigan communities in Flint's population category.

Thank you for the consideration Governor. There is nothing more important in Flint right now than fixing the water problems. We must work together to identify funds to repair and update the water treatment facilities and city-wide infrastructure and to help those persons without access to clean water so that the entire Flint community has sustainable, safe, secure and affordable water now and into the future. This is an important issue for the state of our State of Michigan and I urge you to work with us to implement solutions.

Sincerely,

Dayne Walling, Mayor
City of Flint

CC: Flint City Council President Joshua Freeman; Congressman Dan Kildee; State Senator Jim Ananich; State Representative Sheldon Neeley; State Representative Phil Phelps; Flint Emergency Manager Jerry Ambrose

Subject: RE: Flint Water

While I am sure there is much history of which I am not aware, my relatively uninformed response is to question why the State has to intervene in their negotiations with DWSD. I certainly understand our responsibilities arising from the appointment of an EM and allowing them to "chase their tail", but when do they own the consequences of their decisions?

I would like to participate in the internal meeting prior the meeting on the 28th.

Thanks.

Yes, this would be pretty complicated to do now after we agreed to allow them to chase their tail on the Karegondi system. A lot of money has been invested to this point.

I assume you saw the attached. At this point we are trying to determine whether this (DWSD offer) makes economic sense. As you know the past discussions between the City & DWSD haven't been that productive.
Dick P. has also scheduled a mtg on the 28th with the Mayor, Jerry et al. I think you are scheduled to be in that. We should probably have an internal meeting just prior to that meeting.
Also, I haven't talked to DEQ/Dan W. since probably Nov. I will try to do that this week to get their perspective, etc.

Dear Governor,

There is nothing more important in Flint right now than fixing the water problems. Attached is a letter outlining a plan with my request for your support. I urge you to work with all of us in the Flint community to implement solutions.

Sincerely,

Mayor Walling

City of Flint Wednesday 9:00am Phone Conference Agenda

January 21, 2015

1-888-557-8511, Access code 3389106

		Last Report	Status
1) Public Safety Update – FPD, MSP, (FFD, if needed)			
	a) FPD	* The final reports for the evaluation of both the Police and the Fire Departments have been received. The study will be presented to City Council at the Public Safety Committee on January 22, 2015. MSP will attend as well.	No Change
		* SRMS MOA has been signed, project charter development is underway. Last item for which Flint needed to provide a sign-off has been completed.	No Change
	b) FFD	City applied for $999,103 grant from the FEMA Assistance to Firefighters Grant Program to purchase a new aerial truck.	No Action Needed
	c) Other update from Chief Tolbert and MSP		
2) Governor's Office Update – R. Baird, H. Hollins, B. Clement			
	a) District Court Consolidation	County Commissioners voted on 12/10/14 to approve "pursuant to the terms and conditions set forth in a MOU to be approved between City of Flint and Gen. Cty."	No Change
	b) Local Income Tax Initiative	No action was taken during the lame duck session. Additional source of funds still needed for City. H. Hollins working to find a new sponsor.	No Change
	c) Other		

		Last Report	Status
3) Finance and Administrative Update			
	a) Firefighters Contract	City Council sent an alternative contract to the Emergency Loan Board on December 17, 2014. Emergency Loan Board decided in favor of the EM proposal. IAFF contract has been imposed.	UPDATE
	b) Financial Ordinances	City Council approved first reading of Fund Balance Policy, OPEB, BSF and strategic planning processes ordinances. Purchasing Ordinance still to be moved.	No Change
	c) City Administrator Hired	Natasha Henderson was announced as new Flint City Administrator on December 22, 2014. Start date: Feb 23, 2015	No Change
	d) Management Vacancies	MML has been selected to recruit candidates for Treasurer, HR Director and Finance Director. Interim appointments have been made: DCA Tony Chubb handle HR and Al Mooney, former Treasurer of Grand Rapids, has started as Interim Treasurer.	Update
	e) City Clerk Supervision	Can EM establish supervisory oversight of the City Clerk; change priorities, activities of Clerk? Treasury advised that EM Order can be written for this. There is historical background with other Ems.	No Change
4) City Council Update			
	a) Vacant Council Seats	Three candidates were sent to City Council for consideration for Ward 3 and Ward 6. Special meeting held Jan 5, 2015. Kerry Nelson and Herb Winfrey selected.	Complete

		Last Report	Status
5) Water Issues			
	a) MDEQ Violation Notice	Violation notice received 12/16/14 maximum contaminant level for TTHM exceeded. Public notice required. Notices sent out Jan 5, 2015. Most recent readings in compliance except one location. This issue has become the largest current challenge. Actions: community meetings being held, RFP for river water treatment consulting firm due back 1/26/15, selected MSU water expert will attend 1/21/15 Water Forum. Maor sent a letter to Gov. and others with his Flint Water Improvement Plan whic requests Federal and State assistance. See attached.	Update
	b) Distressed Cities Grants	Are the announcements of awards due soon? City of Flint submitted two grant requests: Leak Detection and Sewage sludge Load Out Facility.	New
6) 9-1-1 Reconsolidation Plan			
	a) Tower Transfer to Consortium	Tower built with C-GAP funds. Procedure necessary to transfer asset to Consortium? Need to have assessment of value? Value exceeds $50,000, the intent to transfer was included in the last two updates to the Financial and Operating Plan. Is process same as water pipe sale?	Update
7) Transition Activities			
	a) Strategic Planning Workshop	Two off-site workshops are planned: For Dept. Heads and Core Team on Jan 26, 2015. Then, for Council, Dept. Heads and Core Team scheduled for Jan. 28, 2015. Future Council activities, strategic plan and budget prep will be main topics. Both will be facilitated by Dr. Scorsone.	Update

	Last Report	Status
b) Council Meeting Schedule	Council President has asked to return to regular Council meeting schedule and committee meetings with new dates and fewer restrictions. This will be dependent upon need for Council action.	Update
c) Council/Mayor Compensation	What happens to salary for council and mayor when the EM leaves? As budgeted or back to old levels? Treasury: depends on final order, also a budget consideration.	Complete
d) Update of Transition Management Plan	A planning calendar for the next three months is being developed.	NEW

		Last Report	Status
8) Other Items			
	MDNR and Purchase of CSX rail area	Requesting DNR authorize full amount of appraised property value to be paid by DNR grant. **Note from Planning and Development Director:** In brief, the City hired an appraiser for the Grand Traverse Greenway trail to complete acquisition of the CSX properties. We forwarded the appraisal of $170,000 to the DNR for approval to proceed with negotiations with CSX. During our negotiations, CSX disputed the appraisal and submitted their own appraisal for the property of $330,000. After reviewing the CSX appraisal, DNR told the City that they would be willing to increase the grant up to $215,000 for acquisition, but the City would have to make up the difference After doing additional research on similar properties including acquisition of the Genesee Valley Trail in the City of Flint, we realize that CSX offer is not unreasonable. We asked DNR to reconsider and allow us to have our appraisal amended so that we can fully use the DNR grant for the $330,000 asking price. (Our DNR grant allocation is $700,000 more than enough to cover the $330,000 asking price. Thus far, DNR has been unwilling to provide the additional funding and suggested we talk to MDOT about making up the difference. I think the MDNR is concerned about setting precedent for future trail acquisition, but I don't think it matters if MDOT is routinely paying more.	NEW

All,

The City of Flint is hosting a public forum next Wednesday January 21st in the dome at City Hall at 7:00 pm.The focus will be a presentation followed by a question and answer session about water. The panel will consist of two of our DEQ representatives, the lead engineer from LAN, the Genesee County Drain Commissioner Jeff Wright, and myself.

Please feel free to attend or recommend your constituency to attend, I am forwarding a copy of the press release along with our most recent communication's about the City of Flint water system.

I am looking to build a better communication network for sending out information from the City of Flint DPW Department to interested parties on a more frequent basis. I will inform everyone when that is formally established.

Please call me if you have any questions,

Thank you,

For Immediate Release

City of Flint Will Hold Public Water Presentation Wednesday, January 21, 2015 at 7:00pm in the City Hall Dome

Flint, Michigan – January 16, 2015 – The City of Flint will be hosting a water presentation on Wednesday, January 21, 2015 at 7pm. That presentation will be held in the City Hall Dome and will feature information detailing water treatment, water distribution and the steps being taken to ensure that citizens get water that meets all regulatory safety and quality standards. "We want the residents, businesses and visitors of Flint to know that the water in Flint is safe and that we are working every day to make improvements to our system to ensure that," said City DPW Director Howard Croft. "Our goal is make sure we get people the information on our efforts and assure them that we are on the right track with them."

DPW Director Croft and Utilities Administrator Daugherty Johnson will be joined on a panel by representatives from the Genesee County Drain Commissioner's office, the Michigan Department of Environmental Quality and LAN engineering. Written questions from the audience will be collected during the presentation and answered by the panel after the presentation.

–END–

Addressing Flint's Water Concerns

Recent events have raised concerns among many as to the safety and quality of the water provided by the City's utility system. The City is and continues to be committed to assuring that residents and visitors know that the water is safe and that those responsible for providing water are working every day to improve the quality of the water. The quality of the water does need improvement, but that is not to be confused with safety of the water. The recent notice by MDEQ clearly stated that the water provided by the utility system is safe to drink, but cautioned that some vulnerable groups may want to consult with their health care provider if they have concerns. The City remains committed to their efforts to assure that the water is safe for everyone and that quality is both improved and improving.

To date, the City has taken the following actions:

- As an integral part of the transition to the Flint River on a temporary basis, the MDEQ was consulted about the City's plans, and ultimately issued necessary permits to proceed. The City also engaged the services of the LAN engineering firm to guide the city in installing the necessary equipment to treat the water on an ongoing basis. This resulted in the development of a comprehensive drinking water plan.

- The City monitors its water quality on a daily basis to assure that water quality remains within established guidelines. With the variances in water temperature and the leakage and infiltration problems arising as the result of failure of parts of the distribution system, water quality did exceed, for a time, some of the established guidelines. This resulted in the issuance of the recent notices to the public. Upon receipt of information that some guidelines were exceeded, the City's priority focus was to bring water quality back within guidelines. Efforts taken to address non-compliance included increasing water flow through valve replacements and hydrant flushing and optimizing treatment processes.

- The City has committed to increasing communication with the public in order to inform water users factually of the issues which have arisen, to alleviate unnecessary concern and to identify the steps being taken to address the issues. This is being implemented through detailed and easy to understand educational materials being made available both online and at City Hall, as well as through ongoing public informational meetings.

- Most recently, in light of recent concerns raised by resident groups over the quality and safety of water, Department of Public Works Director Howard Croft and his staff collected questions from citizens during a recent public meeting. After reviewing these questions, DPW Director Croft and his staff set out to answer them in concise detail; the result of that work is a full Water System Questions and Answers document is available online. Along with the detailed information within, the document also contains links to other source documents and regulatory statutes found online which were used as reference. **"We want the residents, businesses and visitors of Flint to know that the water in Flint is safe**

and that we are working every day to make improvements to our system to ensure that," said Croft. "Our goal is make sure we get people the information on our efforts and assure them that we are on the right track with them." More documentation, including regular water quality monitoring reports, will be made available.

- Additionally, a number of public meetings have and will continue to take place. Two of the most recent of these took place at the Antioch Baptist Church and the Mott Community College Regional Technology Center. These meetings were held by concerned neighborhood groups and were attended by Mayor Walling and DPW Director Croft. At both meetings, citizens voiced their concerns and asked questions about water quality and the recent violation notice. Director Croft offered detailed answers to common questions, but also offered to investigate specific water issues raised by residents in which the City could offer assistance. Those in attendance came away with a better understanding of the issues surrounding the drinking water in their community.

- The City of Flint will be hosting a water presentation on **Wednesday, January 21, 2015 at 7pm. That presentation will be held in the City Hall Dome** and will feature information detailing water treatment, water distribution and the steps being taken to ensure that citizens get water that meets all regulatory safety and quality standards. City DPW Director Howard Croft and Daugherty Johnson, Utilities Administrator, will be joined on a panel by representatives from the Genesee County Drain Commissioner's office, the Michigan Department of Environmental Quality and LAN engineering. Written questions from the audience will be collected during the presentation and answered by the panel after the presentation.

- The City of Flint has also determined that in light of the serious concerns raised, it will secure the services of an external firm with expertise in managing drinking water quality to assess the steps that the city has taken, to make recommendations as to other steps to be taken, to oversee their implementation, and to monitor operations until the City's water source becomes the KWA. A Request for Proposal was issued on January 15, 2015, with proposals due back on January 26.

The DWSD Question:

As a result of the concerns raised, several community members have suggested that the City reconnect to the Detroit Water and Sewer Department (DWSD). DWSD has advised that they would be willing to allow such a reconnection without a hook-up fee. However, the City would be obligated to pay a fixed monthly charge of $846,700 plus the $14.92/Mcf cost of water itself and agree to a long term arrangement. The City's analysis of the DWSD proposal concludes that the City's cost would increase by more than $12 million per year at the proposed rates, and could increase even more as proposed rates are subject to change after July 1, 2015. This increase in costs would not be in the best interests of the City or its water users, as the City is committed to assuring safety and improving water quality by following its current plan, and reconnecting to DWSD would likely require deferment of existing capital improvements or an additional increase in rates.

City of Flint

Public Forum

Wednesday January 21, 2015
7:00 pm City Hall Dome

AGENDA

Opening COF – DPW Director - Howard Croft

- Forum Ground Rules (disorderly conduct will not be tolerated)
- Overview of Format (each guest to speak for ~10 minutes with written questions afterword)
- Recognition of Officials
- Introduction of Guests

1st Speaker DEQ – Local Representatives - Mike Prysby, Steve Busch

- Role of DEQ
- Explanation of TTHM violation

2nd Speaker LAN – Lead Engineer - Warren Green

- Discuss Engineering role
- Discuss Operational Evaluation Report

3rd Speaker MSU Microbiologist – Dr. Joan Rose

- Risk Assessment (what do the numbers mean?)
- What to do if someone suspects they are at risk
- What about the elderly and those with a weak immune system
- What will the next violation mean (water is still safe)

4th Speaker GCDC – Jeff Wright

- What to expect from KWA raw water as source
- Update on KWA timeline

Final COF – DPW Director – Howard Croft

- Summary (Next Steps – Action Plans)
  - Hiring an industry expert
  - Tours of Treatment Plant
  - Continued communication
  - Planned steps (CIP built on , Water Reliability Study, Operational Evaluation Report)
  - Funding (researching all sources, state funding, federal opportunities)
  - Water & sewer rates (budgetary evaluation upcoming)
- Questions (Expected to have an hour of panel response time)
- Conclusion - Thank the panel, (Additional follow up at next Public Works Committee meeting)

Department of Environmental Quality (DEQ)

Michael Prysby, P.E.
District Engineer

Stephen Busch, P.E.
Lansing and Jackson District Supervisor

Lockwood, Andrews, and Newnam (LAN)

J. Warren Green, PE
Senior Associate, Director of Engineering

Warren has more than 30 years of experience in engineering management and supervision of complex water treatment and transmission facilities projects. He has successfully guided water system improvements through all necessary phases including feasibility studies, pilot testing, design, financial evaluation, land acquisition, construction, start-up and operation. His expertise is in the areas of facilities design, construction management and contract administration.

He has worked with several municipal utility clients throughout Illinois, Mississippi, Michigan and Wisconsin. He worked with the Green Bay Water Utility in Green Bay, Wis., for 12 years, serving as a project manager for a number of design and contract administration tasks. These included the expansion of a 10-mgd raw water pumping station, construction of approximately 17 miles of 54-in. steel water transmission main, and expansion of its water treatment plant in 1997 and 2004. He also oversaw a $376 million project in DuPage County, Ill., where he was responsible for contract administration and construction management of 140 miles of water transmission mains.

MSU Water Quality and Environmental Microbiology Laboratory

Dr. Joan B. Rose, Ph.D.
Laboratory Director/Principal Investigator
Homer Nowlin Chair in Water Research
Co-Director Center for Water Sciences
Co-Director Center for Advancing Microbial Risk Assessment

Joan is an international expert in water microbiology, water quality and public health safety and is a member of the National Academy of Engineering. She has been involved in the investigation of numerous waterborne outbreaks world-wide. Her work addresses the use of new tools for surveying and mapping water pollution for recreational and drinking water; assessment of water treatment technology and use of risk assessment.

Degrees:

- Bachelor's (1976) and Ph.D. (1985), microbiology, University of Arizona
- Master's (1980) microbiology, University of Wyoming

Genesee County Drain Commissioner

Jeff Wright

Past positions include:

- Chief Executive Officer of Karegnondi Water Authority
- Legislative Committee and Executive Board of Michigan Association of County Drain Commissioners
- Northeast District Chairman – Michigan Association of County Drain Commissioners
- Former Secretary/Treasurer – Michigan Association of County Drain Commissioners

FLINT WATER SUPPLY FUTURE

1. Based on all our analysis, KWA presents the best opportunity for Flint for the following reasons:
    a. Because approximately 40% of Michigan's population is served by the Detroit Water and Sewer District (DWSD) system, it is in Flint's, as well as the State's, best interest for a second pipeline to be built.
    b. It is the least expensive of the alternatives and provides for relatively fixed rates for water to the Flint citizens for the next 25 years. In the first year of operations (Fiscal Year 16), the City should be able to deliver water for about the same costs as today with annual increases of less than 3%.
    c. Flint can use the Flint River for its backup and that cost is factored into the above projections.
    d. It eliminates the need to update the dams at a substantial savings to the city. A Riverfront Restoration Plan exists which deals with the elimination/replacement of the dams.
2. Use of the Flint River while feasible is risky and very expensive
    a. Significant upgrades would need to be made to the dams to insure adequate water levels during both high and low water events
    b. The cost of treating river water is more expensive than treating lake water
    c. In a study of the Flint River in 2011 it was estimated that the up front cost of Flint using the river would be $61.5 million.
3. If Flint does not participate with Karegnondi Water Authority (KWA) it will be a hostage of Detroit or the Flint River for the next 40 years.
4. The estimated cost of continuing to use DWSD water would be $19 million more than KWA over the next eight years conservatively. It is our belief that based on everything we read and hear about Detroit the rates will increase substantially more than our forecast.

5. Concerns
    a. KWA would consist of five Incorporating Board Members
        i. Genesee County
        ii. City of Flint
        iii. City of Lapeer
        iv. Lapeer County
        v. Sanilac County

    b. Only two, possibly three, municipalities would sign capacity agreements to buy water, though all would have a vote.
    c. In addition an additional ten board members will be appointed on the basis of water purchased.
    d. It is concerning that members not purchasing water could make decisions affecting those that are paying the costs.

e. In any event, Flint would be a minority voting member, with Genesee County having a majority. (The Five member incorporating board can override the decisions of the total board on some matters such as incurring debt and selling the system).
f. In the event of cost overruns after contracts are signed, the Board could vote to incur additional debt even if Flint was opposed.
g. Flint would have the option to opt out if the bids exceed the projected costs ($355,000/unit per year).
h. Based on cost estimates by KWA Flint would have to pay a one time fee of $581,400 upon signing a capacity contract and then $48,450 per month until the bonds have been sold. (Estimated to be 3 years) A total of $2.3 million will be recovered in the first year of operations under KWA.
i. At the end of the contract (40 years) KWA owns the system and has no obligation to deliver water to Flint.
j. If construction costs exceeded projections by 15% and if constructions was to be delayed by one year and the city was obligated to make its first year debt service before KWA begins operations, the city's up front costs would exceed $10 million. Given the City's precarious financial position it would be necessary to find a source of capital for this until operating savings covers it.

6. Funding sources for:
    a. $2.3 million got up front operating costs.
    b. $7,100,000 for upgrades to the water treatment plant.
    c. $8.2 million additional up front cost if there are significant cost overruns and a one year delay in water supply delivery from KWA. (This would require an additional source of capital.)

7. Next steps
    a. Finalizing a contract with KWA
    b. Continue to explore options for the operation of the Flint Water System
        i. $25,000,000 in bond debt and high legacy costs limit options

Randy,

The Governor's staff is meeting with Mayor Walling, Flint Legislators and others next week to discuss the water issue.

Tom Saxton needs the following by Thursday 1/22/15.:

1. Cost analysis of what Flint is paying for water now versus what they were paying DWSD (Is this what Sue McCormick is offering in the 1/12/15 letter?)
2. A summary of what is causing the problem and possible solutions. Contact LeAnn Sheckter-Smith to get details.

Additionally, he wants OFR staff to attend tomorrow's public meeting in Flint (Robert?) regarding the water issue.

Let me know if you have any questions.

Subject: Flint Water Issue

Randy,

I spoke to Wayne more about the information Eric is preparing for the Tom Saxton. Wayne believes the document that Jerry sent with today's Flint agenda contains the relevant information. Wayne suggested that Eric prepare a 2 page summary to include the history, status and any other relevant information. Additionally, the cost comparison of using water from the Flint river versus the cost to purchase from DWSD should be included as a separate document. That comparison should also not the bonds sold to join KWA.

Let me know if you have any questions.

Remember this info needs to go to Tom by tomorrow.

Wayne & Ed...

FYI—see attached and below.

My counterpart at the Department of Environmental Quality, Brad Wurfel, called this morning, to ask if I might help connect he and DEQ Director Dan Wyant ahead of tonight's public meeting re: water. I have reached out to Jerry.

Apparently some DEQ staffers are going to be at the meeting and they fear that Walling and co. are going to beat the stuffing out of JA (and thus the State & Governor) over the handling of the water issue.

Wanted to be sure you were aware...

That is the first option listed.

Changes made to date have reduced the formation of DBPs; but because of the way the standard is calculated the violation is anticipated to remain until at least late summer. However, it is difficult to predict whether the operational changes will be effective enough to address seasonal water quality changes that occur during the summer. It is possible to have a spike in August that could cause the city additional problems. But for now, all indications are that DBP levels in the distribution system are within an acceptable range.

Subject: RE: Flint Mayor request to Governor regarding Flint Water

In light of the Mayor's letter, this could be quite uncomfortable for us tonight.

Our position has always been that we do not dictate which acceptable option(s) a water supply may choose. Our responsibility is to see that operations are managed properly, regulations are met, and safe water is delivered. For example, when Flint decided to leave Detroit and operate using the River, our role wasn't to tell them our opinion; only what steps would be necessary to make the switch.

Now that there is a violation of a drinking water standard, we have been treating Flint as we would any other supply. It is up to them to propose a solution/corrective action. Our role is to determine the reasonableness of that proposal. One option available to them is to continue to use the river until the KWA source is available as long as they implement operational changes to mitigate the formation of DBPs. Another acceptable option is to return to Detroit (GLWA) until the KWA source is available. And third option could certainly be returning to GLWA permanently.

The Mayor is saying that since there is an EM, the state (Governor) has responsibility for decisions being made (not our position). It will be very important for DEQ staff to limit our discussion to our role under the Safe Drinking Water Act. Hopefully, the EM will be prepared to respond if and when the conversation veers off into this other arena.

Subject: RE: a question about flint

The water is still pre-treated. I think you mean when the water was coming from DWSD, and the city was just in the water transmission business instead of the water treatment business.
I believe the answer is no, they didn't have many violations, but I'd encourage you to put the question to Mike Prysby, who will be at the meeting. Understand that dozens and dozens of 'boil water' advisories are issued by municipalities around the state every year for various reasons – anything from an abnormal coliform count to broken water mains that expose water to outside influence ... and the advisory is not by itself a warning that folks drinking the water will become ill. It's representative of a comprehensive, conservative protection standard with ample public notification measures to ensure that water customers can make informed decisions.
All of that said, the two guys most likely to know the answer to your specific question will be in the room tonight. And I've copied them here to make them aware you've got questions.

Ed/Randy:

Attached is the Flint Water Report.

Given the volume of information, I have kept the report focused upon the issues germane to the DEQ violation notice and the offer from DWSD.

I have tried to keep technical jargon to a minimum, but some inclusion was necessary in order for some items to be clear.

I also went back into our records to see what rate projections were assumed to be in order to cross-compare the City's analysis of the DWSD proposal. However, I kept references to all of this at a minimum.

If there are any questions, let me know.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

R KEVIN CLINTON
STATE TREASURER

SUMMARY REPORT

TO: Wayne Workman, Deputy State Treasurer

FROM: Eric Cline. Department Manager; Office of Fiscal Responsibility

SUBJECT: Summary of Flint Water System Issues

DATE: January 22, 2015

Summary

On December 16, 2014, the City of Flint received a violation notice from the Michigan Department of Environmental Quality (DEQ). This notice stated that the City water samples were in violation of Maximum Contaminant Levels (MCL), a violation of the Safe Drinking Water Act (PA 399 of 1976).

The DEQ considers the violation period to have begun December 1, 2014. The violation was triggered when water sample reports showed that the City's water quality, on average, exceed the total allowable level of *Disinfection Byproducts* during the first three quarters of 2014. Further, four of the City's eight water sample site locations individually exceeded allowable MCL levels during the same period of 2014.

These conditions are considered a Tier 2 violation and, as a result, the City was required to notify the public of these contamination levels by January 10, 2015 (which was done) and continue to notify them every three months until the violation is resolved.

The City must also update its Operational Evaluation Report, which is on-file with the DEQ, as to how it will correct this issue by March 1, 2015.

Causes & Possible Solutions

According to information provided by the City, the high levels of *Disinfection Byproducts*, which resulted in the DEQ violation notice, can be caused by high levels of chlorine. The City is required to perform testing every three months and the yearly average exceeded allowable MCL levels.

Some of the potential causes for this high level of chlorine include:

- Inefficient ozone system operation.
- A sewer leak discovered upstream of the intake, resulting in the need to increase the chlorine feed.
- An improper softening process.
- Unlined cast iron pipes in the distribution system.
- Recirculating water in the distribution system due to poor configuration of two pump stations.
- Broken valves resulting in stagnant water.
- High chlorine demand in filters.

- High potential of impurities in the source water.
- Less than optimal removal of impurities.

The City outlined some potential remedies to this problem in its initial Operational Evaluation Report, dated November 26, 2014. These potential remedies are intended to be implemented in stages. Stage 1 consists of actions that can be implemented without any new construction within the distribution system and are due to be implemented by early March 2015.

Stage 1 actions include:

- Troubleshooting of the ozone system.
- Implementation of different testing methods.
- Operational changes at the Water Treatment Plant.
- Increase water main flushing efforts to minimize stagnant water.
- Identify areas with high water age and implement preemptive measures.

Stage 2 consists of long term actions that require major system construction and potentially include:

- Upgrades to the ozone system.
- Implement the use of polymer aids.
- Convert to lime and soda ash softening.
- Change the disinfectant process.
- Install a new feed at the intake to optimize disinfection.
- Implement advanced treatment for precursor removal.
- Increase main flushing based on water modeling results.
- Continue valve replacements.
- Emphasize cast iron pipes on water main replacement priority list.

The projected cost of these options is unavailable.

It should be noted that all of these potential remedies are intended to be utilized only until the KWA pipeline is operational in late 2016.

Further, the City will be providing additional potential solutions when it updates the Operational Evaluation Report, which must be submitted to the DEQ by March 1, 2015.

Also, the City's Emergency Manager has committed to hiring an independent external consultant to assess the steps that the City has taken, to make recommendations as to other steps that can be taken, to oversee implementation, and to monitor operations until KWA is online.

DWSD Situation

Concurrent to the City addressing the aforementioned issues, on January 12, 2015, the Detroit Water and Sewer Department (DWSD) extended an offer to the City to reopen water connections that have been closed since May 2014 and resume supplying the City with drinking water.

DWSD has offered waiving a connection charge if the City will consider a long term agreement. DWSD has offered the City a fixed monthly rate of $846,700/month ($10,160,400/year) plus a commodity rate of $14.92/Mcf. DWSD stated that these rates will be guaranteed until June 30, 2015. Any future rate increases beyond the June 30 date are not identified, however, prior projections indicated that DWSD rates would exceed $16-million in 2015.

The City's analysis of this offer indicates that the total cost of purchasing water from DWSD would exceed $12-million annually (before any rate increases beginning July 1, 2015). These costs are supported by projections utilized by the City when the original decision to switch to KWA was made.

The City's current water system expenditures are approximately $11.7-million, with operations and capital upgrades currently running below projections. Therefore, the Emergency Manager has made the determination that the City will not be acting upon the offer extended by DWSD.

If further information on this issue is needed, please let me know.

City of Flint Call Notes 01/21/15 9 AM
Treasury: W. Workman, R. Byrne, R. Widigan
GOV: H. Hollins
MSP: G. Kapp, J. Carter, S. Sipes, S, O'Neill, T. Sands
City: J. Ambrose, Liz Murphy, Chief Tolbert

1. **Public Safety Update**
   - FPD Chief Tolbert:
     a. 4 Homicides for the year, up from 1 this time LY.
     b. The final reports for the evaluation of both the Police and the Fire Departments have been received. The study will be presented to City Council at the Public Safety Committee on January 22, 2015. MSP will attend as well. R. Byrne to attend.
     c. 118 officers & civilians total.
     d. Performance measures for officers were implemented on January 1.
     e. Chief Tolbert is hosting town hall meetings, working on community policing.
   - FFD:
     a. City applied for $999,103 grant from the FEMA Assistance to Firefighters Grant Program to purchase a new aerial truck.

2. **Governor's Office Update**
   - District Court Consolidation:
     a. County Commissioners voted on 12/10/14 to approve "pursuant to the terms and conditions set forth in a MOU to be approved between City of Flint and Gen. County."
     b. H. Hollins (GOV) stated J. Ambrose needs to issue an order that mirrors what the resolution passed by the County Commissioners – H. Hollins to speak to Judge Yuille.
   - Local Income Tax Initiative:
     a. H. Hollins (GOV) is trying to find a legislative sponsor.

3. **Finance and Administrative Update**
   - Firefighters Contract:
     a. City Council sent an alternative contract to the Emergency Loan Board on December 17, 2014. Emergency Loan Board decided in favor of the EM proposal. IAFF contract has been imposed.
   - Financial Ordinances:
     a. City Council approved first reading of Fund Balance Policy, OPEB, BSF and strategic planning processes ordinances. Purchasing Ordinance still to be moved.

4. **Water Issues**
   - MDEQ Violation Notice:
     a. Violation notice received 12/16/14 maximum contaminant level for TTHM exceeded. Public notice required. Notices sent out Jan 5, 2015. Most recent readings in compliance except one location. This issue has become the largest current challenge.

b. Public Water Forum will be on 1/21/15 at City Hall. Panel will include City Officials, MDEQ, MSU Microbiologist, Genesee Co. Drain Commissioner.
c. RFP for river water treatment consulting firm due back 1/26/15, selected MSU water expert will attend 1/21/15 Water Forum.
d. Mayor sent a letter to Gov. and others with his Flint Water Improvement Plan which requests Federal and **State assistance.**
e. KWA Project is on track and under budget. Expected completion is spring 2016.

- Distressed Cities Grants:
  a. City of Flint submitted two grant requests: Leak Detection and Sewage sludge load out facility. Awards expected to be announced at the end of January.

5. 9-1-1 Reconsolidation Plan

- Tower Transfer to Consortium:
  a. Tower built with C-GAP funds. Construction value exceeds $50,000; the intent to transfer was included in the last two updates to the Financial and Operating Plan.

6. Transition Activities

- Strategic Planning Workshop:
  a. Two off-site workshops are planned: For Dept. Heads and Core Team on Jan 26, 2015. Then, for Council, Dept. Heads and Core Team scheduled for Jan. 28, 2015. Future Council activities, strategic plan and budget prep will be main topics. Both will be facilitated by Dr. Scorsone.
  b. Update of Transition Management Plan: A planning calendar for the next three months is being developed.

7. MDNR and Purchase of CSX Rail Area:

- The City is requesting DNR authorize full amount of appraised property value to be paid by DNR grant. R. Byrne will look into this further.
  a. **Note from City's Planning and Development Director:** In brief, the City hired an appraiser for the Grand Traverse Greenway trail to complete acquisition of the CSX properties. We forwarded the appraisal of $170,000 to the DNR for approval to proceed with negotiations with CSX. During our negotiations, CSX disputed the appraisal and submitted their own appraisal for the property of $330,000. After reviewing the CSX appraisal, DNR told the City that they would be willing to increase the grant up to $215,000 for acquisition, but the City would have to make up the difference. After doing additional research on similar properties including acquisition of the Genesee Valley Trail in the City of Flint, we realize that CSX offer is not unreasonable. We asked DNR to reconsider and allow us to have our appraisal amended so that we can fully use the DNR grant for the $330,000 asking price. (Our DNR grant allocation is $700,000 more than enough to cover the $330,000 asking price. Thus far, DNR has been unwilling to provide the additional funding and suggested we talk to MDOT about making up the difference. I think the MDNR is concerned about setting precedent for future trail acquisition, but I don't think it matters if MDOT is routinely paying more.

Wayne:

I now have had an opportunity to review the complaint and attached exhibits. The complaint asserts that the City's drinking water is contaminated and seeks a temporary restraining order, although of what is not quite clear. The lack of clarity may be due in part to the plaintiff, who describes himself as indigent, acting *in pro per* (i.e., representing himself).

Also unclear is why Darnell was named as a defendant. There is in the complaint no mention of Act 436, nor any assertion that the plaintiff is aggrieved by any action, or inaction, on Darnell's part. However, because it appears Darnell was named in his official capacity as then Emergency Manager, it is likely the plaintiff will amend his complaint to substitute the current Emergency Manager, Jerry Ambrose, as a defendant.

Given the absence in the complaint of any reference to Act 436, or to any action, or inaction, under that Act, there does not appear to be, in a strictly statutory sense, any basis to request Attorney General representation for either Darnell or Jerry. I spoke with Pete and he concurred. However, he and I also decided to re-read the complaint to satisfy ourselves we have not missed anything upon this point.

The four corners of the Act notwithstanding, there may be prudential grounds for requesting involvement by the Attorney General's Office. However, because I think it advisable not to reduce those grounds to writing, I would prefer to discuss at your convenience.

I will forward a copy of the complaint to Darnell.

Wayne:

It depends upon the circumstance. Per the Act, the Attorney General's Office is required to defend any cause of action involving any of the following:

(a) The validity of this act.

(b) The authority of a state official or officer acting under this act.

(c) The authority of an emergency manager if the emergency manager is or was acting within the scope of authority for an emergency manager under this act.

I will need to review the document that Pete forwarded to determine the nature of Darnell's involvement.

Gentlemen: I'm forwarding the attached motion for temporary restraining order that was filed in federal court. Darnell Earley is a named defendant. I and writing to seek guidance on whether the Attorney General will be representing him.

I do not have Darnell's new email address. I left a message on his cell phone this morning. I'm not sure if he's been served.

Terry,

This is the quickest response I can give you...you will see the water issue is important and we are working on it everyday. If you go to our web site, you will see additional information we are posting for the public. And we have an RFP out soliciting expert assistance to assure we are doing everything we need to be doing. Let me know if you need something else.

Additional item - we stand by the statement that going back to DWSD would add some $1 million monthly to our expenses, and DWSD's "offer" makes reference to a "long term" commitment, which presumably could mean leaving KWA....

We are committed to addressing this problem and are pursuing our strategy.

Dave...

Please see the attached, which includes the info I shared yesterday. I have asked Brad at DEQ if he has anything more, as they have had more involvement on the water issue. I will forward anything he sends me. I believe there is a meeting next week with the G to discuss this issue, though clearly he may face media questions well before that occurs.

We suggest the G say the ***residents deserve clean, safe water and EM Jerry Ambrose, his management team and the DEQ are working to ensure that...and that the State will be a resource where and when possible (as we have with other issues, ie, crime).***

I cannot speak to other "requests" in the Mayor's letter (dated 1-18), which seek waivers, Federal and State funding, etc.

As you will see in the document, the city is committed to addressing the issue and in fact, has taken numerous steps (with guidance and/or approval from DEQ) to date.

Hope this helps.

For Immediate Release

City of Flint Extends Submission Deadline for Water Quality Consultant Request for Proposals

Flint, Michigan – January 26, 2015 – The City of Flint has extended the deadline for its Water Quality Consultant Request for Proposal (RFP) to Thursday, January 29, 2015 by 12pm, in order to ensure that interested and qualified firms can submit comprehensive proposals. Proposals received by the deadline will undergo immediate review with a goal of finalists being selected by Monday, February 2, 2015. Final selection is anticipated by the week of February 9, 2015.

In the RFP, The City is seeking a consultant to review and evaluate the water treatment process and distribution system, provide recommendations to maintain compliance with both state and Federal agencies, and assist in implementing accepted recommendations. The City will have the selected vendor provide reports to reflect their findings and provide continual oversight in implementing any approved recommended practices to improve the quality of water until implementation of the KWA project. The RFP can be found on the City's website at http://flintweb2.cityofflint.com/Purchasing/bids.asp.

If you haven't already, I would suggest you contact Jerry Ambrose, Flint's emergency manager. He could give you complete background on the situation, and update you on the steps the city has been taking...and plans to take...to address the situation.

As for the mayor's letter, much of the content is outside Treasury's oversight and/o authority. That said, below is some information (reaction) I shared with reporters earlier.

You may attribute the following to me.

"Jerry Ambrose and his management team are working diligently to ensure Flint residents have access to clean, safe water. To that end, the city has an rfp out for a consultant to advise the city on appropriate next steps.

The city continues to work closely with staff from the Department of Environmental Quality (DEQ) to ensure water meets safety guidelines, that water operations are managed properly, and all regulations are met.

Treasury staff is also in regular contact with both the city and DEQ and will be providing support as appropriate."

Brad,

Under the Act 399 Rules, the City is required to conduct an Operational Evaluation and make adjustments to their system to reduce TTHM levels. They have 90 days from the violation to complete the report (due date is March 1). This was outlined in the violation notice (attached).

When results from August continued to show high levels of TTHM and the likelihood that a violation of the standard would occur in the future, the City was asked to proactively complete an Operational Evaluation at that time to try and reduce levels (see attached September OEL compliance communication). The City did complete the evaluation, and this, in part, is why levels from November showed such a significant reduction. A copy of this Operational Evaluation can be provided.

It should also be noted that the Operational Evaluation from one monitoring period to another are separate required reports. An Operational Evaluation for a subsequent period can utilize information from a previous report, but can't be a resubmittal of the same report. It must take into account the most current data.

The City has contracted with LAN Engineering to conduct the Operational Evaluations and produce the reports.

It is the City's responsibility to evaluate their system and provide solutions.

Also keep in mind that the long term solution will continue to be connection to KWA. Such long term solutions have been acceptable for other communities to address this type of standard violation.

STATE OF MICHIGAN
DEPARTMENT OF ENVIRONMENTAL QUALITY
LANSING DISTRICT OFFICE

RICK SNYDER
GOVERNOR

DAN WYANT
DIRECTOR

December 16, 2014

Mr. Brent Wright, Operation Supervisor
City Of Flint - DPW
Flint Water Plant
4500 North Dort Highway
Flint, MI 48505

WSSN: 02310

Dear Mr. Wright:

SUBJECT: Violation Notice – Maximum Contaminant Level for Total Trihalomethanes
Operational Evaluation – Total Trihalomethanes
4th Quarter 2014 Monitoring Period

The Department of Environmental Quality (DEQ), Office of Drinking Water and Municipal Assistance (ODWMA), records show that the City of Flint is in violation of the Safe Drinking Water Act,1976 PA 399, as amended (Act 399); R 325.10610, *Maximum contaminant levels* (MCL) *for disinfection byproducts*, of the 1979 Administrative Code.

In accordance with R.325.10610, *MCLs for disinfection byproducts*, of the 1979 Administrative Code, the MCL for disinfection byproduct total trihalomethanes (TTHM) is 0.080 milligrams per liter (mg/L) as a Locational Running Annual Average (LRAA) at each monitoring location. As listed in the table below, our records show that the City of Flint's highest TTHM locational running annual average (LRAA), based on the last three quarters, ending November 30, 2014, is 0.099 mg/l which exceeds the standard, and that two of the eight sample site locations exceed the standard of 0.080 mg/L.

Further, in accordance with R325.10719l, *Disinfection byproducts: operational evaluation levels*, of the 1979 Administrative Code, when an operational evaluation level (OEL) at a monitoring location for TTHM exceeds 0.080 mg/L, a supply shall conduct an operational evaluation and submit a written report of the evaluation to the department not later than 90 days after being notified of the analytical result that causes the supply to exceed the operational evaluation level. As listed in the table below, our records show that TTHM operational evaluation levels for the City of Flint exceed 0.080 mg/L at four of the City's eight sample site locations.

TTHM Results (mg/L)					
	5/21/14	8/21/14	11/20/14	LRAA	OEL
DBP1 McDonalds 3719 Davison	**0.162**	**0.145**	0.059	**0.092**	**0.106**
DBP2 Liquor Palace 3302 S. Dort Highway	**0.112**	**0.127**	0.033	0.068	0.076
DBP3 North Flint Auto 6204 N. Saginaw St.	**0.097**	**0.118**	0.041	0.064	0.074
DBP4 University Market 2501 Flushing Road	**0.106**	**0.196**	**0.094**	**0.099**	**0.122**
DBP5 Taco Bell 3606 Corunna Road	0.079	**0.181**	0.034	0.074	**0.082**
DBP6 Rite-Aid Pharmacy 5018 Clio Road	**0.088**	**0.144**	0.054	0.072	**0.085**
DBP7 Salem Housing 3216 MLK Boulevard	**0.082**	**0.112**	0.050	0.061	0.074
DBP8 BP Gas Station 822 S. Dort Highway	0.075	**0.112**	0.036	0.056	0.065

Our investigation consisted of a review of ODWMA files for laboratory reports received for compliance monitoring. Our investigation is considered complete. This violation began on December 1, 2014, and will continue until TTHM LRAA is below the MCL at all sample sites.

We acknowledge and appreciate the city's cooperation with our recommendation to preemptively conduct an Operational Evaluation following the City's second quarterly round of monitoring in August. That Operational Evaluation report has identified possible causes and corrective measures for the elevated TTHM levels which we encourage the City continue implementing. These modifications have likely contributed in part to the reduction in TTHM levels reported in the most recent quarter, and suggest the City may be able to achieve compliance with the TTHM standard.

Our office is continuing to review the Operational Evaluation report that was submitted on December 1, 2014, and will provide the City and their consultant comments as needed to help address this MCL violation.

Water systems that exceed the OEL must complete and submit an Operational Evaluation in accordance with Administrative Rule 719l (R325.10719l) within 90 days of being notified of the violation. **An updated Operational Evaluation report, which incorporates the most recent sample results, must now be completed and received by our office by no later than March 1, 2015**.

If you have any other factual information you would like us to consider regarding the violation identified in this Violation Notice (VN), please provide them in a written response by January 16, 2015.

Administrative rule R 325.10403 of Act 399 requires that suppliers provide public notice (PN) as soon as practical, but no later than thirty (30) days after the supplier learns of this type of violation, by mail or direct delivery **and** by any other means reasonably calculated to reach customers not normally reached by mail. Enclosed is a sample PN

which contains the minimum required language. The City is encouraged to include additional information regarding its response to this violation. **Please notify your consumers by January 10, 2015, and send us a signed and dated copy of the notice that you issued within ten (10) days of distributing the public notice.** This violation must also be included in your 2014 Consumer Confidence Report (CCR), due by July 1, 2015. The PN must be repeated every quarter until you no longer exceed the TTHM standard. Failure to issue a PN for this violation will result in a fine of at least $1,000 per event, with a maximum of $5,000 per violation.

We anticipate and appreciate your continued cooperation in resolving this matter. If you have any questions regarding this VN, please contact us at the numbers below.

Sincerely,

Michael F. Prysby, P.E., District Engineer

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system recently violated a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 µg/L. The location reporting the highest TTHM level was 99 ug/L; thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. These people may be at increased risk and should seek advice about drinking water from their health care providers.

- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem by 2015.

For more information, please contact Mr. Brent Wright at 517-787-6537 or the Flint Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

Signature	Title	Date Distributed

Reminder to water supplier: This notice / certification must be sent to the DEQ.

STATE OF MICHIGAN
DEPARTMENT OF ENVIRONMENTAL QUALITY
LANSING DISTRICT OFFICE

RICK SNYDER
GOVERNOR

DAN WYANT
DIRECTOR

September 10, 2014

Mr. Brent Wright
City of Flint Water Treatment Plant
4500 North Dort Highway
Flint, Michigan 48505

SUBJECT: Compliance Communication
Total Trihalomethane Operational Evaluation Requested

Under the Stage 2 Disinfectants and Disinfection Byproduct Rule, the City of Flint has been required to collect samples for the analysis of Total Trihalomethane (TTHM) and Haloacetic Acids (HAA5) at eight sites within the City's water distribution system. The City has completed two quarterly monitoring periods since changing its source water to the Flint River effective April 25, 2014.

Normally an Operational Evaluation Level (OEL) would be calculated in accordance with the Michigan Safe Drinking Water Act, Public Act 399, 1976, as amended, Administrative Rule 7196 (R 325.107196), each quarter once three quarters of results have been obtained and compared with the respective maximum contaminant level (MCL) for TTHM. Normally the calculation would be made as follows:

(2 x current quarter + sum of 2 previous quarters) divided by 4

As the City of Flint currently has only two quarters of data, the calculation has been modified as follows:

(2 x current quarter + previous quarter) divided by 4

The resulting OEL for each site is listed in the table below. All results are in parts per billion (ppb):

		TTHM			HAA5	
	5/21/14	8/21/14	Mod. OEL	5/21/14	8/21/14	Mod. OEL
DBP1 McDonalds 3719 Davison	162.4	145.3	113	64	43	38
DBP2 Liquor Palace 822 S. Dort Highway	111.6	112	84	52	40	33
DBP3 North Flint Auto 3302 S. Dort Highway	96.5	127.2	88	48	31	28
DBP4 University Market 3606 Corunna	106.4	181.3	117	55	24	26
DBP5 B&P Gas Station 2501 Flushing	75.1	196.2	117	38	17	18
DBP6 Salem Housing 3216 MLK Boulevard	82.2	112.4	77	41	25	23
DBP7 Kroger 5018 Clio Road	88.2	144.4	94	49	30	27
DBP8 Taco Bell 6204 N. Saginaw	79.2	118.3	79	50	37	31

As shown in the table above, even with this less restrictive modified method, six of the City's eight sites already exceed the OEL limit of 80 ppb for TTHM. In addition, the City's two other sites are both more than 95% of the TTHM OEL limit.

The MCL for TTHM and HAA5 is based on a locational running annual average for each site, essentially the average at each site over the four previous quarterly monitoring periods. However, with TTHM levels of this magnitude, it is likely the MCL will be exceeded for at least one of these eight sites from just three quarters of monitoring results. For TTHM, four quarters at the MCL of 80 ppb (4 x 80) would provide 320 ppb allowable. As an example, site DBP1 through just two quarterly monitoring periods has a total of 307 ppb (162+145), leaving only 13 ppb over two more quarterly monitoring periods to maintain compliance with the MCL.

Therefore, this office is requesting the City of Flint complete an Operational Evaluation in accordance with Administrative Rule 719l (R325.10179l). The Operational Evaluation Report shall be submitted to this office no later than November 28, 2014. The report shall not be limited in scope and shall include the following:

Examination of Treatment Operational Practices
- Changes in source water quality
- Treatment changes
- Storage tank operations
- Excess storage capacity
- Treatment problems that contribute to TTHM formation

Examination of Distribution Operational Practices
- Storage tank operations
- Excess storage capacity
- Distribution system flushing

The report shall also include steps the City could consider to minimize future exceedances.

Additional guidance on completing the Operational Evaluation Report, including a number of forms that can be used to gather and evaluate water system information is provided in the United States Environmental Protection Agency's (U.S. EPA) Operational Evaluation Guidance Manual. This document is available on the U.S. EPA's website at the following link:

http://www.epa.gov/ogwdw/disinfection/stage2/pdfs/draft_guide_stage2_operationalevaluation.pdf

Be advised, failure to submit an Operational Evaluation Report by this deadline is a reporting violation subject to Tier 3 Public Notification.

The OEL is an indicator of operational performance. The water system must take proactive steps to be able to comply with the MCL's for TTHM and HAA5. While it is recognized that removal of Total Organic Carbon disinfection byproduct precursors as part of the treatment process has performed above minimum removal requirements under the treatment technique, around 4 parts per million of organic carbon are still present in the treated water and may be leading to additional TTHM formation in the City's distribution system.

While health effects associated with disinfection byproducts contaminants are based on chronic exposure, the City has available alternatives that must be considered to achieve compliance with this drinking water public health standard.

If you have any questions regarding this information, please contact me at the number below.

Sincerely,

Michael Prysby, P.E.

Subject: RE: Flint Water Call

I will have documentation to more specifically articulate this tomorrow, but for the timeline, it goes like this:
Conversation one: Flint wants to join KWA and eventually gets approved.
Conversation two: Flint sees formation of the Regional water authority in Detroit and announces to DEQ they're getting off the bus, and going to use the local water supply.
Oh, and this got a new twist late today. I'll expand in another forum with each of you.

Hi Brad and Terry –

Do you each have about 15 minutes available in the near/immediate future to hop on a quick call with Sara and Dave? Want to make sure all on same page for Flint water issue. If we could find a time window between now and 1 that would be ideal – otherwise Sara and Dave can do between 1:30-2:30.

Please let me know ASAP. Thanks much!

Subject: Flint issue
Attachments: Flint - KWA Approval.pdf; Dillon KWA.PDF; Flint_KWA TPs.doc; Flint Water TPs.docx

Importance: High

All,

Please see the attached TPs. I have also attached a couple pdfs noted in the TPs. They include the Treasurer's conditional approval of the eventual move to KWA and the EM's response to DWSD's "last, best offer."

Additionally, during my most recent interaction with Jerry Ambrose, he indicated that the water issue is critically important and that he and staff are working on it every day. They have posted a host of information for residents on the City's website (http://cityofflint.com/?p=6251). They have extended the deadline for the Water Quality Consultant RFP to this Thursday, to ensure interested and qualified firms can submit comprehensive proposals and assist the city.

I have also attached the earlier talking points I had shared with Dave.

Let me know if you need anything else in the meantime...or before we speak again...

Terry

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
EDWARD J. KURTZ

ELECTRONIC LETTER

April 16, 2013

Andy Dillon
State Treasurer
P. O. Box 30716
Lansing, MI 48909

Dear Treasurer Dillon:

Flint, Genesee County and KWA received an eight page letter from Detroit Water and Sewerage Department (DWSD) offering a framework for a long-term agreement with our region. Two scenarios were presented;

Scenario 1: Water from the Lake Huron Plant.

This offer was dismissed immediately because Flint would still be responsible for their share of the KWA water pipeline delivery system estimated to be $79 million. In addition Flint would not be able to operate the Flint Water Plant in which we have invested over $40 million per MDEQ mandates over the past ten years. Finally, although DWSD shows this as an option and supplied a per month cost projection for the first year, no total costs over the life of the contract were provided.

Scenario 2: "Full Service" Water Supply

This offer was also rejected. DWSD would supply water to Flint/Genesee the same way they currently are today. They would change the method of calculating our bill. The offer would provide a $1.00 per ccf reduction on our usage for the first year, providing a 30 year contract is signed.

After review of the offer, Flint/Genesee has the following concerns:

1. DWSD's offer is a framework subject to negotiations and is not a firm offer.

2. DWSD's offer is based on 40.6 mgd, the KWA plan is based on 60 mgd. Flint/Genesee last summer hit the peak of 40.6 mgd and this DWSD offer provides no room for growth. Growth would result in penalties or added cost.

3. DWSD's offer does not include a guaranteed rate for years two through thirty, nor does it provide a maximum annual increase.

4. DWSD's offer does not provide a redundant supply for GCDC.

5. DWSD's offer does not allow for the use of Flint's existing water plant.

6. The offer indicates that the total cost to Flint over the life of the contract would be $587,990,665. No indication of what annual rate of increase was used in this projection. Flint can only assume it is 4.4% based on the Tucker Young report. It is also based on 40.6 mgds. KWA's proposal is for $649,775,166 based on 60mgds (33% more). Based on 60 mgds DWSD's proposal would be $868,950,738.

On a final note, Flint/Genesee has great concern over the accuracy of the figures provided by DWSD. Attachment 1 indicates that our joint annual cost to DWSD is $50 million; actual cost is less than $25 million. Attachment 2 indicates $800 million in savings over the next 30 years. That is greater than the total cost we would pay DWSD.

Therefore, I will sign the resolution to join KWA at the close of business today.

Sincerely,

Edward J. Kurtz
Emergency Manager

89 (Rev 11-13)

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

R KEVIN CLINTON
STATE TREASURER

Flint Water/KWA Decision Points and Timeline

In November 2012, all major stakeholders (city officials, EM Kurtz, county officials, DWSD, DEQ & Treasury) met to discuss a regional effort to build a new water pipeline from Lake Huron to Genesee County.

Flint and Genesee Co. had been getting water from DWSD under a 30-year contract that, at that time had expired.

Genesee Co. was planning to build a new pipeline from Lake Huron (Karegnondi Water Authority, KWA) and eventually provide service to the City of Lapeer, Lapeer County, and Sanilac County.

County officials believed that continuing to buy water from DWSD would cost the region more than $2.1 billion over the next 25 years but that building a pipeline and developing the KWA would reduce regional cost by approximately $200 million over that time.

Genesee County officials said it was cheaper to build their own system than to continue to pay more each year to the DWSD and the proposal was about delivering the best quality water to residents in the least expensive way.

EM Ed Kurtz had been exploring options for water since his appointment in August 2012 (to replace Mike Brown).

Mayor Walling and City Council were fully supportive of the move to KWA, though under the emergency manager Act, the State Treasurer had to approve deals >$50,000.

Prior to the meeting, Treasury suggested a high-level response to media inquiries about the meeting:

Treasury officials will be meeting with Genesee County and Detroit officials tomorrow to get the details of the proposed pipeline plan. Until the ultimate costs

are known and the various studies have been conducted, the benefits to the citizens of Flint and Genesee County cannot be determined.

In December of 2012, then State Treasurer Andy Dillon requested an independent review of the KWA proposal. Consulting engineers Tucker, Young, Jackson, and Tull, Inc. conducted a review that supported the County and City preference to join KWA (I'M AWAITING A COPY OF THIS REPORT TO ENSURE ACCURACY ON THIS POINT).

In March of 2013, the City was pushing for a decision, given the need to hit tight construction season timelines/deadlines.

In late March, Kurtz submitted a resolution to join KWA to the State Treasurer. It was received on March 29, 2013. The Treasurer and DEQ staff thoroughly reviewed the resolution (Under PA 436, the Treasurer must approve contracts >$50K that were not competitively bid).

DWSD was allowed an opportunity to make a "last, best offer" to keep Flint with the DWSD.

On April 11, 2013, the Treasurer sent his approval to Flint (attached). The effective date for the approval was April 16, 2013 as a condition of the approval was Mr. Kurtz's consideration of the final DWSD offer.

On April 16, 2013, Flint EM Kurtz sent a letter to the State Treasurer, indicating that the DWSD last best offer was not sufficient (attached).

Following Mr. Kurtz announcement of the City's decision to join KWA, Treasury worked from the following talking points.

- This is a decision made by the City of Flint and its elected leaders and is a local decision that affects the local water supply.
- Flint EM Ed Kurtz kept the city's elected officials involved throughout the decision-making process and all agree this is best for the citizens and businesses in Flint.
- The change is expected to save Flint ~$100m over the next 25 years, and possibly as much as $300m.
- The Departments of Treasury and Environmental Quality have approved the financial and environmental soundness of KWA's plan.
- Flint accounts for only 2% of DWSD's capacity.

Talking Points:

The City, in conjunction with the Dept. of Environmental Quality, is working diligently...every day...to ensure Flint residents have access to clean, safe water. To that end, the City has issued an RFP soliciting expert assistance to assure the City is doing everything it needs to be doing.

The city continues to work closely with staff from the Department of Environmental Quality (DEQ) to ensure water meets safety guidelines, that water operations are managed properly, and all regulations are met.

The city is committed to addressing the issue and continues to pursue its strategy.

Background:

On December 16, 2014, the City of Flint received a violation notice from the Michigan Department of Environmental Quality (DEQ), stating the City water samples were in violation of Maximum Contaminant Levels (MCL), a violation of the Safe Drinking Water Act (PA 399 of 1976).

The DEQ considers the violation period to have begun December 1, 2014. The violation was triggered when water sample reports showed that the City's water quality, on average, exceed the total allowable level of *Disinfection Byproducts* during the first three quarters of 2014. Further, four of the City's eight water sample site locations individually exceeded allowable MCL levels during the same period of 2014.

These conditions are considered a Tier 2 violation and, as a result, the City was required to notify the public of these contamination levels by January 10, 2015 (which was done) and continue to notify them every three months until the violation is resolved.

The City outlined some potential remedies to the problem in its initial Operational Evaluation Report, dated November 26, 2014. These potential remedies are intended to be implemented in stages. Stage 1 consists of actions that can be implemented without any new construction within the distribution system and are due to be implemented by early March 2015.

- Troubleshooting of the ozone system.
- Implementation of different testing methods.
- Operational changes at the Water Treatment Plant.
- Increase water main flushing efforts to minimize stagnant water.
- Identify areas with high water age and implement preemptive measures.

The City will be providing additional potential solutions when it updates the Operational Evaluation Report, which must be submitted to the DEQ by March 1, 2015.

To date, the City has taken the following actions:

As an integral part of the transition to the Flint River on a temporary basis, the MDEQ was consulted about the City's plans, and ultimately issued necessary permits to proceed. The City also engaged the services of the LAN engineering firm to guide the city in installing the necessary equipment to treat the water on an ongoing basis. This resulted in the development of a comprehensive drinking water plan.

The City monitors its water quality on a daily basis to assure that water quality remains within established guidelines. With the variances in water temperature and the leakage and infiltration problems arising as the result of failure of parts of the distribution system, water quality did exceed, for a time, some of the established guidelines. This resulted in the issuance of the recent notices to the public.

Efforts taken to address non-compliance included increasing water flow through valve replacements and hydrant flushing and optimizing treatment processes.

The City has committed to increasing communication with the public in order to inform water users factually of the issues which have arisen, to alleviate unnecessary concern and to identify steps being taken to address the issues. This is being implemented through detailed educational materials being made available both online and at City Hall, as well as through public informational meetings. Additionally, a full Water System Questions and Answers document is available online.

Additional information:

State and city officials have said exposure to TTHM is a long-term concern for some if they drink water with elevated TTHM for several decades.

Notices indicated that Flint water is safe to drink but warns those with a "severely compromised immune systems or who are elderly" may be at increased risk and should seek advice about drinking water from your health care provider.

The city and county are partners in the Karegnondi Water Authority, which is building a pipeline to Lake Huron to bring lake water here for use by the end of 2016.

Returning to DWSD would add approximately $1 million (monthly) to the City expenses.

Stanton, Terry A. (Treasury)

From:	Wurfel, Brad (DEQ)

Cc:	Silfven, Ken (GOV); Wyant, Dan (DEQ); Datema, Maggie (DEQ)
Subject:	DEQ Flint Backgrounder / talking points

Terry, all good and thanks for working these up. Been rebriefed by our staff, so let me throw in some things that are pertinent from that point.

Following the formal approval of Flint into the KWA, DWSD sent Flint a letter saying their contract was thereby terminated (early 2013).
According to our folks, Genesee County has been using DWSD water without a contract since May 2014. But Flint took the letter to imply a water cutoff, and promptly turned to DEQ with a proposal to use the Flint River (their historic backup system).

This proposed shift put the city in the business of water production, where they historically had been in the business of water transmission. DEQ approved the use of the river as a source, based on the treatment plant's past performance as a standby facility and the improvements needed prior to switchover. Several municipalities around the state use surface water supplies (rivers): Blissfield near Monroe, Manistique, and Alma to name a few.

The city completed the upgrades at the water plant the facility and DEQ approved it April 2014.

There were some initial hiccups. Last summer, there were a couple of 'boil water' notices issued. One for a water test that showed e. coli, one for a break in the water main.

The challenge to using the Flint River as a source is that the condition of the water is variable and changes with season and weather. It has substantially more organic matter than deep lake sources like Lake Huron. This organic matter is mobilized by high water events, and warm weather also can account for more organic material in the water.

The treatment of the organic matter is done with chlorine. One might conclude that the perennial answer is just to use more chlorine to achieve water safety. However, at some point on the continuum, the chlorine and organic matter create TTHM – total trihalomethanes – as a byproduct. When the standard for those is exceeded over several consecutive quarters of testing, the supply is required by law to issue public notice and submit an approved plan for addressing the situation.

You'll note that this regulatory approach means TTHM testing is done quarterly. That means people who use the system are exposed to TTHM for several months before the public notice is required. It's because TTHM is a chronic health threat. Over the long term (measured in decades), continued exposure can contribute to some known health problems. Put in context, the EPA (who established the standard and the rule) estimates this rule prevents an estimated 280 bladder cancer cases each year ... out of more than 330 million people who use public water supplies around the country.

It's not nothing. State and federal law requires quarterly testing for TTHM and that the public be informed of it when the annual average of four quarters' worth of consecutive testing shows TTHM levels exceeding 80 parts per billion. Flint's results managed to exceed the annual average in three quarters, and they must develop a plan to address it. But it's not like an eminent threat to public health. Unlike an e. Coli or even total coliform bacteria maximum contaminant level, which require immediate public notification and response and are part of daily / hourly testing of public water supplies, TTHMs pose a public health concern with chronic, long-term exposure.

It's clear the nature of the threat was communicated poorly. It's also clear that folks in Flint are concerned about other aspects of their water – taste, smell and color being among the top complaints.

The Safe Drinking Water Act requires public water supplies be tested for more than 90 regulated contaminants, including microbial contaminants. The act, and the program here in Michigan, work to ensure that water is safe to drink. The act does not regulate aesthetic values of water. Here are some factors affecting the aesthetics of water in Flint.

1. It's the Flint River. The water supplied by DWSD historically came from Lake Huron. It's softer. With hard water, you get a different flavor and feel. It's why General Motors suspended use of Flint Water – it was rusting their parts. Also, there's the 'organics' factor (discussed previously).

2. The system is old. Flint has more than 500 miles of water pipes. More than half of those pipe miles are more than 75 years old. Much of it is cast iron. Hard water can react with cast iron and exacerbates the rusty factor, which creates that brown water that angry residents were holding up in jugs for the media cameras last week. Valve failure has also been a key challenge. The system has an estimated 7,500+ valves. When they stick open or stick shut, it affects the hydraulics of the system and increase areas of stagnation. The city has a backlog of valves that need to be addressed. They've done half a dozen or so since November.

3. Flint is old. Many of the homes served by the system are old. Brown water complaints may also be attributable to cast iron pipes in customers' service connection to the city lines. The DEQ has been encouraging people with water coloration concerns to contact the city and see whether it is the service line or the City's line causing the issue. Again, discoloration is not an indicator of water quality or water safety, but we recognize that nobody likes it.

In summary, the City of Flint has tremendous need to address its water delivery system. We are not aware that they have any Capital Improvement funds for preventative maintenance in place, much less line replacement project monies that will require hundreds of millions. The City was approved for a Revolving Fund loan in 2008 or 2009. As a Distressed Community, they qualified for flexible terms and 2 percent interest rate Revolving Fund Loan. After they were notified they were approved for the loan, they declined it. Previous SRF loans from the state to Flint bear an outstanding balance of $20.7 million today.

The DEQ continues working with the city to address the TTHM issue. They can take interim steps – from scrubbing the insides of transmission lines to carefully monitoring the hydraulic challenges in their system – to address customers' aesthetic concerns. Their TTHM numbers already are showing dramatic improvement; the November testing showed only one of seven sample points exceeding the standard. The key now is that the standard is an average of three quarters' worth of results. It will be some time before they are officially "not in violation." However, depending on weather in 2015, it's not unforeseeable that we will be having this conversation again by next Christmas.

The key to the conversation is that TTHM is not a top health concern. That's key because residents need to understand TTHM in context, and it is key because it appears the mayor has seized on the public panic (sparked, frankly, by their poor communication of the violation notice) to ask the state for loan forgiveness and more money for their infrastructure improvement.

Another key thing to remember is that once the city connects to the new KWA system in 2016, this issue will fade in the rearview.

Until then, our top messages:

1. The DEQ Drinking Water program works with communities around the state to ensure that municipalities provide customers with clean, safe drinking water.
2. Municipal water supplies are tested rigorously and regularly for more than 90 regulated contaminants, including microbial contaminants that pose an immediate public health concern.
3. Flint's exceedance of the TTHM standard should reassure residents that the testing program is effective.

4. TTHM is not an immediate health threat. It is a chronic concern, one that can be problematic over the course of several decades of exposure. The public was notified because the law requires the city to make public notification, so that everyone can make informed decisions. This is particularly true for people with infants or those with compromised immune systems.
5. The DEQ is working with the City to address the situation. Recent tests show the TTHM numbers dropping rapidly. The department will continue working with the city in the months ahead, and residents should feel confident that their water is safe to drink unless the DEQ or City notifies them otherwise.
6. The discoloration and odor issues some Flint residents are experiencing are separate issues from the TTHM issue. TTHM is odorless, colorless and measured in parts per billion.
7. Flint water customers who have questions or concerns about their water should first contact the city to get answers and help. They also can contact the Michigan DEQ at ********** (web or phone address?)

INVITATION TO BID

OWNER:

THE CITY OF FLINT
DEPARTMENT OF PURCHASES AND SUPPLIES
1101 S. SAGINAW ST., 3RD FLOOR
FLINT, MI 48502

PROPOSAL NO.: 15-573

SCOPE OF WORK:

The City of Flint (The City), Department of Purchases & Supplies, is soliciting sealed proposals for the following:

Water Quality Consultant

per the attached specification.

If your firm is interested in providing the requested services, please submit 1 original and 2 copies of your detailed proposal to the City of Flint, Department of Purchases and Supplies, 1101 S. Saginaw St. Rm. 304, Third Floor, Flint, MI, 48502, by **Monday, January 26, 2015 @ 12:00 PM (EST)**. Please note: all detailed proposals received after 12:00 PM (EST) will not be considered. Faxed proposals into the Purchasing Department are not accepted.

The City of Flint may hold proposals for a period of 120 days from opening, for the purpose of reviewing the results and investigating the qualifications of proposals prior to making an award. The City of Flint reserves the right to waive any irregularities and accept or reject any or all proposals submitted. Vendors located within the corporate city limits of Flint, Michigan may be given a seven percent (7%) competitive price advantage. Additionally, if the lowest responsible bidder is not located with the limits of the City of Flint, but is located within the county of Genesee, and said Genesee County responsible bidder does not exceed the bid of the lowest non-local bidder by more than three and one-half percent (3 ½ %), the County vendor may have a competitive advantage.

The City reserves the right to waive any irregularities and accept or reject any or all

proposals submitted.

The City is an equal opportunity employer.

The successful bidder must comply with all requirements and pay prevailing wages and fringe benefits on this project per the City's Resolution R-12 adopted 4/8/91.

Pursuant to the requirements of 1976 P.A. 453 (Michigan Civil Rights Act) and 1976 P.A. 220 (Michigan Handicapped Rights Act), the local unit and its agent agree not to discriminate against any employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment or a matter directly or indirectly related to employment because of race, color, religion, national origin, age, sex, height, weight, marital status or because of a handicap that is unrelated to the person's ability to perform the duties of nondiscrimination provision identical to this provision and binding upon any and all contractors and subcontractors. A breach of this covenant shall be regarded as a material breach of this contract.

All materials furnished must be new, of latest model and standard first grade quality, or best workmanship and design, unless otherwise expressly specified. Bidder, if required, must furnish satisfactory evidence of quality materials, offers of experimental or unproven equipment may be disregarded.

Bidder shall protect against expense of any nature, shall bear costs of any suits which arise, and shall pay all damages which may be awarded against the City for the use, under this specification, of any patented device, process, apparatus, material or invention.

Bidder is not permitted to take advantage of any obvious errors or omissions in specifications.

The City reserves the right to reject any or all bids, or split awards by items, unless otherwise stipulated, or to accept any bid which will best serve its interests.

The Director shall not knowingly accept a proposal from a vendor /contractor who is in default on the payment of taxes, licenses, fees or other monies due the City. Purchase agreements with bidders who are found to have been in default at the time of award of such agreement shall be voided.

The bidder acknowledges that by signing this document that he/she is duly authorized to make said offer on behalf of the company he/she represents and that said proposal is genuine and not sham or collusive and not made in the interests or on behalf of any person not therein named, and that he/she and said bidder have not directly induced or solicited any other person(s) or corporation to refrain from responding to this solicitation and that he/she and said bidder have not in any manner sought by collusion to secure to himself/herself and said bidder any advantage over any other bidder.

Any questions regarding this proposal should be submitted by either fax (810-766-7240) or e-mail djones@cityofflint.com by Tuesday, January 20, 2015 by 5:00 PM. Responses to any questions will be posted to the City's website under this project number no later Wednesday, January 21, 2015.

Sincerely,

Derrick F. Jones
Department of Purchases & Supplies

Enclosure

All additional proposal documents, requirements, addendums, specifications and plans/drawings (if utilized) are available on the Purchasing page of the City of Flint's web site at "http://cityofflint.spudsoftware.com/?page_id=4694" under "open bids" and the specific bid or proposal number assigned to this notice.

Background Information

On May 1, 2014 the City of Flint (the City) completed a transition to using water provided by Detroit Water and Sewer Department to drawing water from the Flint River and utilizing our plant to treat and distribute the water. In the subsequent months, many of the eight testing sites around the City were returning low chlorine residual levels and several of those sites developed into positive tests for total coliform and resulted in the issuance of boil water notices for precautionary measures. Numerous valve replacements and additional chlorination resultinged in more consistent chlorine residuals throughout the system.

Quarterly reporting to the Michigan Department of Environmental Quality (MDEQ) of Disinfectant Byproduct Levels resulted in trihalomethane levels above the maximum contaminant level (MCL). Seven of eight test sites are currently below the MCL but the annual average has triggered a violation notice from the MDEQ dated December 16, 2014. The City has worked with an engineering team to develop an Operational Evaluation Report (see Exhibit A) as required by the violation and has submitted that report to the MDEQ. The next testing period is scheduled for the middle of February 2015 and an updated Operational Evaluation report which incorporates the results of that test is due to the MDEQ no later than March 1, 2015.

The City is anticipating during the middle of 2016 to begin receiving and treating raw water from Lake Huron via the Karegnondi Water Authority (KWA). The City's Water Plant will still be capable of drawing water from the Flint River and will need to be proficient in treating both bodies of water. It is planned that the Flint River will be a permanent back-up source in providing water to the citizens of Flint.

Scope of Services

The City is seeking a consultant to review and evaluate the water treatment process and distribution system, provide recommendations to maintain compliance with both state and federal agencies, and assist in implementing accepted recommendations. The City will have the selected vendor provide reports to reflect their findings and provide continual oversight in implementing any approved recommended practices to improve the quality of water until implementation of the KWA project.

Deliverables

The City is requesting that the selected vendor provide the following reports in their order of appearance:

- Evaluation of the City's processes and procedures to maintain and improve water quality;
- Report that outlines recommendations that will improve the water treatment and distribution system.

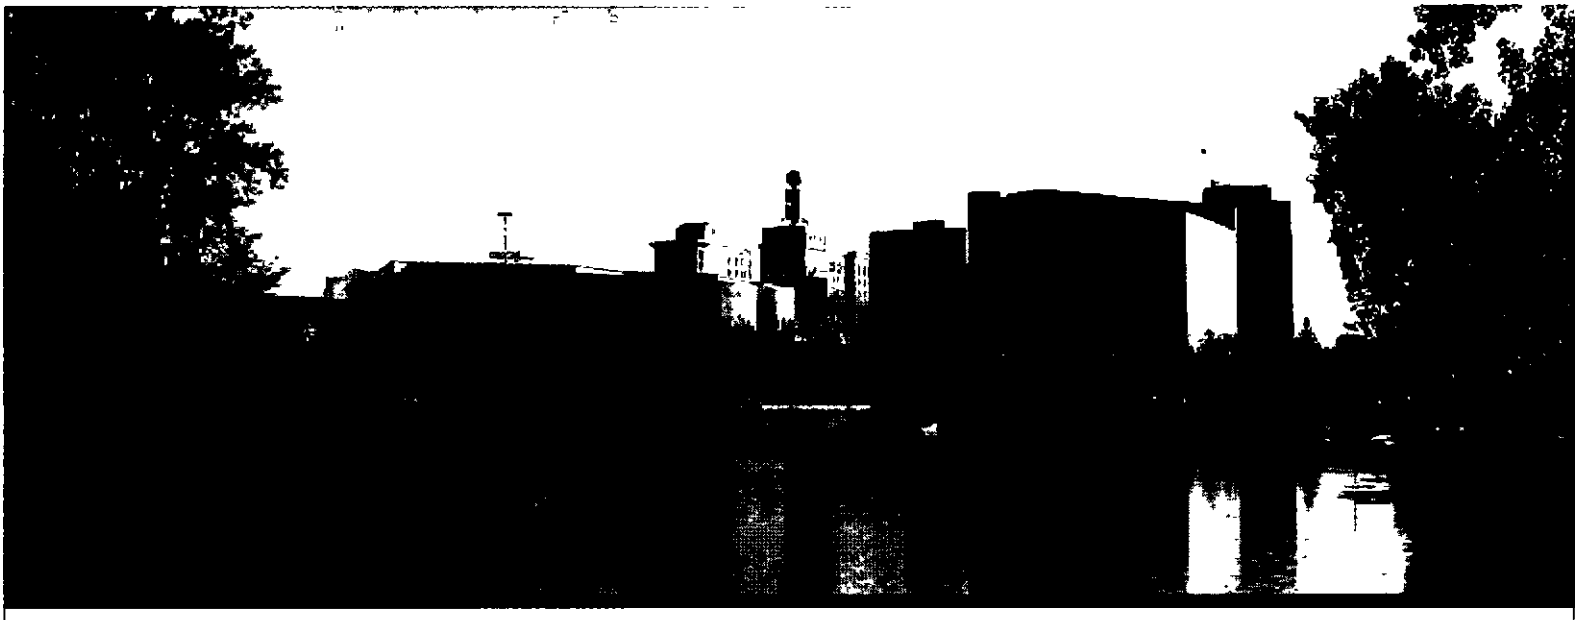
The City is requesting that the selected vendor provide coordination in implementing any selected recommendations that will result in improving the overall process of treating and distributing water until such time that the City is receiving and successfully treating Lake Huron water.

Information Required to Submit Proposal

The City has deemed this project a priority and will be requesting the selected firm to produce the requested information in an expedient manner. Firms interested in submitting a proposal based on the information requested in this document must submit the following information:

- **Company's Information**-The proposal shall list the legal name of the firm, its address and phone number, and firm's history.
- **Firm Qualifications, Experiences and References**-The proposal should state the size of the firm, personnel that will be assigned to this project, and other significant projects performed in the past five years that are similar to this request for proposal. Indicate the scope of work provided and the name and telephone number of the client.
- **Staff Experience**-The proposal should provide information on each staff member to include experience, relevant education, degrees, certifications and any other pertinent information or a resume.
- **Project Scope** – Provide a statement discussing the firm's understanding of the requested services, potential obstacles that may occur during this project, and a work plan and timeline in preparing and submitting the requested deliverables.
- **Price for Services**-Vendor is to provide a pricing schedule to perform the requested services. Pricing should include a lump sum to provide the requested reports, an hourly rate schedule of personnel that will be utilized to perform the requested services, and a detail timeline that articulate the completion of the requested reports.
- **Other**-Please include any other information that you think would be helpful in allowing the

City to make an informed decision in the selection process.



Submitted to:

City of Flint, Michigan
Department of Purchases & Supplies

Response to Invitation to Bid

Water Quality Consultant

Proposal No.: 15-573

January 29, 2015

VEOLIA

January 29, 2015

Mr. Derrick F. Jones
Purchasing Manager
City of Flint
Department of Purchases and Supplies
1101 S. Saginaw Street, Room 304, Third Floor
Flint, Michigan 48502

Subject: **Response to Invitation to Bid – Proposal No.: 15-573**
Water Quality Consultant

Dear Mr. Jones:

In response to your Request for Bid/Proposal (RFP), **Veolia Water North America Operating Services, LLC** (Veolia) is pleased to have the opportunity to provide this letter submittal. We have prepared a response that is focused on providing the **City of Flint** with a complete solution to address the immediate reliability and operational needs of your water system throughout your continuous operations – whether under the current draw from Flint River or future draw from Lake Huron.

In reviewing the challenges that the City of Flint is facing, we present a longer-term approach for the Operational Evaluation Report, which involves implementation and monitoring through 2016 and the transition to Lake Huron supply. Our commitment to the City of Flint is to make sure the utility can identify the immediate issues through the proposed report, and also secure its future by addressing and fixing these issues identified in the report, build capacity for the future, and better manage the change in water sources in 2016.

Depending on the City's preference, Veolia's expertise to reinforce operations is available to Flint through performance advisory services using our innovative Peer Performance Solutions (PPS), or through longer-term contract operation and maintenance (O&M) type services. Both approaches are designed to help the City of Flint benefit from operational reliability and utility-wide efficiencies.

With the PPS approach, Veolia addresses fundamental issues from the ground-up to deliver improved reliability, compliance and efficiencies for major water and wastewater agencies. Under this model, our Subject Matter Experts (SMEs) would work in collaboration with the City's management team, your line managers and your operators to develop the path forward that suits your needs – both now and into the future. Over the course of this process the City remains in control of all levels of management at all times and benefits from Veolia's expertise through the support of a small team of on-site experts, who in turn can access the rest of our company's worldwide resources.

Veolia's PPS approach is highly data-driven to identify and implement cost savings and deliver utility optimization and organizational best practices. One key example of this model at work is in our ongoing contract with the Pittsburgh Water & Sewer Authority (PWSA). That partnership began in 2012 and was just (this past month) extended for a new term. Working with PWSA, Veolia is implementing a long-term strategy to improve water quality and customer service, increase efficiency, and overcome financial challenges.

PWSA serves the needs of more than 310,000 people in the greater Pittsburgh area, and Veolia assisted them in realizing more than $5.5 million annually in recurring revenue and efficiencies. This involved working with PWSA to establish a Distribution System Optimization Plan with the State of Pennsylvania, to implement a Process Control Management Plan at their water treatment plant, to identify early warnings for non-compliance trends, to update their laboratory Quality Control/Quality Assurance (QA/QC) program, to initiate performance monitoring methods, and to initiate the use of compliance metrics in order to improve relationships with regulatory agencies. We also implemented a Community Outreach Program to improve the public's perception of PWSA and create positive media attention for the agency.

Veolia is also applying the PPS model for New York City's water and wastewater operations. Under a contract that began in 2011, Veolia has reviewed all aspects of that utility's practices to assess potential improvements. Working collaboratively with the City's water and wastewater operators and managers, Veolia focused on areas including: chemical use and pricing; labor productivity; inventory management; sludge process optimization; and overall O&M activities. Under this approach, our firm identified opportunities that are expected to yield annual recurring financial benefits of more than $100 million by 2016 -- to date, more than $90 million in savings and revenue enhancements have been reported by New York City.

The highly collaborative PPS partnership model evolved as an alternative to Veolia's traditional O&M services delivery approach, an approach that our firm first applied over 42 years ago under the first municipal contract operations partnership in the U.S. – an ongoing partnership with the City of Burlingame, California. Today, our firm continues to use this model to provide water and wastewater services to over 160 municipal clients. To demonstrate the depth of our firm's award-winning experience in the operation of surface water plants we have included a list of Veolia-operated plants as an attachment to this letter. Veolia's contract operations services are also available to Flint, as an alternative to PPS.

In the remainder of this letter, we outline our approach to: providing immediate assistance related to the review and evaluation of the water treatment process and distribution system; development of recommendations and a report for maintaining compliance with both State of Michigan and federal agencies; and assistance in implementing accepted recommendations from the report. The report that Veolia would develop for the City would outline findings and provide recommendations for continual oversight of the approved recommended practices to improve the quality of water until the implementation of the Karegnondi Water Authority (KWA) project.

Veolia's Understanding and Proposed Approach to Providing the Water Quality Consultant Scope

Our longer-term approach would begin by addressing the immediate assistance outlined in your RFP, and then service beyond that scope. Under this expanded scope, Veolia would help with the transition from the Flint River source to Lake Huron water to avoid a repeat of this scenario. That transition is expected to be in place in 2016 and will complete the City's transition from using water provided by the Detroit Water and Sewerage Department (DWSD) to drawing water from the Flint River, using the City-owned water plant.

With a Notice of Proceed issued, Veolia would mobilize a team of experts, including our two prominent water SMEs, from our corporate Technical Services Group (an in-house team of technical and management experts that support the company's projects and operations throughout North America). These experts would include:

- **Marvin Gnagy, P.E. - Water Process and Quality Manager** – He has more than 37 years of water quality management experience, and is a certified Water Operator in Ohio and a registered Professional Engineer. Mr. Gnagy has completed projects that have involved the set of tasks that the City as defined under this contract, and was most recently engaged as a part of a Veolia team of experts that worked with DWSD and the City of Detroit on a program to evaluate their water and wastewater operations and proposed solutions. This included conducting an intensive due diligence examination of Detroit's water and wastewater facilities and operations, and the development of two reports, a Peer Review Report, which looked at the current operations with a focus on identifying immediate and long term needs, and a Transition Plan: Retail Services for the City of Detroit, which outlined the issues facing the DWSD and the City as the water and wastewater operations changed under a new regionalization approach. Through that work, Mr. Gnagy understands the City of Flint's drivers for this new project, and will be able to use the work that Veolia has done to date for the DWSD to aid in identifying the optimal solution for your water system and the transition from DWSD to your own operations.

  Mr. Gnagy's background and key experience that relates directly to the work scope outlined for Water Quality Consultant tasks includes:

  - River Water & Groundwater Treatment and Disinfection Byproducts (DBP) Reduction – Mr. Gnagy has very broad experience with both river water and groundwater treatment on project work involving unit process design and operations to meet drinking water standards and water quality goals. Indeed, he has

conducted numerous studies involving DBP (particularly THM) reduction to meet drinking water standards, establishing treatment alternatives and process targets for THM compliance solutions.

- Master Plan Development and Unit Process Improvements – Mr. Gnagy prepared the master plan and performed plant evaluations for unit process improvements to meet future drinking water standards for the City of Adrian, Michigan's10-MGD water treatment plant. That plan discussed multiple options for process improvements and chemical feed adjustments, specifically targeted for THM control treatment. Jar testing was used to define the chemical dosing and treatment scheme that resulted in the most effective THM reduction solution for the city. He also served as Project Manager for a DBP Reduction Study for the City of Akron, Ohio's 67-MGD water supply plant. That study reviewed jar testing evaluations and historical monitoring records to develop the necessary treatment process adjustments to effectively reduce THMs in the drinking water. Computer models were developed using the data obtained to predict the chemical treatment needs based on source water quality, and to predict THM concentrations following treatment adjustments using the chemical treatments selected. Recommendations included chemical feed adjustments and further study related to advanced treatment technologies.

  Other work in this area included serving as the Project Manager for an optimization study for the Village of Blissfield, Michigan's 2.2-MGD water treatment plant to determine needs for improved turbidity and THM concentrations. All major unit processes and chemical feed systems were evaluated for optimal treatment needs. Jar testing and plant operating adjustments were made weekly to improve water quality and process control. Implementation of organics control treatment was accomplished that successfully achieved compliance with both the turbidity and THM compliance requirements.

  Mr. Gnagy also conducted plant reviews, performed process design changes, designed new flocculation equipment replacements, and designed and started-up new washwater handling operations for several of DWSD's water treatment plants. That worked involved three plants, the Southwest, Lake Huron and Springwells water plants, and focused on improving operations and to meet drinking water compliance.

A full resume for Mr. Gnagy is provided as an attachment at the end of this letter.

- **Theping Chen, P.E. - Process and Operations Optimization Manager** - He has close to 30 years of water engineering, operations and research experience, and he spent 15 years as a water consulting engineer in Michigan and is a registered Professional Engineer in the State of Michigan. Mr. Chen's experience includes working with DWSD on various projects related to master plan, source water protection, water quality management, treatment process optimizations including PAC and ozone design criteria development, taste and odor control, residual management and capital improvement program development. He has also worked extensively with the Michigan Department of Environmental Quality (MDEQ) on compliance issues with focus on water quality compliance, and is a well-published author at the national and state level conferences.

  With Veolia, Mr. Chen has been engaged in supporting the ongoing operations and management contract for the City of Buffalo, New York's water operations, and in providing technical support for Veolia's water plant operations at the cities of Gloucester and Brockton, Massachusetts; with that work including jar testing evaluation and compliance strategies development for DBPs.

  Mr. Chen's background and key experience that relates directly to the work scope outlined for Water Quality Consultant tasks includes:

  - River Water and Groundwater Treatment – Mr. Chen has broad experience with both river water and groundwater softening treatment on projects including: on-call engineering, comprehensive needs assessment, filter and chemical system rehabilitation projects for the City of Marion, Ohio's 9.1-MGD water treatment plant (treating combined groundwater and river source water), under a scope of work that involved investigating DBP control strategies and conceptual design of a UV treatment system; a comprehensive regulatory review and capacity evaluation for the City of Dayton, Ohio's two groundwater water treatment plants (96-MGD each); and a comprehensive disinfection and DBPs compliance strategy review for the City of Ann Arbor, Michigan's water treatment plant (a combined surface and groundwater softening plant with at rated capacity of 27-MGD) as part of an overall Water Master Plan project.

- Ozone and Disinfection Technologies - His experience in this area included completing ozone system study, design, construction management and optimization projects for more than 10 municipal water treatment plants.
- DBP Compliance – Mr. Chen's experience in this area includes: optimizing and upgrading ozone systems, and proposing the use of biological filtration to enhance the TOC removal to control DBPs for the City of Shreveport, Louisiana's water treatment plant; optimizing chlorination application, conducting a review of contact time calculation to minimize DBP formation, and proposing UV system upgrades for the City of Marion, Ohio's water treatment plant; evaluating a commercial (self-fabricated) aeration system for installation in elevated and ground-level water storage tanks to reduce the hot spots in Northern Kentucky water treatment plant's water distribution system; and development of tracer test program to calibrate the water quality model for the City of Akron, Ohio.

A full resume for Mr. Chen is provided as an attachment to this letter.

These staff will be responsible for delivering on the immediate tasks that the City has defined:

- Reviewing and evaluating the City's water treatment process and distribution system. This will include evaluating the City's processes and procedures to maintain and improve water quality.
- Developing a report on the finding of the evaluation, with specific recommendations to maintain compliance with both State of Michigan and federal agencies. This will include outlining recommendations that will improve the water treatment and distribution system.
- Assisting the City in implementing accepted recommendations. This will include providing continual oversight and support for the implementation of any approved recommended practices. Recommendations will focus on those areas that will improve the overall process of treating and distributing water, including improvements to water quality until the implementation of the KWA project (anticipated to be by mid-2016) under which the City will be receiving and treating Lake Huron water.

In addition to Mr. Gnagy and Mr. Chen, our core staff group, would be assisted by other technical, operations, management and communications experts from Veolia to proceed promptly into implementation simultaneously.

We believe that addressing the fundamental issues concerning water quality compliance and operational reliability is much more complex than the recommendations study and advisory services approach outlined in your RFP.

We want to ensure that the utility can fix these immediate issues effectively and without delays, while at the same helping the City to begin to build capacity for the future and better manage the 2016 water source change in a systematic way – with all the relevant stakeholders engaged along the way.

In undertaking these tasks, Veolia understands that in 2014 the City completed the transition from using water provided by DWSD to drawing water from the Flint River – utilizing your own water plant to treat and distribute water to those served by your system. Since that transition process was completed, it was found that many of the City's eight water quality testing sites exhibited low chlorine residual levels, and several of those sites developed had positive tests for total coliform, which resulted in issuance of boil water notices for precautionary measures. To address this, the City implemented valve replacements and additional chlorination that yielded consistent chlorine residuals throughout the system. However, quarterly reporting to the MDEQ of Disinfectant Byproduct Levels resulted in trihalomethane levels above the maximum contaminant level (MCL), with an annual average level that triggered a violation notice from the MDEQ.

To date the City, working with an outside engineering team, developed and submitted to the MDEQ an Operational Evaluation Report. The next testing period is scheduled for the middle of February and an update to this report will be required by March 1, 2015. That update will incorporate the results of the tests required by the MDEQ.

The City is expecting to work with the selected Water Quality Consultant to complete the required testing and prepare the updated Operational Evaluation Report. As a secondary element of this task, the City is seeking to retain the selected Consultant to aid in the implementation of these suggestions.

Veolia excels at the day-to-day operation issues and understands how to fix them using diverse and subject matter expertise in a structured, bottom-up type, staff engagement process. That is why we designed the PPS approach to help convert the report findings into actionable items for the City of Flint's staff and then help them implement those changes. This would involves making sure that your staff understand why changes are being made, ensuring that they have the training necessary to make the changes, and then following up to be certain what is planned works or if not then provide help making adjustments. This will involve also a monitoring process to make certain the changes are on track for management and the public.

All of this can then be used to help the City to be prepared to begin receiving and treating raw water from Lake Huron through the KWA. The end goal of this process will be to develop within the City's staff a better understanding and capability to handle the changes in water, whether drawing water from the City of Flint's or the new KWA supply sources.

Veolia's Anticipated Level of Effort

In order to respond to the immediate needs of your defined scope of work, we anticipate mobilizing a team of technical, operations, maintenance and communications SMEs to: calibrate daily water quality samples with the City's hydraulic model; refine the operational strategies for the plant and distribution system; coordinate daily efforts across plant, operations and maintenance staff; and to alleviate continued concerns from the public through a public communications process. The elements of this approach would be delivered under a management and staffing approach which allows for collaboration between the City and Veolia's technical and management team.

For purposes of the scope of services outlined in the City's RFP, Veolia's core staff would be charged at a common rate of $225/hour, plus expenses.

For the longer-term type of approach, Veolia would set a single lump sum price for the study, implementation and long term services after review and discussion with the City on selecting your preferred approach – the PPS approach or the contract O&M approach. At that time, we can also explore an incentive-based (risk/reward) type of approach, one which is common under PPS contracts, where Veolia's fee is based on achieving performance targets that we would mutually agree upon. As demonstrated in our work with water and wastewater clients, Veolia's PPS model has provided great insight into working with large utility staffs to change the culture and ensure implementation of ideas that improve the utility's performance.

The methodology for implementing a PPS approach, as outlined on Figure 1 (below), includes each of the following steps:

- Preparation – This stage involves the mobilization of resources (Veolia and the City), a joint project kickoff meeting (Veolia and the City), development and implementation of a communications plan (Veolia and the

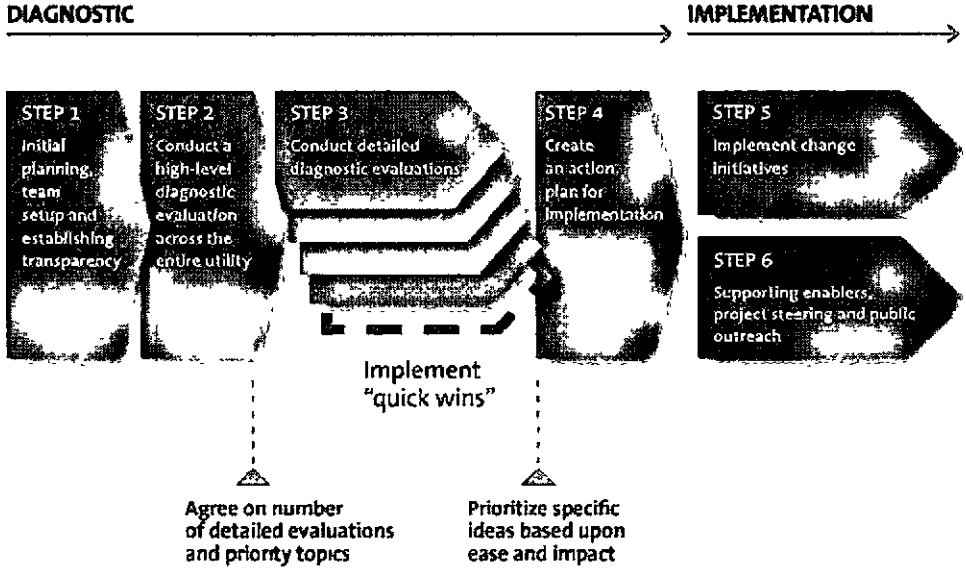

Figure 1. Veolia Peer Performance Solutions (PPS) – Service Delivery Model

City), and data collection (Veolia). The City and its consultants have already done a lot of work on the problem and are achieving some success.

- Top-down Analysis – This stage involves data analysis, benchmarking, field observations, interviews and idea generation workshops. This would be done to assure how effective current changes have been and if there are any additional actions to be taken.
- Bottom-up Analysis – This stage involves detailed analysis and modeling of the available options, working in collaboration with the City's management team and staff.
- Action Plan – This stage involves defining specific steps for a recommendation based on the actual, current state and desired state performance of an asset.
- Plan and Report – This stage involves the final development and delivery of a written report summarizing findings and presenting analyses and recommendations

These actions are what we would provide during the study phase of the project, and the following actions are what we would do to implement study recommendations

- Implementation – Putting plans into action. This involves working with O&M and management staff to carry out the proposed plan. This effort I focused on building capacity and confidence within the staff to solve the problem.
- Monitoring and Repeat – Monitoring the process and then repeating it, digging even deeper into the organization for additional savings and improvements.

Using this type of plan and approach, Veolia can address the immediate scope/needs defined for the Water Quality Consultant task, and work with the City of Flint to provide a long-term and sustainable approach for the needs of your water treatment and supply system.

Addressing the Requirements of the Invitation for Bid

Veolia recognizes that we are submitting this Proposal as an alternative approach for the City of Flint to consider within the procurement process that you have defined, and in that regard we are providing the other specific information that your have requested as part of the formal RFP response, including:

- Company's Information – Veolia Water North America Operating Services, LLC is the respondent, and the contact information for our firm is as follows: Veolia - 101 West Washington Street, Suite 1400 East, Indianapolis, IN 46204 - Telephone: 317/917-3700
- Firm Background and History – Veolia is a company that traces our history in providing operations and related services to municipal clients back more than 42 years. Today our firm ranks as the leader in the delivery of O&M and related services, including those under the PPS model. This include serving as the operator and manager of over 180 municipal wastewater systems (processing over 1.66 billion gallons a day of flow) and some 90 municipal water systems (providing over 715 million gallons a day of water).

Today, Veolia ranks grown as the leading water services provider in North American market, with more projects, operations, resources, expertise and demonstrated success than any other services provider. This record of performance and market leadership is affirmed in the most recent survey from the publication Public Works Financing (opposite), which shows Veolia's better than 40% market share, with revenues and a renewal rate that lead the industry. What these market leading indicators serve to show is that we can meet the standards of experience and capabilities that the City of Flint is requiring under this new contract.

Water operators ranked by 2013 revenues

- Firm Qualifications, Experiences and References - Like the City of Flint, we are at our core utility managers and service providers, and Veolia understands the need for high quality, efficient service and dependable reliability. We also work with communities like yours to deliver services under a variety of contract models, each focused on providing our municipal partners with the best value under a long-term and sustainable approach and customized to their objectives. Figure 2, above, outlines our experience with various service delivery models, each of which involves working with clients to develop a customized approach to meet their particular needs and objectives. This table also shows the key advantages of each type of service delivery approach, with **green** being optimal in terms of ease of execution and delivery and **red** being the most challenging and complicated in terms of delivery. This table also highlights example projects where our firm has successfully delivered each of these approaches (and many of those are highlighted under the reference projects section of this letter). What this table also shows is that Veolia can offer alternative transaction structures, including long-term lease, concession arrangement or sale/purchase.

  As we discussed above, Veolia currently operates and manages 90 municipal water systems (providing over 715 million gallons a day of water); at the end of this letter we have provided a summary table of this experience.

  Following here we provide some of the specific clients/projects as the core references that we are submitting for the City of Flint's consideration:

  - **Pittsburgh Water and Sewer Authority (PWSA), Pittsburgh, Pennsylvania** - The PWSA's Board of Directors unanimously selected Veolia in 2011 to deliver an innovative approach to managing the system, provide measurable results to customers and demonstrate an ability to quickly and easily collaborate with employees. In 2014, this management assistance/PPS contract was extended for a new term, recognizing the success of the effort to date.

    Since the beginning of this partnership, Veolia has assisted the PWSA in realizing more than $5.5 million in annually recurring revenue and efficiencies.

    PWSA provides water and sewer services to 310,000 people in the City of Pittsburgh and surrounding areas. The agency hired Veolia to: 1) provide interim executive management services, leading 270 public employees in the delivery of water and wastewater services in the greater Pittsburgh area; and, 2) conduct a study to identify ways to cut costs and improve service. Under a management assistance scope, Veolia has worked with the PWSA to establish financial controls that limit spending and increase accountability, foster competition among companies seeking to do business with and on behalf of the PWSA, and identify opportunities for operational efficiencies having a direct impact on the utility's bottom line.

Under this contract, Veolia's management team is integrated into PWSA's organization to manage the agency's staff at their offices and operations sites, while another team of experts jointly identifies and evaluates improvement opportunities. This joint effort aims to help the PWSA improve the utility's customer service and performance levels.

Veolia in North America – Experience Profile

- 188 Municipal and Commercial Clients
  - 90 Municipal Water Treatment Facilities
    - 2,952 Miles of Distribution System Lines
    - 87 Water Pump Stations
    - 171 Water Wells
  - 183 Municipal Wastewater Treatment Facilities
    - 5,286 Miles of Collection System Lines
    - 1,158 Wastewater Pump Stations
    - 31 Industrial Pretreatment Programs
  - 13 Billing/Collection Operations
  - 23 Meter Reading Operations - 147,399 Meters Read
  - 4 Public Works Operations (other than Water/Wastewater)
  - 6 Operations Assistance/Peer Performance Solutions Projects
  - 53 Energy Installations (owned/operated/managed)
    - 631.6 MW of Energy Generation/Supply Capacity
    - 290,394 tons per day of Chilled Water Capacity
    - 443 MMBTU/hour Total Hot Water Capacity
    - 13.2 million pounds/hour of Total Steam Capacity
- 95 Industrial Clients
  - 60 Industrial Wastewater Treatment Facilities
  - 23 Industrial Water Treatment Facilities
- 913.3 Million Gallons Water Treated Daily
- 1.7 Billion Gallons Wastewater Treated Daily
- 293,089 Dry Tons of Biosolids Processed/Year
- 19.2 Million+ Population Served Daily

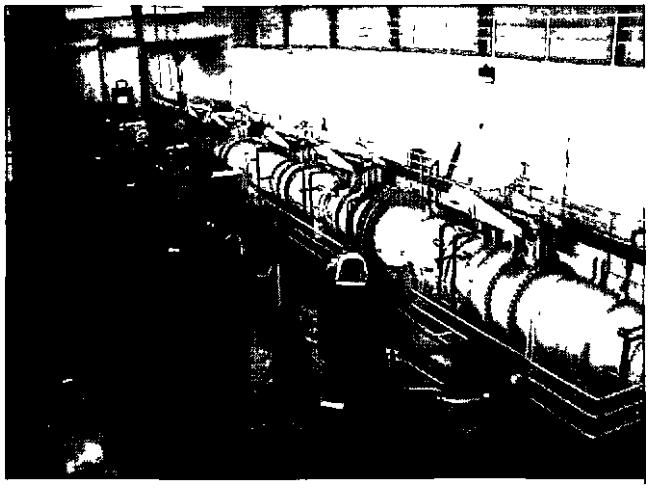
The study phase of this project (Phase 1) was completed, and that work effort helped PWSA improve the customer service and performance levels by utilizing in-depth diagnostics of current operations. Veolia also developed recommendations for improvement that were approved by the PWSA board, and we are now supporting PWSA employees in implementing initiatives aimed at reaching new performance metrics. The Phase 1 report identified measures that will lead to annually recurring savings. During the partnership's first year, a team of water and wastewater experts from Veolia helped PWSA improve the utility's customer service and performance levels by conducting in-depth diagnostics of current operations, developing recommendations for improvement and supporting PWSA employees in implementing initiatives aimed at reaching new performance metrics. The analysis and resulting operational changes helped PWSA reduce its cost of operations and increase the utility's revenue by, among other things, re-securing a large commercial customer. The total impact of these changes has allowed the PWSA to approve an annual budget without a water rate increase.

Early quick-wins under Phase 1 work for this project involved optimizing water production run-times at the membrane plant, which will reduce chemical costs by $350,000 annually, and implementing enhancements at the customer service call center that slashed the call-abandonment rate almost immediately and reduced customer call waiting time by half. A key focus of the work is on identifying efficiencies in O&M practices for over $3 billion in above- and below-ground infrastructure that serves the water and sewer conveyance needs of customers across 54 square miles. The initial tasks in this area involved working with the PWSA's managers and staff to meet Consent Decree (CD) obligations to state and county regulators. Under this initiative, Veolia's management and support teams worked to organize the department and create a culture of responsibility and accountability for the success or failure of projects. Veolia also worked with the PWSA's local and national engineering consultants and contractors to get them back on schedule, clearing a backlog of potentially litigious disputes, which allowed projects to move forward. Other tasks included working on the feasibility of creating a stormwater authority to better assess stormwater usage and create additional revenue for increased levels of service. Additionally, Veolia assisted with the planning for a more than $150 million Capital Improvement Program (CIP) covering three years. This initial program addressed the PWSA's most critical infrastructure needs. The underground (water and sewer) pipelines in Pittsburgh are 80 to 100 years old and winter line breaks are a constant occurrence, so the PWSA is continually replacing underground assets.

Throughout these efforts, Veolia's Pittsburgh-based team worked side-by-side with the PWSA's staff, helping them execute the utility-approved initiatives and training them to sustain the work after the work of this partnership is complete.

- Client Reference: Alex Thomson, Chairman of the Board, PWSA c/o Houston Harbaugh, P.C. - Three Gateway Center, 401 Liberty Avenue, 22nd Floor, Pittsburgh, PA 15222 - Telephone: 412/281-5060 - Email: athomson@hh-law.com

- **City of Buffalo, New York** - In 2010, Veolia began a 10-year partnership with the City for O&M of their water supply system which serves more than 77,000 customer accounts. This is the largest water system under contract O&M in New York State, with facilities and operations that include: a 160-MGD surface water treatment plant; 814 miles of water distribution system, customer service management (meter reading, billing and collections); capital program management; and underground asset management (UGAM) and above-ground asset management programs.



"The Buffalo Water Board... is confident that we have selected the best operator for our system ... Veolia Water's demonstrated focus on service has convinced us that our long-term partnership will result in notable advances ... We expect Veolia Water to move us forward through the next decade with marked efficiency improvements and technological advances while maintaining our exceptional water quality."
– Oluwole McFoy, Chairperson, Buffalo Water Board
Speaking at the start of the contract in 2010.

  In additional, Buffalo was one of the first cities in the U.S. to use the Veolia North American Meter Testing Facility. Under that approach, some 400 meters from the City have been sent to the facility on an annual basis for accuracy testing and evaluation of remaining life. On average, Veolia repairs/replaces more than 3,400 meters annually in Buffalo, and customer service metrics involve answering up to 7,000 calls a month in one minute or less and collecting 96% of meter revenue. Some 96% of all meters in the City are true-read type, with only 4% being estimated, and over 3,000 commercial and industrial accounts in Buffalo are now on mobile-read AMR systems.

  Veolia transitioned the City's water operations to our firm under a delegated management type of contract, with the O&M staff remaining direct City employees working under supervision of Veolia's management team. Under this arrangement, Veolia has worked with the City and the staff to establish new work disciplines and procedures and to drive performance and enhance the quality of service. A core part of this effort involved establishing some 20 performance metrics to track and determine performance and accountability under this partnership.

  In the area of customer service, Veolia implemented new customer service phone/information systems and partnered with the Water Authority service center staff to implement a process of a customer service cultural change that have enhanced performance and provided a better customer experience.

  - Client Reference: O.J. McFoy, Water Board Chairperson, City of Buffalo, City Hall, 65 Niagara Street, Rm. 1101, Buffalo, NY 14202 - Telephone: 716/851-4333 - Email: omcfoy@sa.ci.buffalo.ny.us

- **Tampa Bay Water, Florida** - Veolia has worked with this agency since 2000 under multiple contracts that have focused on water treatment, storage and supply.

  Tampa Bay Water, a regional water authority, serves the needs of over 2.5 million people in the communities of Tampa and St. Petersburg, and this agency ranks as the largest wholesale treated water supplier in Florida.

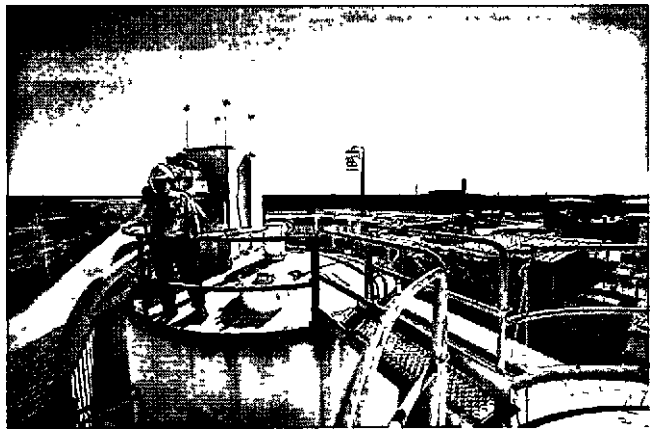
  Veolia's initial project with Tampa Bay Water began in April 2000 when, following a year-long selection process among four competitive teams, they awarded our company a $135 million, 15-year (with a 5-year option) contract to design, build and then operate a new 60-MGD Regional Surface Water Treatment Facility.

  Since that time, the Tampa Bay Water-Veolia Water Public-Private Partnership has constantly expanded over the years – a testament to the quality of our work and our client's trust and satisfaction.

Veolia's initial design-build-operated (DBO) contract was for a 66-MGD surface water treatment plant, and that was followed by additional service agreements for the maintenance of a 30-MGD groundwater treatment facility, O&M of a 15-billion reservoir, and an engineering-procurement-construction management (EPCM) type contract for a new 45-MGD hydrogen sulfide treatment plant and 20-MGD high-lift pumping station.

Tampa Bay Water also awarded Veolia Water a second DBO contract to expand (nearly doubling the size) the original surface water plant from 66-MGD to 120-MGD.

Today the Public-Private Partnership between Tampa Bay Water and Veolia Water is the largest in Florida, and the surface water treatment plant is among the most technologically sophisticated in the world.



The Public-Private Partnership between Tampa Bay Water and Veolia Water, which began in 2000 and now encompasses multiple projects for the water treatment and supply, ranks as the largest and most successful of its type in the State of Florida. The project has been recognized with numerous awards, including the 2013 Plant Operations Excellence Award from the Florida Department of Environmental Protection.

- Client Reference: Mr. Matt Jordan, General Manager, Tampa Bay Water - 2575 Enterprise Road, Clearwater, FL 33763 - Telephone: 727/796-2355 - Email: mjordan@tampabaywater.org.

- **DeKalb County Department of Watershed Management (DWM), Georgia** - DeKalb County is Georgia's third-largest county, with more than 700,000 residents. The DWM hired Veolia in 2014 to assist in identifying cost savings and customer service improvement, and work completed to date has involved conducting a comprehensive and independent review of their water and wastewater operations.

  DWM's operations include: a 140-MGD water treatment plant; 65 pump stations; two wastewater treatment plants (20-MGD and 36-MGD in capacity); more than 5,000 miles of water and sewer pipe; and a customer service operation that provides services to 700,000 residents in the Atlanta metropolitan region.

  The County and Veolia estimate that this review could produce as much as $8 million in savings annually for DeKalb ratepayers, reducing costs and helping mitigate rate increases.

  After a thorough analysis of existing operations, Veolia has presented a proposal to transform the entire customer service organization and leverage existing technological solutions to reduce wait times and increase satisfaction for customers. In addition to customer service, Veolia will support implementation of best practices across the utility's administration, planning, operations, maintenance and capital programs, and billing and collections.

  In tandem with the assessment, Veolia is working with the DWM to implement County-approved operations and management initiatives focused on achieving measurable operational, revenue and organizational enhancements to ultimately reduce operating costs and improve service levels, allowing DWM to provide more efficient and sustainable services.

  Some of the early wins under this contract have included: construction and maintenance wrench-time findings that offer the potential for more than $1 million in annual impacts; efficiency studies of field operations crews at the wastewater plant that identified more than $1 million in annual savings through in-sourcing current contractor spend; and more than $500,000 in annual savings identified in the areas of chemicals and power at the water treatment plant. Veolia continues to work with the County as we focus on shaping a long-term approach to meeting their needs.

  - Client Reference: Dr. James M. Chansler, P.E., Director DWM, DeKalb County - 1580 Roadhaven Drive, Stone Mountain, GA 30083 - Telephone: 770/621-7234 - Email: jmchansler@dekalbcountyga.gov

- **New York City, Department of Environmental Protection (DEP), New York** - Veolia began working with the DEP in 2011 to optimize their operations and help implement savings initiatives. New York City's water and wastewater operations that serve over 9 million people daily, delivering over 1 billion gallons of clean water and treating more than 1.3 billion gallons of wastewater per day. These operations include: 13 wastewater treatment plants; a new 290-MGD water treatment plant; 6,000 miles of sewers; and 7,400 of miles of distribution lines.

  The primary scope of this PPS program involved reviewing all aspects of this utility's operations to assess potential improvements in areas including: chemical use and pricing; labor productivity; inventory management; sludge process optimization; and overall O&M. Additionally, the project identified such enabling steps as public outreach, legislative initiatives and other processes for the implementation of recommendations.

  Veolia's final report for the Phase 1 work ultimately identified over 100 implementable measures for the City's consideration. Throughout the first phase of this innovative partnership, the City's employees worked alongside our project team under a joint management and governance structure to identify operational and organizational efficiencies. In order to capture "quick wins," our joint team identified and implemented several cost-saving initiatives within the first three months: chemical procurement modifications, for example, yielded million dollars in annual recurring savings.

  Under this approach, Veolia has identified opportunities that are expected to yield annually recurring financial benefits of more than $100 million by 2016, and, to date, over $90 million in savings and revenue enhancements have been reported by New York City's DEP. These benefits represented between 9% and 11% of the agency's $1.2 billion fiscal year 2012 budget.

  In June 2012, Veolia received notice to proceed with the official implementation phase, Phase 2, which involves implementing the approved recommendations of the assessment phase (Phase 1) under a four-year contract. To implement this phase of the project, we mobilized a world-class team to work with the City's staff in their offices and at their water and wastewater operations locations.

  Veolia's unique partnership, New York City's Operational Excellence (OpX) program, is focused on enhancing water and wastewater services, streamlining workflows, boosting efficiency and continuously identifying opportunities for improvements that will allow DEP to maintain its high level of customer service, safety and productivity while minimizing rate increases for its roughly 836,000 ratepayers. To achieve this, DEP set an ambitious goal for the OpX program right from the start – to achieve significant operating benefits by 2016. The program goes beyond individual projects and encompasses transformational initiatives, including enhancing performance management, strengthening core capabilities in human resources and procurement and fostering an organizational culture focused on performance and continual improvement. To reach these goals, the Veolia-led team worked with DEP to:

  - Review current O&M practices for potential improvements in terms of energy usage and production opportunities, chemical usage and pricing, labor productivity, inventory management and optimal sludge processes.
  - Recommend implementable measures to improve and/or streamline operations and maintenance, increase efficiencies, enhance productivity and reduce costs.
  - Support public outreach, legislative initiatives, and other processes required to implement recommendations.
  - Work with DEP staff to implement the recommended initiatives.

  During the top-down and bottom-up analysis work conducted in Phase 1, which continues in the Phase 2 work, the Veolia team identified current strengths within DEP's operation and noted five key areas where improvements will have significant financial benefits for the agency: efficient and sustainable use of resources and materials; enhanced workforce effectiveness; improved revenue collection; development of a metrics-based performance culture; and strengthening DEP's support services. The OpX program confirmed that DEP is a world leader in meeting drinking water and wastewater compliance, performing

well above the average of similar utilities. In the first six months of the OpX program, 100+ individual improvement ideas were identified and evaluated.

- Client Reference: Mr. Steve Lawitts, Chief Financial Officer, New York City DEP - 59-17 Junction Boulevard, 8th Floor, Flushing, NY 11373 - Telephone: 718/595-6576 - Email: slawitts@dep.nyc.gov.gov

- **City of Indianapolis, Indiana** - From 2002 to August 2011 (when the City completed the sale of its water system assets to a quasi-governmental utility services provider), Veolia operated what was (at the time) the largest water system O&M contract in the U.S. The Indianapolis water system is a regional operation, serving the needs of almost one million people in central Indiana, and included: four surface water treatment plants, ranging in size from 16-MGD to 96-MGD; five groundwater treatment plants, ranging in size from 2-MGD to 24-MGD; a 4,300-mile water distribution system; and pumps, storage tanks and reservoirs. The City's water system includes 38,000 fire hydrants, 300,000+ customer accounts, meter reading (310,000 meters – residential, commercial and fire), meter replacement program, and billing & collection (600,000 accounts). A key element of the project focused on customer service improvements, and over the nine years of work in managing this system (prior to the sale of the utility by the City), Veolia achieved a customer satisfaction rate of at least 90% (independent survey) and answering 88% of 70,000 monthly calls within 30 seconds. Improvements that were implemented by Veolia in the area of customer service includes empowering customer service employees to resolve most issues on the first call ("One and Done"); responding to 99% of emergency calls within 60 minutes; maintaining the operations ranking in the top quartile for performance in billing accuracy, customer complaints and O&M (AWWA benchmarking survey); ensuring customers were not without water for more than 12 hours; providing customers with 24-hour access to their billing and account information.

  Over the course of this nine-year contract, Veolia stopped a trend of substantial annual customer rate increases and had achieved a cumulative $83.1 million in savings at contract completion in 2011. At the end of the contract, our annual operating costs were some $2 million less than the previous management's had been when we started in 2002. We also improved the quality of operations by simultaneously achieving ISO 9001 and 14001 certifications, making the City the only major U.S. city to achieve both certifications.

  Veolia also worked with this client to establish a set of key performance indicators (KPIs) that formed the basis for the award of a portion of our fee. Under the incentive plan, a portion of our fees were paid only if we met specified customer service, water quality, operations and other performance measures. By directly linking performance to compensation, this partnership established a new model in the water outsourcing industry. Over the nine-year life of this agreement, Veolia achieved over 90% of incentive payment fees.

  - Client Reference: Mr. Sam Odle, Past Chairman, Board of Waterworks - City of Indianapolis, 3939 Priority Way S. Drive, #400, Indianapolis, IN 46220 - Telephone: 317/706-6349 - Email: samuallodle@gmail.com

- **Atlanta/Fulton County, Georgia** - Veolia, in a 50-50 joint venture with a minority-owned business enterprise, began operating the Atlanta-Fulton County Treatment Plant (which opened in November 1990). Over the term of this contract, Veolia has worked with the facility owner, the Atlanta/Fulton County Water Resources Commission (AFCWRC), to triple the capacity of this water treatment plant using a variety of process improvement and capital improvement approaches.

  The scope of work for this project has involved all aspects of facility O&M, as well as working with the AFCWRC for facility expansion and upgrade. Over the past decade, Veolia implemented a pilot program to increase the plant's 30-MGD production capability to meets its rated flow of 45-MGD (as rated by the Georgia Environmental Protection Division, GEPD), with no capital expenditures. Subsequent efforts increased the plant's rated capacity to 56-MGD; with an ultimate treatment capacity of 135-MGD. Water demand is so great that the AFCWRC began Phase II earlier than planned to upgrade the plant to 90 MGD. The plant has been running at this new flow capacity since March 1998.

  Veolia's O&M program has also reduced the power, chemicals, and overall operations costs, with savings passed on 100% to the AFCWRC. In addition, we have had no change orders to the contract even though the plant capacity expanded to 90 MGD under our current agreement.

The project also includes O&M responsibility for a 200-MGD raw water pumping station, dual 54-inch raw water pipe, more than 800 million gallons of reservoir capacity, and the treatment plant. The raw water pumping station—located on the Chattahoochee River—and raw water mains connect it to the surface water treatment plant. Major process equipment at the plant includes raw water traveling screens, grit removers, pumps, chemical addition/feed systems, meters, rapid-mix and flocculation chambers, declining-rate filters, clearwell storage, and finished-water pumps.

The success of the water operations project also led to a new contract with Fulton County for the O&M of their regional wastewater facilities, as highlighted above, and in 2014 Veolia was again selected for the renewal of the water operation contract under a competitive renewal process.

- Client Reference: Ms. Kathy Crews, General Manager - Atlanta-Fulton County Water Resources Commission - 9750 Spruill Road, Alpharetta, GA 30202 - Telephone: 678/942-2790 - Email: kcrews@afcwrc.com

- **District of Columbia Water and Sewer Authority (DC Water), Washington, DC** - DC Water is the largest wholesale customer of the Washington Aqueduct (Aqueduct), a federally-owned public water supplier operated by the U.S. Army Corps of Engineers. Veolia was retained to conduct a comprehensive evaluation of the Washington Aqueduct operations and related organization processes, and then recommend improvements that will add value to the delivery of services to its wholesale customers.

  Working in collaboration with Aqueduct staff, Veolia brought in experts to complete the evaluation phase (Phase 1), focused on identifying ways to ensure that DC Water is receiving reliable, quality drinking water at efficient production cost. More than 25 individual improvement ideas were identified and thoroughly evaluated during the four-month study phase, and up to 15% in savings were identified by the Veolia at the Aqueduct. The cumulative annual impact of successfully transforming operations is projected to be between $8 million and $12 million total (OPEX and CAPEX) recurring yearly saving.

  Veolia worked to review every aspect of the Aqueduct's operations, including the treatment process, maintenance and support functions. This review included the Aqueduct's capital program and also included an assessment of the key financial metrics and a high-level asset valuation.

  Additionally, our team worked to benchmark the Aqueduct operations against some of Veolia's own operations, as well as other publicly operated utilities in order to identify gaps in performance and efficiency. This comprehensive analysis work involved site visits to the treatment facilities, discussions with staff, hands-on observations of the work performed, and in-depth review and analysis of all of the documentation provided. For example, the maintenance assessment involved over 100 hours of wrench-time observations, and for the procurement scope, we reviewed all of the contract specifications, terms and conditions. As part of this work, our teams conducted over a dozen one-on-one discussions and workshops with leadership and staff.

  Veolia's team also analyzed data available across the organization and built new databases where necessary to generate insight. For instance, we used the CMMS data to develop the Pareto analysis in the maintenance section of the final report. To recommended implementable measures, Veolia facilitated workshops to generate, prioritize and refine initiatives across the different scope areas of the assessment. Most of the prioritization took place during the Steering Committee meetings, which included both Washington Aqueduct and DC Water participation and input. The Wholesale Customer Board was also involved in the review process through a presentation in September 2013 that summarized the primary findings and recommendations of the study. Working with the Washington Aqueduct and DC Water, Veolia identified approximately 10 improvement initiatives for maintenance, six initiatives in capital planning, five initiatives for water treatment, three initiatives for operations and two initiatives for support functions, including procurement. All of these more than 25 initiatives are supported by proposed enhancements in communications, training and performance management. These activities are often referred to as "enablers," which help organizations get the most out of their initiatives by properly supporting them with investments in these three overlapping activities.

Veolia has been selected to continue into Phase 2, Implementation, and that work (which will begin in 2015) will involve advising Aqueduct management and staff, coaching them on how to perform the recommended enhancements, measuring progress and refining approaches. The focus of this approach will be on ensuring that the staff can carry on this work and that the Washington Aqueduct can continue to benefit from our expertise long after our contract concludes.

- Client Reference: Thomas P. Jacobus, General Manager - Washington Aqueduct, Baltimore District, U.S. Army Corps of Engineers, 10 South Howard Street, Baltimore, MD 21201
  - Telephone: 202/764-0031- Email: thomas.p.jacobus@usace.army.mil

- Staff Experience – Veolia has provided resumes for the two core staff proposed for this project as an attachment to this letter. These resumes provide the requested information on each staff member, including experience, relevant education, degrees, certifications and any other pertinent information related to the base of experience they bring to this partnership with the City of Flint.
- Project Scope – At the start of this letter we provided a statement discussing our firm's understanding of the requested services and our approach to providing the services requested.
- Price for Services – With our proposed approach, presented earlier in this letter, Veolia provide a pricing schedule (hourly rates for key staff) to perform the requested services.
- Affidavit – Veolia has completed the required Affidavit and it is provided as part of our submittal (as an attachment to this letter).

Finally, as we discussed at the start of this letter, Veolia is offering this as an Alternative Bid/Proposal, which is being submitted to you in the requested form and format – an executed original and two copies of our letter proposal submittal – and remains a valid offer for 120 days from the date of submittal. Further, our Bid/Proposal is based on the City's RFP and other documents and information provided as part of the procurement process, as well as on the contractual concepts under which Veolia normally provides the services outlined in this letter. Veolia's Bid/Proposal also assumes the negotiation and execution of a mutually acceptable contract consistent with those concepts. We would note that contractual provisions that often require discussion and further agreement include, among other provisions, warranties, indemnities, casualty risks, insurance, environmental liability, ownership of wastes, consequential damages, contractual limits of liability and remedies for breach or default and termination. We do not believe that these matters should present any serious obstacles to the negotiation of a contract, and we are prepared to meet with you to discuss them at your convenience.

As the Veolia Executive Sponsor for this proposed work with the City of Flint, I will be the key contact as we move forward with this process. Further, as we discussed in our meetings with you, my background for this key role includes a combination of utility management experience, as well as experience in leading Veolia's PPS work with other major communities and water utility operations in the U.S.

I am also the former President and Manager of the water system for the City of Indianapolis, which Veolia operated and managed for over nine years. Under that O&M contract, our firm achieved an industry-first in performance standards and quality management.

My contact information for the purposes of this Proposal is as follows:

Mr. David Gadis – Senior Vice President – Sales – Municipal and Commercial Development
Veolia Water North America Operating Services, LLC
101 West Washington Street, Suite 1400 East, Indianapolis, Indiana 46204
Telephone: 317/716-5683 – Fax: 317/917-3718 – Email: david.gadis@veolia.com

I invite you to contact me should you have any questions with regard to our Bid/Proposal, or if you need any additional information.

We very much look forward to your review of this submittal and the next steps in this procurement process for this proposed new partnership.

Sincerely yours,

David Gadis
Senior Vice President
Veolia Water North America Operating Services, LLC

Attachment 1

Resumes for Key Staff

Marvin C. Gnagy, Jr., P.E.

VEOLIA

Education:

BS, Chemical and Environmental Engineering, University of Toledo

Registrations/ Certifications:

F-1 Waterworks Operator, Michigan

Registered Professional Engineer, Ohio

Class IV, Water Supply Operator, Ohio

Class III, Wastewater Operator, Ohio

Memberships/ Affiliations:

American Water Works Association

Operator Training Committee of Ohio (OTCO)

Background:

Mr. Gnagy is the Water Process Manager with the Engineering and Optimization group of Veolia Environnement North America (Veolia)'s Municipal and Commercial Technical Support Group. In this role he provides support for Veolia's design/build, design/build/operate (DBO) and operations, maintenance and management (O&M) projects in the U.S. and Canada. This includes providing technical and capital project support to municipal, commercial and other projects in the water and energy business lines.

Mr. Gnagy joined Veolia in 2010, and prior to his current role he worked as the Municipal Water Technical Manager with Veolia Water North America Operating Services, LLC (Veolia Water)'s Technical Direction Group. In these technical leadership roles, he has provided engineering and operational expertise to projects related to troubleshooting process and equipment problems, achieving water quality goals, maintaining regulatory compliance, optimizing treatment and chemical processes, maintaining system water quality and participating in the development of new projects throughout North America.

Mr. Gnagy has also worked as part of the teams engaged in the delivery of projects under Veolia Water's Peer Performance Solutions (PPS) project approach. This new approach involves working with large water and wastewater utilities in to conduct detailed operations evaluations that lead to operations efficiencies and cost saving for their operations. In this work, Mr. Gnagy has provided support for some of the largest water and wastewater utility operations in the U.S., including that for New York City, New York.

Mr. Gnagy has over 33 years of experience in management, operation, maintenance, design and construction of water treatment systems. He is experienced with chemical treatment operations and troubleshooting for the optimization of treatment processes and operational sequencing.

Mr. Gnagy also has experience in conventional and advanced treatment technologies, and has been involved with solving treatment issues and providing regulatory compliance. His experience includes: water supply development and monitoring; chemical treatment; mixing applications; taste and odor control; oxidation and coagulation treatment; chemical softening; ion exchange softening; clarification; filtration techniques; membrane filtration and membrane softening; disinfection methods; pumping operations; bench-scale, pilot testing and demonstration studies; high-rate treatment technologies; dewatering and solids handling; and process monitoring and optimization. His design experience has provided operator-friendly solutions to solve both regulatory and operational issues for a number of water treatment systems in the U.S.

In addition, Mr. Gnagy has specific knowledge of regulatory drivers and compliance in multiple state, and he has been involved with the development of site-specific operating strategies that help treatment plants achieve water quality goals and regulatory standards.

Work History:

- **2013-Present: Water Process Manager – Engineering and Optimization Group – Municipal and Commercial Technical Support Group – Veolia Environnement North America**
  - Works as part of an in-house specialty team that provides technical and management support for new and ongoing projects with municipal and commercial clients. This involves supporting projects under the water treatment and supply, wastewater collection and treatment, and energy utility operations and management business lines.
  - Served as Subject Matter Expert in the area of water operations for a contract with the Detroit Water and Sewerage Authority (DWSD) and the City of Detroit to evaluate their water and wastewater operations and proposed solutions. This includes an intensive due diligence examination of the facilities and operations and development of two reports, a Peer Review Report, which looked at the current operations with a focus on identifying immediate and long term needs for the DWSD, and a Transition Plan: Retail Services Report for the City. These reports outlined the issues facing the DWSD and the City as the water and wastewater operations changed under a new regionalization approach.
- **2010-2013: Municipal Water Technical Manager – Technical Direction Group - Veolia Water North America Operating Services, LLC**
  - Worked as part of the Veolia Water PPS team in New York City (operations evaluation and identification of improvements for the City's water supply systems), as well as the team involved in implementing a PPS project with DC Water and Sewer Authority (DC Water), Washington, DC. The DC Water project involved conducting an independent comprehensive review of the operations and management of the Washington Aqueduct (WAD). The focus of this work was on examining WAD's operations, considering: overall operational efficiency; reliability and security of supply; and total water quality management. The project with New York City involved operations efficiency studies that identified utility-approved opportunities expected to save the City $108–$130 million per year; Veolia Water is currently engaged in the implementation phase (Phase 2), which will cover the next five years.
  - Responsible for providing technical and operational expertise to current and ongoing Veolia Water projects. Participated in the development of new projects throughout North America.
  - Provided technical consultation and process troubleshooting for water treatment plant operations throughout the U.S., including a variety of conventional and advanced water treatment processes and the specialized equipment they employ.
- **2009-2010: Water Resources Manager - Brown and Caldwell**
- **2005-2009: Water Resources Manager/Operations Manager - URS Corporation**
- **1996-2005: Operations Specialist/Senior Design Engineer - Arcadis**
- **1989-1996: Operations Specialist - Jones & Henry Engineers**
- **1986-1989: Superintendent of Water - City of Defiance, Ohio**
- **1979-1986: Superintendent of Water - City of Berea, Ohio**
- **1977-1979: Water and Wastewater Operator - Village of LaGrange, Ohio**

Other Key Experience:

- Involved with the testing design and optimization of treatment processes including: source water characterization and oxidative organics fractioning; carbon adsorption; enhanced coagulation techniques; effective mixing applications; high-rate clarification processes; solids contact clarification; high pressure and low pressure membrane technologies including ultrafiltration (UF) and nanofiltration (NF); TOC removal and DBP control; enhanced softening techniques; anion exchange processes; chlorine and chlorine dioxide disinfection; chloramination; precipitative

softening and recarbonation; tube and plate settlers; sludge management (pumping and processing, gravity thickening, lagoon storage and dewatering, land application, filter press dewatering and centrifuge dewatering); and laboratory analyses and operations.

- Significant experience in distribution system operations, including pumping operations, booster disinfection techniques, water quality monitoring, taste and odor investigations, iron and manganese related issues, unidirectional flushing programs, cross connection control, and repair and maintenance of piping systems.
- Served as Project Manager for a number of water treatment plant design projects related to implementation of chemical and treatment process improvements aimed at achieving compliance with drinking water standards, and improving plant operations and water quality. Provided construction oversight for the projects once construction of the improvements began.
- Provided chemical and process optimization services for a number of water treatment plants across the U.S. defining needed upgrades in operating practices and/or process equipment to enhance water quality and reduce operating costs.
- Conducted a number of bench-scale, pilot-scale, and full-scale process investigations related to identification of operating strategies and advanced treatment technologies to meet more stringent drinking water standards and developed recommendations for process treatments and equipment necessary to achieve regulatory compliance.
- Designed and equipped municipal drinking water laboratories for process monitoring, bacteriological analyses, algae identification and speciation, and advanced instrumentation and analyses.
- Prepared site-specific water and wastewater treatment plant operations and maintenance manuals for more than 120 systems across the U.S. outlining operating strategies, equipment descriptions, process control techniques, instrumentation and control systems, troubleshooting, and maintenance activities.
- Developed operating standards and training manuals related to jar testing and coagulation operations, mixing applications, solids contact clarification, water and wastewater disinfection, lime-soda softening and recarbonation techniques, filter inspection techniques, formation and control of DBPs, and an overview of the Stage 2 D/DBP and LT2 ESWT Rules. Also served as principle instructor for these courses since their development.
- Instructor for basic and advanced water treatment courses for the Operator Training Committee of Ohio; and instructor for basic math, basic chemistry, and basic hydraulics for the Michigan Department of Environmental Quality.

Theping Chen, P.E.

VEOLIA

Background:

Mr. Chen is a Process and Operations Optimization Manager with the Engineering and Optimization group of Veolia Environnement North America (Veolia)'s Municipal and Commercial Technical Support Group. In this role he provides support for Veolia's design/build, design/build/operate (DBO) and operations, maintenance and management (O&M) projects in the U.S. and Canada. This includes providing technical and capital project support to municipal, commercial and other projects in the water and energy business lines.

Mr. Chen has almost 30 years of water system engineering, operations and research experience. He joined Veolia in 2014 and has been engaged in supporting the delivery of projects under O&M and Peer Performance Solutions (PPS) project approaches. The PPS approach involves working with large water and wastewater utilities in to conduct detailed operations evaluations that lead to operations efficiencies and cost saving for their operations. In this work, Mr. Chen has provided support for some of the largest water and wastewater utility operations in the U.S., including that for New York City, New York, and Washington, DC. Most recently he was part of the Veolia team that worked with the Detroit Water & Sewerage Authority in conducting an operations assessment, which yielded a comprehensive due diligence report and a second future planning/operations report for a regional approach for the water and wastewater operations.

Mr. Chen's experience includes working as a Senior Technical Specialist, Senior Project Manager, Technical Manager, as well as Research and Development (R&D) Specialist. He has extensive experience in water, wastewater treatment and water quality, and has worked on numerous study, planning, design, and services during construction projects. This work has included master planning, water and wastewater treatment, taste and odor control, asset management, biosolids management, residual management, and water quality.

Work History:

- **2014-Present: Process and Operations Optimization Manager – Engineering and Optimization Group – Municipal and Commercial Technical Support Group – Veolia Environnement North America**
  - Works as part of an in-house specialty team that provides technical and management support for new and ongoing projects with municipal and commercial clients. This involves supporting projects under the water treatment and supply, wastewater collection and treatment, and energy utility operations and management.
  - Served as a Technical Support Manager for PPS and O&M project sites, including:
    - DC Water and Sewer Authority (DC Water), Washington, DC. - Project involved conducting an independent comprehensive review of the operations and management of the Washington Aqueduct (WAD). The focus of this work was on examining WAD's operations, considering: overall operational efficiency; reliability and security of supply; and total water quality management.

Under the DC Water PPS project task, a key work task included: conducting a workshop evaluating the induction mixer to improve rapid mixing, review of water quality and chemical dosages, alternatives for controlling algae in the two water treatment plants) for the Washington Aqueduct McMillan Water Treatment Plant.

- Pittsburgh Water & Sewer Authority (PWSA), Pennsylvania – This PPS project has involved evaluating the operations of this agency's water and wastewater operations. This utility serves more than 300,000 people in the greater Pittsburgh area. A main area of focus for the work was on the development of Key Performance Indicators (KPIs) that were used to drive system improvements for the PWSA. Work tasks engaged in under this contract involved evaluating the algaecide alternative, and CAL-FLO replacing lime.
- Detroit Water & Sewerage Department, Michigan – Served as part of a team that worked with the DWSD along with Counties in the greater Detroit area in shaping comprehensive water and wastewater solutions considering the needs of the City and those of customers in the surrounding County areas. The work involved developing a comprehensive Peer Review Report, along with a second report (Retail Report) that discussed issues surrounding the formation of the Great Lakes Water Authority and the impact of that on operations of the DWSD and the City of Detroit. These reports involved performing extensive due diligence of the City's water and wastewater assets, preparing reports documents and supporting materials, and then presentations to multiple parties, including state level and judicial, City and County managers. Work tasks under that contract included conducting a process review for the DWSD's five water treatment plants.
- City of Buffalo, New York – This is an O&M contract that began in 2010 for operations and management of a water system serving a population of 280,000, with facilities and operations that include: a 160-MGD surface water treatment plant; 814 miles of water distribution system, customer service management (meter reading, billing and collections); capital program management; and underground asset management (UGAM) and above-ground asset management programs. Involved in supporting this operation in soliciting bids for an induction mixer and streaming current monitor, and alternative evaluations for these systems.
- City of Brockton, Massachusetts – This is an O&M contract that began in 1988 and includes: water operations for a 1.3-MGD and a 24-MGD surface water treatment plant, two raw water pump stations (40-MGD capacity), and two ground storage tanks (11.4 million gallons capacity); and wastewater operations for a 20.49-MGD tertiary wastewater treatment plant, three pump stations, and an 18 dry ton per day multiple-hearth sludge incinerator. Served as the Lead Technical Support Specialist for the conduct of a comprehensive water quality and water treatment plant review. This included evaluating alternatives for algae control, TOC and manganese removal, and evaluating manganese removal and short filter runtime, as well as backwash pump cavitation issues.
- Owned and Managed Energy Operations – Conducted a comprehensive system operation and optimization review for two Veolia energy makeup water treatment plants, including: Kendall Station Cogeneration in Cambridge, Massachusetts and the Grays Ferry Cogeneration Plant in Philadelphia, Pennsylvania. This included performing a review of river source water pretreatment alternatives, and identifying optimization opportunities of the ultrapure water treatment processes.

- **2013-2014: Independent Water Consultant – Solon, Ohio**
- **2012-2013: Project Principal - ARCADIS US Water – Cleveland, Ohio**
  - Served as Task Lead for softening water treatment plant upgrade and expansion evaluation for:
    - Dayton and Montgomery County Water Efficiency Master Plan, Ohio- Worked as the senior consultant and lead author of the three tasks reports, including: Task 5 - Water Treatment Plant Capacity Evaluation and Assessment for two 96-MGD softening water treatment plants; Task 6

– Regulatory Review and Compliance Assessment; and Task 9 – Evaluation of Groundwater Wells Reclassification's Impact on Water Treatment.

- Delaware County Water System Master Plan, Ohio – Served as the Task Lead for water treatment. The work involved evaluating the historical water productions and forecasted the future water production profile. Evaluated the treatment plant expansion and upgrade needs for four surface water and groundwater softening plants to best utilize the available source of supply to meet the future water supply needs. Provided recommended scope of work, process schematic and opinion of cost for upgrading and expanding the water treatment plants.
- Northeast Ohio Regional Sewer District (NEORSD) - Cleveland, Ohio – Worked as a Technical Consultant/ O&M Manual Task Process Engineer for the NEORSD's Southerly Wastewater Treatment Plan's biosolids handling facility. Responsible for preparing an O&M manual for the centrifuge dewatering system.
- Eureka Resources, Pennsylvania - Served as Process Mechanical Design Task Leader for a new frac wastewater treatment plant. The process included: oil/water separators; primary clarifiers; pH adjustment units; membrane biological reactors; crystallizer; sludge thickening and dewatering units; and various raw wastewater and treated wastewater storage tanks. Lead the design documentation preparations and coordinated and reviewed the P&ID drawing development.
- New York City, Department of Environmental Protection, New York - Performed a quality assurance and quality control (QA/QC) role for the NYDEP's Groundwater Treatment BOD report. Reviewed basis of design report for treatment of three well sites which uses treatment processes such as air stripping with and without vapor GAC adsorption, liquid GAC adsorption, and chemical oxidation followed by filtration for iron and manganese removal.
- City of Monroe, Michigan – Served as the Technical Lead for the City's Water Treatment Plant Ozone System Improvement Study. Assessed the current conditions of the existing system, evaluated different generator and ozone contactor improvement alternatives, and made recommendations and provided opinion of cost for each alternative.
- Other Work - Supported winning proposals for Akron Water Quality Modeling, Alliance Joint Dewatering System, and Minneapolis Water Pool of Consultants. Served as: Technical Knowledge and Innovation and Technical Community of Practice member; Client Account Manager for Aqua Ohio and Pennsylvania American Water; and manager and support specialist for business development efforts, including pursuits with DWSD, NEORSD, the Louisville Water Company, the City of St. Louis, the MSD, the City of Toronto's wastewater treatment plant, the City of Ann Arbor's water treatment plant, the City of Toledo's water treatment, and the Warren County water treatment plant.

- **2012: Technical Director and Technical Practice Network Leader, Water and Urban Development - AECOM Asia - Hong Kong/Shanghai China**
  - Served as the Technical Practice Network Leader and the Team Leader for: Asian Development Bank/JiangXi Government Boyang Lake Water Resource Management project; Project Manager of Shanghai Wastewater Treatment Plant Sludge Management Strategy Optimization Study; and Process Lead for the 50-MGD first membrane filtration plant feasibility study, and first 37-MGD sea water desalination plant feasibility study proposal in Hong Kong.
- **2010-2012: Regional Director, Water and Urban Development - AECOM China – Shanghai**
  - Served as the Regional Director for Water and Urban Development in China with responsibility for: operation, strategic plan development, client management, business development and project delivery and staffing management of PRC WUD business line; leading the team winning record numbers of ADB and WB funded PPTA, ADTA and loan implementation projects (over $10M USD) in 12 months; conducting high profile national strategy and policy projects in China on Boyang Lake

Water Resource Management (largest fresh water lake in PRC), National Stormwater Management and Water Logging Prevention Policy Study, and National Wastewater Treatment Plant Sludge and Wastewater Reuse Technology and Policy Study for PRC; consulting on wastewater treatment plant sludge management technical route studies for Beijing and Shanghai, two largest municipalities in PRC, including two of world's largest wastewater treatment plants: the Beijing GaoBeiDian plant and the Shanghai BeiLongGang plant; and serving as Process Manager for the Hong Kong Shatin Water Treatment Plant reprovisioning (expansion from 90-MGD to 145-MGD) with ozone and two-stage filtration (one biological) treatment processes.

- **2010: Senior Project Manager/Senior Technical Specialist - AECOM - San Francisco, California**
  - Worked as Senior Project Manager supporting AECOM Water operations and projects in North America. This included:
    - Project Manager and Lead Process Engineer on the Groundwater Reuse project for NASA Ames Research Center in Moffat Field, California. Upgraded the collection system from three pump-and-treat groundwater treatment systems, conducted hydraulic analysis and designed the pump and control upgrades. Designed the modifications of converting the existing 240,000 gallon tank into a RO permeate storage tank. Lead the alternative evaluation, and design services for treating the three different sources of pump-and-treated groundwater. Prepared the D/B contract for construction of a new 850,000 gallon tank. Designed the upgrade to the RO pretreatment system including the installation of dual media filter, UV reactor, and chemical feed system. Designed the refurbishment of the RO system including the new pumps, sensors, and RO membrane elements. Designed the new CIP system, and CIP waste neutralization and disposal system and piping, RO concentrate disposal system and piping. Designed and upgraded the control system for the RO permeate distribution system, provided the constant pressure in the system that allows the auto-source switching in the event the distribution system loss of pressure.
    - Engineering Manager for a multi-year, as-needed, system-wide zebra mussel study and control project with the California Department of Water Resource.
    - Senior Technical Consultant on the City of Portland, Oregon's, 225-MGD Bull Run Water Treatment Plant Chlorination Alternative Study. Evaluated bulk hypochlorite storage and feed, low strength (0.8% wt.) onsite generation of hypochlorite, high strength (12% wt.) onsite generation of hypochlorite, and onsite gas chlorine generation technologies. Conducted the conceptual design, including sizing, layout, list of equipment, construction and O&M cost estimate. Conducted the market research on installations, operation experience and cost.
- **2006-2009: Global Drinking Water Oxidation & Disinfection Technical Practice Workgroup Leader, Project Manager and Senior Technical Specialist – Metcalf & Eddy, Inc. (later acquired by AECOM) – Cleveland, Ohio**
  - Served in multiple roles for an engineering and operations company, including serving as: Global Drinking Water Oxidation and Disinfection Technical Workgroup Leader; International Ozone Association Champion; Ohio American Water Company (OAWC) Client Coordinator; Senior Technical Specialist; and Project Manager.
  - Key project work and accomplishments included: developing the company's first project for from both Ohio American Water and Pennsylvania American Water, and then managing the treatment plant projects with these two clients; developed the $25 million Ashtabula Water Treatment Plant design/build project with the OAWC; organized the workshop for IO3A and IUVA/IO3A conferences; served as Project Manager and Lead Process Engineer for the OAWC Marion Water Treatment Plant chemical and filter systems improvements project; served as Project Manager for the OAWC Marion Water Treatment Plant needs assessment study, and on-call engineering services for both water and wastewater systems; served as Project Manager for the Elyria Water Treatment Plant intake study and preliminary design project; served as the Lead Technical

Engineer on the Shreveport ozone system improvement study and preliminary design project; served as the Lead Technical Engineer on Miami-Dade County Water and Sewer Department's Hialeah Water Treatment Plant filter backwash improvement alternative evaluations; served as the Project Manager and Lead Process Engineer for the Pennsylvania New Castle water treatment plant filter-to-waste addition project; and Project Engineer for the Northeast Ohio Regional Sewer District's ECT-4 Baffled Drop CSO Shaft Physical Model Study.

- **2001-2006: Multiple Technical and Management Roles - CH2M HILL – Detroit, Michigan**
  - Worked in multiple roles, including: Northeast Regional Water Process Practice Leader; Northeast Regional Water Treatment Technology Leader; member of the Detroit Client Service Management Team; Member of the Northeast Regional Water Service Team; Technical Director of China Water Business Group; and Project Manager.
  - Responsibilities in these roles included: contributing to developing strategic business plan for local, and region-wide markets; maintaining client contact and involvement in business development efforts for strategic water projects; and contributing to business development for water projects in Ann Arbor, Louisville, Cincinnati and other communities in the Mid-West.
  - Worked on multiple projects with the DWSD, including:
    - Task Manager for DWSD's 50-year Comprehensive Water Master Plan. This work involved: evaluation of capacity development; analysis and projection of significant industrial flows and loadings; and projected flows from significant industrial users (SIU) and quality in the next 50 years by decade, industrial category, and geographic areas, within DWSD's service area.
    - Task Project Manager for the summary and evaluation of Detroit wastewater treatment plant capacity and performance, as part of the development of a comprehensive wastewater master plan for the DWSD. The plant has a rated secondary treatment capacity of 890-MGD, and primary treatment capacity of 1,700-MGD. Summarized the design criteria; assessed the existing and near-term capacity under the comprehensive treatment plant renovation project for both liquid and solids processing streams; conducted water quality and compliance status analysis; and discussed the suitability of the plant to meet future expansion and treatment needs including the proposed additional dewatering from CSO basins.
    - Project Manager and Lead Process Engineer for improvements to two wastewater treatment plant pump stations, including pickle liquor buildings, the polymer utilization building, and main plant influent building rehabilitation for DWSD. The wastewater treatment plant has a secondary treatment capacity of 890-MGD. Replaced all polymer delivery pumps, pickle liquor feed and transfer pumps, and influent sampling pumps. Managed the selection and sizing of various chemical and wastewater transfer pumps, with specific consideration of handling chemicals and high solids applications, and designed the new piping layout and control system. Assisted in preparing the specifications for various pumps and pipes and oversaw the design and specification of the basket strainers. Prepared construction documents and provided services during construction.
    - Managed an evaluation of long-term solids disposal alternatives as part of the development of a comprehensive wastewater master plan for DWSD. The plant has a rated secondary treatment capacity of 890-MGD. Conducted a thorough review of the current solids production and handling practices at the plant; reviewed the applicable treatment technologies and current and future regulations; and developed various alternatives and implementation plans as well as a scoring system to rank and select the recommended alternatives. Also developed capital and operations cost estimates for each alternative.
    - Project Manager and Lead Engineer for field sampling activities review and pre-audit service for the DWSD. Reviewed program documents and QA/QC procedures as well as the standard operating procedures. Audited the field sampling safety issues, reviewed EPA auditing reports

and pertinent federal regulations and EPA guidelines, and recommended areas that needed improvement.

- Manage and Lead Engineer for the preparation of a low-interest loan application for the Drinking Water State Revolving Fund for the DWSD. Prepared an overview project plan for the 2004-2008 loan programs, successfully securing $30M per year in low-interest loans from the Michigan DWSRF.
- Task Manager for a source water protection project for DWSD. Summarized the pertinent federal and state regulations and international charters and agreements related to the Great Lakes and reviewed the associated watershed initiatives, trends, and programs, as well as the current and future monitoring technologies. Investigated the existing spill notification system and procedures and conducted a national survey on the early-warning monitoring and source water protection programs. Developed the framework for establishing a source water protection program. Made recommendations for short-, intermediate-, and long-term improvement and proposed the scope and estimated cost of the near-term capital improvement project needs of this first source water protection plan for a surface water utility in Michigan.
- Task Manager for the development of a water quality management and treatment plant capital improvement plan for DWSD, covering their five water treatment plants (with a combined capacity of over 1.7 billion gallons per day. Reviewed the past and ongoing projects, reviewed the short-term and long-term water quality regulations. Developed short- and long-term water quality goals. Conducted a thorough assessment and evaluation of the current treatment process for capacity, technology and performance. Selected future treatment technologies and prepared the conceptual preliminary design and cost estimate for each plant, including ozone and UV installations. Coordinated ongoing plant improvement projects and developed a capital improvement plan for plants that would meet both system growth and water quality needs while maintaining a limited increase (6-7 percent) of water rate to DWSD customers in the future.
- Task Manager for the development of DWSD's Wastewater Master Plan, which addressed: Significant Industrial Flows, Capacity and Performance Evaluation of the Detroit Wastewater Treatment Plant, Wholesale User Survey, and Long Term Solids Disposal Plan tasks.
- Managed the development of a customer survey and service plan for the DWSD. Designed the survey form and managed the design and distribution of the survey questionnaires.
- Project Engineer for the update of DWSD's industrial pretreatment program local limits database, including modification of the program and local limits calculation.
- Project Engineer for Phase I and project manager for Phase II of an atmospheric deposition study for the DWSD, addressing the air deposition addition of mercury, cadmium, and PCBs loads to the headworks of a wastewater treatment system. Developed a quality assurance project performance plan and field sampling standard operating procedures, and coordinated the lab SOPs. Managed the water-phase sampling and led data analysis. Interfaced with subcontractors and labs; conducted detailed chronicle and statistical data analysis of pollutant concentrations, fluxes, or loadings for dry deposition, wet deposition, runoff, ambient, and treatment plant influent and effluent. Developed several approaches in estimating the quantitative relationships between the air deposition and runoff, air deposition and the plant headworks loadings of PCBs, mercury, and cadmium. Prepared responses to the steering committee's review comments. Conducted all data treatment and prepared the final study report, providing the crucial information for the state to establish the regulatory policies toward these chemicals.

- Served as Senior Technical Consultant and Lead Engineer for a brackish groundwater treatment pilot study and preliminary design of the reverse osmosis water treatment plant at Moron Air Force Base in Spain. Led the technical evaluation and process design for providing portable water

to the base by evaluating, piloting, and designing a 1-mgd groundwater treatment facility. Conducted the desktop evaluation for alternative technologies to remove hardness, nitrate, TCE, and salinity from the groundwater sources. Developed the test plan and conducted the pilot tests on GAC, ion-exchange demineralizer, and reverse osmosis processes. Provided air-stripping unit troubleshooting, scale control evaluation, and preliminary design. Evaluated concentrate disposal alternatives and developed the construction cost estimate.

- Served as the Project Manager and Lead Process Engineer for the evaluation and design of an ozone system to remove geosmin-caused drinking water tastes and odors from the Lucerne Water Treatment Plant for the California-American Water Company. Evaluated the bench treatability data, designed the ozone and ozone/H_2O_2 application dose, and established the remaining ozone system design criteria, including a construction cost estimate. Prepared preliminary design of the system and evaluated different types of ozone generators, ozone dissolution methods, and ozone contactors. Determined final design, which included a LOX-feed ozone generator with side-stream injection skid and a pipeline contactor with the options of using an ozone contactor for disinfection (ozone alone) and taste and odor removal (ozone/H_2O_2) or T&O removal only.
- Served as the Lead Process Engineer for construction and start-up of the 17-MGD Windsor Water Treatment Plant's new ozone system. The scope includes the construction management, start-up of the ozone system, optimization of the ozone residual analyzer layout and design and upgrade of the ozone-quenching agent with calcium thiosulfate to increase quenching capacity and safety. Participated in the resizing of the tanks and redesign of the layout and spill containment area. Participated in process and start-up troubleshooting, including how to achieve the desired log inactivation of Cryptosporidium and residual quenching during winter season.
- Served as a Senior Consultant for ozonation design for the 167-MGD Tacoma, Washington, water treatment plant. Developed design criteria and evaluated bench testing results on geosmin and MIB removals. Employed the experimental design approach. Conducted statistical analysis of the experimental data, summarized the findings and conclusions of the tests, and prepared the study report.
- Served as Senior Consultant for an algal toxin removal project for the American Water Works Research Foundation (AWWARF). Prepared the testing plan using statistical experimental design methodology for ozone oxidation, UV/H_2O_2 oxidation, and PAC adsorption of the microcystin-LR. Conducted a statistical analysis on the testing results and prepared the study reports.
- Managed and served as Lead Technologist for a filter backwash and recycle stream evaluation and improvement study for the 27-MGD water treatment plant in the City of Ann Arbor, Michigan. Investigated the filter backwash and other recycle stream practices, as well as the average and peak instantaneous flow of each stream, and evaluated the potential hydraulic and water quality impact to the treatment process. Facilitated a plant staff workshop to develop operational and process improvements. Prepared report to submit to the Michigan Department of Environmental Quality.
- Served as Process Engineer for the development of a master water plan for the City of Ann Arbor, Michigan. Led a water treatment plant process criteria evaluation and evaluations of the treatment of 1,4-dioxane from the groundwater.

- **1992-2001: Multiple Technical and Management Roles - TETRA TECH MPS - Detroit and Ann Arbor, Michigan**
  - Worked as Project Manager, Senior Project Engineer, Project Engineer; and Water/Wastewater Technology Council Member.
  - Served as Process and Project Engineer for the Baby Creek combined sewer overflow control study for DWSD. Conducted a literature review, provided dry and wet weather multi-stage sampling of the CSO events, and performed bench-scale evaluations of various disinfection options, including UV, ozone, sodium hypochlorite, peracetic acids, and sodium bromide with sodium hypochlorite.

Proposed recommendations and disinfection design criteria. Prepared the disinfection study report and reviewed the final design study report.

- Served as Lead Engineer for a drinking water taste-and-odor study for DWSD, which received the 1998 Research and Technical Practices Award from the Michigan Section of the AWWA and required the development of monitoring and experimental plans and analytical standard operating procedures. Trained senior chemists to become flavor panelists, coordinated the monitoring efforts and flavor profile analysis, interfaced with clients, and conducted comprehensive powdered activated carbon and ozonation treatability studies to remove the taste- and odor-causing compounds from the water. Investigated a broad range of operational parameters and identified their impact to the odorant removals. Developed mathematical models for quantitative assessment of operational parameters and performance prediction.
- Served as Project Manager and Lead Engineer in the development of ozonation design criteria for taste and odor control and Cryptosporidium inactivation for DWSD. Conducted an ozone demand and decay study, and developed the design criteria for meeting the requirement of disinfecting Giardia and Cryptosporidium. Assessed the impact of the proposed treatment technologies on the current operation. Prepared the progress and final study reports and made presentations to the client.
- Served as Lead Engineer examining powdered activated carbon and chlorine interaction impact on T&O compound removal and contact time value for DWSD. Performed CT calculations under various conditions for four water treatment plants and made design and operational recommendations.
- Served as Process Engineer for an implementation assessment of PAC storage, dosing, and delivery facilities at four water treatment plants for DWSD. Developed the design criteria for upgrading the powdered activated carbon dosing systems and reviewed the conceptual design and cost estimate of the PAC feeding system. Also provided an engineering feasibility valuation of building centralized PAC storage and dosing facilities. Reviewed the contact time calculations under various PAC addition points for the four plants and developed design criteria for alternative PAC dosing systems.
- Served as Process Engineer for a backwash and residual management improvement project for DWSD. Developed the treatment process basis of design criteria and conceptual design for handling the backwash water and plant treatment residual for four water treatment plants with a combined capacity over 1,600-MGD. Conducted the historical data analysis and scenario analysis for determining the optimum equalization volume and treatment process design capacities.
- Served as a Co-principal Investigator which involved conducting an investigation for a taste-and-odor materials evaluation workshop for the American Water Works Research Foundation. Convened an international expert panel to develop a new AWWA drinking water standard for testing materials from taste and odor perspectives. Organized a workshop, managed literature review, and prepared the final standard and project report.
- Served as Resident Project Engineer for a seven-month pilot study to treat the low-strength, organics-containing cooling water for the Upjohn Company in Kalamazoo, Michigan. Participated in the planning, initiation, and operation of a 30-gpm carbon fluidized bed biological reactor. Coordinated with the client, vendor, and project manager and prepared weekly and final project reports.
- Served as Field Project Engineer for a three-month feasibility study for the Kellogg Company of Battle Creek, Michigan, for the treatment of high-strength BOD/COD cereal-production wastewater using a pilot upflow anaerobic sludge blanket bioreactor. Obtained optimum operation and design conditions and addressed typical operation interference such as shock loads of BOD and TSS.

- Served as Project Engineer for Michigan's Rouge River CSO control study for a national wet weather demonstration project. Trained the sampling crew, developed the field sampling SOPs, and coordinated with the weather service. Conducted detailed data analyses, such as concentration and load profiles for different pollutants, removal efficiencies, and overflow discharge quality. Drafted final report and provided recommendations for sampling and design of the future CSO basins.
- Served as Project Engineer for Michigan's Rouge River settling column study, as part of a CSO control study for a national wet weather demonstration project. Developed the experimental and sampling plans, trained technicians, performed data analysis, and drafted the report.
- Assisted in the evaluation of CSO control technologies and performance of retention basins in the Rouge River watershed. Assisted in evaluating the retention basin's effectiveness in disinfecting and removing numerous pollutants. Reviewed existing column testing protocol and proposed new protocol using modified columns and Imhoff cones. Developed a protocol for evaluating disinfection and the standard data analysis procedures to be used at all basins within the Rouge watersheds. Reviewed the mathematical models (steady-state settling model, statistical models, and dynamic models) available for predicting the basin long-term performance and individual event performance and assessed their advantages and limitations. Worked with modeling experts to develop new dynamic models for the project and developed the protocol for disinfection evaluation.

- **1991-1992: Process and Environmental Engineer (Biotech scale-up and Groundwater remediation projects) - ARCTECH, Inc. - Alexandria, Virginia**
- **1988-1991: Research Assistant and Graduate Student (Thesis: Enzymatic Oxidation of Phenolic Pollutants) – University of North Carolina at Chapel Hill, Department of Environmental Engineering – Chapel Hill, North Carolina**
- **1985-1988: Research & Design Engineer (industrial wastewater treatment) and Teaching Assistant – East China University of Chemical Technology, Department of Environmental Engineering and Institute of Chemical Environmental Engineering**

Publications:

- **Completed numerous technical articles, reports and other publications on topics related to water and wastewater treatment, water quality and research and development related topics.**

David L. Gadis

VEOLIA

Education:

BA, Marketing/ Communications, Southern Methodist University (1984)

Memberships/ Affiliations:

Indianapolis Urban League

Indianapolis Sports Corporation President's Council

Indiana Business Diversity Council

Purdue University Science Bound

St. Mary's Child Development Center

Big Ten Basketball Tournament Committee

American Water Works Association (AWWA)

Awards:

Indiana Basketball Hall of Fame

2005 Achievement in Business Award, Center for Leadership and Development

2006 Sam Jones Award, Indianapolis Black Chamber of Commerce

Background:

Mr. Gadis is Vice President and Manager for Sales with the Municipal and Commercial Group of Veolia in North America. In this role he leads a team that is responsible for new project development and the support of ongoing projects and client relationships. This work has included supporting alternative project delivery approaches to municipal clients in the North American market. His recent work has focused on working with Veolia's team at the City of Detroit, Michigan, to support the identification of utility needs and solutions/approaches to address the City's water and wastewater utility.

Mr. Gadis was also a part of the Veolia team that working with the New York City Water Board and New York City Department of Environmental Protection (DEP) under the Operational Excellence (OpX) program. This team is charged with examining water and wastewater operations in the City with the goal of developing recommendations to streamline workflows, boost productivity, identify opportunities for efficiency gains, and keep future water rate increases as low as possible.

Prior to his current role, Mr. Gadis was the President of Veolia Water Indianapolis, LLC, the company that was charged with managing the water system providing service to almost a million in Central Indiana. The scope of this contract involved operating, maintaining and managing a water treatment, storage and supply system, a customer service organization responsible for meter reading for some 310,000 connections for the City of Indianapolis and an additional 15,000 connections through contracts with surrounding communities, as well as billing and revenue collection for 600,000 accounts. The contract also included a capital project component, and Veolia Water managed and implemented in excess of $200 million in capital work to improve the City's aging water infrastructure.

Prior to that, Mr. Gadis managed the procurement and operations of the Indianapolis Water operations, with responsibility for administering the Veolia Water Indianapolis minority-owned (MBE), woman-owned (WBE) and other locally-owned business involvement efforts. The success of this was demonstrated in the company's unmatched success in achieving local involvement in all aspects of the project work at levels that well exceeded all of the City's goals and expectations-- keeping 92% of the dollars spent in the local economy and maintaining a 35% M/WBE participation level. He also provided leadership for Veolia Water's local involvement program in Indianapolis, with involvement in numerous community service organizations in the community. Additionally, Mr. Gadis has played a key role in shaping Veolia Water's national program for MBE/WBE recruitment and involvement in governmental and industrial projects at sites across North America.

Mr. Gadis has over 23 years of overall business experience, with more than 14 years of management experience, and his involvement with the Indianapolis water facilities began back in 1998, working as the Director of Procurement for Indianapolis Water Company. He joined Veolia Water Indianapolis in 2002 on the transition of the water facilities.

Key Experience:

- **2013-President: Vice President and Manager – Sales – Municipal & Commercial Group - Veolia North America – Indianapolis, Indiana**
  - Provides leadership for a Sale team and new project development for Veolia's water and energy utility services line in North America.
  - Work has included the development and support for projects under Veolia's Peer Performance Solutions (PPS) approach, including a new project with the DeKalb County, Georgia, Department of Watershed Management (DWM). This work is focused on helping the County identify cost savings and help improve customer service by conducting a comprehensive and independent review of their water and wastewater operations. DWM provides services to 700,000 residents in the Atlanta metropolitan region through its system of water treatment and distribution, customer service, and wastewater collection and treatment.
- **2010-2013: Vice President – Municipal Sales Group – Veolia Water North America Operating Services, LLC – Indianapolis, Indiana**
  - Provided leadership for the company's sales and development program that has focused on identifying and developing innovative utility operations solutions for major cities in the U.S.
  - Worked as a part of the Veolia Water team for the Operational Excellence (OpX) program with New York City. The work is divided into two phases, with the Veolia Water Team first conducting an initial evaluation and recommendation phase that will result in a final report in 2012 of recommendations on how DEP can improve productivity and reduce costs. Based on that report, DEP has the ability to accept or reject any of the proposed operational changes and cost-saving measures. Improvements that DEP chooses will be implemented over a four-year period.
- **2008-2010: President – Veolia Water Indianapolis, LLC - Indianapolis, Indiana**
  - Served as the Executive officer for Veolia Water's operations of the City's water systems, under a project that was completed in 2011.
  - Served as a part of the transition management team responsible for managing the transfer of the water operations (owned by the City) to a new owner and operator. The sale of the City's water treatment and supply assets, which serve almost 1 million people in the region, was completed in 2010, and the transition of services was completed in August 2011. The key challenges of that process involved maintaining the levels of service and quality for the customers that rely on the water system, and providing ongoing operations, maintenance and management services as the new owner is allowed to implement its own operations and management approach.
- **2003-2008: Vice President and Chief Operating Officer – Veolia Water Indianapolis, LLC - Indianapolis, Indiana**
  - Responsible for day-to-day operations of the company, including field services, production, engineering, construction, procurement, risk management, asset management, laboratory services, health and safety, security, IOS9001 and 14001, as well as the company's MBE/WBE program.
- **2002-2003: Vice President of Shared Services – Veolia Water Indianapolis, LLC - Indianapolis, Indiana**
  - Responsible for procurement, fleet, risk management, warehousing, health and safety, security, and M/WBE development.
- **2000-2002: Vice President – Water Materials Unlimited (Indianapolis Water Company subsidiary) – Indianapolis, Indiana**
- **1998-2000: Director of Procurement - Indianapolis Water Company - Indianapolis, Indiana**

- Acted as Director of Supply Chain Management, with responsibility for a $15 million budget, $8 million in sales, non-regulated business development, and $7.5 million minority vendor program.
- Responsible for liability and property insurance claims, developing and administering the company's risk goals and objectives, and overseeing the procurement of goods and services.

- **1995-1998: Vice President – Monroe Guaranty Insurance – Indianapolis, Indiana**
  - Responsible for claims management, including $125 million of claims expenses.
- **1989-1995: Midwest Regional Manager – USF&G Insurance Company – Indianapolis, Indiana**
  - Managed 16 branch office operations, 120 employees and $200 million in written premiums. Responsible for re-engineering efforts in the company.
- **1984-19889: Senior Claims Adjuster – USF&G Insurance Company – Indianapolis, Indiana**
  - Responsible for handling general liability, auto and property claims, and special investigations.

Subject: Flint water piece.

In case you guys missed Chastity Pratt's piece today in Bridge...
http://bridgemi.com/2015/01/cringe-over-troubled-water-flints-smelly-dilemma/

I've drafted this response. Would like to send it to her yet today. Would like to make sure it doesn't cause any of us undue heartburn. Please review and call me? Thanks!
b

Hi, Chastity. Apologies we did not get to connect as you were preparing your story on Flint water. I understand DEQ staff were able to provide some data.
Overall, well done from a factual perspective. If you decide to revisit the issue, keep me in mind. I'd much like to offer some broader DEQ perspective on our drinking water program and this situation in particular. Some key pieces that folks should know include these:

1. The decision to leave Detroit as a water supplier and use the Flint River was developed and pushed by Flint's local elected officials – over the concerns of state officials. Ultimately, the state signed off on the project (as required because of the EFM) – but consider that Genesee County still gets water from Detroit today, without a contract. This switch wasn't mandated by Detroit, or the state, or anyone but the leadership in Flint, and was proposed as a money saver until the KWA system comes online.

2. The idea that the state owns Flint's water woes outright because of the presence of an EFM ignores that much of this problem is the result of decades of the city failing to perform upkeep on their system. Someone might even argue that the absence of a maintenance fund for infrastructure is just one more symptom of a broader problem that resulted in an EFM assigned to keep the city from financial crash. It's worth noting that the city was approved for a DEQ revolving fund loan in 2009, and DEQ sent a letter congratulating them, only to have the city decline the funding. Seen in that light, the city's proposed solution of state forgiveness on the $20.7 million it presently owes to the State Revolving Fund and an infusion of new, no-strings money for maintenance and line repairs looks, arguably, different.

3. The heart of the problem isn't just because Flint's leaders decided to use the Flint River as a source. It's true that the river water varies in quality, and requires a flexible

treatment strategy to address seasonal fluctuations, but the water aesthetics concerning residents in Flint are compounded by the fact that the system is old and has not been kept up. Flint's water system consists of more than 500 miles of pipes, and more than half of those pipe miles are more than 75 years old. Much of it is cast iron (hence the color issues). The hardness of the water from the river certainly appears to be exacerbating the (rusting) discoloration. It's why GM pulled off Flint's water.

4. The Safe Drinking Water Act, and Michigan's drinking water program, regularly and rigorously reviews municipal water supplies for more than 90 different toxins, including microbial ones. The objective is comprehensive screening that keeps water quality up and mandatory reporting to help customers make informed health decisions when there's an issue, whether that's an immediate health threat (like e. coli or total coliform) or a long-term potential threat like TTHM. But it is the Safe Drinking Water Act, not the Clear Drinking Water Act. The program does not regulate water for aesthetics like color or smell.

5. We empathize with Flint residents who are unhappy with their water. They pay a lot for it, and in some cases it is not the clear, tasteless product one might anticipate. But our goal at DEQ is to make sure the system operators are testing the water according to state and federal law, and that it meets safety standards. Recent testing indicates that the TTHM levels are dropping rapidly, and we will continue to work with the city to protect water customers in the days, months and years ahead.

Thanks,
b

ABC12 Investigates: What's in your water?

Posted: Jan 29, 2015 3:38 PM EST
Updated: Jan 29, 2015 11:54 PM EST

By Larry Elliott **CONNECT**

FLINT (WJRT) - (01/29/15) - The results are in and we now have a completely independent look at what's in Flint's water supply.

For months, since Flint switched from a Detroit water supply to the Flint River as it's water source, Flint water customers have complained of smelly, cloudy, bad tasting water and blame it for a variety of health problems.

Complaints exploded earlier this month when Flint notified its water customers that a group of chemicals known as TTHM were at much higher average levels than allowed by law.

With so many questions and distrust of the answers, ABC12's Larry Elliott investigates - What's in your Water?

It seems no matter who you ask in the Flint area, there's an opinion about the city's water. Most of the issues center on the quality of the water and whether it's safe to drink.

"Right now it smells," said Flint resident Lee Miller. "We're getting water out of our own back yard now and it's costing me double what it was coming from Detroit."

"It has a funny taste to it," said Flint resident Milton Alexander.

"It could be dangerous to us, actually I don't know how dangerous it is," said Flint resident Sharika Sanders.

"I'm no cheerleader for the water department here, I think we've got a lot of issues to work on." Ken VanWagoner, of Good Beans Cafe - Flint.

Most of the issues center on the quality of the water and whether it's safe to drink, but concern over its safety reached a new high earlier this month when the city was required by the state Department of Environmental Quality to notify residents that the water had exceeded the allowable limit of a group of chemicals known as TTHM.

TTHM is in most municipal water systems and is thought by some to be a possible carcinogen in long term exposure.

It's a byproduct of chlorination, which is commonly used to help purify water. Last August, as Flint's water treatment plant worked to purify the water it was drawing from the Flint River, levels of TTHM grew to well over the EPA allowed maximum.

August test results provided by the DEQ to ABC12 show all of the eight testing sites around Flint had TTHM levels well above the legal limit.

The lowest level among the eight sites was 40 percent above the legal limit. The highest was 145 percent

more than allowed.

DEQ rules only require the city to report higher than allowed levels to the public once a year, and only if the average of quarterly tests is higher than the legal limit.

That notification went out to residents on Jan. 5. Since then, many residents have refused to believe assurances from the DEQ and the city that the water is now safe to drink.

So, we set out to do complete and independent testing to find out for ourselves exactly what's in your water.

It took a bit of research, but we finally found Water Tech, in Howell, a testing lab with absolutely no ties to Flint, just to make sure there are no questions about the test results.

After having Water Tech train ABC12's Larry Elliott on the proper methods for collecting water samples, we set out last week to randomly test five sites in Flint.

1. Downtown.

"I'm excited to see this done because this is an independent way to find out that everything's just fine," VanWagoner said.

2. The north side.

"We'd like to do kind of a whole battery of tests of your water. Oh yeah," Alexander said.

3. The west side.

"It could be dangerous to us. How about if we help you find out what's in it right now?" Sanders said.

4. The east side.

"I'm hoping for a good test and put my family at ease," Miller said.

5. Our main studio, on the south side.

We also wanted to compare whatever we're to find with Detroit supplied water, so we took a sample from the Burton water system.

Since next year Flint will connect to the new KWA pipeline, getting its water from Lake Huron, we took a comparison sample from the Saginaw-Midland water system, which currently uses Lake Huron water.

We tested all the sites for levels of TTHM. We also tested how much residual chlorine was in the Flint and Burton water supply and more importantly, we tested at two of our Flint sites for a number of other hazardous chemicals that could cause skin or other health problems.

Tests for those other chemicals are not required for public water systems, but we decided to run those tests anyway.

Here's what our independent testing shows:

All sites tested, including the Saginaw-Midland water system and the Burton system, using Detroit water, contained TTHM - but all of them were well below the EPA allowed maximum.

Saginaw-Midland water had less than a third of the maximum TTHM allowed, the Burton system had only about 25 percent of the maximum and the highest level found of all of our Flint tests showed just over 65 percent of what's allowed, all below EPA limits.

A similar byproduct of chlorination, haloacetic acids, was also well below EPA maximums in Flint's water.

We tested Flint's north and east water samples for many other hazardous chemicals that a doctor told us could cause skin or other health problems, and on both tests, not a single one of those chemicals was detected.

Since most often any smell to the water would be caused by levels of total residual chlorine, we tested that too, in both our Flint and Burton samples.

The legal limit is 4 milligrams per liter. The average of our Flint samples shows a level of about a half milligram per liter. Our test in Burton actually shows 22 percent more residual chlorine than Flint.

Our Flint sample also showed no Coliform bacteria.

We asked Chris McCarthy, of Water Tech, a few questions.

Q: How would you describe these test results?

A: "Well, for the samples received, the tests we performed, everything is within EPA guidelines for safe drinking water."

Q: Is there anything in these results that raises a red flag for you?

A: "For water quality or water safety, No."

We then asked residents if these results change their opinion of what they'll do with their water now.

"To be honest, no," Alexander said.

"It will make me feel a lot more comfortable about bathing and brushing my teeth in it, but I'm still not going to drink it and I'm not gonna give it to my kids or my dog," Sanders said.

"It makes me feel a lot more safer, a lot more comfortable knowing that it's safe to drink now, you know. I'll tell you a load lifted off my shoulders. When the kids take baths, when my wife takes a shower, you know, I know now we're safe," Miller said.

So what about those who've stood before Flint City Council with jugs of discolored water?

While Genesee County Drain Commissioner Jeff Wright points out he has no jurisdiction over Flint's water system, he says in general, discolored water like this is nearly always the result of water main breaks or repairs, and Flint has more than its share because of its aging system.

Wright also says the KWA pipeline won't change that. It will take better management of repairs and money - lots of it - to replace Flint's aging water mains.

Unfortunately for the city of Flint, those very high levels of TTHM recorded last August in Flint water tests are still required by the DEQ to be included in the next report calculating average TTHM levels.

The next test will be done next week, and city Public Works Director Howard Croft tells ABC12, because of the high levels last August, the city will again be found in violation and will be required by the DEQ to send out another TTHM notice of violation to all Flint water customers in early March, even if all new tests show levels under the legal limit.

Thanks for sending, this is a great article. I agree that we should send this out ... just so I'm clear, are you asking Tom or I to handle the transmittal? Happy to do so, just let me know who would be the best contact in the G's office (Dennis?). Maybe Howard/Paul can send to the legislators.

Just making sure we're on the same page for next steps. Thanks.

Subject: Backgrounder on Tuesday Flint water event
Attachments: Briefing Flint grant announcement.docx

Team,

Here is background on the planned Tuesday event in Flint regarding the $2 million Distressed Cities grant and other issues connected to the water issue.

There are plans for two press releases on Tuesday. The first will detail the two Flint grants and will be released by the governor's communications office. The other release, which would detail the other grants, would follow from Treasury with a quote from the governor.

Mayor Walling has agreed to speak at the event, with Harvey Hollins and Dan Wyant representing the governor's office. Sen. Ananich has asked to speak, and it has been suggested that Rep. Neeley would speak and it might be better to add him to the program. Others, such as Deputy Director Workman and Emergency Manager Ambrose, would be present and available.

The attached document includes details about the planned event, as well as background on the grants from Treasury and on the entire water issue from DEQ as well as Mayor Walling's Facebook post about the governor and links to the stories in the media about the issue.

We have a room reserved and are working with the communications team in Flint to have microphones and other items needed for the event.

Please let me know if there is any information you think should also be included, or anything that should be changed. Once everyone has had the opportunity to review, we can forward to the governor.

Thank you, everyone, for your assistance. I know there are lots of moving pieces and many people involved.

Dave

Briefing: Grant announcement in Flint

Tuesday, Feb. 3, 2015, 3-4 p.m.
Haskell Community Center, 2201 Forest Hills Ave. Flint
Governor's communications: Dave Murray, murrayd1@michgian.gov, 517[redacted]
DEQ communications: Brad Wurfel, wurfelb@michigan.gov, 517[redacted]
Treasury communications: Terry Stanton, stantont@michigan.gov, 517[redacted]

Purpose

The state government is providing support for the Flint government as it addresses issues with its water system. The state on Tuesday is announcing that Flint is receiving two grants totaling $2 million related to water system improvements through the Financially Distressed Cities, Villages and Townships grant program. DEQ Director Dan Wyant will address ongoing efforts with his agency to test Flint water and explain why the city is facing some of its problems. Senate Minority Leader Jim Ananich, D-Flint, will discuss his appreciation for the ongoing support for the city and its residents.

Attending

- Harvey Hollins, director of the Michigan Office of Urban Initiatives
- Dan Wyant, director of the Michigan Department of Environmental Quality
- Wayne Workman, deputy treasurer, Michigan Department of Treasury
- Jerry Ambrose, Flint emergency manager
- Dayne Walling, Flint mayor
- State Sen. Jim Ananich
- State Rep. Sheldon Neeley
- State Rep. Phil Phelps

Agenda

3:00 PM – 3:05 PM:	Harvey Hollins announces that Flint has received two grants totaling $2 million.
3:05 PM – 3:10 PM:	Dan Wyant discusses the state's ongoing role in monitoring Flint's water and any assistance that has been provided and will continue to be provided.
3:10 PM – 3:15 PM:	Mayor Dayne Walling remarks about appreciation for state assistance.
3:15 PM – 3:20 PM:	Sen. Jim Ananich remarks about appreciation for state assistance.
3:20 PM – 3:25 PM:	
3:25 PM – 3:35 PM:	Harvey Hollins closing remarks, opens floor to media questions.
3:35 PM	Event ends, though this might be optimistic.

Background

- The quality of Flint water has been a high-profile concern in recent weeks, with residents complaining about the color, taste and smell of tap water since a switch to Flint River water as a temporary source as a pipeline is built to Lake Huron as a water source starting in 2016.
    - Residents have attended meetings with jugs of brownish water.
    - U.S. Kildee has worked with labor and community groups to distribute bottled water.

- Mayor Walling has issued a letter (included below) calling for state and federal assistance for the city, including forgiveness of some $20 million in debt through the Drinking Water Revolving Loan Fund and calling for the governor to come to Flint personally.
    - Walling also submitted a guest column to the Flint Journal with similar requests.
        - He said the loan forgiveness is needed for the city to upgrade its water treatment process.
    - Governor and Mayor Walling had a telephone conversation on Friday, and the mayor has pledged to work together on solutions.

- Rep. Sheldon Neeley also has sent the governor a letter, saying that his constituents "are on the verge of civil unrest."

- The Department of Environmental Quality has been monitoring the water situation, with a detailed backgrounder and talking points attached below.

- The Treasury Department is announcing Tuesday that Flint is among the cities receiving a combined $8 million the Financially Distressed Cities, Villages and Townships grant program.
    - The announcement of the other grants will follow the Flint announcement.
        - The Flint grants are $1.1 million to allow the city to replace the functions of the old incinerator with new water pollution control facility allowing for the disposal of waste to landfills.
        - The other is $900,000 to allow the city to hire a contractor to perform a leak detection survey, which will lead to prioritizing repairs.
    - A breakdown of the grants is included below.

Treasury breakdown of Flint grants

Flint Incinerator: The grant project entails shutting down the current Water Pollution Control Facility Incinerator (due to the incinerator not being up to new EPA standards). In order to meet EPA standards, it would cost roughly $8.8M in upgrades to the current incinerator. The grant funding will allow them to replace the functions of the old incinerator by constructing new facilities which will allow for the disposal of waste to landfills.

Budget Breakdown	
Construction Contractor	$1,050,000
Project Management	$50,000
Total	$1,100,000

Flint Leak Detection: The grant project will allow the city to hire a contractor to perform a leak detection survey of the city water lines. The city will receive a map of leak locations and an assessment of leak severity. This data will allow the city to prioritize leak repair. The project also covers the expense of conducting a water pipe line wall thickness condition assessment on a portion of the city's pipes. The assessment will guide the city's water main replacement program.

Budget Breakdown	
Project Planning	$90,000
Mobilization of Crew to Site	$27,000
Leak Detection < 16" diameter	$378,000

Leak Detection 16" diameter or >	$270,000
Pipe Condition Assessments	$135,000
Total	$900,000

DEQ backgrounder on Flint water

Following the formal approval of Flint into the KWA in 2012, DWSD sent Flint a letter saying their contract was thereby terminated (by early 2013).

Genesee County has been using DWSD water without a contract since May 2014. But Flint took the letter to imply a water cutoff, and promptly turned to DEQ with a proposal to use the Flint River (their historic backup system).

This proposed shift was pitched primarily as a money saver. But it put the city in the business of water production, where they historically had been in the business of water transmission. DEQ approved the use of the river as a source, based on the treatment plant's past performance as a standby facility and the improvements we outlined prior to a switchover.

Several municipalities around the state use surface water supplies (rivers): Blissfield near Monroe, Manistique, and Alma to name a few.

The city completed the upgrades at the water plant the facility and DEQ approved it April 2014.

There were some initial hiccups. Last summer, there were a couple of 'boil water' notices issued. One for a water test that showed e. coli, one for a break in the water main.

The challenge to using the Flint River as a source is that the condition of the water is variable and changes with season and weather. It has substantially more organic matter than deep lake sources like Lake Huron. This organic matter is mobilized by high water events, and warm weather also can account for more organic material in the water.

The treatment of the organic matter is done with chlorine. One might conclude that the continual answer is just to use more chlorine to achieve water safety. However, at some point on the continuum, the chlorine and organic matter create TTHM – total trihalomethanes – as a byproduct. When the standard for those is exceeded over several consecutive quarters of testing, the supply is required by law to issue public notice and submit an approved plan for addressing the situation.

You'll note that this regulatory approach means TTHM testing is done quarterly. That means people who use the system are exposed to TTHM for several months before the public notice is required. It's because TTHM is a chronic health threat. Over the long term (measured in decades), continued exposure can contribute to some known health problems. If this were an immediate health threat, customers would receive immediate notification to boil their water or not use it.

Put in context, the EPA (which established the standard and the rule) estimates the existence of the TTHM standard prevents an estimated 280 bladder cancer cases each year ... out of more than 330 million people who use public water supplies around the country.

It's not "nothing." State and federal law requires quarterly testing for TTHM and that the public be informed of it when the annual average of four quarters' worth of consecutive testing shows TTHM

levels exceeding 80 parts per billion. Flint's results managed to exceed the annual average in three quarters, and they must develop a plan to address it.

But it's not like an eminent threat to public health. Unlike an e. Coli or even total coliform bacteria maximum contaminant level, which require immediate public notification and response and are part of daily / hourly testing of public water supplies, TTHMs pose a public health concern with chronic, long-term exposure.

It's clear the nature of the threat was communicated poorly. It's also clear that folks in Flint are concerned about other aspects of their water – taste, smell and color being among the top complaints.

The Safe Drinking Water Act requires public water supplies be tested for more than 90 regulated contaminants, including microbial contaminants. The act, and the program here in Michigan, work to ensure that water is safe to drink. The act does not regulate aesthetic values of water. Here are some factors affecting the aesthetics of water in Flint.

1. It's the Flint River. The water supplied by DWSD historically came from Lake Huron. It's softer. With hard water, you get a different flavor and feel. It's why General Motors suspended use of Flint Water – it was rusting their parts. Also, there's the 'organics' factor (discussed previously).
2. The system is old. Flint has more than 500 miles of water pipes. More than half of those pipe miles are more than 75 years old. Much of it is cast iron. Hard water can react with cast iron and exacerbates the rusty factor, which creates that brown water that angry residents were holding up in jugs for the media cameras last week. Valve failure has also been a key challenge. The system has an estimated 7,500+ valves. When they stick open or stick shut, it affects the hydraulics of the system and increase areas of stagnation. The city has a backlog of valves that need to be addressed. They've done half a dozen or so since November.
3. Flint is old. Many of the homes served by the system are old. Brown water complaints may also be attributable to cast iron pipes in customers' service connection to the city lines. The DEQ has been encouraging people with water coloration concerns to contact the city and see whether it is the service line or the City's line causing the issue. Again, discoloration is not an indicator of water quality or water safety, but we recognize that nobody likes it.

In summary, the City of Flint has tremendous need to address its water delivery system. We are not aware that they have any capital improvement funds for preventative maintenance in place, much less line replacement project monies that will require hundreds of millions.

The City was approved for a Revolving Fund loan in 2008 or 2009. As a Distressed Community, they qualified for flexible terms and 2 percent interest rate Revolving Fund Loan. After they were notified they were approved for the loan, they declined it. Previous SRF loans from the state to Flint bear an outstanding balance of $20.7 million today.

The DEQ continues working with the city to address the TTHM issue. They can take interim steps – from scrubbing the insides of transmission lines to carefully monitoring the hydraulic challenges in their system – to address customers' aesthetic concerns. Their TTHM numbers already are showing dramatic improvement; the November testing showed only one of seven sample points exceeding the standard.

The key now is that the standard is an average of three quarters' worth of results. It will be some time before they are officially "not in violation." However, depending on weather in 2015, it's not unforeseeable that we will be having this conversation again by next Christmas.

The key to the conversation is that TTHM is not a top health concern. That's key because residents need to understand TTHM in context, and it is key because it appears the mayor has seized on the public panic (sparked, frankly, by their poor communication of the violation notice) to ask the state for loan forgiveness and more money for their infrastructure improvement.

Another key thing to remember is that once the city connects to the new KWA system in 2016, this issue will fade in the rearview.

Key messages:

1. The DEQ Drinking Water program works with communities around the state to ensure that municipalities provide customers with clean, safe drinking water.
2. Municipal water supplies are tested rigorously and regularly for more than 90 regulated contaminants, including microbial contaminants that pose an immediate public health concern.
3. Flint's exceedance of the TTHM standard should reassure residents that the testing program is effective.
4. TTHM is not an immediate health threat. It is a chronic concern, one that can be problematic over the course of several decades of exposure. The public was notified because the law requires the city to make public notification, so that everyone can make informed decisions. This is particularly true for people with infants or those with compromised immune systems.
5. The DEQ is working with the City to address the situation. Recent tests show the TTHM numbers dropping rapidly. The department will continue working with the city in the months ahead, and residents should feel confident that their water is safe to drink unless the DEQ or City notifies them otherwise.
6. The discoloration and odor issues some Flint residents are experiencing are separate issues from the TTHM issue. TTHM is odorless, colorless and measured in parts per billion.
7. Flint water customers who have questions or concerns about their water should first contact the city to get answers and help. They also can contact the Michigan DEQ.

Mayor Walling's Facebook post

Friend,

Access to clean, safe, affordable water is a basic human right.

That's why I just sent Gov. Snyder my Flint Water Improvement Plan. It focuses on the areas of safety, quality, access, investment and education. My letter urges the governor to quickly implement these ideas so that Flint's water is 100% safe.

Please contact Gov. Snyder by calling (517) 335-6397 (or by clicking here) and ask him to take action immediately to implement my plan and ensure Flint's water is safe.

My plan offers new ideas and also builds on successful models of utility, energy and assistance programs at the state and federal levels. Here is my plan:

Safety & Quality

- 100% Safety is the standard

- City of Flint releases testing data to assure safety and expands testing to households with support from the Michigan Department of Environmental Quality
- Support alternatives for those advised not to drink the water by their doctors through the Michigan Health Endowment Fund and community partners to protect the vulnerable like seniors and infants
- Bring on experienced river water treatment operational management in the City of Flint
- Require water testing data to be released quarterly by law in all Michigan communities

Access

- Announce an amnesty program for turn-ons and reduce the turn-on cost in Flint
- Develop a revised payment plan policy to allow customers to come back on to the Flint system
- New Federal and State partnership to establish new Drinking Water Emergency Assistance Fund for customers (modeled on Federal and State energy utility programs: Low Income Home Energy Assistance Program; Michigan Energy Assistance Program; State Emergency Relief)

Investment

- Accelerate water system improvements outlined in the City of Flint Capital Improvement Plan through Federal and State Investments
- State approves City of Flint's Distressed Cities Fund applications
- Federal and State forgiveness of payment to Drinking Water Revolving Loan Fund
- Federal and State financing for future improvements
- City Water Department implements budgeted FY15 projects including leak detection, valve repairs, new pipes and meter replacements

Education

- Develop a community partnership to provide household and business customers with information on testing and conservation
- Ongoing partnership with Michigan Department of Human Services, United Way, Salvation Army and community organizations to provide information on water assistance
- Expand youth energy initiative to assist households with conservation and efficiency (piloted in summer 2014 with Northwestern High School students, EcoWorks and Consumers Energy)

The struggle with our water has gone on for too long. The state must take action and do its part. Please ask Gov. Snyder to take action immediately to implement my plan and ensure Flint's water is safe. Thank you for your ongoing support.

CITY of FLINT WATER TREATMENT PLANT MONTHLY OPERATION REPORT

SUPPLY NAME: CITY of FLINT WATER PLANT
WSSN: 2310

Michael Glasgow	**January 2015**
Operator-in-Charge	Month/Year
F-1R, F-2	**F-1**
Certification of Operator-in-Charge	Water Plant Classification
Michael Glasgow	**Genesee**
Signature of Operator-in-Charge	County

Treatment Rate and Filter Data

Maximum Treatment Rate	**19.3**	Million Gallons per Day
Rated Plant Capacity:	**36**	Million Gallons per Day
Average Filter Run:	**76**	Hours
Average Head Loss:	**n/a**	Feet *(filter head loss meters not operational)
Average Filtration Rate	**2.1**	Gallons Per Square Feet per Minute
Maximum Filtration Rate	**3.6**	Gallons Per Square Feet per Minute
Average Wash Water Use:	**3.2%**	Percent of Treated Water

Chemical Data

Chlorine on hand:	**12,000**	lb.	Est supply:	**18**	days
Primary Coagulant (Ferric Chloride) on hand.	**110,000**	lb.	Est. supply	**10**	days
Lime (CaO) on hand.	**257**	tons	Est. supply	**22**	days
Fluoride on Hand	**16,630**	lb.	Est supply	**42**	days
Cost of All Chemicals per Million Gallons	**n/a**	dollars			
Total Power Cost per Million Gallons	**n/a**	dollars			

Remarks	Confluence Point # 1 (N)	Confluence Point # 2 (S)
Number of filter confluence samples > 0.3 NTU:	**0**	**0**
Number of filter confluence samples collected:	**244**	**242**
Percent of filter confluence samples > 0.3 NTU:	**0.0%**	**0.0%**
Number of filter confluence samples > 1 NTU	**0**	**0**

Did any individual filter exceed:

1.0 NTU in two consecutive measurements taken 15 minutes apart? **NO**
If yes, attach specific filter(s) information and indicate required follow-up status.

0.5 NTU in two consecutive measurements taken 15 minutes apart after 4 hours of operation? **NO**
If yes, attach specific filter(s) information and indicate required follow-up status

1.0 NTU in two consecutive measurements taken 15 minutes apart for 3 consecutive months? **NO**
If yes, attach specific filter(s) information and indicate required follow-up status

2.0 NTU in two consecutive measurements taken 15 minutes apart for 2 consecutive months? **NO**
If yes, attach specific filter(s) information and indicate required follow-up status

Was continuous (every 15 minutes) filter monitoring equipment off-line during the month? **NO**
If yes, indicate date(s), duration, and individual filter grab sampling frequency on a separate sheet.

Did POE disinfectant residual fall below 0 2 ppm during the month? **NO**
If yes, indicate date(s) and duration on a separate sheet.

Was minimum C*T credit achieved for the entire month? **YES**
If no, indicate on a separate sheet the date(s) not achieved

Was continuous POE chlorine residual monitoring equipment off-line during the month? **NO**
If yes, indicate date(s) and duration on a separate sheet.

Flint – July 1, 2015 – Mayor D. Walling, J. Freeman, N. Henderson, R. Byrne,P. Dostine, E. Cline

- **Water & (U of M Flint story)**
  Flint continues to work on the issue of water quality. By mid-July, 6 of the 12 new filters will have been installed.
  U of M Flint. U of M staffer and students found presence of TTHM, levels higher than the MCL allows. The story got picked-up in the media. Henderson said the university meant no harm, that the media put the story in a negative light. Flint and the U of M will continue to work together. Flint will continue to test its sites as well.
  Flint is going to push back the date to start the 24' water main replacement. The city will re-bid the project. Why? Project would interfere with current, ongoing transportation projects, the current construction season is already half over, and the original bid came in higher because of the current KWA project. Henderson said the re-bid should save the city as much as $1.5M.

- **Election**
  The scheduled election is moving along. Henderson doesn't anticipate any issues. The last day to register is Monday, July 6.

- **Police and Fire**
  Crime report. Henderson said while overall crime is down, other serious crime incidences are up, like homicide.
  Mayor Walling reported that Flint was selected (1 of 5 cities in Michigan) to participate in a U.S. Dept. of Justice-sponsored, multi-federal agency collaborative intensive crime intervention. Presently, Dept. of Justice officials have been meeting with Flint officials including law enforcement and performing problem assessment. According to the Mayor, it will be a two-year "engagement". The official announcement of the program will be in Detroit sometime in September. Much of the federal help will be in the form of in-kind: coaching and technical assistance.

- **Budget**
  Council adopted the FY '16 budget. The fund balance was $495,000. Council adopted an amendment to utilize $250,000 of the fund balance for weed and grass abatement. Henderson opposed council's decision (Mayor is not going to veto) and said the issue will have to be handled at the July 15 RTAB. Henderson noted that the city's overall fund balance -- $1.5M of a total budget of $ 55M -- represents 3% of the total budget. That's well below the 12% in the EM Final Order. Henderson said council's actions are "not financially responsible."
  About the unmowed grass issue. Henderson said $100,000 was found in DPW's FY '16 budget that can go to partially mitigate the issue of unmowed grass. (The mayor estimated it would cost the city $1M to cut the whole city, one time!) She also said they are exploring other avenues like CDBG funds. The county Land Bank maintains it properties.

Plant Jul 1 9AM WED

R Byrne, E Clerie RDoctine
NAMARRA Jack Freeman Mayor Wasilla.

Priorities

N - Water - Cont to work on quality of water
- U of M testing they found:
TTHM - higher levels over the MCL
- Plant will still test their site
- U of M still working
- MSU Comm. College - they haven't said anything negative

by mid-July
6 of 12 filters installed

▷ project begin end of July
Put off till

Dupont
TTHM -
$1.5M to do FT NRL it would cost
Also interfer
related FT - to do.

KWA

MAYOR

KWA project did entirely consume our mid-mkt. capacity.

Authority to water plan rates same. will re-bid and get cheaper price - less $1.5M

Detroit leased their water rates?

Fleet still w/ DWSD?

(Mayor) yes.

Election

don't see prob. Ele - working along last day to register & then. Id 6.

Police + Fire

Police - down overall in crime stats
- homicides are still up.

Mayor selected

- Flint one of 5 intensive focus By Dept of Justice

- Coaching + tech assist. program
- connect Liaison Dept of Justice

City of Flint
Water Quality Update
Wednesday July 1st 2015

Leak Detection

What: $900,000 Treasury Distressed City Grant for Leak Detection / Pipe Wall Assessment

Status: Expected start date – mid / late July

The Contract and RFP should be to vendor "Echologics" by next week.

The vendor has several questions regarding assurance of payment. Their requests have been forwarded to the Finance Director.

The vendor maintains a window of 10 – 14 weeks following mobilization to complete the full scope of work.

Next steps: Complete the contract signing and schedule mobilization.

GAC Installation

What: $1,601,740 contract with LAN to design and install new filter media at the Water Plant

Status: Ahead of schedule

The filter testing has been completed by the vendor and the final media has been determined and forwarded to DEQ. Preliminary testing has shown that for optimal GAC performance, filter media sand will also be replaced. This will be a complete filter media replacement.

Installation has been scheduled to start the week following the 4th of July, with vendor committing to complete 6 filters by July 17th. The remaining 6 filters are to be complete by mid-August. Six filters can treat up to 18 MGD, and current usage is ranging from 13 -15 MGD.

The measurement of success will be determined by the level of TTHM leaving the plant tap. When traveling through the distribution system the levels can reach as high as twice the plant tap level leaving this as the control point.

The test results indicate that the installation will serve the desired purpose and allow the City to control TTHM levels in the summer months. Testing will occur weekly during the installation to measure the success rate and determine the actual effectiveness of the filters.

Next steps: Installation is scheduled to begin on the week following the 4th of July (one week ahead of original projections).

WPC Incinerator Shutdown

What: $1,100,000 Treasury Distressed City Grant for WPC Incinerator Shutdown

Status: In construction phase

Concrete pours are underway, and will be ongoing the next few weeks.

Building footings are poured, and further progress will continue when the concrete has cured.

Panels for the upper section of the facility have started to arrive on site.

Next steps: Completion of underground infrastructure followed by more concrete.

Water Meter Installation

What: $5,000,000 contract to purchase and install up to 18,000 water meters.

Status: On schedule with tentative start date of July 20th.

The vendor "Metron" has signed the contract and is working with City staff to develop a written installation plan

The plan will be to replace the 9000 meters that are currently producing irregular reads in a scheduled and efficient manner.

The City will install an additional 3000 meters annually over the next three years.

The plan is expected to be completed by mid-July with installation planned for the end of July.

Next steps: Complete written installation plan, and develop notification letter to coordinate installation with customers.

Dupont St. 24' Water Main Replacement

The recent decision to re-bid the project was based on a number of issues discussed on 6/26/15 with DPW staff and Rowe Engineering.

- Interference with current ongoing Transportation projects:
    - Saginaw St. paving project (MDOT)
    - Dupont St. paving project
    - Stewart Ave. to Bishop St. project
    - Stewart Ave. to Andrew St. project

  With the late start many of these newly paved roads will be impacted, and will need to be repaired to specs at extra cost to the project.

- Last bid for project perceived as too high.
    - Industry professionals believe the current KWA project drove the price up due to contractor's schedules and equipment already allocated to other projects.
    - Bidding timeframe was not optimal, most projects of this nature are bid out in January. At this time most contracting firms have an open schedule, therefore more bids are usually returned and the bidding is more competitive.
    - It was discussed to bid phase 1 again in January, and then bid phase 2 in February. This may increase the ability to save money overall on both projects

- Late start may push project into the winter months if issues arise.

Mike Glasgow
Utilities Administrator

RESOLUTION STAFF REVIEW

DATE: 7-1-15

Agenda Item Title: Repair Clamp and Water Service Parts

Prepared By: Cheri Priest, Water Service Center

Background/Summary of Proposed Action: The City of Flint Water Service Center requests that a purchase order be issued for the purchase of stainless steel repair clamps and miscellaneous service parts which are used in the repair of water mains and service lines.

Financial Implications: Adequate funding has been allocated for this purchase

Budgeted Expenditure? **Yes** ☒ **No** ☐ **Please explain if no:**

Account No.: 591-540.202-726-000 $130,000.00

Pre-encumbered? Yes ☒ **No** ☐ **Requisition #** 150000608

Other Implications (i.e., collective bargaining): None

Staff Recommendation: Recommend Approval

Staff Person: Robert Bunish
(Dept Head or other authorized staff)

SEALED PROPOSALS RECEIVED FINANCE DEPT/PURCHASING & SUPPLIES ON SEPTEMBER 10, 2015

Subject: KWA Update

KWA UPDATE

July 7, 2015

This KWA update is given with information provided by the Genesee County Drain Commissioner Jeff Wright who is also the CEO of the Authority.

The Kwa Pipeline is on schedule to provide Lake Huron water to the Flint Treatment Plant by **June of 2016**.

Intake – The intake, which is the entry point for Lake Huron water a mile down is nearly 90% completed and will be finished in the next several months. Additional regulatory procedures have slowed the timing but this aspect is on target.

Pump Stations – There are two pump stations along the pipeline that have to be finished and each is approximately 75% complete. Current timeline has each station done by the end of this calendar year.

Underground Pipe – Twenty-six of seventy (70) miles of underground pipe has been installed including the majority of the pipe from the Genesee County line to the Flint Treatment Plant.

Installation of the remaining pipe stands out as the determining factor as to how soon water can be delivered from Lake Huron to the Flint Treatment Plant.

- If the weather remains mild then the possibility exists to have water delivered by the first quarter of 2016.

- If there is a significant amount of rain, then the timing of water delivery could be pushed back to the third quarter of 2016.

- Conservative estimates and current pace of construction maintains that the pipeline will be complete to the Flint Water Plant by

Flint telephone call, July 8, 2015, 9AM

Randy, Patrick, Carmen

Natasha Henderson, Mayor Walling

- Priorities for the upcoming week

- Ecologic update. Contact signed?
- Water issue at U of M Flint

  Nothing new, continuing to work closely with – didn't have enough consumption on campus to get water flowing

- Councilman Kincaid's lawsuit, update

  Nothing new, moving forward

- Re-assessment

  Received a letter, will send RFP from City of Detroit, stated we accept your letter – closer it is to $3M, the harder it will be to get done. Natasha inquired about funding assistance for this project – FDCVT program has $5M funding for next fiscal year, call for project in fall? Randy will discuss with Treasury contact re: timing

- KWA – Estimated completion date is June 2016, one of twelve filters installed – this portion should be completed in a couple weeks

- New RFP for water main replacement
- Updates from the City Charter Commission

  Meet every week, and have subcommittee meetings weekly as well, 3-4 meetings per week

  Budget request – $59,000 allocated, asking for double – Mott Foundation may help with funding, Natasha will keep OFR updated on

  Looking at Pontiac's charter – Council didn't go out and support it, wasn't explained what it would do (reasons for denial)

- Miscellaneous
- Transportation Millage MTA

  Same millage rate – Natasha will report back OFR on length of renewal

Deadline to approve request to get on ballot is August 11, would need to be addressed at July RTAB Meeting

- Refiling for Coalition for Clean Water – Federal Judge dismissed request for injunctive relief, former City Attorney Young resubmitted suit (30 pages of allegations) to Circuit Court, Mayor and Natasha named in suit

- RTAB Meeting

  Natasha had concerns regarding a budget amendment, 12-15% fund balance, with Council's actions it will only be at 3%

  Mayor stated that June 30 has already passed, $200,000 is unspent, will not change end of year balance, need to move forward with audit and close books

- Preparing Year-End Strategic Plan Update & Summary

- Jodi is doing a good job so far – Jerry is still on call and will be coming in today to help with 911 or Courts

- Flint Firebirds are announcing their new sponsor tomorrow (formerly Pirani), also making improvements to building, ie locker rooms, media box, etc.

- A lot of people are watching the OPRA issue, Mayor feels RTAB support is crucial

  Randy will ask Eric which member will be absent from meeting, Natasha would like them to vote still

- Phone call next week will be canceled due to RTAB Meeting

Flint tele call 7.8.2015

CARMEN, Randy, MAYOR, NATASHA, [redacted]

Water / DOJ on Flint

- still working closely with them
- NO New developments

Re-assessment

- Flint received letter from tax commission
- Forwarding Det RFP to Flint

Q. CAN Flint get funding to help with Re-Assessment project? (From NATASHA)

A: Maybe some new funding under existing distressed community treasury grant

KINCAID lawsuit

NO New developments

lawsuit update

- Coalition of Clean Water

- They have re-filed lawsuit to circuit court
  - 30 pgs of "suspect allegations"
  - MAYOR has been added to lawsuit

- KWA completion - June 2016

- water treatment project

- one of the 12 filters has been installed.
- Natasha thinks it will be completed next couple of weeks

Charter Commission

- Meet weekly incl. subcommittees
  - They made budget request - they asked double the amount ($5900) for funding - Flint cannot afford that - Flint told charter commission to seek money from foundations

MTA Millage renewal

- asking for same amount, ~~no~~ no increase
- CAN we have this on RTAB? MAYOR ASKED MILLAGE
- Aug. 11th deadline to ok for upcoming election

For Immediate Release

Granulated Activated Carbon Filter Installation Underway at Flint's Water Treatment Plant, Expected to be Completed by Mid-Month

Flint, Michigan – July 9, 2015 – Installation of the Granulated Carbon filter media (GAC) is underway at Flint's Water Treatment Plant. The first phase of the new filter media will be installed and operational within a couple of weeks. The GAC filter media will immediately begin greatly reducing the amount of Total Organic Carbon (TOC) in the water which is expected to significantly reduce the formation of total trihalomethanes (TTHM).

The City of Flint and LAN Engineering designed the plan for installing the GAC and work was coordinated with the Michigan Department of Environmental Quality. Installation of the GAC was a key recommendation by water service firm Veolia North America for addressing the issue of TTHM. The cost of the filters is approximately $1.6 million.

Recent testing has shown that Flint's water is meeting all regulatory safety standards, with TTHM levels being significantly below the maximum level accepted. Flint has been under the that level at all eight sampling sites during the last two quarters of testing, however a violation notice was required to be sent at the beginning of this month due to the average being high at one site from levels experienced in 2014.

TTHM is the colorless, odorless byproduct gas created by the reaction between TOC and the chlorine used for disinfecting water during treatment. By drastically reducing the amount of TOC in the water through the GAC, the formation of TTHM is expected to be reduced. Installation of the GAC is one of many improvements to the water system which are call for in the City's Capital Improvement Plan.

For Immediate Release

City of Flint Statement on Amended Water Lawsuit

Flint, Michigan – July 10, 2015 – The Coalition for Clean Water has filed a new lawsuit against the City of Flint in which they have abandoned all previous federal claims. In response to the updated complaints, city officials issue the following statements:

"Only one month ago, plaintiffs filed a lawsuit claiming the City violated federal laws. Now they have admitted their claims lacked merit, just as the U.S. District Court said. The plaintiffs' new claims are equally baseless and devoid of legal merit. The taxpayers of this community can ill afford yet another lawsuit and any assertion that water decisions by the City of Flint were made without the public's best interest in mind is misleading and damaging to the public trust."

– Pete Bade, City Attorney

"Every step has been taken to ensure the safety of the water. The City has worked closely with authorities to make certain all safety and quality guidelines are followed. Flint's commitment to providing safe, quality and affordable water has not wavered. The City has taken numerous steps and invested a substantial amount, more than $30 million over 5 years, to improve its water system. These steps have and will include:

- Upgrades to the Water Treatment Plant ahead of water source switch
- Construction of a new intake at the WTP ahead of the KWA connection
- The regular flushing of hydrants

–CONTINUE–

Dayne Walling
Mayor

Natasha L. Henderson
City Administrator

- Exercising and repairing of valves
- Repair of mains damaged during the spring thaw
- The ongoing hydraulic modeling of the distribution system
- Creation of both a citizens' and a technical advisory committee in order to share information with the community
- In-home water testing to monitor distribution system
- On-site testing for TTHM at the Water Treatment Plant
- Approval of a leak detection system set to begin in August
- The creation of a dedicated water webpage, complete with documents and timeline of events, to share this information with the public

In addition, the new granulated activated carbon (GAC) filters are being installed at Flint's Water Treatment Plant. The first round of filters will be installed by mid-July and will have an immediate impact greatly reducing the amount of total organic compound (TOC) and thus reducing the formation of trihalomethanes. These filters, along with the others proactive measures being undertaken to address issues in the system, were the concurrent recommendation of the various parties who evaluated Flint's treatment operation.

– Howard Croft, DPW Director

STATE OF MICHIGAN
DEPARTMENT OF TREASURY

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

DATE: July 10, 2015

TO: Rick Snyder, Governor

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: Status of Financially Distressed Local Governments

EMERGENCY MANAGER

Lincoln Park
Emergency Manager: Brad Coulter
Appointed: July 3, 2014
Anticipated Exit: January 2016

Recent Developments
- The city ended FY 15 with an estimated $100K General Fund Balance.
- An actuarial analysis published on May 20, 2015 shows a further decline in pension funding, down to 23%. More conservative actuarial assumptions were used in this report.
- EM Coulter has modified retiree collective bargaining agreements to reduce healthcare benefits. These changes are to be implemented in July 2015 and will reduce retiree healthcare costs from $4.1M to $600K annually.
- City Manager interviews have been conducted. Mathew Coppler, City Manager of Enfield, Connecticut was offered the position and accepted. His contract has been finalized and he will begin work in late September.
- The Lincoln Park Retiree Associations have filed a lawsuit against the State of Michigan, Treasury, and the City of Lincoln Park regarding the reduction of city retiree healthcare.

Significant Actions/Issues
- FY 14 ended with a General Fund accumulated deficit of $736K, out of a total budget of $21M. This is a significant increase from the FY 13 accumulated deficit of $89K. Increases were in Public Safety - $1.1M, Public Works - $700K, and Culture and Recreation - $600K.
- Voters rejected the Firefighters and Police Officers Retirement Act proposal last month by a 53% to 47% margin. Had it been approved, an additional $3M annually would have helped fund fire/police pension and healthcare costs. EM Coulter is pursuing an alternative plan under provisions of PA 345 of 1927 to create a Board of Trustees to manage and operate the retirement system. If successful, a request for seven mills per year to fund public safety pensions will be placed on the November ballot.

Issues to Resolve before EM Exit
- Police CBAs must be finalized.
- Increase and stabilize pension funding levels.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

FRC Created: November 12, 2014
FRC Members: Nick Khouri, Bill Martin, Brenda Jones, Darrell Burks, John Roberts, Lorron James. Mike Duggan, Stacy Fox, Tony Saunders

Recent Developments

- In reaction to the June 30, 2015 vote by Detroit City Council against increasing rates on water and sewerage costs, the Chairman of the FRC and State Treasurer, sent a letter to Detroit's Mayor and City Council on July 2, 2015. The purpose of the letter was to ask the Mayor and City Council to provide the FRC with either the necessary information to demonstrate the city's plan to comply with the approved budget for FY 16, or the basis upon which the city will seek an amendment to the FY 16 budget. If the vote is not reversed, this action will result in the Detroit Water and Sewerage Department Enterprise Fund being in a deficit position for FY 16.
- At the FRC's June 22, 2015 meeting, the city provided an update on the syndication of the city's $275M bankruptcy exit financing. The city may elect to repay a portion of the exit refinancing before the public offering, which is expected to occur in mid-August, and will report back to the FRC at the July 27, 2015 meeting.
- The most intense work the FRC will perform going forward is measuring the effectiveness of restructuring initiatives in light of the large annual pension obligations the city will incur beginning in 2024.

Significant Action/Issues

- The first statutorily required biannual report on Detroit was filed by the Financial Review Commission (FRC) on May 28, 2015. The report detailed the FRC's activities and formal requirements since its appointment in November 2014. The FRC will file its second biannual report in December 2015.
- The city submitted its Four-Year Financial and Operating Plan (Plan) to the FRC in March. After reviewing the Plan and determining it was based on sound assumptions and met all statutory requirements, the FRC granted approval on April 20, 2015. The city's Plan encompassed the second year (FY 16) of Emergency Manager Orr's two-year budget and used this as its base year with no changes, plus three years (FY 17, FY 18, and FY 19).
- The City of Detroit Assessor's Office is currently conducting a multi-year project to reappraise all properties in Detroit, after the State Tax Commission found significant problems with property valuations. The reappraisal is scheduled to be completed in 2017.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Allen Park

RTAB Appointed: September 26, 2014
RTAB Members: Suzanne Schafer, Joyce Parker, Fredrick Frank, Karen Barann

Recent Developments

- The City Council adopted the FY 16 Budget on May 26, 2015. It was approved by the RTAB on June 3, 2015.

- The city completed its move to a new temporary City Hall on June 8, 2015. Final inspections are scheduled for July 17, 2015.
- The city met with the police bargaining unit and is considering a one-year extension to the CBA.
- On May 15, 2015, an updated five-year budget projection from the city was received. The RTAB will be considering this item at their July 22, 2015 meeting.
- The RTAB approved the hiring of a professional search firm to assist with finding qualified City Administrator candidates. Treasury will participate in the selection process. Initial screening of applicants is expected to begin in July 2015.
- Completion of the bond tender process is projected for August 2015. The 2015 Refunding Bonds will be rated Single A, due to the city's pledge of distributable state aide.
- Standard & Poor's released its rating of the city on June 24, 2015, in anticipation of the bond tender release. The city's long-term rating for the existing bonds was downgraded with a negative outlook. The downgrading for these bonds is similar to the rating by Standard and Poor's on the City of Detroit's DWSD tender refinancing.
- A retired city employee has brought a breach of contract and age discrimination lawsuit against the city. The city's insurance policy covers only a small portion of the alleged damages.

Significant Actions/Issues

- There's a need to add one member to the RTAB to find additional Allen Park area diversity.
- In April, the RTAB approved creation of an Interim Deputy City Administrator position to oversee city operations until the bond tender and City Hall projects are complete. Mark Kibby, former City Manager of the City of Woodhaven, was appointed to this position.
- Litigation was filed by retirees challenging the EM's authority to reduce other post-employment benefit (OPEB) liabilities. A motion for summary disposition is pending. No date has been set to hear this motion.

Benton Harbor

RTAB Appointed: March 10, 2014

RTAB Members: Larry Steckelberg, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments

- The City Council adopted the FY 16 budget on June 15, 2015. The RTAB approved the FY 16 budget on June 22, 2015.
- There is a vacancy on the City Commission due to the passing of Commissioner Mary Donald.
- Former Benton Harbor Public Safety Director Roger Lange has brought a Whistleblower and Elliot Larson Civil Rights case against the City of Benton Harbor and former Emergency Manager Tony Saunders. The mediation is expected to take place on July 17, 2015 with Jon March of Miller Johnson serving as the mediator.
- The Finance Director, Deputy Finance Director, several Public Safety Officers, and two Public Works Department employees have resigned due to other employment opportunities.
- The first annual evaluation from the RTAB will commence in July.

Significant Actions/Issues

- On April 6, 2015, the City Commission passed resolutions adopting a procurement policy, investment policy, and a credit card policy.
- FY 14 audited General Fund revenues exceed expenditures by $1M, out of a total budget of $6.1M.

Ecorse

RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joyce Parker

Recent Developments

- On May 12, 2015, the RTAB approved a narrowly balanced FY 16 Budget. To balance the budget, the city increased an existing P.A. 33 levy by approximately 15 mills.
- The City has completed a balanced five-year financial plan. Difficult changes including the outsourcing of fire services must be realized soon to comply with this financial plan. This is the first time that the City has proposed a solvent path out of receivership.
- The City Administrator has requested a new City Controller (third in six months), however; the RTAB rejected this appointment at the May meeting. The Mayor has submitted a letter of protest, disagreeing with this RTAB decision, and Treasurer Khouri met with him on June 26, 2015. Treasury is considering changes to the final EM Order as a result of that meeting.
- A second annual evaluation from the RTAB will commence in the coming months.

Significant Actions/Issues

- The city continues to have difficulty attracting qualified candidates and filling higher level administrative positions.
- Municipal Employee's Retiree System pension contributions are anticipated to increase from $1.8M in FY 15 to $2.4M in FY 16 due to accelerated funding for closed plans.

Flint

RTAB Appointed: April 29, 2015
RTAB Members: Frederick Headen, Brian Larkin, David McGhee, Beverly Walker-Griffea, Robert McMahan

Recent Developments

- The City Council approved an amendment to the EM adopted FY 15 budget on June 29, 2015. The city ended FY 15 with an estimated $495K General Fund balance. The RTAB will be reviewing the budget amendment at their July 15, 2015 meeting.
- The City Administrator has issued a Corrective Action Plan to the City Clerk to correct a number of operational deficiencies that resulted in the wrong election submission dates being provided to local candidates.
- Legislation has been signed that will allow candidates who submitted petitions by April 28, 2015 to have their names placed on the August Primary ballot.
- U.S. District Judge Stephen J. Murphy denied a motion for a preliminary injunction on June 23, 2015, to force the city to purchase water from the City of Detroit.
- On June 12, 2015, the Michigan Court of Appeals reversed a decision by Genesee County Circuit Judge Richard Yuille, who dismissed a claim that the city violated its own ordinances when the Emergency Manager raised water and sewer rates in 2011.
- The RTAB held its first meeting on June 11, 2015. Jodi Lundquist has assumed the position of CFO.

- As a result of a recent review, the State Tax Commission notified the city that it must maintain adequate assessment records in compliance with statute and State Tax Commission Rules, and must implement any corrective actions necessary. In addition, the city shall implement a full reassessment within a time frame agreed upon with the State Tax Commission. The city will be issuing an RFP for a reappraisal.
- The city continues to inform residents that it is in violation of the Clean Water Standards Act. Monthly testing is ongoing.
- The city is implementing Veolia recommended improvements to its water system, including water plant improvements, distribution system improvements, new policies and procedures, and better communication with customers. The city is installing a $1.5M granulated active-charcoal filter to improve water quality. This filter installation will be completed in mid-July.
- The city hired Echologics at a cost of $895,850 to perform a leak detection study. This project is scheduled to begin in July 2015.
- The KWA pipeline is expected to be completed in June 2016. The two pump stations are 75% complete and the intake should be completed in August 2015.

Significant Actions/Issues

- If the city loses a lawsuit over retiree healthcare, the EM's two-year budget does not assume an additional $5M to $6M annual expense.

Hamtramck

RTAB Appointed: December 18, 2014

RTAB Members: Deborah Roberts, Mark Stema, Cathy Square, Karen Young

Recent Developments

- The City Council adopted the FY 16 Budget on June 17, 2015. The RTAB approved the Budget on June 23, 2015. The city has also developed a long-term capital improvement plan.
- The city is undertaking a $7M sewer infrastructure improvement project which is eligible for State Revolving Fund monies. The project will reduce storm water inflow into the sanitary sewers.

Significant Actions/Issues

- A suit was filed in federal court by Hamtramck retirees over changes to healthcare benefits made in October 2014. The potential exposure to the city is currently unknown.
- The annual pension liability is anticipated to increase from $3.5M in FY 15 to $4.3M by FY 19. This increase is a result of closing certain pension plans and the Michigan Employee's Retirement System (MERS) policy of accelerating the required contribution for closed plans. The increases were included in the Emergency Manager's two-year budget.

Pontiac

RTAB Appointed: August 19, 2013

RTAB Members: Edward Koryzno, Louis Schimmel, Keith Sawdon, Robert Burgess

Recent Developments

- Treasury staff met with members of the City Council on June 22, 2015 and June 23, 2015 to discuss the RTAB and transition to local control.
- On June 18, 2015 the City Council adopted the proposed FY 16 budget and 2015 tax rates. The RTAB held a special meeting on June 26, 2015 to approve the proposed FY 16 budget and 2015 tax rates.
- Initial screening of Deputy Mayor Candidates will begin in July. Treasury will participate in the selection process.
- The city lost the Supreme Court ruling on efforts to demolish the Phoenix Center. Treasury is working with the city to move forward with the sale to a private operator which frees up $2M in demolition funds.

Significant Actions/Issues

- On May 21, 2015, the Securities and Exchange Commission (SEC) issued an Order to initiate proceedings against Gray & Company, the city's pension investment advisor. The proceedings involve Gray & Company's dealings with investments made by several Georgia pension plans in the Gray Co Alternative Fund II LP, a proprietary private equity fund. The Pension Board met with Mr. Gray to discuss the SEC proceedings, its effects on the Pontiac GERS portfolio, and how much is invested with Gray's firm. The Pension Board is reviewing options for withdrawal of pension assets from Grayson controlled funds.
- On May 20, 2015, the RTAB postponed consideration of an amendment to the city's retirement ordinance that would have granted early retirement status to 69 former employees. The amendment was adopted by City Council in April with no prior analysis or actuarial study being conducted. The best available estimates indicate an impact to the pension system of approximately $9-$13M per year. The ordinance amendment was sent back to committee for further review.
- The city lost a decision at the Michigan Court of Appeals which may make it liable for a $3.5M payment to the Police and Fire VEBA. The city requested reconsideration but was denied. On May 20, 2015, the RTAB approved the city's request to appeal to the Michigan Supreme Court.
- On May 5, 2015, the city's Charter proposal was rejected by voters by a 55% to 45% margin.
- Per the city's FY 14 audit, the General Fund's accumulated fund balance is approximately $5M out of a total budget of $27M.
- The City of Pontiac Retired Employees Association v. City of Pontiac lawsuit (in U.S. District Court) was reassigned from Judge Lawrence P. Zatkoff to Judge Avern Cohn. The lawsuit challenges former EM Schimmel's elimination of retiree healthcare and replacement with an annual stipend. The General Employees Retirement System Pension Fund is significantly overfunded and the parties are exploring options to use the overfunded portion to fund retiree healthcare. Mediation is taking place under the supervision of Eugene Driker.

CONSENT AGREEMENT

Inkster
Date Executed: February 20, 2012
Consent Agreement Consultant: Mark Stuhldreher

Recent Developments

- The City Council approved the FY 16 budget on May 18, 2015.
- On May 14, 2015, the City Council agreed to settle the Dent lawsuit regarding police misconduct for $1.37M. The cost of the settlement has been placed on the July tax roll by a judgement levy.
- Three Police Chief candidates were interviewed on June 11, 2015. There was a difference in opinion on the preferred candidate. Subsequently, contract negotiations with William Riley, Police Chief of Selma, Alabama are underway.
- On June 1, 2015, an Order was issued requiring the City Treasurer to approve all employment matters with city officials and employees, expenditure of funds, and all contracts.
- On June 29, 2015, an agreement was reached with Wayne County to place a judgment levy starting with the December 2015 tax roll, for five years, to repay the county $4.9M in past due sewer charges.

Significant Actions/Issues

- On April 20, 2015, the city adopted a working capital reserve policy for the Water and Sewer Fund which will provide funds for emergency situations.

River Rouge

Date Executed: December 15, 2009
Consent Agreement Consultant: N/A (P.A. 72)

Recent Developments

- The city adopted its FY 16 budget on May 19, 2015. The budget is balanced at $9,839,808. The city has prepared a proposed five-year budget that shows a deficit in FY 18 to FY 20 unless additional revenues can be found.

Significant Actions/Issues

- A fire union CBA was approved in March, resulting in a reduction in healthcare costs.

Royal Oak Township

Effective Date: April 21, 2014
Consent Agreement Consultant: Robert Burgess

Recent Developments

- The Township Supervisor recently provided a legal opinion from a former Township Attorney that the Township Board could legally spend the $620K in reimbursed retirement assets received from MERS for capital improvement projects. A previous Consent Agreement Order prevented spending of these funds. The Township Board did not request this legal opinion. Treasury is assisting the Consultant in investigating this matter.
- An Order was issued on June 17, 2015, granting the Consultant broad authority to approve expenditures made by the township and ensure that obligations are being paid. The Order also gives the Consultant authority to return the $620K in reimbursed retirement assets to MERS.
- Treasury has requested a work plan from the Consultant on how the township's Finance and Operating Plan will be implemented over the next six months.
- A report issued by the Rehmann Group, the township's financial consultant, noted that the township must make budget adjustments of $164,275 to its FY 15 General Fund budget to

account for expenditures exceeding revenues in FY 14. The township adopted budget amendments on May 28, 2015 and implementation is pending.

Significant Actions/Issues

- Treasury learned that the Township Supervisor was regularly authorizing overtime for employees, though overtime was not included in the FY 15 budget and the Consent Agreement requires State Treasurer approval prior to overtime expenditures. An Order was issued May 20, 2015 requiring the Consultant to approve all requests for overtime prior to authorization.
- On May 11, 2015, Oakland County approved proposed ballot language for 4½ mills for the township's general operations. The current millage expires December 31, 2015. The election is scheduled for August 4, 2015.
- The City of Detroit has declined to provide police services to the township. Proposals from the cities of Ferndale and Hazel Park have been determined to be too expensive. The Michigan State Police continues to provide police services to the township in the interim.

NEUTRAL EVALUATION

Highland Park

Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
P.A. 436 Option Selected: Neutral Evaluation

Recent Developments

- On June 29, 2015, the City Council approved a substantial increase in water and sewer rates which will enable the city to provide funding for water and sewer operations.
- On July 6, 2015, Wade Trim took over the operation and maintenance of the water and sewer systems.
- Mr. Louis Schimmel was hired on June 29, 2015, to provide consulting services regarding water and sewer issues.
- The city will issue an RFP in July to contract-out the collection of past due water and sewer bills from residential and commercial customers.
- The DWSD Director has threatened to terminate water and sewer services if the city doesn't pay its arrearage and current charges. A Wayne County Circuit Judge issued a temporary restraining order on April 29, 2015 blocking DWSD's efforts to cut off water service to the city. The city was granted a stay on the $20M judgement levy on June 3, 2015.

Significant Actions/Issues

- On May 18, 2015, the City Council adopted a resolution requesting MDOT to pay for storm water drainage from the highways and freeways under MDOT's jurisdiction in the city.
- On May 18, 2015, City Council approved a consultant's recommendation for an amnesty plan for residential customers to pay arrearage amounts owed to the city. The consultant has determined that if all customers take advantage of the amnesty plan, the city could collect $2.08M. The city has extended the amnesty plan until July 31, 2015. This will allow more time for customers to pay past due accounts.

- There are concerns about the city's ability to successfully implement health insurance cost reductions as planned in FY 15.
  The city's liabilities total $99.9M. Some major components are: $55.3M debt, including $20.7M owed to the DWSD, and $26.1M unfunded other post-employment benefits (OPEB).

OTHER COMMUNITIES

Wayne County

Recent Developments

- On June 10, 2015 the county reached a settlement with retirees on healthcare. The county will no longer provide health insurance but will instead provide a stipend to retirees. This will result in a savings of $20M annually.
- On June 17, 2015 the Wayne County Executive requested a preliminary review under the Local Financial Stability and Choice Act, Public Act 436 of 2012. After notification to the county, the Department began its preliminary review of the County's finances on June 19, 2015. A final preliminary review report was issued on June 30, 2015.
- On July 1, 2015 the Local Emergency Financial Assistance Loan Board met and found that probable financial stress exists in the county.
- On July 2, 2015, a five member review team was appointed. The review team met with various county officials, commissioners, personnel, and union representatives July 9 and 10, 2015. A recommendation regarding the declaration of financial emergency will be forthcoming within seven to ten days.

Significant Actions/Issues

- The county's annual structural General Fund deficit is approximately $52M prior to any of the proposed remedial actions.
- The county's proposed restructuring is approximately $53M in General Fund savings, $25M of which comes from changes to pension and healthcare benefits for active employees and healthcare benefits for retirees. The county has not yet proposed a long-term solution to its jail problems.

City of Flint
Water Quality Update
Wednesday July 23rd 2015

Leak Detection

What: $900,000 Treasury Distressed City Grant for Leak Detection / Pipe Wall Assessment

Status: Contract signing

The Contract has been signed internally and sent to the vendor.

The vendor maintains a window of 10 – 14 weeks following mobilization to complete the full scope of work.

Next steps: Complete the contract signing and schedule mobilization.

GAC Installation

What: $1,601,740 contract with LAN to design and install new filter media at the Water Plant

Status: Installing

Six of the twelve filters are completely installed and will go into use at the beginning of next week. We need to relocate the mid-point chlorination prior to switching the water to running through the filters.

The filters are expected to immediately drop the TTHM level.

One the water has been redirected through the new GAC, the remaining six filters will begin installed

All twelve filters will be available for use in advance of our next quarterly testing period which is the third week in August.

Next steps: Introduce water through the six new filters, and begin installation of the next six filters.

WPC Incinerator Shutdown

What: $1,100,000 Treasury Distressed City Grant for WPC Incinerator Shutdown

Status: In construction phase

Construction continues, the weather has cooperated and the work is on schedule.

Next steps: Completion of concrete work.

Water Meter Installation

What: $5,000,000 contract to purchase and install up to 18,000 water meters

Status: On schedule

Letters have been sent to the printer for mailing.

A list of frequently asked questions is written and being posted to the website.

The installation of the first 9000 meters is scheduled to launch within the next week.

A kickoff meeting of all management personnel involved is set for this week.

Next steps: Hold a kickoff meeting with all management personnel involved prior to launch of installation program.

Next week sometime can Wayne & I have a follow up conversation with you re Flint water? Wayne & I had a call with Brad W. @ DEQ. He is getting back to us re some of the items on your list. So maybe mid-week?
I think the bottom line is Wayne, Brad & I (we would "volunteer") to meet with your minister group here in Lansing [to the extent we can] provide info to some of the issues they raised with you. It may be better that you are not at the meeting. Of course that is your call but maybe let us 'peons' do it. Harvey could be there in your stead; since he knows them. I am sure whatever we convey they probably won't be happy.

Wayne-
We need to have more discussion relating to Flint water. There seem to be even more issues regarding the water than there should be. I'll have a series of questions that I really need some answers to if you can have someone who understands the problems there. The people there just seem to be getting a raw deal from the city particularly in terms of the information they are getting. I know you are as worried about their health as I am so we kind of need to get answers to some of these concerns.

Just fyi

From: Wurfel, Brad (DEQ)
Sent: Friday, July 24, 2015 4:18 PM
To: Saxton, Thomas (Treasury); Muchmore, Dennis (GOV); Wyant, Dan (DEQ)
Subject: FW: Need upate on lead / copper tests for Flint

Guys, here's an update and some clarification on the lead situation in Flint. Please limit this information to internal for now.

By the tenants of the federal statute, the city is in compliance for lead and copper. That aside, they have not optimized their water treatment (for the most part, this means adding phosphates to minimize the degree that the water Ph mobilizes lead and copper in people's home plumbing).

Compliance with the standard started with testing. A June-December run of tests (all in homes with lead in their premise plumbing) concluded in December. Another January – June round of sampling concluded last month. Everything checks out in terms of compliance, but now the next step is optimizing the water supply.

So, In about two weeks, DEQ will be sending a formal communication about the optimizing issue. The federal program has long timelines for action. A community water supplier gets 18 months to study the options, and two years thereafter to implement water system optimization measures.

My point: Conceivably, by the time we're halfway through the first timeline, the city will begin using a new water source with KWA … and conceivably, the whole process starts all over again.

In terms of near-future issues, the bottom line is that residents of Flint do not need to worry about lead in their water supply, and DEQ's recent sampling does not indicate an eminent health threat from lead or copper. That said, anyone with lead pipes in their premise plumbing (this translates to tens of thousands of homes in our older urban centers, btw) should at least be aware that they have them, and to some limited degree that's going to impart minute parts per billion of lead in water no matter what. Its why nobody uses lead water pipes anymore.

The long version of this note is below. Let's connect next week. I'd like some thoughts about what more the state could be doing – most immediately, to convey the results of our testing and tell the story to the residents of Flint in an effort to quell some fears.
Thanks!
b

Subject: RE: Need upate on lead / copper tests for Flint

Brad,

As we discussed, the City has completed the last round of monitoring (Jan 1 – June 30, 2015). The last samples came in about a week ago. We have made the compliance determination that the 90th percentile level is 11 parts per billion, which is below the Action Level Standard of 15 parts per billion (there is no Lead maximum contaminant level standard). The federal rule requires measuring lead levels in water from household plumbing materials to determine the corrosivity of the City's water in order to limit exposure.

I have provided a summary of Flint's lead compliance monitoring from the last 20+ years since this regulation started in 1991. The City of Flint itself has never had a 90th percentile level exceed the 15 part per billion action level. Sampling requirements look at the worst case plumbing materials. Samples must be collected in accordance with the regulatory requirements and criteria in order to be used for compliance determinations.

Because the City of Flint serves a population of over 50,000 they are required to have Fully Optimized Corrosion Control. While it is possible to meet the fully optimized requirement without additional treatment, based on their two rounds of sampling since switching to the Flint River, we have determined they did not meet the eligibility for this per the regulation. They now have to complete a study (within 18 months) and are then allowed a period of additional time (2 additional years) to install the selected treatment for Fully Optimized Corrosion Control in accordance with the regulatory requirements. This is what DWSD was required to do back in 1993 – 1997 (see attached letter and study). We are planning to suggest the City directly submit a treatment process to shorten the timeline to achieve full optimization. This letter is currently being drafted but won't be ready to mail out for another week.

Liane and I had a conference call with EPA region V in Chicago on Tuesday to go over all of this and they are in support of these next steps with the City.

The matter will be potentially further complicated when the City switches over to water from the Karegnondi Water Authority next year to re-evaluate the continuing requirement to fully optimize corrosion control.

The DEQ recognizes that there is has been no level of lead exposure determined to be safe, but again the regulation was developed to optimize water corrosivity to limit exposure and the City is following the regulatory requirements.

Lead is not coming from the Flint River or the City's Water Treatment Plant or the public distribution system. It is from lead service lines into homes and from plumbing materials and fixtures within the private property of the household.

As watermains are replaced within the City lead services associated with that section of watermain would be replaced in order to reconnect to City water. This would also place burden on the homeowner to pay for having the service line re-plumbed. However, since 2000 only 16 miles of the City's 500 miles of watermain have been replaced as they did not have the financial means to do so.

Let us know if there are questions or you need any additional information.

Subject: Need upate on lead / copper tests for Flint

Guys, the Flint Ministers met with the Governor's office again last week. They also brought along some folks from the community – a college prof and a GM engineer – who imparted that 80 water tests in Flint have shown high lead levels.

Could use an upate on the January / june testing results, as well as recap of the December testing numbers, and any overview you can offer to edify this conversation.
Call me or email today if possible. Thanks!

To: DWSD Wholesale Customers

RE: EXECUTIVE SUMMARY OF DETROIT'S CORROSION CONTROL STUDY

Enclosed is a copy of the Executive Summary prepared by our consultant, Tucker, Young, Jackson & Hull, detailing work to date on the Corrosion Control Study performed for Detroit and Detroit's wholesale customers.

The EPA required large utilities to test water samples in highest risk homes for lead and copper content in 1992 to determine if the action levels of 15 micrograms per liter and 1.3 milligrams per liter respectively were exceeded. Detroit complied with this requirement and determined that the action level for lead was exceeded in many communities. Therefore, DWSD conducted and continues to conduct a public education program designed to inform consumers how to reduce their exposure to lead.

The EPA further required large water suppliers to determine if their lead could be less corrosive and, if so, the utility was mandated by the Lead and Copper Rule to determine ways the water could be made less corrosive and report their recommendations to the primary agency. For DWSD, the primary agency is the Michigan Department of Public Health (MDPH).

After several years of study, DWSD is forwarding the complete study findings to the MDPH for their consideration. It was concluded that DWSD could reduce the corrosivity of the water in the most cost effective and efficient manner by the addition of ortho-phosphate, specifically in the form of phosphoric acid. The Executive Summary of these findings is being forwarded to you for your information. The MDPH has until the end of December 1994 to consider DWSD's recommendation. In the interim, DWSD plans on conducting a demonstration test of the corrosion control treatment in our distribution system to further assist the MDPH and to further safeguard public health.

Very truly yours,

Irving M. Schuraytz, P.E.
Assistant Director, Water Supply Operations

Kathleen Leavey
Deputy Director

KL/IMS/JH/cs

Executive Summary

Lead and Copper Corrosion Control Optimization Study

prepared by

Tucker, Young, Jackson, Tull, Inc., in association with
CH2M HILL, INC., and Economic and Engineering Services, Inc.

May 1984

Detroit Water and Sewerage Department

Introduction

As a result of the Safe Drinking Water Act (SDWA) Amendments of 1986, the U.S. Environmental Protection Agency (EPA) published final drinking water regulations for lead and copper in the June 7, 1991, *Federal Register*. Those regulations, known as the Lead and Copper Rule (LCR), require:

- Tap water monitoring, which is a new approach for water utilities
- Treatment optimization for lead and copper corrosion control
- Public education and lead service line removal if utilities exceed preset lead or copper levels

Large utilities, serving populations greater than 50,000, are required to conduct corrosion control studies to demonstrate that they are either already providing optimal treatment or to determine optimal treatment for their system.

DWSD made necessary public notices and embarked on studies to develop optimal treatment solutions.

In response to the regulations, the Detroit Water and Sewerage Department (DWSD) conducted two rounds of monitoring at home water taps for lead and copper and throughout the distribution systems for other water quality parameters. Monitoring was a cooperative effort between the DWSD, wholesale water customers, and the Michigan Department of Public Health (MDPH). Copper levels were well below EPA limits. Lead levels, however, exceeded EPA action levels (ALs) and DWSD made necessary public notices and embarked on studies to develop optimal treatment solutions.

Lead exposure sources for humans include air, food, dust, paint, and drinking water. Elevated lead levels in blood have been associated with adverse health effects in humans. Federal health authorities have many programs to reduce lead exposure including low-lead gasoline and reduced lead content in paint. Although drinking water may not be the major source of lead, reducing lead levels in drinking water will have a positive health benefit. An additional benefit of corrosion control is prolonged life for water distribution pipes and home plumbing. This results in lower costs for water utilities and their customers.

In March 1992, the DWSD contracted with Tucker, Young, Jackson, Tull, Inc. (TYJT), in association with CH2M HILL, INC., and Economic and Engineering Services, Inc. (EES), to perform a lead and copper corrosion control study. The purpose of the study was to determine the optimal approach for reducing lead and copper concentrations in DWSD drinking water without adversely affecting other water quality characteristics. Major tasks in this study were to:

- Evaluate existing water quality data, existing distribution system pipe materials and the results of lead and copper sampling
- Identify and analyze feasible and practical treatment methods to reduce lead and copper corrosion (desktop analysis)
- Design and construct a pipe-loop testing apparatus to evaluate treatment alternatives identified in the desktop analysis

- Operate the pipe loops for 1 year to evaluate selected corrosion control treatments on different pipe materials
- Evaluate the effectiveness and feasibility of the tested treatment alternatives in reducing lead and copper concentrations
- Recommend an optimum lead corrosion control treatment
- Develop an implementation plan for full-scale corrosion control facilities

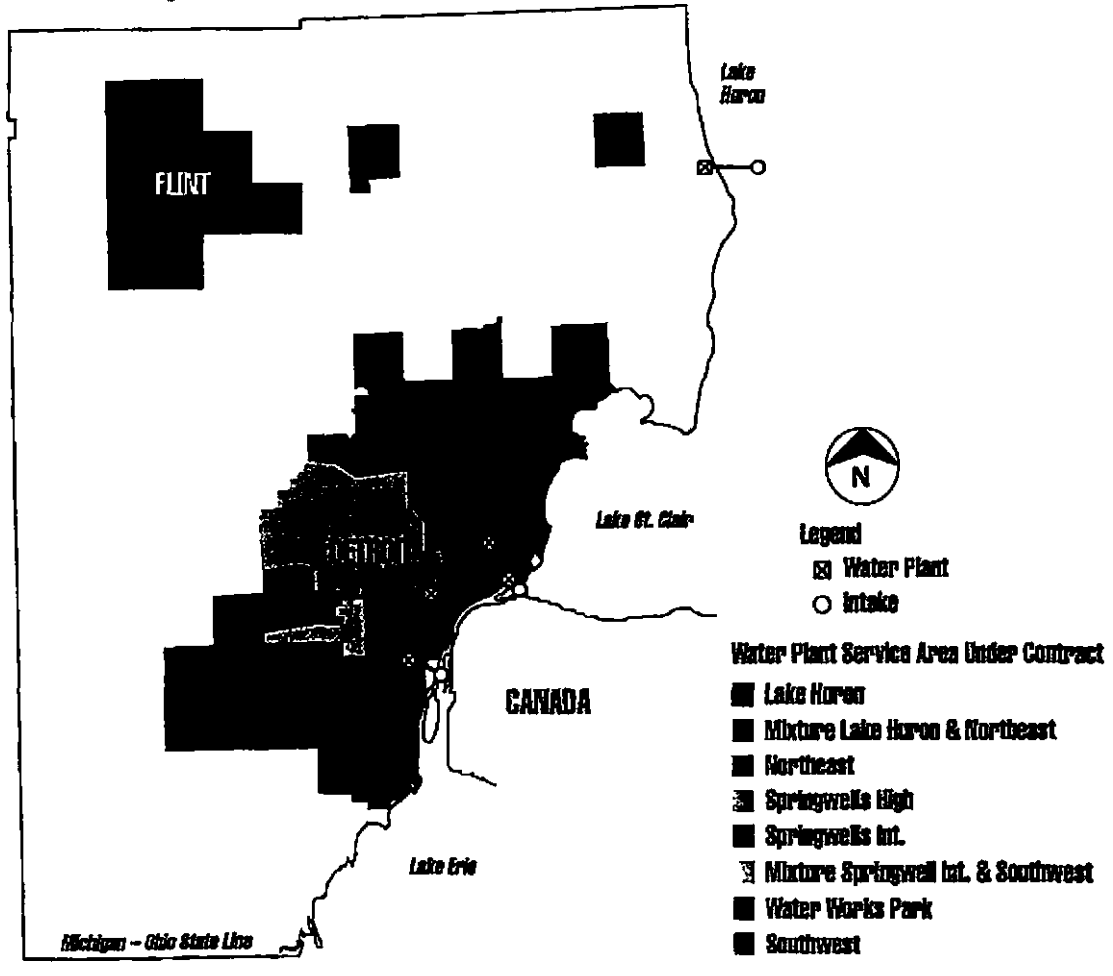
This report presents the results of the DWSD Lead and Copper Corrosion Control Optimization Study.

Existing Conditions

The DWSD obtains water from three intakes. Two of these, the Belle Isle and the Fighting Island Intakes, take water from the Detroit River. The third intake is on Lake Huron. Water is treated at five water treatment plants (WTPs) including the Water Works Park, Southwest, Springwells, Northeast, and Lake Huron WTPs. The water system is shown in Figure ES-1. Treated water from the 5 WTPs is distributed to the City of Detroit and 119 wholesale water customer systems. The DWSD water system serves about 4 million people.

Water leaving the WTPs is of good quality and considered moderately

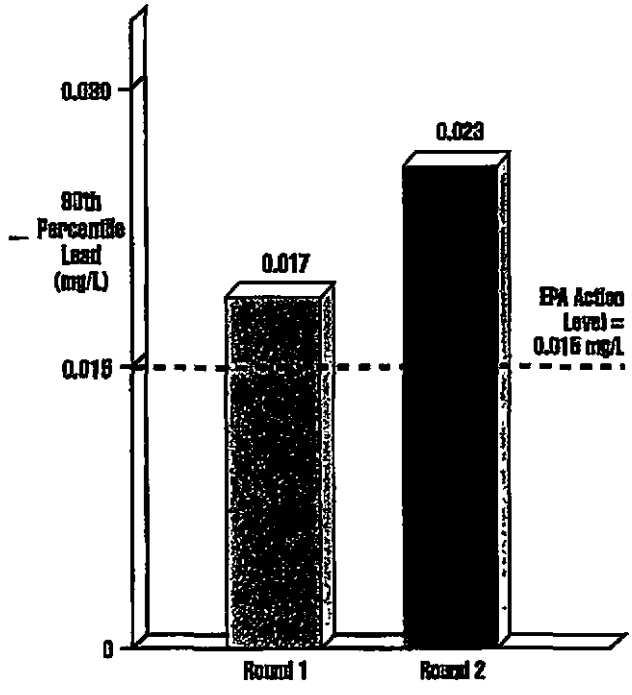
Figure ES-1
DWSD Water System



corrosive. For example, pH from the five WTPs averages 7.4, alkalinity averages 76 mg/L ($CaCO_3$), and hardness averages 100 mg/L ($CaCO_3$). Nevertheless, some increase in lead and copper is resulting from the corrosive action of the water, primarily on service pipe and household plumbing. The main sources of lead are 50:50 lead/tin solder, brass containing lead used in faucets, and lead service lines and plumbing.

The regulation lead AL is 0.015 mg/L at the 90th percentile in home water taps. During the LCR Compliance Monitoring conducted in 1992, DWSD's 90th percentile lead concentration was 0.017 mg/L in the first round and 0.023 mg/L in the second round of sampling (Figure ES-2). Looking at the data in a slightly different manner, 35 to 37 percent of the 119 purveyor water systems exceeded the AL for lead.

Figure ES-2
LCR Compliance Monitoring Results for Lead



For copper, the 90th percentile concentrations were 0.34 and 0.19 mg/L for two rounds of sampling–well below the copper AL of 1.3 mg/L (Figure ES-3). Lead uptake, therefore, is the major concern within the DWSD water system.

Determining the optimal lead control treatment is essential; it is the objective of conducting this corrosion control study. Further, there are an estimated 200,000 lead service lines (LSLs) in DWSD's direct service area and possibly more in areas served by wholesale customers. After corrosion treatment is optimized, the possibility exists that lead ALs may still be over 0.015 mg/L at the 90th percentile. Should this occur, the DWSD would need to embark on a removal program for LSLs, which could cost between $300 and $800 million.

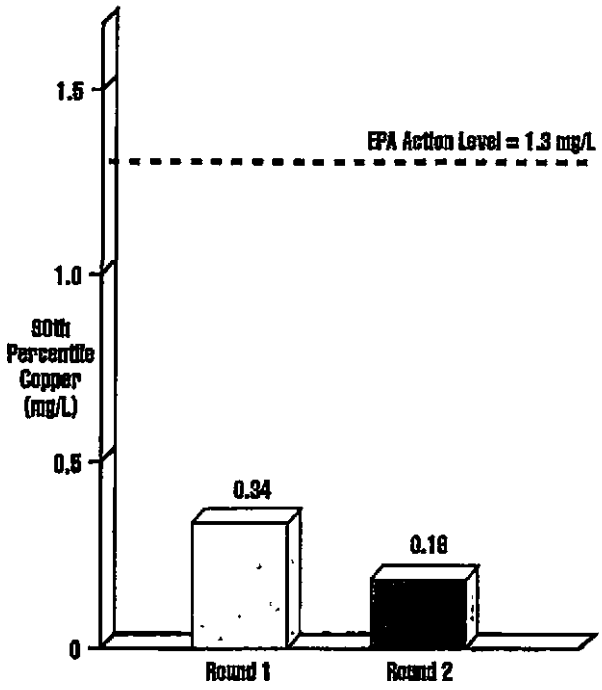
Desktop Analysis

To reduce the number of chemicals for long-term testing, a screening analysis was performed using desktop techniques recommended by U.S. EPA. Lead corrosion control treatment methods examined for their applicability to DWSD are as follows:

- Polyphosphates
- Orthophosphates
- Zinc orthophosphate
- Polyphosphate/orthophosphate blends
- Silicates
- pH adjustment
- Alkalinity adjustment
- Calcium adjustment

The main criteria for selecting a lead corrosion control method is performance for lead uptake reduction. Lead corrosion control methods were also evaluated

Figure ES-3
LCR Compliance Monitoring Results for Copper



based on effects on other drinking water regulations, industrial water users, wastewater treatment, water quality, water treatment operations, consecutive water systems, and multiple sources of supply and treatment.

Based on this evaluation, the following chemical treatments were eliminated from consideration for pipe-loop testing.

- **Polyphosphates.** These products are primarily used to sequester iron, calcium, and manganese and may actually do more to promote lead corrosion than to prevent it.
- **Polyphosphate/Orthophosphate Blends.** These products have not been proven to be more effective than orthophosphates alone for lead reduction, and their proprietary chemical composition makes selection of the optimum product difficult.
- **Silicates.** Sodium silicate inhibitors require a high dosage for lead control and, based on a survey of major industries, would have significant adverse effects on industrial water users.
- **Alkalinity Adjustment.** This technique would have marginal performance for lead reduction based on DWSD water quality and would be impractical for a system the size of DWSD.
- **Calcium Adjustment to Deposit a Calcium Carbonate Layer.** This technique is not a proven method for lead reduction, and would be difficult to produce a uniform layer throughout a distribution system the size of DWSD. Calcium carbonate deposition, however, can occur when pH is raised for lead reduction. This situation is addressed under the pH adjustment alternative.

Lead corrosion control treatment methods applicable for DWSD water are as follows:

- **Orthophosphates.** These products have been shown to be an effective means of lead reduction for water similar to that of the DWSD.
- **Zinc Orthophosphate.** These products are also a proven method of lead reduction, although there is concern about zinc in industrial water and wastewater.
- **pH adjustment.** This technique is also a proven method of reducing lead solubility, although higher pHs affect some industrial users and can increase calcium carbonate deposition.

A survey of 16 Great Lakes area water utilities using water of similar quality to that of DWSD demonstrated the effectiveness of orthophosphate, zinc orthophosphate, and pH adjustment in reducing lead concentrations at the consumers' taps. Those treatment methods, therefore, were retained for further testing in the pipe-loop apparatus.

Pipe-Loop Testing

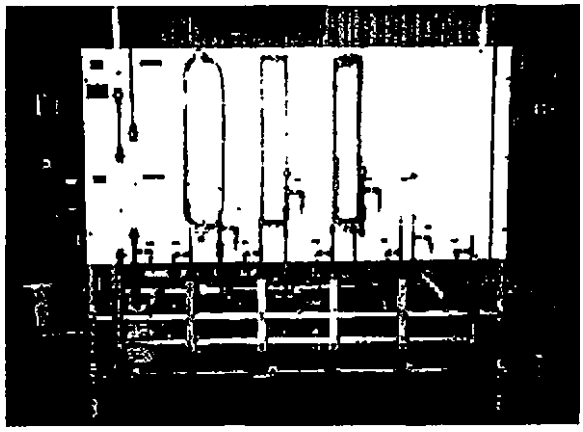
Based on the desktop analysis, it was concluded that the following treatments would be tested in the pipe loops:

- Adjusting pH to 8.1 using sodium hydroxide
- Adjusting pH to 8.7 using sodium hydroxide
- Adding zinc orthophosphate at doses of 0.4 mg/L for zinc and phosphorous (as P)
- Adding orthophosphate using phosphoric acid at a dose of 0.4 mg/L as P

Pipe-loop testing produces information on the corrosion control treatment most likely to effectively reduce lead levels.

It is important to understand that pipe-loop testing is conducted to provide information on the relative effectiveness of corrosion control treatments. The results cannot be used to predict actual lead levels that may occur at customers' taps in the water system. Pipe-loop testing, however, produces information on the corrosion control treatment most likely to effectively reduce lead levels and is an approved optimization technique.

Figure ES-4
Typical Testing Apparatus



A pilot-scale testing apparatus was designed and constructed to test each of the treatment techniques on different pipe materials. Five pipe-loop racks were constructed: one for each of the four methods and another for control (no treatment provided). Each pipe-loop rack included one new lead pipe loop, two identical copper pipe loops with lead soldered joints, one brass tester, and one section of old lead pipe. Three weight loss testers were also included for measuring corrosion rates of steel, galvanized steel, and copper. A typical testing apparatus is shown in Figure ES-4.

The pipe-loop facility was installed in the lower level of the Water Works Park High Service Pump Station and operated from January to November, 1993. After an initial period of passivation, water samples were collected on a weekly basis and analyzed for lead, copper, and zinc. The 1-liter water samples were taken after the water had been in contact with the pipe loop materials for 8 hours. This was done to represent the first-draw sampling required by the LCR. Additional sampling included daily monitoring for pH, chemical doses, and temperature. Disinfection

by-products (DBPs) and pipe insert weight loss were done quarterly. Flavor profile analyses to assess any changes in tastes or odors were run monthly.

Results of pilot testing indicated:

- The inhibitor treatments, zinc orthophosphate, and phosphoric acid are statistically better than the untreated control for both old and new lead piping (Figure ES-5).
- For lead solder and copper piping, the median lead levels were lowest in the water with inhibitors (zinc orthophosphate and phosphoric acid), but only the phosphoric acid results were statistically better than the other loops (Figure ES-6).
- For brass, the results indicated that the treatments were no better than the control; however, lead levels were near the detection limit in the brass testers (Figure ES-6).
- Zinc orthophosphate and phosphoric acid were also found to be the most effective treatments in reducing copper (Figure ES-7).

Figure ES-5
Relative Lead Levels from Lead Pipe

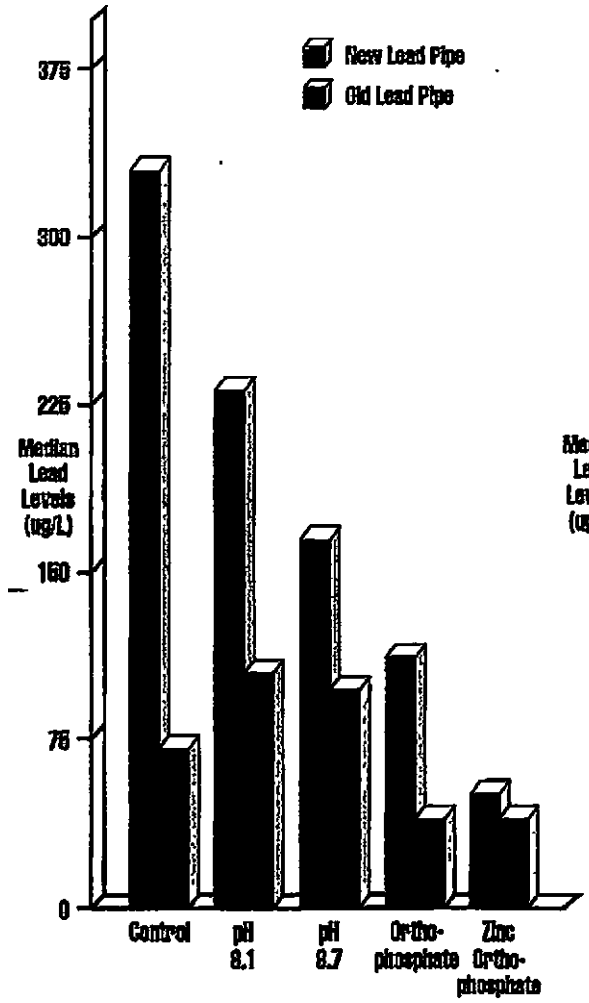


Figure ES-6
Relative Lead Levels from Soldered Copper and Brass

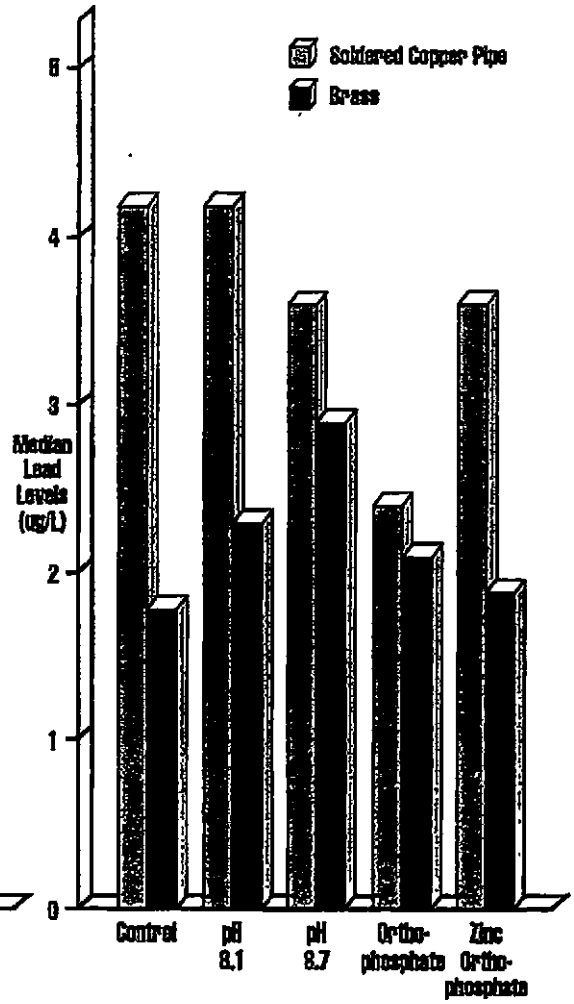

Figure ES-7
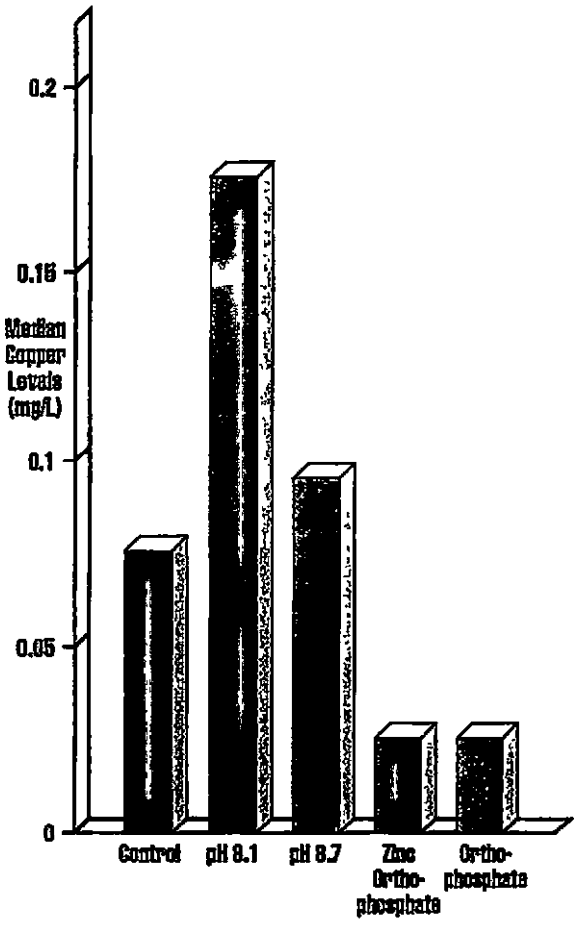
Relative Copper Levels from Copper Pipe



- DPBs were increased for the pH adjustment treatments as expected. The DBPs formed as a result of this increase, however, did not exceed EPA-proposed limits. The orthophosphate and zinc orthophosphate did not increase DBPs.
- None of the corrosion control treatments had an adverse effect on the taste and odor of the water produced.

Evaluating Corrosion Control Treatment

The four corrosion control treatments tested in the pipe loops were evaluated based on the following criteria:

- Performance for lead uptake reduction
- Feasibility of implementation within regulatory and functional constraints
- Reliability in terms of operational consistency and continuous corrosion control protection
- Cost

Pipe-loop data analyses indicated orthophosphate and zinc orthophosphate are most likely to yield the best results for lead reduction. pH adjustment was not as effective for lead control. Orthophosphate and zinc orthophosphate were effective at reducing copper levels.

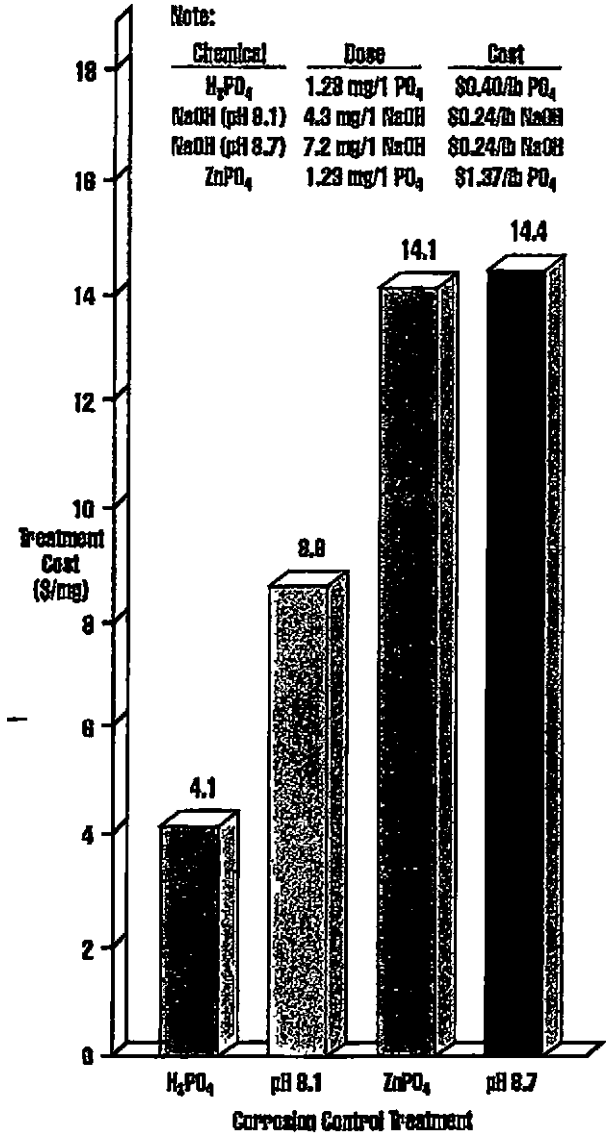
A feasibility analysis indicated that industrial water users would be affected adversely by zinc or a higher water pH. Wastewater operations would be adversely affected by zinc and orthophosphates loadings. There were no major effects of corrosion control treatment on drinking water regulations. pH adjustment could, however, decrease disinfection effectiveness and increase DBP formation.

The reliability of zinc orthophosphate and sodium hydroxide chemicals is less than would be expected for orthophosphates. Zinc orthophosphate is a proprietary chemical with price and supply constraints. Sodium hydroxide availability and price depend on market conditions. Orthophosphate (phosphoric acid) is available as a generic chemical and is commonly used in the food and bever-

age industry; therefore, price and availability are more stable. From a WTP-operations standpoint, pH adjustment is less reliable because pH can change with raw water quality and treatment conditions.

The chemical cost of each treatment alternative is shown in Figure ES-8. Phosphoric acid addition is less than half the cost of pH adjustment to 8.1, the next lowest chemical cost. This represents an average cost savings of about $2,400 per day. Phosphoric acid could save the DWSD about $10 million in present worth in the next 20 years compared to the next lowest cost alternative.

Figure ES-8
Treatment Alternatives Costs



Selecting Corrosion Control Treatment

The relative ranking of alternatives for the four criteria (performance, feasibility, reliability, cost) is summarized in Figure ES-9. Values of 1 through 4 were assigned for each treatment alternative in each criteria category (1 was best; 4 worst). Because performance for lead reduction was the main criteria, it was given a weight of 2. Each of the other criteria was given a weight of 1.

Orthophosphates were ranked highest overall. Zinc orthophosphate was second, mainly because of its adverse effects on industry, wastewater plant operations, and higher costs. pH adjustment was ranked lowest because it is less effective for lead reduction, less reliable, and demonstrates more adverse effects on industry and drinking water regulatory compliance.

Orthophosphates were selected as the optimal treatment alternative for full-scale lead corrosion control.

Based on corrosion control theory, comparison with analogous water systems, and the extensive pilot plant studies, orthophosphates were selected as the optimal treatment alternative for full-scale lead corrosion control.

Figure ES-9
Alternatives Ranking by Criteria

Treatment	Evaluation Criteria				
	Performance wt.= 2	Feasibility wt.= 1	Reliability wt.= 1	Cost wt.= 1	Weighted
Phosphoric Acid	2	1	1	1	7
Zinc Orthophosphate	1	4	2	3	11
pH 8.1	4	2	3	2	15
pH 8.7	3	3	4	4	17

Legend: 1 = Best; 4 = Worst

Phosphoric acid is the recommended form of adding orthophosphate. It is a generic chemical and can be bid competitively. It does not add sodium to the water and costs less than any other form of orthophosphate. In addition, the finished water pH is already in the optimal range for lead solubility reduction by phosphates, so pH adjustment is not required.

The recommended dose of phosphoric acid is 1.2 mg/L as P for initial passivation and a sustained dose of 0.4 mg/L as P for maintaining control of lead uptake. Values may be adjusted based on full-scale results.

Full-Scale Implementation

The LCR requires optimal corrosion control treatment installation by January 1, 1997. To meet this deadline, the implementation schedule in Figure ES-10 is proposed. The first element of implementation is to conduct full-scale demonstration testing in the distribution system served by one of the WTPs before installing chemical feed facilities in the other four plants. Operation of lead corrosion control facilities at all plants is planned for May 1996. This will provide additional time to optimize the system before lead monitoring is required in 1997.

The chemical equipment required for each WTP is summarized in Table ES-1. A schematic of a typical liquid chemical system is shown in Figure ES-11.

The cost of lead corrosion control chemicals is estimated to be about $0.87 per year per household.

The estimated capital cost for corrosion control facilities at the five WTPs is $3,740,000. The estimated cost of chemicals is $868,000 per year. The cost of lead corrosion control chemicals is estimated to be about $0.87 per year per household.

A monitoring program will be established before and after corrosion control treatment is implemented to determine performance for lead reduction and effects on other water quality parameters. If lead is reduced to below the EPA AL of 0.015 mg/L for two consecutive 6-month monitoring periods, other methods of lead reduction, such as removing lead service lines, will not be required.

If the lead AL is still exceeded after optimization and stabilization, a program for lead service line removal should be developed in addition to an ongoing public education program.

Operation of lead corrosion control facilities at all plants is planned for May 1996.

P.O. BOX 30195, LANSING, MICHIGAN 48909

Vernice Davis Anthony, Director

March 15, 1993

City of Flint
1101 South Saginaw Street
Flint, Michigan 48502

WSSN: 2310

Attention: Mr. Charles Smith, Utilities Superintendent

Subject: Lead/Copper Monitoring

Gentlemen:

We have reviewed the results of the second round of the lead and copper monitoring completed for your water supply for the period of July 1, 1992, through December 31, 1992. The samples were collected and analyzed to comply with the U.S. Environmental Protection Agency's Lead and Copper Regulation. The action levels specified in the regulation require that the 90th percentile results from the distribution system samples for lead and copper not exceed 15 and 1300 ug/l, respectively.

Since the 90th percentile lead level for your water system is 14.4 ug/l, the lead action level of 15 ug/l has not been exceeded. Also, the 90th percentile copper level was significantly below the copper action level of 1300 ug/l. This means that your water system has met both action levels for the first two monitoring periods.

Although many of the Detroit Water and Sewerage Department (DWSD) customers have met the action levels, DWSD is required to conduct a study to determine whether their water treatment processes can be improved to further reduce corrosion. The study is to be completed by July 1, 1994, and any recommended treatment modifications must be in place by January 1, 1997.

Further monitoring of your water system for lead and copper will not be required until the DWSD study is complete and any additional corrosion control treatment has begun. We will inform you when monitoring is again required. This may be as late as January 1997.

If you have any questions, please call me at (517) 335-8309.

Sincerely,

Timothy A. Benton, P.E.
District Engineer
Division of Water Supply
Bureau of Environmental and
Occupational Health

Weekly Conference Call Notes – July 27, 2015

Allen Park –July 24 –Mayor Matakas, M. Kibby, B. Cady, R. Byrne, E. Cline, P. Dostine, C. Porubsky

- **Weekly Priorities/Misc:**
  - Engineering bids are in. Wade Trim is the City's current engineer.
  - Master Plan bids are due July 28.
  - Five-year financial plan: the City expects to have hard copies available at the next RTAB meeting; Eric asked them to also provide a brief verbal summary.
  - RFP for sewer project due October 5.
  - Master Plan RFP due in August.
  - Salary survey is coming up.
  - Bids are open for engineer.
- **Police Contract Negotiations:**
  - Tentative agreement reached, but have not ratified, lawyers will work on again in August.
  - PPOAM reached an agreement today.
- **FDCVT:**
  - The City was informed that $5M would be available in grant money soon; applications should be available in late August or early September.
- **Retiree Healthcare:**
  - If the City does not switch from BCBS, their costs will increase by 23%, or $644K on October 1. Bob needs the okay from Treasury to proceed with Humana or the deal may not happen.
  - BCBS discovered an $834K arrearage.
  - If the deal with Humana goes through, 192/220 65+ retirees would be switched to that plan.
- **Prescription Drug Bid:**
  - Treasury has received the information, but hasn't had a chance to review yet.
- **Bond Issue:**
  - This should be completed next week, by Thursday or Friday.
  - The City has due diligence questions to turn in by Monday, the lender will have the same by Wednesday.
- **Settlement Conference:**
  - Did not go well; mediation was ordered by the Judge and will take place July 31.
  - The League is willing to pay $75K; the City is hoping for more, however it has not been authorized yet. Settlement is expected to come in around $375K.
- **City Hall Elevators & Status:**
  - The waterproofing work is complete. There is still a little water, but the crew says that it's okay. Walls are going up now, but the inspection was moved back another week.
  - Handicap rails are open, waiting for railing on stairs, cameras have been installed.
- **Boji/City Hall:**

- Eric drafting an amendment to the Order concerning this sale in lieu of recent interest in property.

- **Roof at Community Center:**
  - Only one wing, approximately $30K job.
  - City is soliciting bids, will hopefully go before RTAB in August.

Benton Harbor –July 16 – D. Watson, R. Byrne, R. Widigan, C. Porubsky

- **Weekly Priorities:**
  - At the 07/15/15 Legislative Committee meeting it was discussed that the City will send a resolution to the State saying that the State owes the City for the actions of the former EM and the costs of the lawsuits.
  - Commissioners have been tabling items because they know that the City Manager and State can't force them to act on them.
    - Rob will review the Final Order for a possible amendment to allow the City Manager to act if the Commission refuses to do so.
  - The Commission is concerned about drones.
  - Neighborhood development is picking up with a number of new homes being built.
  - Darwin will remind the Commissioners that the State is looking to set up meetings.
- **Dept. of Labor Settlement:**
  - $19K to settle – will be on the agenda at Monday's meeting.
- **Lange, O'Brien, Unruh Mediation (07-17-15):**
  - Mediation in Grand Rapids – Darwin, Mayor, Mayor Pro-Temp, and Commissioner Muhammad to attend.
  - Outcome will be discussed at Monday's City Commission meeting.
  - Commissioner Muhammad was requested to attend in hopes he will see the need to settle.
  - Will update OFR next week.
  - Insurance – aggregate coverage for back wages up to $50K.
- **Update on Vacant Positions:**
  - Darwin is looking for head hunting firms to help the City find a finance director, assessor, and water department superintendent.
  - He should have a list of possible firms with costs the first part of next week.
- **Status of FDCVT Grants:**
  - Advertisements for water-main projects have been sent out.
  - Hydrant RFPs have been sent out.
  - City appraisal is being developed and a RFP will be sent out.
  - List of blighted structures is completed.
  - $50K for sidewalks doesn't go very far, looking into which sidewalks to do.
  - Randy stated another round of funding ($5M) will open up in August or September.

Ecorse – June 30 – W. O'Neal, R. Byrne, P. Dostine, D. Van de Grift, C. Porubsky

- **Priorities for the week:**
  - Working on five-year budget
  - FBI and AG were there yesterday, Wayne is not at liberty to discuss why they were there.
- **Fire consolidation**
  - No meeting set; Mayor was meeting with Howard Shipman after seeing Wayne last week, but has not heard from since.
- **Five-Year Budget:**
  - Would like to finish this week. Wayne promised he will have it to OFR by next week.
- **PPT/Discussion with Howard Heideman:**
  - John Pepperman contacted Mr. Heideman and was told monies for FY15-16 would be available in the beginning of FY16-17.
- **Sewer Project/Flooding Issues**
  - No calls, positive project
- **Miscellaneous Items:**
  - Loss of Packaging Specialties Inc.: The MEDC gave money to relocate to Romulus, approximately 50 jobs – company wanted to expand, but City would not entertain. Wayne stated the company backs up to DNR property and the City would not be able to sell even if they wanted to. He was not aware that they had decided to relocate.
  - Wayne and the Mayor met with Treasury last Friday, said meeting went well. Wayne stated Tidwell is the best mayor he's worked with. Stated they need to get through the election; Miller is also running, Wayne classified Miller as the "Old Guard." Thirteen people are running for Council.

Flint – July 22 – Mayor D. Walling, N. Henderson, J. Freeman, R. Byrne, P. Dostine, E. Cline, C. Porubsky

- **Priorities/Miscellaneous:**
  - KWA filter installation continues. 6/12 will be completed by next week, the remaining will start in August.
  - Moving forward with leak detection.
  - Usage from plant has decreased, will be able to shut part down soon.
  - The City is getting complaints of water discoloration.
  - No change with the U of M issue.
  - Megan Hunter, Director of Community & Economic Development, is leaving the end of August.
  - The City was giving information on the upcoming FDCVT grant money that will be available.
  - No update on OPEB lawsuit.
  - The Mayor will participate in a blight roundtable update next week with MSHDA and MEDC. He invited Treasury to attend and will forward the information.
  - According to a call from John Blanchard; on August 4, GM will announce an $800M investment.
- **Re-assessment:**
  - Received RFP from Tax Commission.
  - Moving forward, looking for funding.
- **Updates from the City Charter Commission:**

- Commission meets every week, and has subcommittee meetings weekly as well, 3-4 meetings per week.
- Budget request -- $59,000 allocated, asking for double. Flint cannot afford the new request. Natasha suggested Commission approach foundations, Mott Foundation may help with funding, Natasha will keep OFR updated.
- The Commission is operating like a City Council. Natasha thinks they would benefit from a more relaxed set up, and possibly a different attorney that will provide more guidance.

- **Transportation Millage MTA:**
  - Approved; the renewal is for five years.
- **Coalition for Clean Water Lawsuit in Circuit Court:**
  - A Federal Judge dismissed request for injunctive relief, former City Attorney Young resubmitted suit (30 pages of allegations).Mayor Walling and Natasha are both named in the suit. (Nothing new to report this week).
- **Primary Election:**
  - Will be held in a couple weeks.
  - It was noted that the absentee ballot count was lower than anticipated; approximately 200-250 received.

Hamtramck – July 17 – K. Powell, R. Byrne, P. Dostine, D. Van de Grift, C. Porubsky

- **Update on Audit:**
  - Drew explained to Katrina that she does not have a duty to bargain, and advised speaking with labor attorney John Clark. Katrina has talked with the Michigan Management Labor Association.
- **City Council Members:**
  - Per the Final Order, Members need to complete MML Level One training within the first year of receivership. Katrina states that she gave the forms to members, but is having trouble with them complying. She would like the matter to be addressed at the upcoming RTAB meeting.
- **Sewer Projects:**
  - Bids have been received. According to a number of neighboring communities, the lowest bidder is not a good candidate for the project. Katrina would like to use the second lowest bidder, and will be presenting the information to the RTAB.
- **Year-End Fund Balance Estimate:**
  - Still closing the books – Katrina is not comfortable with the numbers right now and hopes that some of former EM Cathy Square's spending allocations does not alter it much.
  - Katrina was encouraged to inquire about income from charge backs.
- **FDCVT Grants:**
  - Street lighting will be completed by August.
  - Assessment is complete.
  - Katrina would like to apply for new round of FDCVT grant money.
- **Police Study:**
  - Mark Nottley, Evergreen, and ICMA are all unable to complete a study this year. Katrina stated that Mark Nottley gave her some tips on how to conduct a study, and she is attempting to do it herself.

- **Police Overtime:**
  - There are still some costs for this, however $83K in tickets has offset that cost and created additional revenue. Katrina stated that she would like to switch to 12 hour shifts, and believes this will decrease overtime by 32 hours.

Inkster – May 28 – M. Stuhldreher, R. Byrne

- Interviews for the Police Chief position are scheduled for June 11. The City has a travel and lodging line item that will pay the travel and expenses of the two out-of-town candidates.
- Wayne County has contacted Mark regarding the City's outstanding sewer debt ($4.9M).
- The FDCVT grant projects are moving forward toward completion.
- A manufacturer from Madison Heights will be purchasing a building in Inkster that will bring up to 250 jobs over the next five years.
- Mark intends to issue an order on June 1 granting additional authority to approve contract and expenditures.

Lincoln Park – July 1 – B. Coulter, R. Byrne

- Brad made an offer to Mathew Coppler to become the next City Manager. He will be having another discussion with him later today. He was asked to send Treasury a copy of the proposed contract.
- He indicated that the City has ended the Fiscal Year with a General Fund Balance of $100,000.
- Brad stated that the Police Chief had retired.
- The DDA Director's contract will not be renewed.
- Health insurance reductions went into effect today; Brad expects a lawsuit from the retirees next week.
- The City's required pension payment may be late by a month.

Pontiac – July 24 – Mayor Waterman, J. Sobota, N. Nazarko, R. Byrne, P. Dostine, R. Widigan, C. Porubsky

- **Weekly Priorities:**
  - Follow-up from this week's RTAB meeting
  - Finish up blight court ordinances
  - HR Specialist – hoping the RTAB can meet to revisit, waiting on a call from E. Koryzno
    - The employee will stay if the RTAB will meet to revisit the decision
  - The Mayor discussed at length why the Board should justify their decision when they deny agenda items.
  - J. Sobota inquired about Jim Mills – R. Byrne directed him to call Jim directly.
  - Council is on strike again – postponed any items that the Mayor and J. Sobota brought to the table.
  - City can purchase pothole equipment for $22K – would like to do pothole repair in house.
    - Mayor says it would help with the workforce development problem

- J. Sobota sees a movement to bring DPW in-house. Currently the City only has staff to supervise contractors.
- The Mayor inquired on if there are other cities in the state and/or country that have their services 100% contracted out.

- **Deputy Mayor Position**: TJ Adams will be at the City today with a list of 3-5 people to review and pick for interviews. R. Byrne will be in attendance.
- **Phoenix Center**: Will meet with John Clark next week on the matter.
  - Owner of Ottawa Towers has purchased 8 schools that were for sale from the Pontiac School District
  - The Mayor will meet one on one with the owner of Ottawa Towers
  - Owner of the Towers said they may want to buy the Phoenix Center but would like to be reimbursed for $9M in 'damages'
    - They claim that it's the City's fault for the owners not being able to rent out their building to the State
- **North Oakland County Water Authority (NOCWA) Project**: Moving ahead – City is not a signatory on the agreement and are not eligible to vote because they don't own a part of the water system. They has received significant savings from the deal.
- Pat and Randy will visit the City on Tuesday.

Royal Oak Township – June 29 – R. Burgess, D. Squalls, R. Byrne, P. Dostine, C. Porubsky

- **Priorities for the Week:**
  - Audit due tomorrow, also finishing up last part of F & O plan.
- **On-site Visit; Week of July 13th**
- **Police Update**
  - Should hear from Donna by next week, they have not heard from Detroit. Donna will contact Southfield, but doesn't expect much, as well as Hazel Park and Huntington Woods. She plans to talk to State Reps and as for help.
- **Overtime, School, and Grant Updates:**
  - Street Lighting Grant: DTE will start converting on July 6, will take 4-5 days.
  - Should hear back from AG on demolition project by tomorrow, June 30.
  - Robert would like to know if there is a centralized area to learn about SOM grants, Randy is unsure of this but suggested going to the SOM website and will check for more information.
- **Miscellaneous Items:**
  - Ferndale Schools Adult/Alternative Education moving today, room used for code enforcement will be given up for a total of three rooms.
  - Budget amendments are with the Clerk, Robert will check to see that they've actually been placed in the system.

SUBJECT: Questions Regarding City of Flint Water System

DATE: July 28, 2015

At a July 23, 2015 meeting, Deputy Treasurer Workman posed several questions regarding the City of Flint's water system. This memo is a response to those questions.

The annual cost to the City of Flint to reconnect to the DWSD system

In a March 3, 2015 memo to Deputy Treasurer Workman, Emergency Manager Ambrose noted that he had been informed by DWSD that such a reconnection would immediately levy a fixed cost on the City of $10.1-million per year.

Actual water purchases would be in addition to the fixed cost fee and would be dependent upon actual usage, but the annual cost was estimated to be as high as $1-million/month; making the entire total of a one year connection back to DWSD as high as $22-million. This cost would be reduced to approximately $19-million/year once the City's $3-million annual expense of operating the water system itself was offset.

These calculations were outlined in a March 2015 memo from the Emergency Manager to Deputy Treasurer Workman and update cost projections provided in a February 11, 2015 memo to Chief Deputy Treasurer Tom Saxton.

The Emergency Manager also stated his concern that for the City to be able to pay these costs that water rates charged to Flint residents would need to be increased by a minimum of 30%. Water rate increases between 2010 and 2015 are illustrated in the table attached.

In addition, DWSD was requiring that the City of Flint negotiate a 30-year contract for the provision of back-up services.

The City of Flint's degree of participation in the management of the KWA system

Mayor Dayne Walling is the City's official representative to the Karegnondi Water Authority (KWA). The participation of the Mayor as the official representative for the City of Flint is established in the KWA Articles of Incorporation. Mayor Walling is the current Chair of the Board of the KWA Board of Directors.

Continued use of Flint River water after the City is connected to the KWA system

The City Administrator has confirmed that once the City is fully connected to the KWA system they will no longer continue to use Flint River water.

The Flint River, however, will be the City's primary back-up water source in the event that a major disruption in the KWA system temporarily prevents the City from receiving water.

The process used to hire Veolia

Veolia responded on January 29, 2015, to a Request for Proposal issued by the City of Flint. Emergency Manager Ambrose made the final decision to retain Veolia.

The importance of hydrant flushing

Fire hydrant flushing is an important part of distribution system maintenance. It is useful in determining flow conditions in water mains.

According to information from the American Water Works Association (AWWA), there are two types of hydrant flushing utilized. The most comprehensive method is fire-flow testing.

Fire-flow testing requires hydrants to be opened, flushed, pressure and flow data to be collected and the potential fire flow at a particular point in a water main to be determined.

Hydrant flushing permits any debris to be cleared from a water main. They process of collecting fire flow data allows the determination of water pressure and flow capabilities for fighting fires at any location within a distribution system. It can also help determine the general condition of a system by detecting reduced water flows in a given area.

Status of the GAC carbon filter installation

Six of the twelve filters will be operational by no later than the first week of August.

Activation of the filters is expected to immediately drop the levels of TTHM within the system.

The remaining six filters are projected to be installed and operational by the end of August.

Status of the DuPont Street Water Main Replacement

After an internal review, the City made the decision to rebid this project.

There were multiple reasons for this decision, which included interference with current road projects, the determination that project bids were too high, and bidding timelines which were not favorable to secure quality bids or contractors.

This project will be rebid by the City later this fiscal year.

If you have any questions or need additional information on this topic, let me know. Thank you.

City of Flint
Water Quality Update
Wednesday July 29rd 2015

Leak Detection

What: $900,000 Treasury Distressed City Grant for Leak Detection / Pipe Wall Assessment

Status: Contract signing

The vendor Echologics is ready to mobilize and has set the week of August 10th as the time to begin the project.

The vendor maintains a window of 10 – 14 weeks following starting in order to complete the full scope of work.

Next steps: Mobilization.

GAC Installation

What: $1,601,740 contract with LAN to design and install new filter media at the Water Plant

Status: Installing

Six of the twelve filters are completely installed

The filters are expected to immediately drop the TTHM level.

The timing of putting the filters into use is designed to get the maximum impact at the time of the next testing period which is schedule for the third week of August.

Next steps: Introduce water through the six new filters, and begin installation of the next six filters.

WPC Incinerator Shutdown

What: $1,100,000 Treasury Distressed City Grant for WPC Incinerator Shutdown

Status: In construction phase

Construction continues, the weather has cooperated and the work is on schedule.

Next steps: Completion of concrete work.

Water Meter Installation

What: $5,000,000 contract to purchase and install up to 18,000 water meters.

Status: On schedule

Letters have been sent to the public and posted online.

The installation of the first 9000 meters started this week.

A kickoff meeting of all management personnel involved is set for today to evaluate all aspects and possible issue that could occur.

Next steps: Kickoff meeting with all management today.

Subject: RE: Director's Office Assignment -- Flint - need update asap

I apologize for the delay in responding more specifically to this assignment, it took some time to review our Childhood Lead Poisoning Prevention program data to see if it might contribute to the understanding of the situation in Flint with their water supply. Here is what we found:

We looked at lead testing results for May 2014-April 2015, which is the 12 month time frame just after Flint started drawing their water from the river (water source changed in April 2014).

We compared lead testing rates and lead testing results to the same time frame for the previous 3 years, to see if there were any patterns that suggested that there were increased rates of lead poisoning after the water supply was switched. Per the attached charts –

- Lead testing rates remained about the same from year to year (chart on the right).
- There was a spike in elevated blood lead tests from July-September 2014 (chart on the left, gold line).
- However that pattern was not terribly different from what we saw in the previous three years, especially in 2011-2012 (we are working with our Epidemiologist to statistically verify any significant differences).
- We commonly see a 'seasonal effect' with lead, related to people opening and closing windows more often in the summer, which disturbs old deteriorating paint on the windows, sills and sashes. Window fans frequently blow and spread the lead dust from the deteriorating paint to other parts of the room/house. We suspect that the summer data spike may be related to this effect.
- If the home water supply lines and/or river water were contributing to elevated blood lead tests, we

expected that the increased rates would extend beyond the summer, but they drop quite a bit from September to October, stayed low over the winter, and are just starting to tail up again in the spring of 2015.

So upon review, we don't believe our data demonstrates an increase in lead poisoning rates that might be attributable to the change in water source for Flint. We recognize that lead exposure via the water is only a small piece of what may be happening for families in Flint, however, we hope the information is helpful.

Cc: Saxton, Thomas (Treasury); Wisniewski, Wendy (GOV)
Subject: RE: Updated Memo on Water Coalition Questions - July 29

I think this information is very helpful. It will not answer the main question about the quality of the water (DEQ is working on that through Brad I believe), and the color and smell of the present water, but it does get us to the answers to the less subjective issues. Frankly, the only way the issues will be totally resolved is when the KWA comes on line and the water is perceived to be cleaner and healthier.
I am somewhat surprised that the leadership in Flint has not responded better to the community questions, which don't seem unreasonable at all. Seems like Harvey has a better network into some of the neighborhoods than the city does. The KWA PR department definitely needs to do some outreach or they're headed down the same road as DWSD. Do you know if they go out on a regular basis to the community and talk about the rates, costs, etc.?

Subject: KWA Board Members
Importance: High

http://www.karegnondi.com/#!about/c20r9

Randy,

Here is a list of the KWA Board members:

Jeff Wright is the CEO of KWA.

The Board members are:

1. Dayne Walling, Chairperson
2. Greg Alexander, Vice Chairperson
3. Jamie Curtis
4. Ted Henry
5. Joseph Suma
6. Joshua Freeman
7. Steve Landaal
8. Larry Green
9. Sheldon Neeley
10. Thomas Svrcek
11. Richard E. Hammel
12. Marilyn "Micki" Hoffman
13. Paula Zelenko
14. Dale Kerbyson
15. Tracey Tucker

I have also included a link to the Board's page.

If you need more information, please let me know.

CITY of FLINT WATER TREATMENT PLANT MONTHLY OPERATION REPORT

SUPPLY NAME: CITY of FLINT WATER PLANT
WSSN: 2310

Michael Glasgow	**July 2015**
Operator-in-Charge	Month/Year
F-1R, F-2	F-1
Certification of Operator-in-Charge	Water Plant Classification
Michael Glasgow	**Genesee**
Signature of Operator-in-Charge	County

Treatment Rate and Filter Data

Maximum Treatment Rate	**18.5**	Million Gallons per Day
Rated Plant Capacity	**36**	Million Gallons per Day
Average Filter Run	**124**	Hours
Average Head Loss	**n/a**	Feet *(filter head loss meters not operational)
Average Filtration Rate	**2.5**	Gallons Per Square Feet per Minute
Maximum Filtration Rate	**3.3**	Gallons Per Square Feet per Minute
Average Wash Water Use	**1.0%**	Percent of Treated Water

Chemical Data

Chlorine on hand	**24,000**	lb	Est supply	**28**	days
Primary Coagulant (Ferric Chloride) on hand	**153,000**	lb	Est supply	**10**	days
Lime (CaO) on hand	**197**	tons	Est supply	**17**	days
Fluoride on Hand	**6,000**	lb	Est supply	**13**	days
Cost of All Chemicals per Million Gallons	**n/a**	dollars			
Total Power Cost per Million Gallons	**n/a**	dollars			

Remarks	Confluence Point # 1 (N)	Confluence Point # 2 (S)
Number of filter confluence samples > 0 3 NTU	**1**	**0**
Number of filter confluence samples collected	**218**	**218**
Percent of filter confluence samples > 0 3 NTU	**0.5%**	**0.0%**
Number of filter confluence samples > 1 NTU	**0**	**0**

Did any individual filter exceed:

1 0 NTU in two consecutive measurements taken 15 minutes apart? **NO**
If yes, attach specific filter(s) information and indicate required follow-up status

0 5 NTU in two consecutive measurements taken 15 minutes apart after 4 hours of operation? **NO**
If yes, attach specific filter(s) information and indicate required follow-up status

1 0 NTU in two consecutive measurements taken 15 minutes apart for 3 consecutive months? **NO**
If yes, attach specific filter(s) information and indicate required follow-up status

2 0 NTU in two consecutive measurements taken 15 minutes apart for 2 consecutive months? **NO**
If yes, attach specific filter(s) information and indicate required follow-up status

Was continuous (every 15 minutes) filter monitoring equipment off-line during the month? **NO**
If yes, indicate date(s), duration, and individual filter grab sampling frequency on a separate sheet

Did POE disinfectant residual fall below 0 2 ppm during the month? **NO**
If yes, indicate date(s) and duration on a separate sheet.

Was minimum C*T credit achieved for the entire month? **YES**
If no, indicate on a separate sheet the date(s) not achieved

Was continuous POE chlorine residual monitoring equipment off-line during the month? **NO**
If yes, indicate date(s) and duration on a separate sheet.

Importance: High

Randy,

I am ok with the textual comments in my communities of ROT, AP and Flint.

Under ROT, I did change some text color that was showing as read. The particular paragraph is:

Recent Developments

- Treasury has been informed that the Township Supervisor is regularly approving overtime for employees. Overtime is not included in the 2015 budget, and the Consent Agreement requires State Treasurer approval prior to any overtime expenditures. An Order was issued on May 20, 2015 that requires the Consultant to approve all requests for overtime prior to authorization. This is another example of the Township's inability to comply with the terms of the Consent Agreement.

Also, under Flint we need to confirm if any changes to the Water Quality Reporting has occurred. The specific paragraph is:

- The City of Flint continues to inform residents that it is in violation of the Clean Water Standards Act, after unsafe levels of trihalomethanes (TTHM, a disinfectant by-product) were found in the water. Recent testing by the Michigan Department of Environmental Quality (MDEQ) Testing Lab showed that the total TTHM levels for the month of March are well within the Environmental Protection Agency (EPA) guidelines for safe water. However, because EPA regulations require that the four month average for all testing sites be within certain guidelines, the City is still considered to be non-compliant by the MDEQ. Monthly testing remains ongoing and is being conducted by several parties.

I don't know if you want to call Natasha on this or I can do so if you would like.

City of Flint
Water Quality Update
Wednesday June 10th 2015

Leak Detection

What: $900,000 Treasury Distressed City Grant for Leak Detection / Pipe Wall Assessment

Status: Expected start date - late June / early July

The resolution was approved by the RTAB and the contract is being sent to the vendor.

The company 'Echologics" is still prepared to sign the contract and mobilize within several weeks following the contract signing.

The company maintains a window of 10 – 14 weeks to complete the full scope of work.

Next steps: Get contract signed and determine mobilization timeframe and length of project.

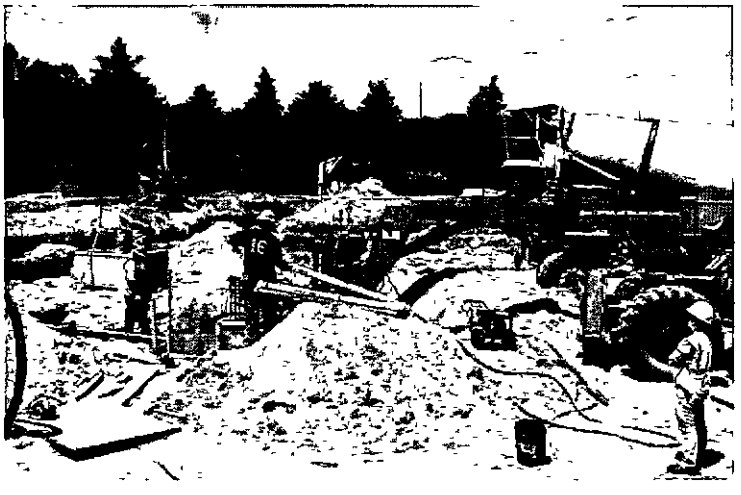
WPC Incinerator Shutdown

What: $1,100,000 Treasury Distressed City Grant for WPC Incinerator Shutdown

Status: In construction phase

With good weather, construction continues to move forward. No change in the schedule.

The 10 inch ductile iron cake pipes have now been placed and partially buried. This week, they are testing them (see pictures) to verify that they will hold 600 psi. This is double the working pressure of the cake discharge from those pumps.



Next steps: Continued construction of underground infrastructure

GAC Installation

What: $1,601,740 contract with LAN to design and install new filter media at the Water Plant

Status: Ahead of schedule

Vendor Calgon is still conducting performance testing on water samples that were sent to them. The sampling will verify the specific media that will be used. Testing is expected to be completed within the next week.

Once the exact medial is determined, delivery of supplies and installation will be scheduled.

Next steps: Vendor tests on Flint water and sand samples continue until results are determined.

Water Meter Installation

What: $5,000,000 contract with Metron to purchase and install 18,000 water meters

Status: On schedule

Funding was budgeted ($2,500,000) in FY 15 to replace all 9,000 of the meters that are

The City will purchase and replace 3000 over each of the next three years to complete the city wide installation plan.

Vendor Metron-Farnier was awarded the contract following an RFP for purchase and installation services.

Metron has just recently signed the contract and has targeted July 15, 2015 to begin the installation of 9,000 meters.

Next steps: A written installation plan is being developed by the city's water service center which will have one person designated as the internal manager of the project.

Howard Croft
Public Works Director

Flint telephone call June 10, 2015 9:00 a.m.

Josh, Randy, Eric, Patrick, Natasha, Dayne

- Priorities for the week

  Preparing for RTAB, Natasha sent OFRA information and reason for denial – denied by Council

  GAC? On schedule – filter installation at water plant to purify water – carbon filter

  Held news conference regarding upcoming violation notice – well received, not getting as many complaints

  Former City Attorney filed lawsuit regarding connecting with DWSD – Council took action during Jerry's time as EM to do all possible to connect to DWSD – cost not being taken into consideration – Amy Hovey, Congressman's Chief of Staff, called Dayne, have been contacting the Governor regarding money for residents who cannot pay their water bills – Jerry said that out of 30,000 residential customers $1.4M over 60 days past due

  Leak Detection Study – has not started yet, up for RTAB approval tomorrow

- Update on election issue including internal investigation

  Governor signed bill to put candidates' names back on the ballot – Internal investigation is complete, Natasha will move forward with a corrective action plan, has met with Clerk – report will not be released publically according to City Attorney

- 4th Quarter Budget Amendments

  Working on, will present to RTAB upon completion

- RTAB meeting tomorrow June 11th.

  Treasury will be there around 1:00, Natasha expects a large attendance

- Update tax abatement for downtown building renovation

  Have not heard back from State Tax Commission, meeting was held on the 9th

- GM expansion

- Re-assessment

- Update on vacant positions

  Treasurer – Natasha has talked to Jodi – Jodi has changed the job description and will be recruiting for the position – last day for old treasurer was Thursday, previous Treasurer is assisting until Jodi has a better understanding – Jerry will assist with finance

  HR Director – Position will be reposted

- Miscellaneous items

Increased attention on Police and Fire millage passed in 2012, community forum tomorrow that Tolbert will speak at – up for renewal in 2017 – covers 25% of Public Safety force – will explain reduction in force

MSP has bicycles out, presence continues to be positive

Sale of Racer Trust, Buick City Corridor former GM property, Martin Trucking Co -- Johnson Enterprises, 200 jobs into City, 120 new hires – Racer has a few prospects for additional sales – alternative energy, solar power

Announcing expansion of community education model tomorrow – one to three schools – AmeriCore members, 30 members, $1M investment, community school directors will return – open to entire community

Robert, Carla M. (Treasury)

Subject: RDS/EC/JW/NKhouri/TSaxton/WWorkman - Local Government Update
Location: Governor's Office, Romney

Start: Thu 6/11/2015 9:15 AM
End: Thu 6/11/2015 10:00 AM

Recurrence: (none)

Meeting Status: Accepted

Organizer: GovCalendar
Required Attendees: Clement, Elizabeth (GOV); Wisniewski, Wendy (GOV); Workman, Wayne (TREASURY); Saxton, Thomas (Treasury); Pleyte, Beth (Treasury); Doyle, Maureen (Treasury); Walsh, John (GOV); Khouri, Nick (TREASURY); Dempkowski, Angela (Treasury)

Attachment: Briefing

Local Government Up...

Local Government Briefing
June 11, 2015
Agenda

EMERGENCY MANAGER (EM)

- **Lincoln Park**
  - Police and Fire pension millage voted down in May 2015.
  - EM modified CBAs via 12(1)(k) to reduce retiree healthcare expense from $4.1M to 600K annually.
  - Three City Manager candidates have been selected to interview with the Mayor and City Council on June 17, 2015.
  - An actuarial analysis published on May 20, 2015 shows a further decline in pension funding, down to 23%.

FINANCIAL REVIEW COMMISSION (FRC)

- **Detroit**
  - Ron Rose, Executive Director.
  - Four-Year Financial and Operating Plan approved by FRC on April 20, 2015.
  - Reappraising all properties in Detroit due to problems with property valuations.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

- **Allen Park**
  - City Administrator search underway to replace former Administrator. Treasury will be participating in the selection process.
  - Bond Tender in process to restructure movie studio debt. It is expected to be completed in July 2015.
  - Relocation to a new temporary City Hall is underway and will be completed in June 2015.
  - The city approved an amended FY 16 budget. The RTAB approved the budget on June 3, 2015. A five-year budget projection has been prepared and is being evaluated by Treasury.

- **Benton Harbor**
  - Whistleblower and Elliot Larson Civil Rights case against the city will be heard in July 2015.
  - FY 16 proposed budget is balanced.
  - The Finance Director has accepted a position as Finance Director in the City of Flint. Her last date of employment is June 5, 2015. The position has been advertised and interviews will be scheduled.

- **Ecorse**
  - 26% decline in residential property values city-wide for FY 2016.

- Unable to submit balanced five-year budget since EM exit (April 30, 2015).
- Annual MERS expense is increasing during a period of revenue reduction.
- The RTAB rejected a proposed employment agreement for a Finance Director due to concerns regarding the hiring process and candidate selection.

- **Flint**
  - RTAB appointed on April 29, 2015. The first meeting will be held on June 11, 2015.
  - Legislation has been passed to allow the candidates, who submitted petitions by April 28, 2015, to have their names placed on the August Primary ballot.
  - Jodi Lundquist has accepted the employment offer as CFO. Her start date is tentatively scheduled to be June 15, 2015.
  - Members of the Charter Commission were sworn into office and their first meeting was held on May 19, 2015.
  - The city will be issuing RFPs to implement a full re-appraisal within a time frame to be agreed upon with the State Tax Commission.
  - The city continues to inform residents that it is in violation of the Clean Water Standards Act. Monthly testing is ongoing.
  - The city is installing a $1.5M granulated active-charcoal filter to improve water quality. This filter installation will be completed in mid-July 2015.
  - On May 27, 2015, the city hired Echologics at a cost of $895,850 to perform a leak detection study of the water system.

- **Hamtramck**
  - City FY 15-16 proposed budget is balanced.
  - City commencing a $7M sewer improvement project; state revolving fund bonds to be issued.

- **Pontiac**
  - City Charter revision on May 2015 ballot was defeated.
  - City lost Police and Fire pension lawsuit in Michigan Court of Appeals; remanded to lower court and could cost $3.5M. The City is filing an appeal with the Michigan Supreme Court.
  - Recruiting Deputy Mayor as part of transition back to Home Rule.
  - Mediation taking place between the City and Retirees regarding the lawsuit filed against the City concerning the elimination of retiree healthcare benefits.
  - SEC – Grayson matter

CONSENT AGREEMENT

- **Royal Oak Township**
  - The City of Detroit has declined to provide police services. This is being reviewed with the City of Detroit. Proposals from the cities of Ferndale and Hazel Park have been determined to be too expensive. The Michigan State Police (MSP) continues to provide police services to the township in the interim.
  - A Consent Agreement Order was issued on May 20, 2015, granting the Consultant the authority to approve all requests for overtime. Issuance of this Order is another example of the Township's inability to comply with the terms of the Consent Agreement.

- Mr. Burgess has requested the issuance of another Consent Agreement order giving him additional authority to approve expenditures and to update their financial records. Staff is preparing an approval for the Treasurer.
- The township's ballot language for a renewal of 4½ mills for general operations was approved by Oakland County. The issue will be placed before the voters in August 2015.
- The Township has approved a $164,275 budget amendment to its 2015 General Fund after an analysis was conducted by the Rehmann Group.

- **Inkster**
  - City Council agreed to settle the Dent lawsuit regarding police misconduct for $1.37M. The cost of the settlement will be placed on the tax roll by a judgement levy.
  - City owes $4.9M to Wayne County for sewer service. Discussions are underway to reach a settlement on this matter.
  - Three police chief candidates will be interviewed on June 11, 2015.
  - The City Treasurer/State Consultant, Mark Stuhldreher, issued an order that requires his approval for all contracts, expenditures, hiring, discipline, and termination.

- **River Rouge**
  - The city adopted the FY 17 budget on May 19, 2015. The budget is balanced at $9,839,808 which compares with the FY 16 budget of $9,878,991. The city has prepared a proposed five-year budget that shows a deficit in FY 18 to FY 20 unless additional revenues can be found.
  - Healthcare benefits reduction for active employees and retirees - $400k annual savings.

NEUTRAL EVALUATION

- **Highland Park**
  - The City of Detroit and the Detroit Water and Sewerage Department was awarded a judgment against the City of Highland Park in the amount of $20M. The City of Highland Park was granted a stay in the matter on June 3, 2015 according to the City Attorney.
  - Pending $12M Emergency Loan by June/July is on hold.
  - Pierce Monroe retained to help fix water billing system. Amnesty program has been approved by City Council.
  - RFP issued to hire private operator for Water and Sewer System. Contract award expected in late June or early July.

OTHER COMMUNITIES

- **Wayne County**
  - Deficit elimination being discussed with county leaders.

- Michigan Supreme Court ruled in favor of retirees regarding payment for a 13th check. Judgement was for $32M plus interest which is a total of $49.3M.
- Plaintiff has filed for a judgement levy.

Koryzno, Edward (Treasury)

Subject: Local Government Update to State Treasurer/June 2015
Attachments: Gov LG Update 6-12-15.docx

Attached is the periodic update on distressed local governments. If you have any questions, please call.

Wayne L. Workman
Deputy State Treasurer
Michigan Department of Treasury

STATE OF MICHIGAN
DEPARTMENT OF TREASURY

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

DATE: June 12, 2015

TO: Rick Snyder, Governor

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: Status of Financially Stressed Local Governments

EMERGENCY MANAGER

Lincoln Park
Emergency Manager: Brad Coulter
Appointed: July 3, 2014
Anticipated Exit: January 2016

Recent Developments
- The Police and Fire Pension Board elected to switch investment advisors to PNC. EM Coulter now expects better returns on pension assets.
- An actuarial analysis published on May 20, 2015 shows a further decline in pension funding, down to 23%. More conservative actuarial assumptions were used in this report.
- EM Coulter has modified retiree collective bargaining agreements to reduce healthcare benefits. These changes are to be implemented on July 1, 2015 and will reduce retiree healthcare costs from $4.1M to $600K annually.

Significant Actions/Issues
- FY 14 ended with a general fund accumulated deficit of $736K, out of a total budget of $21M. This is a significant increase from the FY 13 accumulated deficit of $89K. Salient increases were in Public Safety - $1.1M, Public Works - $700K, and Culture and Recreation - $600K.
- Voters rejected the Firefighters and Police Officers Retirement Act proposal last month by a 53% to 47% margin. Had it been approved, an additional $3M annually would have helped fund fire/police pension and healthcare costs. EM Coulter is working to determine next steps.

Issues to Resolve before EM Exit
- Police CBAs must be finalized.
- Increase and stabilize pension funding levels.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

FRC Created: November 12, 2014
FRC Members: Nick Khouri, Bill Martin, Brenda Jones, Darrell Burks, John Roberts, Lorron James, Mike Duggan, Stacy Fox, Tony Saunders

Recent Developments

- The first statutorily required biannual report on Detroit was filed by the Financial Review Commission (FRC). The report detailed the FRC's activities and formal requirements since its appointment in November 2014.
- At the May 18, 2015 FRC meeting, members approved various contracts and leases related to the Detroit Water and Sewerage Department transaction.
- The most intense work the FRC will perform going forward is measuring the effectiveness of restructuring initiatives in light of the large annual pension obligations the city will incur beginning in 2024.
- The City of Detroit Assessor's Office is currently conducting a multi-year project to reappraise all properties in Detroit, after the State Tax Commission found significant problems with property valuations. The reappraisal is scheduled to be completed in 2017.
- The next FRC meeting is scheduled for June 22, 2015.

Significant Action/Issues

- The city submitted its Four-Year Financial and Operating Plan (Plan) to the FRC in March. After reviewing the Plan and determining it was based on sound assumptions and met all statutory requirements, the FRC granted approval on April 20, 2015. The city's Plan encompassed the second year (FY 16) of Emergency Manager Orr's two-year budget and used this as its base year with no changes, plus three years (FY 17, FY 18, and FY 19).

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Allen Park

RTAB Appointed: September 26, 2014
RTAB Members: Suzanne Schafer, Joyce Parker, Fredrick Frank, Karen Barann

Recent Developments

- The city met with the police bargaining unit and is considering a one-year extension to the CBA. Treasury is investigating whether existing EM Orders would prohibit changes until after the CBA expires June 30, 2015.
- On May 15, 2015, an updated five-year budget projection from the city was received. Treasury is evaluating these projections.
- The city's FY 16 budget was approved by City Council on May 26, 2015 and approved by the RTAB on June 3, 2015. Treasury is evaluating the budget.
- The RTAB approved the hiring of a professional search firm to assist with finding qualified City Administrator candidates. Treasury will participate in the selection process.
- Completion of the bond tender process, delayed due to uncertainty involving the City Administrator position, is projected for July 2015.

Significant Actions/Issues

- RTAB membership will need to be increased due to potential loss of one member and concern about possible deadlocked votes with the current four-member board.
- In April, the RTAB approved creation of an Interim Deputy City Administrator position to oversee city operations until the bond tender and City Hall projects are complete. Mark Kibby, former City Manager of the City of Woodhaven, was appointed to this position.
- Litigation was filed by retirees challenging the EM's authority to reduce other post-employment benefit (OPEB) liabilities. A motion for summary disposition is pending. No date has been set to hear this motion.

Benton Harbor

RTAB Appointed: March 10, 2014
RTAB Members: Larry Steckelberg, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments

- Former Benton Harbor Public Safety Director Roger Lange has brought a Whistleblower and Elliot Larson Civil Rights case against the City of Benton Harbor and former Emergency Manager Tony Saunders. The case was originally scheduled to be heard July 20, 2015, but is expected to be postponed due to a procedural appeal filed by the city.
- The city's Finance Director has accepted a position as CFO in the City of Flint. Her last day in Benton Harbor was June 5, 2015.
- The city's Deputy Finance Director, multiple Public Safety Officers, and two Public Works Department employees have resigned due to other employment opportunities.

Significant Actions/Issues

- On April 6, 2015, the City Commission passed resolutions adopting a procurement policy, investment policy, and a credit card policy.
- FY 14 audited general fund revenues exceed expenditures by $1M, out of a total budget of $6.1M.

Ecorse

RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joyce Parker

Recent Developments

- On May 12, 2015, the RTAB approved a narrowly balanced FY 16 budget, though significant deficits are projected in future fiscal years. To balance the budget, the city increased an existing P.A. 33 levy by approximately 15 mills to fund employee pensions.
- The City Administrator has requested a new City Controller (third in six months), however; the RTAB rejected this appointment at the May meeting. The Mayor has submitted a letter of protest, disagreeing with this RTAB decision.
- The State Treasurer approved an RTAB recommendation to amend the final EM Order to provide RTAB oversight for all hiring and terminations.

Significant Actions/Issues

- The RTAB's Annual Evaluation for the Governor was not favorable, citing a lack of local financial literacy, political infighting, and an inability to develop a balanced multi-year budget. For these reasons, the removal of RTAB oversight cannot be recommended at this time.

- The city continues to have difficulty attracting qualified candidates and filling higher level administrative positions.
- Municipal Employee's Retiree System pension contributions are anticipated to increase from $1.8M in FY 15 to $2.4M in FY 16 due to accelerated funding for closed plans.
- The city has been unable to balance its five-year budget. Previous budgets project deficit spending in FY 16, and exhaustion of all resources in FY 17. To avoid this eventuality, significant expense reductions will be necessary in upcoming fiscal years.

Flint

RTAB Appointed: April 29, 2015

RTAB Members: Frederick Headen, Brian Larkin, David McGhee, Beverly Walker-Griffea, Robert McMahan

Recent Developments

- Legislation has been passed that will allow candidates who submitted petitions by April 28, 2015 to have their names placed on the August Primary ballot.
- Jodi Lundquist has accepted the employment offer as CFO.
- As a result of a recent review, the Executive Director of the State Tax Commission notified the city that it must maintain adequate assessment records in compliance with statute and State Tax Commission Rules, and must implement any corrective actions necessary. In addition, the city shall implement a full reassessment within a time frame agreed upon with the State Tax Commission. The city will be issuing an RFP for a reappraisal.
- The city continues to inform residents that it is in violation of the Clean Water Standards Act. Monthly testing is ongoing.
- The city is implementing Veolia recommended improvements to its water system, including water plant improvements, distribution system improvements, new policies and procedures, and better communication with customers. The city is installing a $1.5M granulated active-charcoal filter to improve water quality. This filter installation will be completed in mid-July.
- On May 27, 2015, the city hired Echologics at a cost of $895,850 to perform a leak detection study.

Significant Actions/Issues

- If the city loses a lawsuit over retiree healthcare, the EM's two-year budget does not assume an additional $5M to $6M annual expense which would result and which would grow at a rate equal to the general rise in healthcare costs.

Hamtramck

RTAB Appointed: December 18, 2014

RTAB Members: Deborah Roberts, Mark Stema, Cathy Square, Karen Young

Recent Developments

- Based on the city's FY 14 audit, the general fund's accumulated fund balance is $2.8M out of a total budget of $16.2M.
- The city is undertaking a $7 million sewer infrastructure improvement project which is eligible for State Revolving Fund monies. The project will reduce storm water inflow into the sanitary sewers.

Significant Actions/Issues

- A suit was filed in federal court by Hamtramck retirees over changes to healthcare benefits made in October 2014. The potential exposure to the city is currently unknown.
- The annual pension liability is anticipated to increase from $3.5M in FY 15 to $4.3M by FY 19. This increase is a result of closing certain pension plans and the Michigan Employee's Retirement System (MERS) policy of accelerating the required contribution for closed plans. The increases were included in the Emergency Manager's two-year budget.

Pontiac

RTAB Appointed: August 19, 2013

RTAB Members: Edward Koryzno, Louis Schimmel, Keith Sawdon, Robert Burgess

Recent Developments

- On May 20, 2015, the RTAB postponed consideration of an amendment to the city's retirement ordinance that would have granted early retirement status to 69 former employees. The amendment was adopted by City Council in April with no prior analysis or actuarial study being conducted. The best available estimates indicate an impact to the pension system of approximately $9-$13M per year. The ordinance amendment was sent back to committee for further review.
- The city lost a decision at the Michigan Court of Appeals which may make it liable for a $3.5M payment to the Police and Fire VEBA. The city requested reconsideration but was denied. On May 20, 2015, the RTAB approved the city's request to file to the Michigan Supreme Court.
- On May 21, 2015, the Securities and Exchange Commission (SEC) issued an Order to initiate proceedings against Gray & Company, the city's pension investment advisor. The proceedings involve Gray & Company's dealings with investments made by several Georgia pension plans in the GrayCo Alternative Fund II LP, a proprietary private equity fund. The Pension Board met with Mr. Gray to discuss the SEC proceedings, its effects on the Pontiac GERS portfolio, and how much is invested with Gray's firm. The Pension Board is reviewing options for withdrawal of pension assets from Grayson controlled funds.

Significant Actions/Issues

- On May 5, 2015, the city's Charter proposal was rejected by voters by a 55% to 45% margin.
- Per the city's FY 14 audit, the general fund's accumulated fund balance is approximately $5M out of a total budget of $27M.
- An Oakland Co. Circuit Judge dismissed the city's condemnation lawsuit involving the Phoenix Center because the city failed to include compensation for the lien placed on the property. The city is preparing an appeal to the U.S. Sixth Circuit Court of Appeals.
- The City of Pontiac Retired Employees Association v. City of Pontiac lawsuit (in U.S. District Court) was reassigned from Judge Lawrence P. Zatkoff to Judge Avern Cohn. The lawsuit challenges former EM Schimmel's elimination of retiree healthcare and replacement with an annual stipend. The General Employees Retirement System Pension Fund is significantly overfunded and the parties are exploring options to use the overfunded portion to fund retiree healthcare. Mediation is taking place under the supervision of Eugene Driker.

CONSENT AGREEMENT

Inkster
Date Executed: February 20, 2012
Consent Agreement Consultant: Mark Stuhldreher

Recent Developments
- On May 14, 2015, the City Council agreed to settle the Dent lawsuit regarding police misconduct for $1.37M. The cost of the settlement will be placed on the tax roll by a judgement levy.
- Three Police Chief candidates were interviewed on June 11, 2015.

Significant Actions/Issues
- On April 20, 2015, the city adopted a working capital reserve policy for the Water and Sewer Fund which will provide funds for emergency situations.
- Per the city's FY 14 audit, the general fund accumulated deficit is $767K out of a total budget of $11M.
- The city owes $4.9M to Wayne County for sewer service.

River Rouge
Date Executed: December 15, 2009
Consent Agreement Consultant: N/A (P.A. 72)

Recent Developments
- The city adopted its FY 17 budget on May 19, 2015. The budget is balanced at $9,839,808 which compares with the FY 16 budget of $9,878,991. The city has prepared a proposed five-year budget that shows a deficit in FY 18 to FY 20 unless additional revenues can be found.

Significant Actions/Issues
- A fire union CBA was approved in March, resulting in a reduction in health care costs.
- General fund revenues exceeded expenditures by $885K in FY 14 and the accumulated fund balance was $1.9M.

Royal Oak Township
Effective Date: April 21, 2014
Consent Agreement Consultant: Robert Burgess

Recent Developments
- Treasury has learned that the Township Supervisor is regularly authorizing overtime for employees, though overtime is not included in the FY 15 budget and the Consent Agreement requires State Treasurer approval prior to overtime expenditures. An Order was issued May 20, 2015 requiring the Consultant to approve all requests for overtime prior to authorization. This is another example of the township's inability to comply with the terms of the Consent Agreement.
- On April 7, 2015, Oakland County notified the township that they rejected the proposed ballot language for 4½ mills for general operations because the township's proposed language did not conform to guidelines. The township adopted newly proposed ballot

language on April 23, 2015 and the language was approved by Oakland County on May 11, 2015.

- A report issued by the Rehmann Group, the township's financial consultant, noted that the township must make budget adjustments of $164,275 to its FY 15 general fund budget to account for expenditures exceeding revenues in FY 14. The township has adopted budget amendments with implementation pending.

Significant Actions/Issues

- The City of Detroit has declined to provide police services to the township. This is being reviewed with the City of Detroit. Proposals from the cities of Ferndale and Hazel Park have been determined to be too expensive. The Michigan State Police continues to provide police services to the township in the interim.

NEUTRAL EVALUATION

Highland Park

Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
P.A. 436 Option Selected: Neutral Evaluation

Recent Developments

- Treasury staff is continuing to monitor the city's lack of progress in complying with terms of a Loan Agreement dated September 23, 2014. There are concerns about the city's ability to successfully restructure finances and implement health insurance benefit cost reductions as planned in FY 15. In addition, failure to reach an agreement with DWSD resulted in a $20M judgement levy against the city.
- On May 18, 2015, City Council approved a financial consultant's recommendation for an amnesty plan for residential water customers to pay arrearage amounts owed to the city. The consultant has determined that if all customers take advantage of the amnesty plan, the city could collect $2.08M.
- The DWSD Director has threatened to terminate water and sewer services if the city doesn't pay its arrearage and current charges. A Wayne Co. Circuit Judge issued a temporary restraining order on April 29, 2015 blocking DWSD's efforts to cut off water service to the city. The city was granted a stay on the $20M judgement levy on June 3, 2015.
- On May 18, 2015, the City Council adopted a resolution requesting MDOT to pay for storm water drainage from the highways and freeways under MDOT's jurisdiction in the city.

Significant Actions/Issues

- Huron Consulting was retained to prepare a request for proposal to solicit firms to operate and maintain the city's water and sewer systems, as required by the city's Plan of Adjustment. The city received one proposal from Wade Trim by the submission deadline of May 4, 2015. This proposal is under review by the city and Treasury.
- The city's liabilities total $117.6M. Some of the major components are: $55.3M debt, including $20.7M owed to the DWSD, $17.7M pension bonds, and $26.1M unfunded other post-employment benefits (OPEB) liabilities.

- Summary of the Plan of Adjustment for the City of Highland Park was adopted on August 28, 2014:
    - The city must make major reductions to retiree healthcare benefit costs.
    - In August 2015, an emergency loan of $12M plus restructuring of $4.8M existing loans will be requested by the city to refund $2.7M in Fiscal Stabilization Bonds, $5.2M in Financial Recovery Bonds, and $3.7M in State Revolving Fund Bonds. The status of this request will be reviewed in the context of benchmarks the city committed to in their last emergency loan in September 2014.

OTHER COMMUNITIES

Wayne County

Recent Developments

- The Recovery Plan has been released to the public and Treasury has begun an analysis.
- On June 10, 2015, the county announced a settlement with retirees over health care benefits that is expected to save $20K annually.

Significant Actions/Issues

- Cash reserves reached its lowest point in February 2014 with pooled cash falling to approximately $22M. The August 2014 cash balance was approximately $150M. This includes proceeds from a short-term borrowing of $75M.
- The county's annual structural general fund deficit is approximately $50M prior to any of the proposed remedial actions.
- The county's proposed restructuring is approximately $50M.
- The preliminary results of the county's actuarial report indicate a drop in other post-employment benefits (OPEB) liability of approximately $409M. This reduction is a result of the county choosing less expensive plans and implementing cost sharing measures (participants are paying a larger share). This does not include any saving opportunities resulting from a proposed change to retiree healthcare.
- The county is working to resolve a disagreement with the Mental Health Authority over services provided to jail inmates. The county currently pays for this service but believes it falls under the purview of the Authority.
- The county has not yet proposed a long-term solution to its jail problems.

Subject: RE: COA Kincaid v. Flint

You have to read the language you quote in its proper context. The entire sentence reads that "[c]onsequently, the Legislature did not grant the EM the power of ratification, nor did the actions of the EM taken under 2011 PA 4 survive the electors' referendum of that Act."

First, note the reference to *the* "EM." It is in the singular; in other words, the Court was referring specifically to Mike Brown, not to Emergency Managers in general. Second, the Court was addressing the issue of whether anything in Act 4 authorized Mike Brown to ratify the actions of the then Finance Director in recommending that water and sewer rates be increased. The Court concluded that the answer was no.

Finally, I think that read literally, and in isolation, the phrase "nor did the actions of the EM taken under 2011 PA 4 survive the electors' referendum of that Act" would be mere dicta because the phrase was not necessary to resolve the question before the Court: namely whether the Act authorized Mike Brown to ratify the actions in question. In addition, it would lead to the absurd result of requiring each Emergency Manager serving when Act 436 took effect to reenact any actions taken by him or her, or a predecessor, under Act 4 in order for those actions to remain valid under Act 436. This would fly in the face of § 31 of Act 436.

I think the statement by the Court was overbroad and unnecessary. But, I see no reason for concern.

Subject: COA Kincaid v. Flint

Hello Fred,

I am reviewing the latest COA opinion for Kincaid v. Flint. I am troubled by the court's holding that no EM actions taken under PA 4 "survive[d] the electors' referendum of that Act" (p8). What about the 19(1)(k) actions taken under PA 4?

Both Flint and Pontiac have enormous OPEB liabilities to honor if the 19(1)(k) actions are no longer effective.

STATE OF MICHIGAN

COURT OF APPEALS

WILLIAM SCOTT KINCAID, ERAINA POOLE, GEORGE POOLE, and MARY BELL,

Plaintiffs-Appellants,

v

CITY OF FLINT,
a municipal corporation.

Defendant-Appellee.

FOR PUBLICATION
June 11, 2015
9:10 a.m.

No. 318906
Genesee Circuit Court
LC No. 12-098490-CZ

Before: DONOFRIO, P.J., and BORRELLO and STEPHENS, JJ.

STEPHENS, J.

Plaintiffs, all residents of the defendant, appeal as of right the order of the circuit court granting defendant's motion for summary disposition and denying plaintiffs' motion to amend their complaint. We reverse and remand.

I. BACKGROUND

On August 15, 2011, the defendant's finance director, Michael Townsend sent a notice of a proposed 3.5% water and sewerage rate increase to be effective September 16, 2011, to the city council and mayor. The increase was proposed to meet a projected fiscal year deficit in the water fund of $14,789,666 as well as a sewer fund deficit of $8,078,917. Council adopted the proposal and the mayor signed it.

Shortly thereafter defendant was declared to be in a state of financial emergency.[1] On November 28, 2011, Governor Rick Snyder appointed Michael Brown as the Emergency Manager (EM) of defendant under the Emergency Manager Law, Public Act 4 of 2011.[2] On

[1] MCL 141.1545, former MCL 141.1214 lists the four instances in which a financial emergency exists.

[2] Former MCL 141.1501 *et seq.*; At the time, former MCL 141.1515(4) provided the Governor with the authority to appoint an emergency manager:

May 5, 2012, after being informed by newly appointed finance director Gerald Ambrose of the financial disarray of the water and sewer funds for defendant, EM Brown created Emergency Order No. 31. Order No. 31 ratified and confirmed the water and sewer rates implemented under Townsend on September 16, 2011, and additionally raised water and sewer rates, 12.5% and 45%, respectively.

After the Emergency Order by Brown, plaintiffs in this suit filed a complaint seeking this Court's original jurisdiction pursuant to Const 1963, art 9, §§ 31-32. The claim of error in that case was that defendant violated the Headlee Amendment[3]. This Court dismissed plaintiffs' claims without a hearing, finding that the rate increases from September of 2011 and those set to take place in July of 2012 were "revisions of existing user fees that do not implicate the Headlee Amendment." Plaintiffs' claims not relating to the Headlee Amendment were dismissed for lack of original jurisdiction. *Kincaid v Flint*, unpublished order of the Court of Appeals, entered June 29, 2012 (Docket No. 310221), lv den 493 Mich 871 (2012).

After the case before this Court was dismissed, plaintiff filed the instant action. The essence of the case was a claim that the rate increases in September of 2011 were made contrary to city ordinances: § 46-52.1,and § 46-57 and that the defendant had illegally pooled the funds collected for the water and sewer fund and used them to pay general obligations not related to sewer or water expenses. Plaintiffs requested that the trial court certify a class action suit against defendant for all sewer and water customers of defendant, declare that the rate increases were an illegal tax under the Headlee Amendment, and cease the co-mingling funds. Additionally, plaintiffs requested monetary relief in the form of a refund of the illegally collected rates and for damages caused to defendant's residents that were left without water and sewer service.

In lieu of filing an answer, defendant moved the trial court to grant it summary disposition pursuant to MCR 2.116(C) (6), (7), and (8). However, before defendant's motion for summary disposition was heard, plaintiffs moved the trial court for leave to amend their complaint asking for leave to allege a violation of MCL 123.131(2), (3).[4]

> Upon the confirmation of a finding of a financial emergency, the governor shall declare the local government in receivership and shall appoint an emergency manager to act for and in the place and stead of the governing body and the office of chief administrative officer of the local government.

[3] Specifically, the Headlee Amendment to the state constitution provides standing to "[a]ny taxpayer of the state" to bring suit in this Court to enforce the tax provisions of §§ 25 to 31.

[4] MCL 123.141(2), (3), states:

> (2) The price charged by the city to its customers shall be at a rate which is based on the actual cost of service as determined under the utility basis of rate-making. This subsection shall not remove any minimum or maximum limits imposed contractually between the city and its wholesale customers during the remaining life of the contract. This subsection shall not apply to a water system

Defendant responded to plaintiffs' motion to amend their complaint by arguing that it should be denied as futile. On February 15, 2013, the trial court heard the two outstanding motions. On June 21, 2013, the trial court entered an opinion and order granting summary disposition in favor of defendant. On July 12, 2013, plaintiffs moved the trial court to reconsider its decision to which the court entered an order permitting defendant to respond to plaintiffs' motion for reconsideration. The court denied the motion on October 14, 2013. Plaintiffs now appeal the order granting defendant summary disposition.

During the pendency of this case in the trial court, Public Act 4 of 2011 was rejected by a majority of the electorate causing its repeal.[5] One month later on December 26, 2012, the Legislature approved the Local Financial Stability and Choice Act, Public Act 436 of 2012,[6] effective March 28, 2013.[7] Many of the provisions of Public Act 436 of 2012 mirror those of Public Act 4 of 2011.

II. STANDARD OF REVIEW

The trial court ordered summary disposition under (C)(8) and the parties base their arguments on that subsection before this Court, but our review of the record shows that the trial court went beyond the pleadings in making its decision as did both parties in making their arguments. Plaintiffs' response to defendant's motion for summary disposition relied on 16 exhibits. Plaintiffs also moved for summary disposition themselves and cited exhibits outside the pleadings. The analysis of this case therefore will be done under MCR 2.116(C)(10). See *Cuddington v United Health Servs, Inc*, 298 Mich App 264, 270; 826 NW2d 519 (2012)

> that is not a contractual customer of another water department and that serves less than 1% of the population of the state. This subsection shall take effect with the first change in wholesale or retail rate by the city or its contractual customers following the effective date of this subsection. Any city that has not adjusted rates in conformity with this subsection by April 1, 1982 shall include in the next ensuing rate period an adjustment to increase or decrease rates to wholesale or retail customers, so that each class of customer pays rates which will yield the same estimated amount of revenue as if the rate adjustment had been retroactive to April 1, 1982. A city that is subject to section 5e of Act No. 279 of the Public Acts of 1909, being section 117.5e of the Michigan Compiled Laws, shall begin proceedings to determine rate changes pursuant to section 5e(b) of Act No. 279 of the Public Acts of 1909, being section 117.5e of the Michigan Compiled Laws.
>
> (3) The retail rate charged to the inhabitants of a city, village, township, or authority which is a contractual customer as provided by subsection (2) shall not exceed the actual cost of providing the service.

[5] The state board of canvassers certified the vote on November 26, 2012. Public Act 72 of 1990 came back into effect while the referendum on Public Act 4 of 2011 was pending.

[6] MCL 141.1541 *et seq*.

[7] Public Act 436 of 2012 repealed Public Act 72 of 1990, effective March 28, 2013.

("[B]ecause the trial court considered documentary evidence beyond the pleadings, we construe the motion as having been granted pursuant to MCR 2.116(C)(10).").

"This Court reviews decisions on motions for summary disposition de novo to determine if the moving party was entitled to judgment as a matter of law." *Alcona Co v Wolverine Environmental Prod, Inc*, 233 Mich App 238, 245; 590 NW2d 586 (1998), lv den 461 Mich 854 (1999). A motion for summary disposition pursuant to MCR 2.116(C)(10) "tests the factual sufficiency of the complaint." *Joseph v Auto Club Ins Assoc*, 491 Mich 200, 206; 815 NW2d 412 (2012), reh den 815 NW2d 491 (2012). "In evaluating a motion for summary disposition brought under this subsection, a trial court considers affidavits, pleadings, depositions, admissions, and other evidence submitted by the parties, MCR 2.116(G)(5), in the light most favorable to the party opposing the motion." *Maiden v Rozwood*, 461 Mich 109, 120; 597 NW2d 817 (1999). Summary disposition is proper where there is no "genuine issue regarding any material fact." *Id.* A party opposing a motion made pursuant to MCR 2.116(C)(10) has "the burden of showing that a genuine issue of disputed fact exists." *Major v Auto Club Ins Assoc*, 185 Mich App 437, 440; 462 NW2d 771 (1990), lv den 437 Mich 923 (1991) (citations omitted). The opposing party may not rest upon mere allegations or denial in the pleadings, but must, by affidavit or other documentary evidence, set forth specific facts showing that there is a genuine issue for trial. *Id.* (citations omitted).

This Court also reviews issues of statutory interpretation de novo. *Allen v Bloomfield Hills Sch Dist,* 281 Mich App 49, 52; 760 NW2d 811 (2008).

> When interpreting a statute, we follow the established rules of statutory construction, the foremost of which is to discern and give effect to the intent of the Legislature. The first step when interpreting a statute is to examine its plain language, which provides the most reliable evidence of [legislative] intent. If the language of a statute is clear and unambiguous, the statute must be enforced as written and no further judicial construction is permitted. When an ambiguity does indeed exist, we may go beyond the statutory text to ascertain legislative intent. Effect should be given to every phrase, clause, and word in the statute and, whenever possible, no word should be treated as surplusage or rendered nugatory. [*People v. Carrier*, ___ Mich App ___; ___ NW2d ___ (2015); slip op at 6-7 (citations and quotation marks omitted).].

III. CLAIMS OF ERROR

Plaintiffs' claims of error are two: that water and sewer rate increases that occurred under Townsend in September 2011were not authorized by Flint Ordinances and that EM Brown did not have the authority to ratify Townsend's unauthorized increases and then further increase water and sewer rates in violation of the same ordinances.

A. ORDINANCE VIOLATIONS

The City of Flint Ordinances that plaintiffs claim were violated are:

Ordinance 46-52.1

(a) Every year the Director of Finance shall calculate and transmit on or before April 15, to the Mayor and City Council the new water rate schedules with a complete itemization of water system costs for all classes of customers as given in § 46-52, for the purpose of calculating all bills for the forthcoming 12 months beginning July 1 of that year. The new water rate schedules shall be published at least 30 days prior to the date of implementation.

(b) Water rates shall be reviewed annually and the water percentage index (WRI) as applied to the water rate schedules shall be limited to an adjustment of 8% in any year unless:

(1) Such an adjustment is necessary to provide for all costs of operation, maintenance, replacement and debt service of the water supply system; or

(2) Such an adjustment is necessary to comply with applicable provisions of the city's water supply revenue bond resolutions or ordinances.

and,

Ordinance 46-57.1

Every year the Director of Finance shall calculate and transmit on or before April 15, to the Mayor and City Council the new sewage rate schedules with a complete itemization of sewage system costs for all classes of customers as given in § 46-57, for the purpose of calculating all bills for the forthcoming 12 months beginning July 1 of that year. The new water rate schedules shall be published at least 30 days prior to the date of implementation.

Plaintiffs argue that the rate increases of September 2011 and those imposed by the EM failed to meet the notice and effective date requirements of the ordinances and exceeded the percentage of increase allowed under the ordinances. We agree in part.

The September 2011 35% water rate increase was in violation of Flint Ordinance 46-52.1 because it was not published and noticed at least 30 days prior to its implementation and went into effect almost immediately in September 2011 instead of being implemented over twelve months beginning on July 1 of the next fiscal year. The sewer rate increases were invalid for the same reasons under Ordinance 46-57.1. The sewer rates were not published and noticed 30 days prior to their implementation and were implemented soon after the finance director's recommendation instead of on July 1 of the next fiscal year.

Plaintiffs' argument that the increases also violated Ordinance 46-52.1 by increasing the water rates above 8% is not supported by the ordinance language. Ordinance 46-52.1 envisions that water rate increases be limited to an adjustment of 8%, but allows for uncapped increases in the event "the adjustment is necessary to provide for all costs of operation, maintenance,

replacement and debt service of the water supply system' or . . . to comply with applicable provisions of the city's water supply revenue bond resolutions and ordinances." The defendant's then finance director, Townsend, sent an August 2011 letter to Mayor Walling and City Council, providing justification for the amount of the increase. In that letter, Townsend stated that the water fund was operating at a $3.21 million loss and that the city was not meeting its state bond requirements to operate with revenues greater than 125% of the amount of debt service of the bonds. Townsend explained that the rate increases would help cover the rate increases the city paid to Detroit and the Drinking Water Revolving Fund Bonds. This Court has no basis to find those statements invalid. While the notice, publication and implementation of the water and sewer rate increases were not authorized, the percentage of increase for the rates was not a violation of the ordinances.

Plaintiffs challenge the EM's rate increases under Order No. 31 on the same basis as they challenged the September 2011 increases. However, EM Brown's water and sewer rate increases of 12.5% and 45% respectively, did not violate Flint Ordinances 46-52.1 and 46-57.1. On May 5, 2012, EM Brown published notice of the increases and that they were to be effective July 1, 2012. The Order complied with the notice, publication and implementation provisions of 46-52.1 and 46-57.1. Plaintiffs again argue that any increase in water rates over 8% is not authorized under 46-52.1, but as discussed above, the language of the ordinance does not support that argument. The language of Order No. 31 established both of the excepted instances in 46-52.1 that allow for an increase in water rates greater than 8%. The Order explained that defendant was required under MCL 141.121[8] to set sewer rates that were sufficient to cover the costs of operating the water and sewer systems and that Townsend's increase was insufficient to

---

[8] MCL 141.121, the Revenue Bond Act of 1933, provides in pertinent part:

(1) Rates for services furnished by a public improvement shall be fixed before the issuance of the bonds. The rates shall be sufficient to provide for all the following:

(a) The payment of the expenses of administration and operation and the expenses for the maintenance of the public improvement as may be necessary to preserve the public improvement in good repair and working order.

(b) The payment of the interest on and the principal of bonds payable from the public improvements when the bonds become due and payable.

(c) The creation of any reserve for the bonds as required in the ordinance.

(d) Other expenditures and funds for the public improvement as the ordinance may require.

(2) The rates shall be fixed and revised by the governing body of the borrower so as to produce the amount described in subsection (1). The borrower shall covenant and agree in the ordinance authorizing the issuance of the bonds and on the face of each bond to maintain at all times the rates for services furnished by the public improvement sufficient to provide for the amount described in subsection (1). Rates pledged for the payment of bonds that are fixed and established pursuant to a contract or lease shall not be subject to revision or change, except in the manner provided in the lease or contract.

meet defendant's obligation under state law. The Order stated that additional increases were necessary "to cover the costs of operating the water and sewer systems and pay outstanding bonded indebtedness on the water system."

B. RATIFICATION AUTHORITY OF THE EMERGENCY MANAGER

EM Brown not only increased water and sewer rates with the enactment of Order No. 31, but also purported to expressly ratify and confirm the September 16, 2011 rate increases. The issue of first impression for this Court is whether EM Brown was granted the authority to ratify the unauthorized acts of another public official. We conclude that the Legislature did not delegate the power to ratify to an emergency manager.

The EM is a creature of the Legislature with only the power and authority to do what is granted by statute. EM Brown derived his authority from the former Emergency Manager Law, PA 4 of 2011.[9] That authority was not as broad as defendant argues. We do not agree with defendant that Public Act 436 of 2012, the successor statute to PA 4 of 2011, ratified all the actions of the EM taken under PA 4. MCL 141.1570(1)(a)-(e), states that "[a]ll of the following actions that occurred under the former 2011 PA 4" became effective under 2012 PA 436:

> (a) A determination by the state treasurer or superintendent of public instruction pursuant to a preliminary review of the existence of probable financial stress or a serious financial problem in a local government.
>
> (b) The appointment of a review team.
>
> (c) The findings and conclusion contained in a review team report submitted to the governor.
>
> (d) A determination by the governor of a financial emergency in a local government.
>
> (e) A confirmation by the governor of a financial emergency in a local government.

The actions taken by the state treasurer, the appointed review team and the governor remain effective and were not required to be re-approved with 2012 PA 436. Notably, actions taken by the EM are not included.

We also reject defendant's argument that an act of the EM is an act of the governor and that the EM derives power to ratify from the governor. Former MCL 141.1519(1)(dd) and (ee) state that an EM's authority is limited to the local level. An EM "[e]xercise[s] solely, for and on behalf of the local government," and "exercise[s] any power or authority of any officer, employee, department, board, commission, or other similar entity of the local government,

---

[9] Former MCL 141.1501 *et seq.*

whether elected or appointed, relating to the operation of the local government." MCL 141.1519(1)(dd), (ee). Thus, the EM acts in place of numerous persons, but they are all local government officials. Former 2011 PA 4[10] and 2012 PA 436[11] each provides that the governor may delegate his duties to the treasurer. Notably, there is no similar provision regarding the delegation of any authority to the EM. Rather, the EM serves at the pleasure of the governor.[12]

The EM's responsibilities and authority under former 2011 PA 4 are listed in former sections MCL 141.1515 through MCL 141.1530. Those provisions are similarly stated in sections MCL 141.1549 through MCL 141.1564 under 2012 PA 436. Of all the powers granted to the EM, ratification is not one of them. Ratification, in both the former 2011 PA 4 and 2012 PA 436, is explicitly granted to the actions of certain persons and entities. Under the former 2011 PA 4, "[a]ll proceedings and actions taken by the governor, the state treasurer, or a review team . . . are ratified and are enforceable as if the proceedings and actions were taken under this act, and a consent agreement entered into . . . is ratified and is binding and enforceable." Former MCL 141.1512(6). 2012 PA 436 contains nearly identical language:

> All proceedings and actions taken by the governor, the state treasurer, the superintendent of public instruction, the local emergency financial assistance loan board, or a review team under former 2011 PA 4, . . . are ratified and are enforceable as if the proceedings and actions were taken under this act, and a consent agreement entered into under former 2011 PA 4, . . . that was in effect immediately prior to the effective date of this act is ratified and is binding and enforceable under this act. [MCL 141.1544(6).]

The clear difference between 2011 PA 4 and 2012 PA 436 is that PA 436 adds "the superintendent of public instruction" and "the local emergency financial assistance loan board." Neither PA 4 nor PA 436 ratifies actions taken by the EM. Further, the EM's power to supersede local government authority does not extend to the state officers and entities listed above.[13] Consequently, the Legislature did not grant the EM the power of ratification, nor did the actions of the EM taken under 2011 PA 4 survive the electors' referendum of that Act.

Absent the power of ratification, defendant urges this Court to look elsewhere for the EM's authority to approve the unauthorized 2011 water and sewer rate increases. Defendant

---

[10] Former MCL 141.1515(10).

[11] MCL 141.1549(8).

[12] Former MCL 141.1515(5)(d); MCL 141.1549(3)(d).

[13] The EM's power is superior to and supersedes that of local government officials and entities. Former MCL 141.1519(1)(ee); MCL 141.1552(1)(ee). The EM does not usurp the authority of the superintendent of public instruction. See e.g. MCL 141.1554(c). The EM is not an appointed member of the financial assistance loan board or review team. Former MCL 141.1212; MCL 141.1544.

argues that the additional powers granted to an emergency manager in former MCL 141.1519[14] authorized the EM to raise water and sewer rates notwithstanding the ordinances. Under that section,

> An emergency manager may take 1 or more of the following additional actions with respect to a local government which is in receivership, notwithstanding any charter provision to the contrary:
>
> (a) Analyze factors and circumstances contributing to the financial emergency of the local government and initiate steps to correct the condition.

We are not persuaded by this argument. MCL 141.1519 applies in the instance where the EM, after having analyzed the factors and circumstances contributing to the financial emergency, *initiates* some action to alleviate the emergency. In other words, some affirmative act is required of the EM. "The word 'initiate' is a synonym of the word 'commence.' " *Fast Air, Inc. v. Knight*, 235 Mich App 541, 544; 599 NW2d 489 (1999) citing *Black's Law Dictionary* (5th ed). In turn, the plain and ordinary meaning of the word commence is "to begin; start," *The American Heritage Dictionary* (4th Ed 2006) and "begin" is defined as "to take the first step in performing an action." *Id.*[15] MCL 141.1519, then in effect, supported the 12.5% water and 45% sewer rates initiated by the EM after his appointment. Those increases were initiated after the EM was provided with information from his appointed finance director Gerald Ambrose of the operating losses of both the water and sewer systems and were implemented to correct those conditions. Although the EM had the authority to institute the change in rates notwithstanding any charter provision to the contrary under the former MCL 141.1519(1)(a), as discussed above, the increases complied with the notice, publication and implementation guidelines of city ordinances 46-52.1 and 46-57.1. MCL 141.1519(1)(a) however, does not support the action taken by the EM to expressly ratify and confirm the increases recommended by Townsend. In that instance, the EM did not "initiate" the steps to correct the condition by an affirmative act, but rather approved the steps already taken by someone else. Because the EM did not initiate those increases, MCL 141.1519(1)(a) does not apply.

In light of our analysis, we conclude that defendant violated its own ordinances, 46-52.1 and 46-57.1, by increasing water and sewer rates without first providing notice and publication to its residents thirty days prior and by not waiting to implement those rates until July 1 of the next fiscal year. We also conclude that Order No. 31 did not rectify the violations.

The trial court's grant of summary disposition to defendant was premised on its understanding of the EM's authority as broad, substantial and complete. Our decision today only highlights that authority for a closer look at the statutory boundaries of the EM's power.

---

[14] Now, MCL 141.1552.

[15] See *SBC v J.T. Crawford, Inc*, unpublished opinion per curiam of the Court of Appeals, issued November 27, 2007 (Docket No. 275334), p. 5.

Because we disagree with the trial court's conclusion that the EM had the authority to ratify, we reverse its order granting defendant summary disposition.

C. COMINGLING OF FUNDS

Next, this Court must consider whether the trial court properly summarily disposed of plaintiffs' claims regarding comingling of funds. Plaintiffs assert that defendant placed water and sewer rate fees from customers into a pooled cash account with other funds, used the water and sewer funds to pay general obligations of defendant in violation of the Revenue Bond Act of 1933, and that this practice led to a deficit in the water and sewer funds which precipitated the increases by Townsend and EM Brown. Plaintiffs' arguments rely entirely on the motion being granted pursuant to MCR 2.116(C)(8). Indeed, plaintiffs maintain that the trial court should not have considered the affidavit of Pamela Hill, a certified public accountant and auditor of defendant's financial statements, nor held it against plaintiffs for not providing any evidence to the contrary, because subrule (C)(8) requires the trial court to disregard evidence outside the pleadings. However, as has been discussed, this motion was granted pursuant to MCR 2.116(C)(10).

Plaintiffs argue that defendant illegally comingled funds. We find no merit to this claim. A party opposing a motion made pursuant to MCR 2.116(C)(10) has "the burden of showing that a genuine issue of disputed fact exists." *Major*, 185 Mich App at 440. The opposing party may not rest upon mere allegations or denials in the pleadings, but must, by affidavit or other documentary evidence, set forth specific facts showing that there is a genuine issue for trial. *Id.* (citations omitted). The record reveals that defendant provided evidence, in the form of an affidavit from Hill who was hired to audit municipalities, that defendant's accounting system was entirely legal and was used by several other municipalities. Plaintiffs assert that Hill's affidavit only evidences the practice of comingling without establishing the legality of the practice. While the trial court only mentioned the Hill affidavit in its order granting summary dismissal, it also had before it plaintiffs' exhibits in support of their response to defendant's motion for summary disposition which included an affidavit from city treasurer Douglas Bingaman. Bingaman's affidavit stated that the water and sewer funds were in a single pooled cash account, but that funds which state law required to be maintained separately were excluded. Further, that the "account is intended to have each City fund, including the water and sewer funds, end up paying only its own operating and other expenses." Bingaman's affidavit is evidence that defendant was following state law in regards to pooled cash accounts. It was also evidence that the water and sewer funds were not being used to pay the general obligations of defendant. Hill's affidavit averred knowledge of legal accounting practices that only certain accounts were excluded from being maintained in single pooled cash accounts and that water and sewer funds were not excluded. Hill further averred that, "each participating fund's share of the pooled cash account is accounted for," meaning that the water and sewer funds were also accounted for. In response, plaintiffs provided no evidence of defendant's accounting system being illegal. This Court's decision in *Major*, 185 Mich App 437, quite plainly requires plaintiffs to provide *some* evidence that there is a disputed issue of fact. This, plaintiffs did not do. As such, the trial court was required to determine that there was no genuine issue of material fact for trial. and properly granted summary disposition on this issue. *Id.*

III. MOTION TO AMEND

Plaintiffs last argue that it was error for the trial court to deny their request to amend their complaint. We agree.

"This Court reviews grants and denials of motions for leave to amend pleadings for an abuse of discretion." *Hakari v Ski Brule Inc*, 230 Mich App 352, 355; 584 NW2d 345 (1998). "There are circumstances where a trial court must decide a matter and there will be no single correct outcome; rather, there may be more than one reasonable and principled outcome. The trial court abuses its discretion when its decision falls outside this range of principled outcomes." *Pontiac Fire Fighters Union Local 376 v Pontiac*, 482 Mich 1, 8; 753 NW2d 595 (2008).

"A party may amend a pleading once as a matter of course within 14 days after being served with a responsive pleading by an adverse party." MCR 2.118(A)(1). "Except as provided in subrule (A)(1), a party may amend a pleading only by leave of the court or by written consent of the adverse party. Leave shall be freely given when justice so requires." MCR 2.118(A)(2). "Because a court should freely grant leave to amend a complaint when justice so requires, a motion to amend should ordinarily be denied only for particularized reasons." *Wormsbacher v Phillip R Seaver Title Co*, 284 Mich App 1, 8; 772 NW2d 827 (2009), lv den 485 Mich 927 (2009). Those reasons include undue delay, bad faith or dilatory motive, repeated failure to cure deficiencies by amendment previously allowed, undue prejudice, or where amendment would be futile. *Miller v Chapman Contracting*, 477 Mich 102, 105; 730 NW2d 462 (2007). Further, MCR 2.116(I)(5) states that when the trial court summarily disposes of a case under subrules (C)(8), (C)(9), or (C)(10), the trial court "shall give the parties an opportunity to amend their pleadings as provided by MCR 2.118, unless the evidence then before the court shows that amendment would not be justified."

The trial court's reason for denying plaintiffs' motion to amend their complaint was that the "proposed amended complaint is in conflict with this decision." The fact that an amended complaint would present issues at odds with the trial court's decision does not appear to be an accepted particularized reason. A court must specify its reasons for denying the motion; a failure to do so requires reversal, unless amendment would be futile. *Noyd v Claxton, Morgan, Flockhart & Vanliere*, 186 Mich.App 333, 340; 463 NW2d 268 (1990). Because we cannot discern on what basis the trial court denied plaintiffs' motion to amend their complaint, we remand this issue to the trial court. On remand, the trial court is to consider the additional claims in plaintiffs' proposed amended complaint and articulate its reasons for granting or denying the motion.

Reversed and remanded for proceedings consistent with this opinion. We do not retain jurisdiction.

Subject: RE: Michigan Report, Friday, June 12, 2015

Wayne:

The Court of Appeals drew a distinction between two actions taken by Mike Brown: first, the ratification by him of water and sewer rate increases proposed by the then City Finance Director ("Townsend") and second, the initiation and implementation by Mike himself of separate, additional water and sewer rate increases. The Court struck down only the former action; it left the latter action in place.

The Court concluded that the water and sewer rate increases proposed by Townsend violated charter provisions requiring "notice and publication to its residents thirty days prior and by not waiting to implement those rates

until July 1 of the next fiscal year." The Court also concluded that nothing in Act 4, under which Mike acted, nor in subsequently enacted Act 436, authorized an Emergency Manager to simply *ratify* the actions of someone else (i.e., Townsend).

Had Mike initiated and implemented the initial set of water and sewer rate increases on his own, the outcome would have been different. "[H]owever, [the statute] d[id] not support the action taken by the EM to expressly ratify and confirm the increases recommended by Townsend."

As a bottom line, this decisions appears to have limited impact upon the authority of Emergency Managers.

Fred

Hello Randall and Eric,

I have an engagement this morning and will not be able to participate in the conference call this morning. Mayor Walling is aware and will update me on the call details. Accordingly, I have attached a water update.

Thanks,

Natasha

City of Flint
Water Quality Update
Wednesday June 10th 2015

Leak Detection

What: $900,000 Treasury Distressed City Grant for Leak Detection / Pipe Wall Assessment

Status: Expected start date - late June / early July

The resolution was approved by the RTAB and the contract is being sent to the vendor.

The company 'Echologics" is still prepared to sign the contract and mobilize within several weeks following the contract signing.

The company maintains a window of 10 – 14 weeks to complete the full scope of work.

Next steps: Get contract signed and determine mobilization timeframe and length of project.

WPC Incinerator Shutdown

What: $1,100,000 Treasury Distressed City Grant for WPC Incinerator Shutdown

Status: In construction phase

With good weather, construction continues to move forward. No change in the schedule.

The 10 inch ductile iron cake pipes have now been placed and partially buried. This week, they are testing them (see pictures) to verify that they will hold 600 psi. This is double the working pressure of the cake discharge from those pumps.

Next steps: Continued construction of underground infrastructure

GAC Installation

What: $1,601,740 contract with LAN to design and install new filter media at the Water Plant

Status: Ahead of schedule

Vendor Calgon is still conducting performance testing on water samples that were sent to them. The sampling will verify the specific media that will be used. Testing is expected to be completed within the next week.

Once the exact medial is determined, delivery of supplies and installation will be scheduled.

Next steps: Vendor tests on Flint water and sand samples continue until results are determined.

Water Meter Installation

What: $5,000,000 contract with Metron to purchase and install 18,000 water meters

Status: On schedule

Funding was budgeted ($2,500,000) in FY 15 to replace all 9,000 of the meters that are

The City will purchase and replace 3000 over each of the next three years to complete the city wide installation plan.

Vendor Metron-Farnier was awarded the contract following an RFP for purchase and installation services.

Metron has just recently signed the contract and has targeted July 15, 2015 to begin the installation of 9,000 meters.

Next steps: A written installation plan is being developed by the city's water service center which will have one person designated as the internal manager of the project.

Michigan Court Ruling Clips Emergency Managers' Power

Caitlin Devitt

CHICAGO - A Michigan appeals court ruling has clipped the authority of the state's emergency managers in the first case examining the extent of their power under the state's law for distressed local governments.

The Michigan Court of Appeals on June 12 that emergency managers cannot simply ratify actions imposed by local officials and must closely follow local ordinances when imposing their own orders.

The case is Kincaid et al v. the City of Flint, stemming from a challenge to a former Flint emergency manager's order imposing steep water and sewer rate increases.

The appeals court decision reverses a lower court's ruling dismissing the case.

"The EM is a creature of the Legislature with only the power and authority to do what is granted by statute," the opinion says. "That authority was not as broad as defendant argues."

The ruling means emergency managers need to formally initiate actions on their own and pay close attention to adhering to local procedure.

For local governments currently under emergency management, managers may want to review their orders to protect against a legal challenge in light of the Flint decision, said attorneys at Michigan-based law firm Miller Canfield, which has been following the case and published a comment on the ruling.

"The court of appeals took a very strict, constructivist view of the statutes," said attorney Christopher Trebilcock, referring to Act 436, the state's current emergency management law, and its predecessor, Act 4.

"For any entity that is under Act 436 or Act 4, the filing of proper procedure is very important and strict adherence to local ordinances is required," he said. "If you're a local unit that's still in receivership it's worth reviewing the orders and actions in light of the court of appeal's decision."

Miller Canfield says it's the first case to analyze the extent of an EM's authority. The ruling places a "previously undefined limit on an EM's powers and by implication narrowed the EM's authority to 'act for and in the place and stead' of local officials," the law firm said in its commentary.

For Flint, the ruling means the loss of revenue generated by the water and sewer rate increases a former emergency manager imposed. The city has not yet announced whether it will appeal the ruling. If it does, it would appeal to the Michigan Supreme Court.

In 2011, before Flint was under state-ordered emergency management, the finance director recommended raising water and sewer rates, a move that was later approved by the city council and the mayor. The state then appointed Michael Brown to take over the city as emergency manager. He ratified the finance director's rate increase. Brown imposed water and sewer rate increases of 12.5% and 45%, respectively.

City council member Scott Kincaid and other residents sued, saying the city did not follow local ordinances in imposing the increases, including adhering to a 30-day waiting period, among other things, and that an EM cannot ratify an action imposed prior to his appointment.

In a press conference June 15, Kincaid and other plaintiffs said they hope to reach a settlement with the city to end the lawsuit.

"We are willing to sit down, we're willing to negotiate," Kincaid said, according to local reports. "Let's work out a process to get water and sewer rates to a level that people can afford them and businesses can continue to grow."

Flint telephone call June 24, 2015 9:00 a.m.

Josh Freeman, Mayor Dayne Walling, Randy Byrne

- Priorities for the week
- Internal investigation in the Clerk's office internal personnel matter
- Councilman Kincaid's lawsuit on water/sewer rate increases - nothing city was looking to maybe seeking appeal for reconsideration
- OPRA tax abatement - response to the question
- GM tax abatement
- Re-assessment-any response from the State Tax Commission - Nothing
- The Return to the Detroit Water Lawsuit was dismissed
- Update on vacant positions

  Treasurer - - with Treasury
  Finance Director started Monday, press conference was held and went well
  HR Director next step..

- Miscellaneous items

** Ice Arena Tax Appeal issue.
** Fourth Quarter Budget Amendments on Monday night
ex Finalizing Department Strategic Plans Update

How much does the RTB require, do we want the City Adm to provide a more listing Explanation?
Do they need more looking at?
Eric & Fred
Ex General Budget question

Jerry Ambrose - still available

** City Council & city Atty - simple ordinance, city adm. said no - conflict or a difference of opinion - restrict cuts / specific Chase.

90 day timeline for new ordinance

Weekly Meeting with Ed—June 24, 2015

- **Staff**—_Auditor Specialist 13-to Restructuring Specialist 13 draft PD is ready.
- **Allen Park**—issues include information for the Fire Contract discussion, Tender Offer now looks like August, retiree lawsuit, and City Adm. Search review of candidates during week of July 20th. Televising the RTAB_meetings and one additional RTAB member. Fred inquired about Order 45. The EM Order on City Hall property sale needs to be amended. I asked Cady to send us a request in writing.
- **Benton Harbor**-issues include lawsuit with former Public Safety Director and two former employees. Filling the Finance Director position Suzanne reviewed the resumes'. Budget was adopted. City Council is alleging City Administrator is insubordinate.
- **Ecorse** -issues include FY16 budget- Wayne indicated about $31,000 GF balance at end of FY 15-16, the city has $3.7M accumulated GF balance now, the Five- year budget will have a draft in July, merger of fire services with another unit and Finance Director's position.
- **Flint** – issues include the re-advertising of the HR_Director position, two year budget amendment, lawsuit on water rates, lawsuit to mandate return to DWSD was denied, water issues are getting resolved, and tax assessment problems. GM tax abatement was approved.
- **Hamtramck**— issues include the status of pension consulting work, police study, meeting with City Council regarding the RTAB. Katrina is planning to fire Rehman.
- **Highland Park**— water and sewer rate increase was adopted, a public hearing has to be held, the RFP will likely be approved next week. We have received another high school cost estimate for preparation of plans and specs, demolition, and project management. It is much cheaper than original estimate. Storm sewer lawsuit filed against MDOT. City wants to know what to do about the DEP. OPEB savings update. The City plans to hire Lou Schimmel to assist them in negotiating a settlement on past due sewer bills. City will have to pay 65% to DWSD of all proceeds collected from customers.
- **Lincoln Park**—CM interviews with the City Council last night, Matt Coppler and Brent Merrriman. Brent Merriman was offered the position but his Council enhanced his compensation. He will make a decision on Thursday. Draft FY15-16 budget review ($500K GF balance). He is considering placing the Act 345 request on the November ballot, Charter amendments may have to wait. Cell tower sale is proceeding. Brad is discussing an E-Loan with Suzanne. I want Brad to develop a plan for the last six months.
- **Inkster**- issues include Police Chief Selection, no word as of Tuesday. Wayne County sewer charges, and Order 5 implementation.
- **Pontiac**— issues include Search for Deputy Mayor is underway. Review of candidates the week of July 20th. Budget issue with the Mayor. One on One's with City Council went well. Exit plan preparation.
- **River Rouge**—issues include five year budget and discussion on exit from Consent Agreement, tax base loss and assessment problems. Contracts have been approved now we need to see the savings.

For Immediate Release

Fourth Quarter Budget Amendment Shows Positive Finish for Flint's Fiscal Year 2015

Flint, Michigan – June 29, 2015 – The City of Flint's fourth quarter budget amendment shows that Flint will end its fiscal year with a positive budget balance. The adopted biennial budget is for fiscal years 2015 and 2016. As of the end of the quarter, all of the City's funds, including the General Fund, will be without a deficit at the end FY15. The fourth quarter FY15 budget amendment will be presented to Flint City Council during a special meeting tonight at 5:30pm in the City Council Chambers.

Flint Mayor Dayne Walling praised the fiscal news as a milestone marking a historic shift in the City's finances. "The City of Flint has made great strides toward financial stability and it is encouraging to see the general fund with a positive reserve for the first time in a decade," said Walling. The fiscal year ends Tuesday, June 30, 2015.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Gerald Ambrose
Emergency Manager

TO: Wayne Workman, Deputy Treasurer
Treasury Department
State of Michigan

FROM: Jerry Ambrose, Emergency Manager
City of Flint

DATE: March 3, 2015

As the Emergency Manager for the City of Flint, I am charged with restoring the City government to financial solvency, and working to assure that the City moves forward on a financially sustainable basis. The steps taken over the past three years have been difficult. Taxes and fees have been raised, services and workforce reduced, and ongoing costs, including legacy costs, have been constrained.

The current controversy surrounding the provision of water, and the path for resolution, has a potentially significant impact on the progress that is being made. I am satisfied that the water provided to Flint users today is within all MDEQ and EPA guidelines, as evidenced by the most recent water quality results conducted for MDEQ. We have a continuing commitment to maintain water safety and to improve water quality, and have dedicated resources to assure this commitment will be made.

The oft-repeated suggestion that the City should return to DWSD, even for a short period of time, would, in my judgment, have extremely negative financial consequences to the water system, and consequently to the rate payers. By the most conservative estimates, such a move would increase costs by at least $12 million annually, with that amount achieved only by eliminating virtually all budgeted improvements in the system. For a system with Unrestricted Assets of only $740,745, according to the June 30, 2014 audited financial statements, the only recourse within the City's control would be to increase revenues significantly. And in my judgment, that would come from raising rates for water by 30% or more . Further, changing the *source* of the city's water would not necessarily change any of the *aesthetics* of the water, including odor and discoloration, since those appear to be directly related to the aging pipes and other infrastructure that carry water from the treatment facility to our customers.

This direction of discussion also deviates from what, in my judgment, should be the focus: How can we not only operate and maintain a system to assure the delivery of safe and quality water dependably, but significantly reduce the cost of water and sewer to the users? At an average of $149 per month for water and sewer service for a residential user, the cost is extremely high in comparison to surrounding areas, as well as most areas across the state, and creates a significant financial burden for many users. In my judgment, we should all be concentrating on how to reduce rates by 50% or more. Unfortunately, there are no easy or evident answers, and continuation of the status will be an impediment to the sustainable recovery of the City of Flint. It is a conversation that I expect we will have with the recently created Water Quality Advisory Committee.

My reasoning for this conclusion is as follows:

One of the decisions made in the context of beginning to eliminate deficits and to restore financial stability to the City of Flint was to increase water and sewer rates significantly – the only choice available to financially stabilize a system that as of June 30, 2012, had a deficit of $8,758,091. Another was to leave DWDS for the KWA because it offered the opportunity to lower future rate increases. A third decision was to utilize the Flint River on an interim basis when DWSD unilaterally terminated the City's contract for water purchase. That decision was made because it also offered an immediate cost savings opportunity which translated into the ability to upgrade the Water Treatment Plant without having to seek financing. It was a reasonable decision because of our experience in using the river in a back-up capacity, including test runs on a quarterly basis for several decades.

Unfortunately, the switch to the river as a primary source was more challenging than anticipated, and the harsh winter of 2013-2014 resulted in much more damage to the aging water infrastructure than in previous years. The result was the issuance of required notices that water exceeded established guidelines for safety as it could affect certain vulnerable populations, and some users of the system experienced unpleasant odors and discoloration. Some users also appeared to have had some negative reactions to the new source of water. However, as soon as the test results were known, City staff took immediate actions to address the concerns. These actions are evidenced today by the fact that MDEQ has certified that our most recent testing shows water from all testing sites to be well within acceptable guidelines. Additionally, the City is continuing to taking the necessary actions to assure that the water supply remains safe and that water quality continues to improve.

As the City has moved to address the situation, the suggestion continues to be made that the City should re-engage with DWSD and purchase water at least until the KWA pipeline is supplying water. As evidenced by the most recent letter from DWSD, such a decision would immediately increase the City's cost by $846,700 per month, or $10,160,400 per year, just for the fixed cost portion of the price. The actual *purchase* of water would be an additional fee, and dependent upon

the quantity purchased. We estimate the actual water purchase cost to average more than $1 million per month, for a grand total of approximately $22 million per year. Finally, the DWSD offer is conditioned upon the City (or presumably the KWA) agreeing to negotiate a long term contract (30 years) for back-up.

The $22 million annual estimate of increased costs to purchase water from DWSD would be minimally offset by an approximate $3 million in reduced operating costs, and could be further offset by an additional $9 million, but only if all funding for capital improvements to the system are eliminated. To eliminate all funding dedicated to repairing, stabilizing, and improving the system would be totally irresponsible and would have long term negative consequences to the City and to future rate payers.

As you are aware we have recently brought in outside expert assistance to evaluate the steps we have taken to assure that the water is safe and to continue to improve water quality. We are expecting specific recommendations within the next few weeks, and are committed to implementing those recommendations in a timely manner. Many steps have already been taken. I am confident that implementing their recommendations will assure a continuing supply of safe water as well as improved quality, and at far less cost than re-engaging DWSD.

We have also created a 40-member Water Advisory Committee and a 13-member Technical Advisory Committee to assure two-way communication with the public and users of the system. Those committees will begin to meet this week, and we look forward to answering their questions and receiving their input.

It is unfortunate that problems and concerns with quality have arisen, and we are working every day to address the issues that caused them. Maintaining safe water and improving quality is a top priority as we work to make the City of Flint an attractive place to live, work, study, and play.

City of Flint Wednesday 9:00am P[redacted]genda

March 4, 2015 1-88[redacted]cess [redacted]

			Status
1) Public Safety Update – FPD, MSP, (FFD, if needed)			
	a) FPD	Status Report	Update
	b) FFD		
	c) Other update from *Chief Tolbert and MSP*		
2) Governor's Office Update – R. Baird, H. Hollins, B. Clement			
	a) District Court Consolidation	County Commissioners voted on 12/10/14 to approve "pursuant to the terms and conditions set forth in a MOU to be approved between City of Flint and Gen. Cty "	Discussion will begin next week with County Controller. Appears County wants long term subsidy from City
	b) Local Income Tax Initiative	Additional source of funds still needed for City. H Hollins working to find a new sponsor Projected financial challenges associated with projection of FY17 budget may emphasize the rationale	No Change
3) Finance and Administrative Update			
	a) Management Vacancies	MML advertising for Treasurer, HR Director and Finance Director. Search for Fire Chief to be added	Update

911 – public safety committee to give input on lease agreement

- Not as many as like.
- late april early may schedule.
- Fire chief in July

		Last Report	Status
	b) Budget	Financial projections status. Projected gap between revenues and status quo expenses is less than last years projection of $4.5 -$5.0 million. Taxable values have declined 3%. (Total)	Projections for HC may not be as bad as projected. Update
Reviewing with LAFD	c) DEP/RAP	Progress under DEP/RAP being revised.	Discussion ongoing
	d) Purchasing	Revised purchasing ordinance being enacted.	No change
4) City Council Update			
	a) EM Order	Orders being developed defining organizational reporting relationships to new City Administrator.	No change → Developing
	b) Council/Mayor Compensation	Revision to Council and Mayor compensation is being developed.	No change → Step to full pay based on training.
5) Water Issues			
	a) MDEQ Violation Notice	Most recent TTHM sampling was tested by the MDEQ - confirmed our most recent internal tests findings that water is within federal/state guidelines. Expect to receive a violation notice from MDEQ, due to the running average calculation, in 7-10 days. The notice to customers will go out by mid-March	• 13 member ~~technical~~ technical advisory committee meets today. Update
	b) Drinking Water Revolving Fund	Discussing possible restructuring of loans.	Discussion ongoing
	c) Water Quality Consultant	Final report being compiled; will focus on assuring continued TTHM compliance and plans for hardness and discoloration improvement.	• Report from VIOLIA this week. Update
	d) WAC/TAC	A 40 member Water Advisory Committee and a 13 member Technical Advisory Committee (including an EPA representative)have been formed as part of the process of improving communication and receiving additional feedback. Meeting this week.	• Raftelis is reviewing water rate study. Update
	e) Problem resolution	Letter from EM to Treasury notes that the basic problem with water in Flint is cost, not water quality, but that no quick resolution is evident	New

		Last Report	Status
6) 9-1-1 Reconsolidation Plan			
	a) Tower Transfer to Consortium	Tower Transfer justification package sent to Council 2/24/15. Will be discussed at Public Safety Committee 3/4/15. Sent grant amendment request to E. Cole for use of current C-GAP grant to pay for consolidation expenses, received note that request will be reviewed. No timeframe provided.	— Eva Chole received amendment. Update
7) Transition Activities			
	a) Transition Management	Next budget step will be for Council to adopt budget priorities and receive updated 5 Year revenue/expense projections. New Council committee structure in place	Update
	b) Transition date	Date specific transition calendar to be developed. RTAB to be appointed	Update
8) Other Items			
	MDNR and Purchase of CSX rail area	Requesting DNR authorize full amount of appraised property value to be paid by DNR grant.	Info Received. Project has many issues.

At a standstill — not much we can do.
oTransfer should be a go in near future.

Flint Call/Meeting 9AM — S. O'neel, g. Kapp, E. Murphy, Carter, Chief Tolbert,

- 18% in crime
- ↑ in home
- Met w/ MSP to work in atherton area.
- SRMS time schedule being worked out.
- ~~G. Kapp~~ ~~Carr~~ St. fire marshall for flint area w/ MSP
  - Not being called out to arsons.
  - Issues w/ Fire Chief

(4M credit — possibly dump to pension)

2) District court merger → City to meet w/ county today to discuss.

MML → 9 for HR, 1 for finance, 1 for treasurer
- May need to contact TJ Adams or Gov HR

3) Exit to RTAB
- Review final orders — organizational orders, budget, etc...

ELoan → $6M ELoan will solve the deficit
- Define water issue separately and look for DWRSF.

> **Subject:** Fwd: Contaminated Drink Water if Flint
>
> Might want to get Jarrod and Terry Stanton on this as well as Harvey. Otherwise it will get out of hand. It's in the city's long term interest to make the KWA work and we can make the river water safe, but we need to work with the ministers this week to help them out. It's tough for everyday people to listen to financial issues and water mumbo jumbo when all they see is problems. You can't expect the ministers to hold the tide on this problem.
>
> How about cutting a deal with Ice Mountain or Bill Young and buying some water for the people for a time? $250K buys a lot of drinking water and we could distribute it through the churches while we continue to make the water even safer.

Good Afternoon, Attorney Randall!

Thank you for returning my call on the other day! Again, my concern as is others in the City of Flint, Michigan regarding the drinking water source for the water customers of the City of Flint. I have enclosed one of the lasted article written by the local newspaper, "The Flint Journal" regarding the Flint River water. Needless to say, the water is dangerous to our health! GM will not use the water at its Engine Plant in Flint to wash engines parts!

We need your help to guide us to the profession people that know about "Bad Drinking Water and Environmental Racism". I truly believe it's "Environmental Racism" at its worst or should I say best! As a resident of flint, Past President of the Flint Branch NAACP, newly elected VP of the Flint Branch NAACP and the most listen to broadcast host during that time on Flint's premiere gospel station, WFLT 1420AM, each Saturday morning from 9:30-10AM, I have challenged our elected officials to step up to the plate and fix this water problem!

I'll be asking the Executive Committee of the Flint Branch of the NAACP to request from our National Office if we can proceed with a possible "Environmental Racism" lawsuit with their assistance and the assistance of other civil rights groups and others to "file briefs in support of our efforts against those parties involved with the changing and the using of the Flint River as our water drinking source.

The City of Flint has Emergency Manager #4 since our "takeover", and cares less about the residents or the water concerns of its Customers of Flint! Please help us with our problem by directing us to the right professional people. Please go to www.actionpa.org/fluoride/ej.html regarding "Environmental Racism" I have attached an article from the Flint Journal, and may Google other articles regarding the Flint's water source, including how we arrived to where we are on today.

Thank you very much in advance!!

I remain.

AC Dumas, Concerned Resident

Tom,

I am good with restructuring the loans, as it positively impacts our need for capital funding. Let me know what you need from us.

Wayne, I also have some new thoughts on eliminating the deficit, so please call when you have a chance.

J

For Immediate Release

City of Flint

Flint, Michigan – March 4, 2015 – Members of the newly established Flint Water Technical Advisory Committee met for two hours today at Flint City Hall to learn more about the steps the city is taking to confirm water safety and improve quality. Members include representatives from the Michigan State University, Genesee County Health Department, Kettering University, Mott Community College, and the Genesee County Medical Society. Joining them were experts from the Michigan Department of Environmental Quality and the EPA, along with several local elected officials.

The presentation included confirmation of the safety of Flint's water system and an overview of the opportunities available to improve water quality. Recent water testing results were shared that confirmed the city today is in compliance with all state guidelines.

Committee members were reminded that another notification to residents would be required later this month, despite the city's progress in improving and stabilizing water safety. The DEQ-required communication is related to test results from 2014. Committee members urged city officials to ensure the required communication focused on the progress and improvement made. Public health officials also offered to help

–CONTINUE–

communicate with health providers throughout the city in an effort to educate residents about the water's safety.

The Water Technical Advisory Committee is expected to meet on a monthly basis through the implementation of KWA as the city's primary water source.

Weekly Meeting with Ed—March 5, 2015

- **Staffing Update**—Specialist 13 has 54 applications. I am in the process of screening out at least 50 and Analyst 9 OFR has been approved.
- **Allen Park**— issue—The City Council is meeting tonight to approve the severance agreement with Karen. I told the Mayor yesterday to not take action tonight to hire an interim administrator. I stated that Treasury wanted to have a discussion with them as to the way forward.
- **Benton Harbor**- update of FDCVT Reappraisal grant award, any update on this.
- **Ecorse**—Five- year budget and Wayne disregard for our weekly telephone calls.
- **Flint** – Draft of the final EM Order. 911 tower issue. Meeting with Natasha and Jerry is being rescheduled for March 18th. Fiscal Stabilization Bonds/E-Loan. I should note that Jerry indicated that he wants an E-loan to resolve the deficit and will repair the water system with funding from the DEQ's revolving water program. Jerry's exit date extended through April or .longer? Flint water meeting this afternoon, I will be in attendance. Jerry indicated that only one candidate had applied for the Finance Directors position.
- **Hamtramck**— Issue between John Gabor and Katrina. I plan to meet with John. Segal has begun the pension consulting work. Police Chief Update. Katrina has begun to meet with City Council regarding the RTAB.
- **Highland Park**— RFP is being sent out. Vacant High School facility environmental RFP, a recommendation to Wayne will be completed soon. Water- Sewer billing update- may need **to** financially assist the City because Cathy wants to hire Pierce-Monroe to get it resolved. Need to discuss loan agreement items with Wayne.
- **Lincoln Park**— CM Search with Tom Adams is progressing. We are probably several weeks out from knowing the final candidate list. Pension millage request, police and fire are working to get it approved by voters. Two year Budget discussion and possible E-Loan. OPEB meetings with retirees update and overage on pension work performed to date. Cell tower sale of leases.
- **Inkster**- . Police Chief Search update. Judgment levy for water-sewer charges to Wayne County and DWSD. DEP. City Manager is requesting a meeting with Treasury to discuss status of consent agreement. Possible assistance on a risk management program.
- **Pontiac**— Mayor Waterman and I met with Tom Adams. Search is being processed for approval.
- River Rouge—Approval letter for police tentative agreements has been sent to Mayor Bowdler.
- **Royal Oak Township**— Meeting with Hazel Park has been scheduled for next week. FOIA request and reimbursement of FICA update. Issues Grant School, conflict of interest issue and Fire Contract.
- **Miscellaneous Items**-- Vacation request for the week after Easter and Good Friday. Sale of Wayne County Sewer Plant. I may request a vacation day on Friday, March 13th.

The meeting was facilitated by the Community Resolution Center. Veolia gave a presentation on the current status of TTHM issue. The next part of the meeting was devoted to answering questions that attendees posted on the walls in the room. The meeting broke down at that point. Jerry Ambrose was attempting to answer a question when the crowd began shouting and was generally unruly. The facilitators did a poor job of controlling the audience. The Flint PD escorted one person from the room. The major issues of course are the water quality, reconnecting to the DWSD, and the cost of the water. Please let me know if you have any questions.

> To reiterate some key points so we're all clear:
>
> 1. DEQ does not inspect individuals' homes in a situation like this. It's the city's system, their operators handle all complaints and maintenance. In fact, our folks alerted me that the city's got union rules in place forbidding any contractor from touching the system.
> 2. DEQ's role is limited to ensuring the plant is operating to state standards and the water it produces meets potability standards. The aesthetic issues drawing concern from residents – color, odor, taste – stem from a variety of things. Age of the system and prolonged lack of upkeep is the leading factor. But in some areas, another contributing factor is changes in water flow – source used to come from the south, now comes from the north, so some pipes are flowing in reverse, stirring up whatever was settled for a long time. In some sections, large pipes that historically served large communities are now serving a much smaller customer base, contributing to water stagnating in the system. In some areas, household connections are old and worn, so two neighbors may be having dramatically different experiences. My point is, the challenge takes many forms and there's no single solution that will bring sweeping change. The two consultants hired by the city have, as I understand it, both reinforced this idea in their assessments, so that's good.
>
> 3. The fix for this will be years in the making, truly. Even if full funding were available, 'big dig' projects can't all happen at once. The city needs to get an assessment of its infrastructure so it can prioritize its needs, and I understand they're working on that. In the near term, maintenance this spring / summer –

things like cleaning the pipes in key sections and flushing the system via the hydrants – could offer some short term results. I know nobody wants to just wait for spring, but that is something important to keep in mind.

4. In the meantime, the group discussed possibly making home water filters available somehow. The National Safety Foundation is a Michigan company, headquartered and founded in Ann Arbor, that develops standards for all kinds of infrastructure. They're a globally recognized source for standard setting. A look at their site reveals there are myriad filtration options on the market and within each type (faucet mounted, whole house line filters, etc) there are filters that focus on different aspects of purification.

   If this idea begins to get legs, I'd suggest testing some different models on the local water at the customer level to see if they work. I'd also suggest the idea be focused on tap-mounted models to promote clean, appealing drinking water. And I'd suggest this program could be funded in whole or in part by the state, but would need to be administered by the city (reinforcing the fact that they own, operate and service the system). I've got some information on filter models below.

   Two more considerations: One, while the state has provided residents in some communities with bottled water in the past, it always has to do with their water being somehow contaminated – as in, some kind of chemical plume that impaired local drinking water sources. This would be the first time the state took steps to deal with what is an aesthetic issue on a system where the water is meeting state drinking water standards.

Water filter info:
ANSI NSF Standard 42 Covers bacteriostasis, taste and odor (associated only with chlorine removal), and other aesthetic conditions
http://standards.nsf org/apps/group_public/download.php/19895/NSF_42-11%20-%20watermarked.pdf

ANSI NSF Standard 53 Covers health effects removal
http://standards.nsf.org/apps/group_public/download.php/19896/NSF_53-11a%20-%20watermarked.pdf

It is important to note that the filters are not required to meet all aspects of the standard, only the portions they want to make claims for. So product information for each filter must be reviewed to determine its applicability.

Most of these point of use filters are basic activated carbon filters that simply remove taste and odor specifically associated with chlorine, not other things like iron, manganese, hydrogen sulfide, etc. that can also impact taste and odor as well as color.

It is important to recognize that taste and odor is generally an individual preference and such standards have for the most part not been developed because groups of individuals may still consider taste and odor issues to exist even after levels for such a standard have been met.

Other considerations are that the test water for such filters attempting to meet the standard uses hardness levels of 170 mg/L or less. Flint's water at times may be above this level, which could then impact filter performance and longevity.

Most of these filters are designed to be replaced after 100 gallons or less of use, a period of about 3 months for most households. In addition the tests allow for initial pressure drops of up to 15 psi. This may limit use in households that already rely on minimum pressure within their household plumbing.

Regarding the health effects standards, as the Flint water system already meets such requirements, with the exception of the current TTHM locational running annual average, there is little point to the use of these filters for such a purpose.

To the point you'd asked about the other day, while Flint and Detroit are leading examples of unmaintained infrastructure, Flint is not alone by any means.

This recent infrastructure report card
http://www.infrastructurereportcard.org/michigan/michigan-overview/
Lists Michigan with a $13.8 Billion need over the next 20 years.

http://www.infrastructurereportcard.org/a/#p/state-facts/michigan

Here's a link to the 2009 Report Card for Michigan Infrastructure
http://www.michiganreportcard.com/

From the report:

"A significant portion of the state's primary distribution system is nearing 100 years old. CWS are facing a significant challenge to maintain the vast network of aging, underground infrastructure. Within the city of Detroit alone, approximately 80% of its distribution piping was installed prior to 1940, which is not unusual for CWS in Michigan."

"The age of the majority of the state's distribution system is the primary contributor to normal decay and failure. In many cases, pipe life has far exceeded useful service life. Much of the older water systems consist of undersized mains constructed of materials such as unlined cast iron pipe. Minor fluctuations in system flows or pressure may cause red water complaints and even result in pipe failure. All CWS should have routine flushing and valve maintenance programs; however many are hesitant due to the time and cost."

"Under the Stage 2 Disinfection Byproducts Rule, all CWS that disinfect are required to provide increased trihalomethane (THHM) and haloacetic acid (HAA5) monitoring due to the potential byproducts of chlorine reactions within the pipe system. Corrosion, scale, solid suspension on the interior sidewall of pipe, in addition to the age and condition of the system will require diligent rehabilitation investment to maintain system integrity."

"While better materials and advanced technology is available to replace the aging distribution system, resources remain scarce when compared with the magnitude of the rehabilitation task at hand. Too often, distribution system replacement costs are underfunded and the first item to be slashed when budget problems arise. Overall, distribution system maintenance is reactionary in much of the older systems. Since the majority of the antiquated system will require removal and replacement beyond the CWS

funding resources for systematic upgrade, a reactionary rehabilitation program is inevitable and must be funded accordingly."

Call or email me if you need anything further.

VEOLIA

Water Quality Report
March 12, 2015

FROM
Veolia North America

TO
Emergency Manager Gerald Ambrose

Executive Summary

The City of Flint changed water sources, transitioning from Detroit's system to the Flint River. This change created water treatment challenges that have resulted in water quality violations. Aging cast-iron pipe has compounded the situation, leading to aesthetic issues including taste, odor and discoloration. Public interest and scrutiny of the drinking water system intensified following the distribution of required public notices of violation

The City of Flint has made a number of good decisions regarding treatment changes that have improved water quality However, this is a very complex water quality issue and the City is seeking additional advice on what to do to ensure healthful drinking water for the community.

Veolia appreciates the City's decision to seek independent third parties to review current treatment processes, maintenance procedures and actions taken to date, and provide ideas for improvement. We are pleased to present this final report to the City of Flint following our experts' 160-hour assessment of the water treatment plant, distribution system, customer service and communications programs, and capital plans and annual budget.

This report provides recommendations and a roadmap for improvement, though our engagement was limited in scope Our assessment included reviewing actions taken by the City to date, validating the City's plans going forward, and making recommendations for ideas not being considered.

Although a review of water quality records for the time period under our study indicates compliance with State and Federal water quality regulations, Veolia, as an operator and manager of comparable utilities, recommends a variety of actions to address improvements in water quality and related aesthetics including. operational changes and improvements, changes in water treatment processes, procedures and chemical dosing, adjustments in how current technologies are being used, increased maintenance and capital program activities; increased training, and, an enhanced customer communications program.

We are also providing a recommended schedule and estimated costs for implementing changes. It is our desire to help Flint residents and public officials better understand the current situation so that informed decisions can be made to ensure safe drinking water for the city's customers.

Review of Actions Taken to Date

To address water quality issues, the city has made operational changes, sought help from the State, hired engineering firm Lockwood, Andrews & Newnam, Inc. (LAN) to provide additional advice, and hired Veolia for an assessment from a utility operator's perspective. The City has also reached out to different specialty vendors (chemical suppliers, filter companies and tank aeration companies) for information about products to help with the TTHM issues. These are logical steps to take.

Flint is not alone in dealing with TTHM problems, as many utilities across the country are facing this challenge. The City appears to be following standard steps that many of those communities are taking to successfully correct the problem.

Although the primary focus of this review was based on solving the TTHM problem, the public has also expressed its frustration over discolored and hard water. Those aesthetic issues have understandably increased the level of concern about the safety of the water

The review of the water quality records during the time of Veolia's study shows the water to be in compliance with State and Federal regulations, and, based on those standards, the water is considered to meet drinking water requirements.

The City has been proactive in its efforts to reach out to the medical community, to set up a phone number and email address to receive complaints, to post State Water Quality reports, to provide the list of EPA required water tests, and offer to test the water at customers' homes.

From our review, these numerous efforts demonstrate how the city is trying to be transparent and responsive beyond what many other communities might do in similar circumstances.

State Report

The Michigan Department of Environmental Quality (MDEQ) has requested specific actions be taken related to the total trihalomethane (TTHM) issues. The February 2015 report from LAN (*Operational Evaluation Report TTHM Formation Concern*) indicated apparent reasons for the elevated levels of TTHM in the distribution system. These generally relate to high Total Organic Carbon (TOC) in the water source, improperly operating equipment both in the plant and the distribution system, less-than-optimal plant TOC removal and old cast-iron pipe in the distribution system. **Our assessment confirms that these reasons are likely given our on-site laboratory testing and analysis, as well as our first-hand observations.**

Due to time constraints, LAN's report to the State was submitted prior to Veolia's final analysis and recommendations, and contained a number of key initial and contingent steps the City should consider, including:

Initial Actions

- Hire a Third Party Water Quality Expert to Complete Independent Audit
- Obtain a THM Analyzer
- Carry Out Jar Testing
- Water Plant Optimization Softening
- Water Plant Optimization Disinfection of Filter Beds (Pre-Chlorination)
- Water Plant Optimization Polymer Aid to Coagulation and Flocculation
- Increase Water Main Flushing
- Water Modeling Cedar Street Pump Recirculation
- Water Modeling West Side Pump Recirculation
- Broken Valve Locations
- Increase Flushing

Contingent Actions

- Fix Ozone System
- Start Feeding Coagulant and Flocculation Polymer
- Convert to Lime and Soda Ash Softening
- Change Disinfection to Chloramine or Chlorine Dioxide Temporarily
- Install Pre-Oxidant at Intake
- Replace Filter Media Implement Advanced Treatment
- Increase Main Flushing
- Continue Valve Replacement
- Emphasize Cast Iron Pipe Replacement

Veolia's Recommendations

While many of Veolia's recommendations match the initial assessment provided by LAN, our approach, as an operator and manager of comparable utilities, considers a more comprehensive solution. These improvements include operational changes, differences in water treatment regimes and chemical dosing, increased maintenance, and increased training.

- **Addition of Permanganate** – The addition of a permanganate chemical will help reduce ozone demand as well as chlorine demand. The reduction of ozone is needed to help eliminate the possibility of violating the bromate limit. The addition of the chemical will require state approval, submission of design documents for approval, procurement of the equipment and installation. The State has indicated they will work with the City on expediting review and approval of any requested changes. The required dosage of permanganate is estimated to range from 0.5 mg/L to 1.2 mg/L with a corresponding price of $160,000 to $320,000 per year. (Please note – The water in the river is dynamic which means it will change with weather, seasons and other factors. The estimates provided are based on bench testing at a given time and as such require the operators to test water and to verify chemical dosages on a frequent basis.)
- **Reduction of Ozone Feed** – Treating water is a delicate balance - increasing ozone to fix the TTHM problem can raise bromate levels to a point of violation. The introduction of permanganate is being recommended to reduce the demand for ozone so that feed rates will not exceed 5 mg/L. The current ozone dosing has been as high as 8 mg/L and, as such, if allowed to continue, will increase the risk of violating the bromate levels.
- **Increase of Ferric Chloride** – Four coagulants were tested by Veolia -ferric chloride, ferric sulfate, polyaluminum chloride (PACl) and aluminum chlorohydrate (ACH). Ferric chloride and ACH were found to be the best choice of product for effectiveness in removing TOC, a precursor to TTHM formation. Current ferric chloride dosages are too low and dosages of 100 mg/L or more are recommended. Again, please note, that the amount of chemical needed changes with the nature of the river and as such, water must be tested multiple times a day with corresponding changes in chemical dosages. This increase to 100 mg/L is twice what is currently being fed and much higher than what had previously been fed last year. The increase in chemical costs could be up to $1,000,000 per year. This change in dosage (using ferric chloride) can be made immediately without state permit review.
- **Reduction of Lime** – Lime is currently being overfed. A higher dosage of lime does not necessarily mean better treatment. A review of different dosages with jar testing indicates that the current dosage of 280 mg/L can be reduced to 230 mg/L. This represents a potential range of savings of up to $270,000 per year. This change can be made immediately. It should be noted that the current softening equipment is in poor condition, which does complicate the treatment process with a poor balance of flow between the two basins, weirs that are not level causing bypassing with the softener basins, and simply old mechanical equipment that periodically breaks down. This equipment is not going to be needed when a change to lake water occurs. Addition of soda ash to help further reduce hardness in cold weather might require dosages up to 40 mg/L with an annual chemical cost up to $320,000. There have also been some questions or complaints from the public regarding hard water. The water entering the plant is currently 360 mg/L and the plant is reducing that level of hardness to about 210 mg/L. Optimization of the dosage can reduce the hardness

further to about 180 mg/L. This reduction however has been sporadic as equipment breakdowns and high flows have caused problems keeping the softening process on-line. As we have noted before, the dosage needs to be adjusted daily or more often based on process control monitoring. The raw water hardness in the summer is much less than in the winter For illustration purposes, the difference could be 360 mg/L in raw water in winter compared with 220 mg/Lin the summer

- **Eliminate Pre-Chlorination on the Filters** – The reduction of pre-chlorination on the filters during the summer months can help reduce TTHM formation. This action has to be considered carefully with procedures documented and reviewed for engineering principles. As such, it will take time for the design engineer to determine what could be done to assure the proper chlorine contact time and document that other safety protocols in water are met. This requires state approval Any submission should be considered along with a possible change in filter media. If Granulated Activated Carbon (GAC) is installed then the pre-chlorination would be stopped or drastically reduced because of the chlorine impact on the GAC filter media. Veolia's initial investigation into changes in chlorine feed point indicate that the recommended action can be accomplished while maintaining the required regulatory contact time for disinfection
- **Change Filters to Granulated Activated Carbon (GAC)** – The object of the other changes being made is to reduce the TOC before chlorine is added into the process. The plant by design is limited on the amount of TOC removal possible. A maximum removal of only 60% is likely if the plant is properly optimized. The change of filter media to GAC would provide the best reduction possible and provide better than 90% removal dramatically reducing the potential for TTHM formation and thus ensuring compliance with that parameter for the water system. The change in filter media; however, is complicated requiring approval by the state, design of the changes, procurement of the media and a contractor to install it. That will take time and is likely in a range of $1.5 million (more or less) in cost. The use of GAC also requires more testing and monitoring of the media and the TOC than with the current media. GAC will accumulate TOC and begin to become in effective after a period of time. Depending upon the level of TOC reaching the filters this could be as short as 3 months and as long as 9 months The amount of TOC is dependent upon the river water quality and operation of the other plant processes. Once the ability of the filters to remove TOC is diminished, the GAC media has to be replaced if river water continues as a source. The change to lake water will not require TOC removal and the media could continue to be used as filter media for that new water source.
- **Corrosion Control** – The primary focus of this study was to assure compliance with the TTHM limits. That is not the only problem facing the city and its customers though. Many people are frustrated and naturally concerned by the discoloration of the water with what primarily appears to be iron from the old unlined cast iron pipes. The water system could add a polyphosphate to the water as a way to minimize the amount of discolored water. Polyphosphate addition will not make discolored water issues go away. The system has been experiencing a tremendous number of water line breaks the last two winters. Just last week there were more than 14 in one day. Any break, work on broken valves or hydrant flushing will change the flow of water and potentially cause temporary discoloration
- **Eliminate a Storage Tank** - The water system has more storage than it requires, due to excess capacity in the water lines in combination with the storage tanks. The City has already employed LAN to update the hydraulic model. The hydraulic model should be used to help determine if water levels can be lowered further and even to remove some storage tanks from service. That decision may need to be made

seasonally. For example demand during water main breaks last week required extensive amounts of water. The excess storage is more a problem with TTHM formation for the system in summer than winter.

- **Prioritize Valve Replacement** - The hydraulic model shows long water age in portions of the system that appear to be contributing to the TTHM problems LAN has updated the model to include the location of broken valves and that added information is being used to identify other system problems. The City has a contract for valve turning and repair work that should be focused on known broken valves, particularly in sections of the distribution system with old water age. This activity however must wait until warmer weather in fear of causing problems in the water system with lines freezing.
- **Target and Increase Flushing** – Flushing the fire hydrants can be useful in cleaning out lines to minimize discolored water complaints and also helping reduce the age of water. This DOES NOT mean just opening hydrants. The hydraulic model needs to be used to determine which hydrants should be opened and for how long to ensure the lines are properly cleaned. For example, this might require 15 minutes or even several hours of flushing depending on location The flushing of hydrants also needs to include records of hydrant condition, color of water initially and after periodic increments plus chlorine residual testing All of that information will help provide information to the engineers on the effectiveness of the procedure. Each crew doing the work should be trained to help explain the process to the public and also warn neighborhoods about flushing so that staining of laundry can be avoided.
- **Change to Lake Water** – The changes being made now to the water plant will not be the same changes required to treat lake water once it becomes available. A thorough analysis and plan needs to be made in preparation of that switch. This is going to need to include changes in how the plant is operated, like eliminating lime softening and reducing the dosages of many chemicals. Consideration will also have to be given to algae treatment when lake water is being used.
- **Operating Programs** – All of the changes discussed above are based on testing and techniques proposed by engineers and skilled operators of both LAN and Veolia. The staff will need further training and implementation of detailed protocols to successfully implement the changes and to ensure long-term success at the plant. This means the City needs to implement a series of programs to ensure success in these changes.
    - **Process Control Management Plan** (PCMP) – The amount of testing and resulting changes in chemical dosages, along with monitoring the impact on the water, will require a well-documented process that all operators follow An example of this is jar testing, which is used by the operators to identify the most effective chemicals and dosages to optimize treatment. The staff understands the basic treatment process but needs further practice and training to become proficient in the use of routine process control to adjust for water quality. This is commonly referred to as a PCMP and is used as a standard operating procedure so that the operators on the day shift can communicate with the night shift, that operators are following the same treatment plan for water, that the adjustments are unified between different shifts and different people, that a desired water treatment quality is defined and variations from it signal alarms and that the staff knows what to do when the water quality setpoints begin to drift away from its desired quality levels.
    - **Lab QA/QC** – The operation of the water plant is dependent upon accurate lab results. Standard operating procedure needs to be set and lab technicians trained in that process. EPA and the State

set procedures and standards to be met and the staff should strive to meet those standards. The City has already purchased a TTHM analyzer but should also consider a TOC analyzer that can be an online continuous device to provide immediate information on influent and effluent levels of TOC Part of the lab records should be historical review of data to help operators better understand the changes they make in the plant.

- **Maintenance Management** – The key to water equipment is having all the equipment effectively maintained and functioning properly. The current capital program is fixing many broken pieces of equipment and updating the plant to current standards This however must be followed with a rigorous maintenance program that ensures the proper preventive maintenance, is able to predict when maintenance is needed to keep equipment functioning properly and responsive to changes in flows and source water quality.
- **Training** – The changes being suggested are new to the staff and as such training needs to be provided in what the changes involve, why they are being made, the impact on the water quality, and how best to run the plant. A good demonstration of skill level is for the staff to become certified by the State as a licensed water plant operator. Many utilities now require all operators to hold at least the minimum certification level as a starting point and offer incentives to increase their certification level

- **Communication Program** – The city should lay out an immediate, written strategy for communicating with the public in the short-term, as well as a 6-to-12 month strategy that contemplates known, future events like the KWA pipeline and switch to lake water. A wide range of activities are underway to work with the public but a comprehensive and coordinated effort, with a strategic focus, will help the utility and its customers.
  - **Dedicated Communications Personnel** – The City has a single, dedicated public information officer, tasked with providing service to all of city government. The current focus on communications support for Public Works, and the anticipated needs over the next several years, indicate the city would benefit from the hiring of a staff person in Public Works who could establish a communications program designed to provide clear and concise information to a broad audience though a number of different channels. In the interim, the city could hire a communications intern, local communications firm, or somebody with experience who is able to provide reduced or no-cost services for the immediate future.
  - **Communications Planning – Public Notification** – The City should be congratulated on its efforts to keep the public informed. It is posting its monthly reports on the web page to provide transparency, though these reports are highly technical – and may be too technical for the customer base at large. They are valuable to those customers who do want this level of detail. The city should create a single-page dashboard of information that outlines the water utility's performance for the previous month, post the dashboard on the website, print copies for distribution at customer service or other reception areas, and be provided during speaking engagements or other events. This dashboard should be easy to understand, and include:
    - The number of water quality tests conducted the previous month
    - The number of violations reported

- Whether these results are in or out of compliance
- Information about other proactive measures such as main and hydrant replacements, or other programs to improve performance of the water utility
- Benchmarking information so the reader has a greater understanding of how Flint compares with other similar utilities in the region and across the country

- **Public Meetings** –There should be additional, proactive coordination with neighborhood, community and civic groups to provide speakers on timely topics. Given the list of numerous responsibilities, the Public Works director cannot do it alone – the city should identify three or four other staff members, knowledgeable about the water utility who can also speak to various groups, provide information and answer questions. The development of an outreach strategy to target key neighborhood, community and civic groups also will advance the communications effort and the dissemination of information in both the short and long term.
- **Standard tools** – Work crews in the field are often the faces of the utility – the city should create standardized tools for communicating with the public that can be easily and quickly delivered to the community in the event of main breaks, flushing or pre-planned capital improvements. Tools should include:
  - Door hangers for individual distribution
  - Yard signs with simple messaging to be placed near work-sites
  - A simple tri-fold brochure with useful information about the utility and appropriate contact information
  - Specific flyers about a range of topics
  - Infographics about how the water system works, from the intake to the customer's site
- **Change in Billing Format** – The City currently has no real way to reach all customers on a regular basis and provide information. The city should consider changing from a billing postcard to using an envelope and bill stuffer. Monthly or bi-monthly bill inserts are typically used to provide educational material for customers and are standard ways to provide information. Understandably, budget considerations must be taken into account.
- **Use Public Affairs Programming and Opportunities** – The news media has been covering this topic quite extensively – there are other media-related opportunities that may reach a wider audience. Taking advantage of these opportunities will help the city relay information to its customers and the community
  - Participate in regular editorial-board meetings to provide background information and updates on key milestones or events.
  - Identify a local weekly television program and offer to provide guests to speak about key milestones or upcoming events.

Conclusions and Next Steps

The focus of this report is to help assure TTHM compliance and then improve general water quality The City had good results in its most recent TTHM tests, although that is to be expected with the changes made to date and the cooler weather which contributes to low TTHM formation. Warm weather will be a different situation both in the nature of the Flint River water quality and in the formation of TTHM With those changes coming, the City needs to act quickly to make improvements before additional testing takes place this spring and summer. The summary below provides the recommended actions, a priority for their implementation and projected costs either operational or capital The costs are rough orders of magnitude and will vary with changes in water quality, operational decisions, and engineering choices being made and in some cases require State approval. Although a priority is assigned many of these actions can take place simultaneously.

Priority	Action	Annual Operational Cost	One Time Capital Cost
1	Implement operating programs for process control, lab QA/QC, maintenance, and training. These programs are needed regardless of the TTHM issue and will help with transition to lake water. The City has decided upon a central maintenance software and the water system should be the first to utilize this program since costs are already budgeted. These programs should be initiated immediately	$ 25,000	$ 250,000 - $ 350,000
2	Contract with your engineer and initiate discussions with the State on the reduction of chlorine prior to the filters and changing the filter media to GAC. This activity has the longest time frame for design and approval, but also is extremely critical to assuring reduced TTHM production. The current filter cleaning and maintenance project needs to be adjusted to take into consideration the change in filter media both to dispose of the anthracite instead of cleaning and to install the GAC This entire project needs to be done by early July to assure a flow of water throughout the system. Several months are required for the engineering design, State approval, bidding of work and installation of GAC and as such needs to begin now.	$ 0	$1,500,000
	Contract with your engineer and initiate discussions with the State on the addition of 0 5 to 1.2 mg/L of either potassium permanganate (dry) or sodium permanganate (liquid). This will take time to get approved and to implement. The use of liquid tanks at the raw water pump station may be the quickest and least expensive alternative for a temporary measure	$ 160,000 - $ 320,000	$ 50,000

	Contract with your engineer and initiate discussions with the State on the addition of a corrosion control chemical. This action can be submitted and discussed with the state at the same time as the other chemical and filter changes saving time and effort. A target dosage of 0.5 mg/L phosphate is suggested for improved corrosion control.	$ 50,000	$ 50,000
3	Increase the ferric chloride dosage to 100 mg/L depending on river water TOC levels. (Lower TOC levels can be treated with less ferric chloride) This change can be made now and is allowed by the State.	$ 1,000,000	$ 0
	Reduce the ozone feed rate to 5 mg/. This change can be done now and does not require State approval.	($50,000 – $100,000	$ 0
	Reduce the lime dosage to minimize hardness levels after softening. This will eliminate magnesium removal during treatment, but will also reduce total hardness A reduction in carbon dioxide dosing for recarbonation treatment also is expected due to the reduction in lime feed. This change can be made now and does not require State approval	($270,000)	$ 0
4	Confirm with the engineer when the revised hydraulic model will be completed and if necessary for time to focus on areas of longest water age if that would speed up the effort. Identify impact of reducing tank levels or eliminating a tank seasonally to improve water age. Include with this effort a list of hydrants to flush along with time required to assure drawing fresh water through the system. The engineer has been assigned this task already and confirmation of the timing of a delivery is needed.	$ 0	Already Contracted
	Ask the engineer to identify closed valves on a map that are impacting water age and that can be bid for replacement as soon as weather permits. Have the engineer identify areas of the system where the valve contractor should be focused on finding and fixing closed valves	$ 0	Already Budgeted
5	Implement the recommendations in the communications program including a person assigned to public works education, using envelopes instead of cards along with bill stuffers for education and provide training for staff. Envelopes and bill stuffers are expensive and might be done periodically and not every month. The cost of TTHM notices, Annual Water Quality Reports and City notices should be figured into if any additional costs would exist. Many of these changes are underway now by the City.	Position Being Budgeted	

Notes

- The costs provided are rough order of magnitude which final engineering will firm up but will fluctuate with final decisions on engineering, operating technique and water quality.
- The change from river to lake water will dramatically cut the chemical costs as less is needed once the change occurs. This means that potassium permanganate will likely not be needed, ferric will drop as much as it went up, ozone levels will be lower and little lime will be needed.

Results Expected

The real question is what changes can be expected from these results in lowering the TTHM, improving the aesthetics and preparing for the change to lake water

- **TTHM** – The City has already made great strides in reducing the TTHM levels with the changes already made The additional suggestions by Veolia will further reduce TTHM in the water and help get the city released from the notices being provided to customers.
- **Hardness** – The hardness entering the plant this winter is 360 mg/L with the current system reducing it to 210 mg/L and optimization will reduce to about 180 mg/L. During the summer the levels will be lower probably in the 140 mg/L to 150 mg/L range. The target set by the current best operating practices is 120 mg/L to 150 mg/L.
- **Discolored Water** – The discolored water is caused by the old unlined cast iron pipe. The water from the plant can have an impact on discolored water, but a greater concern is the breaks and construction work that disrupt the flow of water causing discoloration A polyphosphate is suggested to help bind the old cast iron pipe reducing instances of discolored water. This along with improve flow of water and programmed hydrant flushing will help, BUT WILL NOT eliminate discolored water occurrences.
- **Change to Lake Water** – The recommendations include the suggestion of programs to help the staff better manage the treatment process, additional testing to adjust the plant and additional lab monitoring, a maintenance program focused on keeping equipment properly functioning and more training for staff to improve their skill level. Those actions will prepare the staff for the change of water sources when it comes next year in addition to developing a thorough plan for the switch

VEOLIA
City of Flint, MI
City Council Public Works Committee
Interim Water Quality Report

Veolia Scope of Work

Week 1

- Provide a review of current actions
- Engage staff, visit facilities and analyze data
- Make interim report

Week 2

- Carry out more detailed study of initial findings
- Make recommendations for Improving water quality
- Provide a plan, cost and schedule for change

Items of Note

- **Not in scope** – studying why the change from DWSD or the history of the utility
- **What we found** – A very frustrated community and a staff trying to solve the problem, having some success but frustrated with the pace of change

Everybody Is Checking the Safety of Water

- City, state, news media, universities and other groups
- Safe = compliance with state and federal standards and required testing
  - *Latest tests show water is in compliance with drinking water standards*
  - *Monthly report available on web page*
- More than 20,000 tests required annually for city
- Strict testing requirements in place (what and how to test)

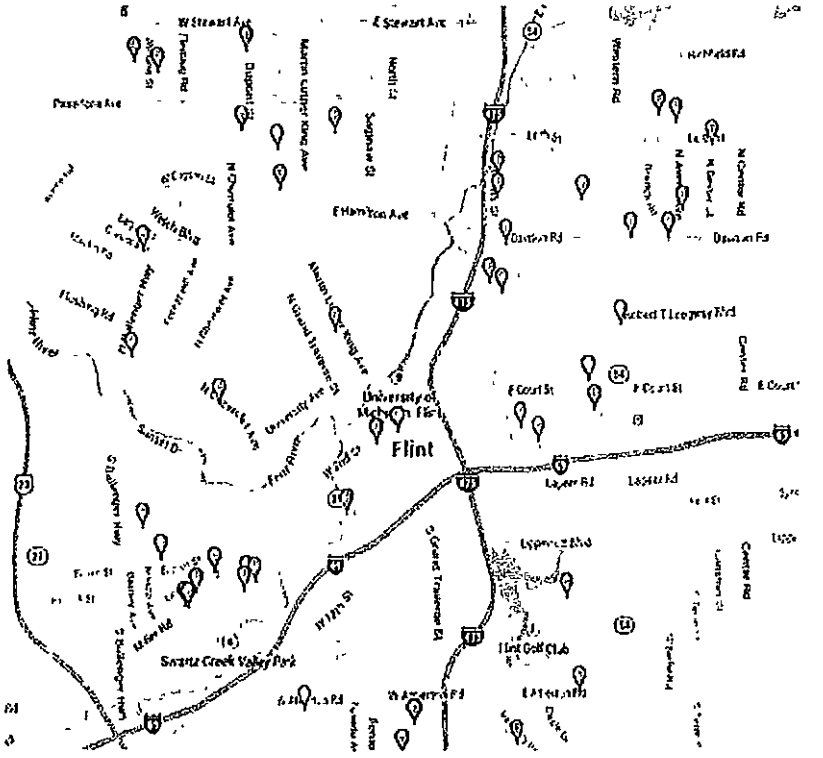
Why TTHM Notices?

- TTHM is formed as a result of the reaction between chlorine and organic material in the water
- City is required to test quarterly at 8 sites
  - *Last summer, several sites had more TTHM than allowed*
- City has reduced levels of TTHM and now all sites are in compliance
  - *Customer notification letters are required until tests are in compliance an average of four quarters*
- It will take at least 2 more quarters to lower average
  - *Even a change to DWSD water doesn't solve problem*
- Flint is not alone – hundreds of communities are facing TTHM issues

Why Discolored Water?

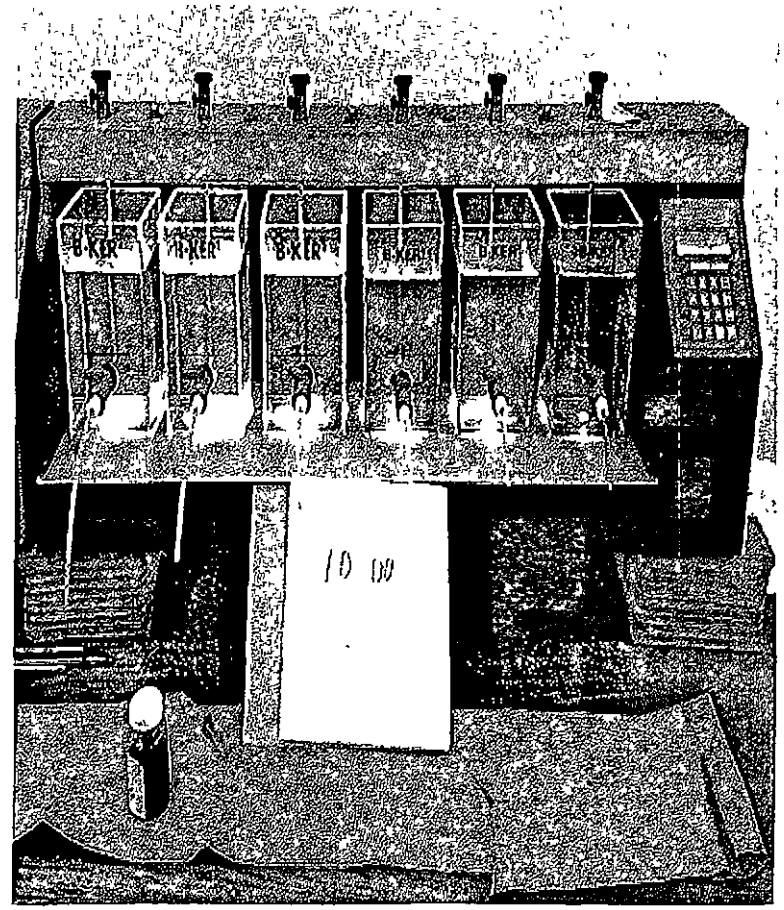
- Old cast iron pipes
- Always has been some discolored water problems – mostly after water breaks
- Efforts to reducing TTHM didn't help discoloration
  - *Doesn't mean the water is unsafe but it is not appealing and raises questions*
- City will test the water at your home – call 787-6537 or email flintwater@cityofflint.com
- Tracking customer complaints is important

Location of water quality complaints
The last 12 months – fewer than you think



Water Quality Can Be Improved

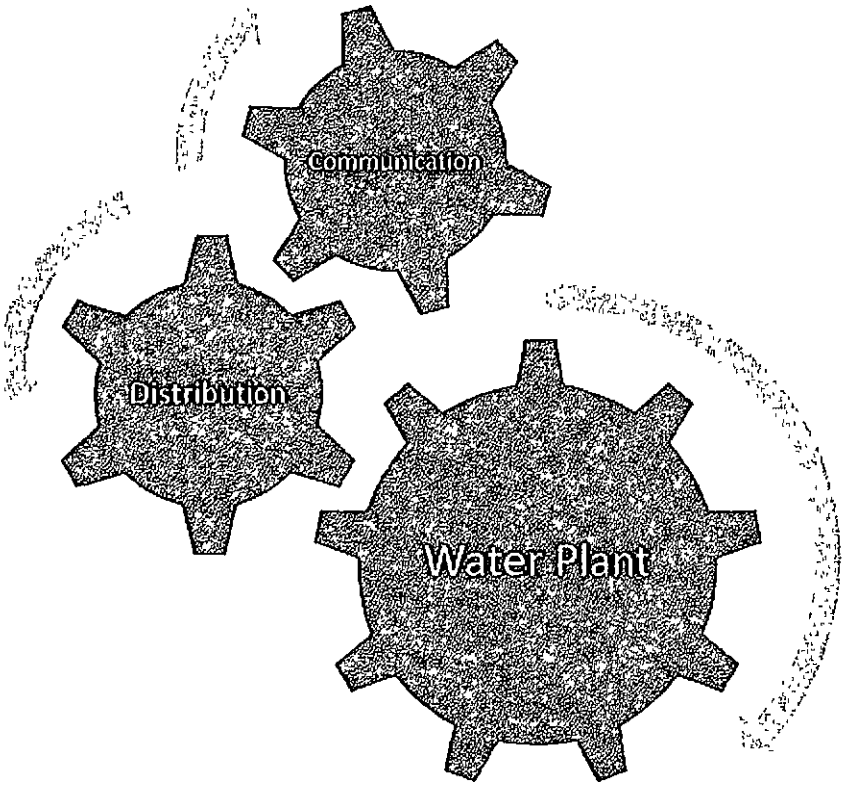
- Adjust the chemicals being fed – stop some, increase some and change some
- Provide better monitoring of water quality to help make adjustments
- Continue repair or replacement of broken parts
- Reduce the over capacity of the distribution system
- Do a better job explaining what is happening
- Do a better job of asking for help



VEOLIA

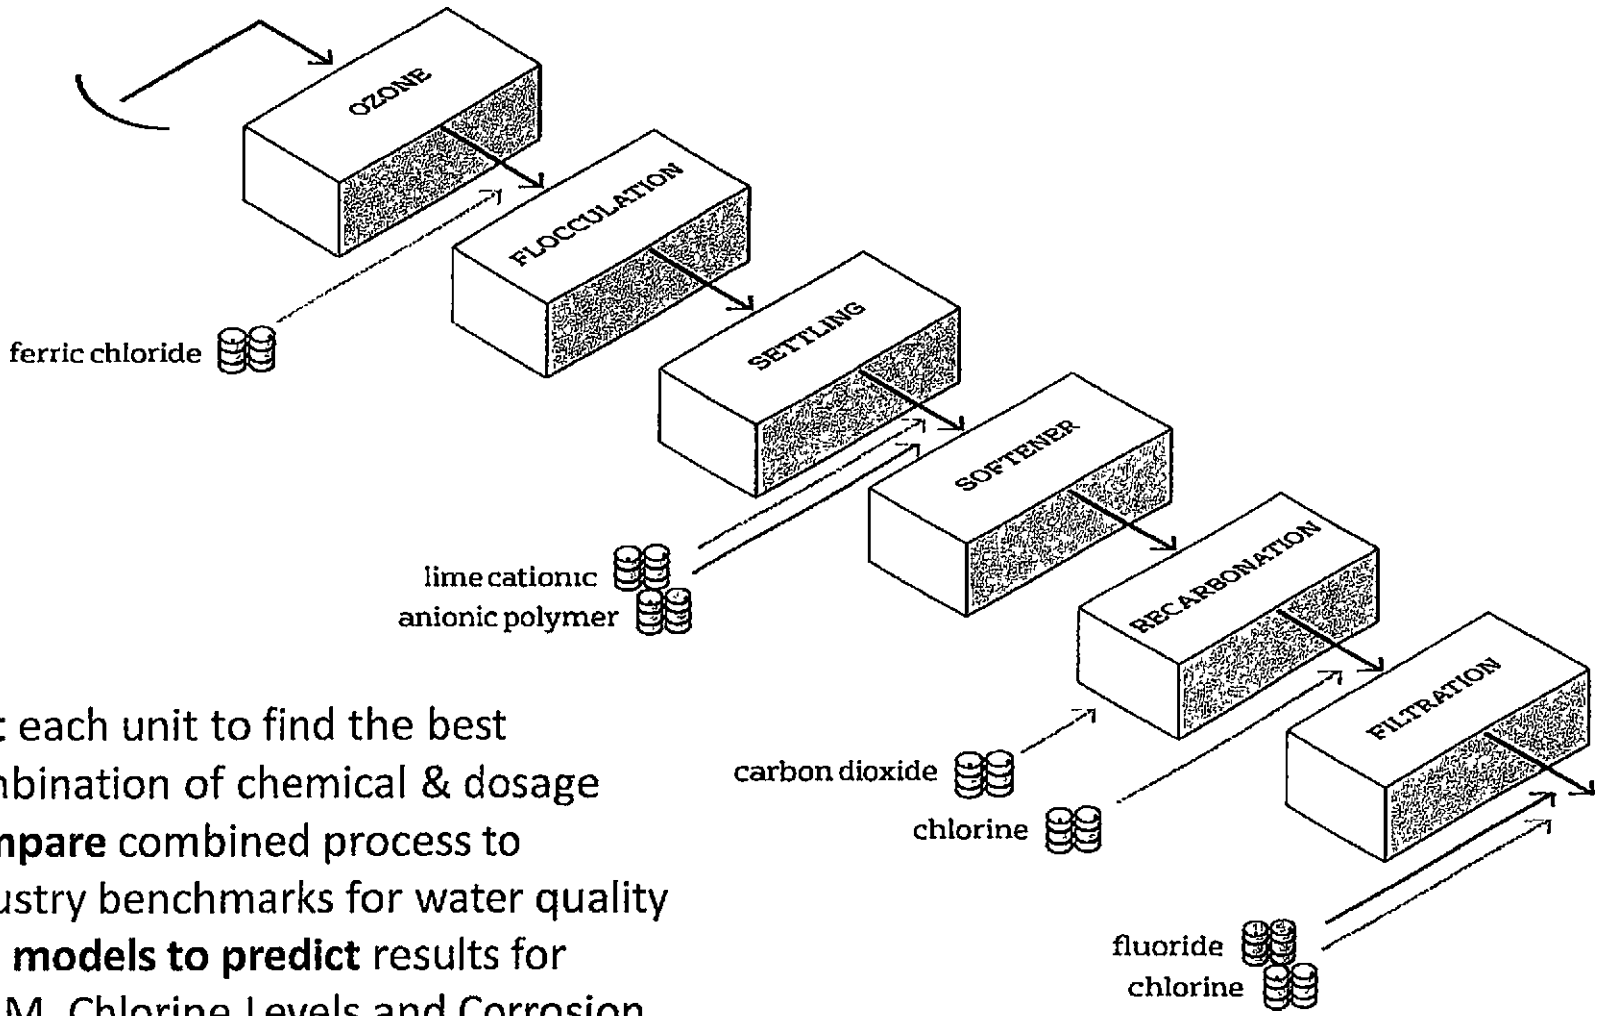
Further Explanation of Solutions

Solution Involves Coordination of 3 Activities



- Water plant improvements
  - *Optimize chemical dosages*
  - *Consider different chemicals*
  - *Change dosing points*
  - *Install granulated activated carbon*
  - *Complete plant upgrades*
  - *Implement best mgt practices*
- Distribution system improvements
  - *Fix broken valves*
  - *Ask for customer feedback*
  - *Reduce tank storage*
  - *Target line flushing*
  - *Run a hydraulic model*
- Better communication with customers
  - *Engage advisory committees*
  - *More accessible utility*
  - *Make it easy to access information*
  - *Better customer communication*

Optimize Plant Processes



- **Test** each unit to find the best combination of chemical & dosage
- **Compare** combined process to industry benchmarks for water quality
- **Use models to predict** results for TTHM, Chlorine Levels and Corrosion

Complete Plant Construction & Re Prioritize Capital

Cost effective plan in budget

- Complete water plant renovation
  - *Target SCADA and instrumentation in plant*
- Speed up valve turning contract & provide money for replacements
- Speed up hydraulic model update to reduce tank volume
- Evaluate installing of granulated activated carbon on filters

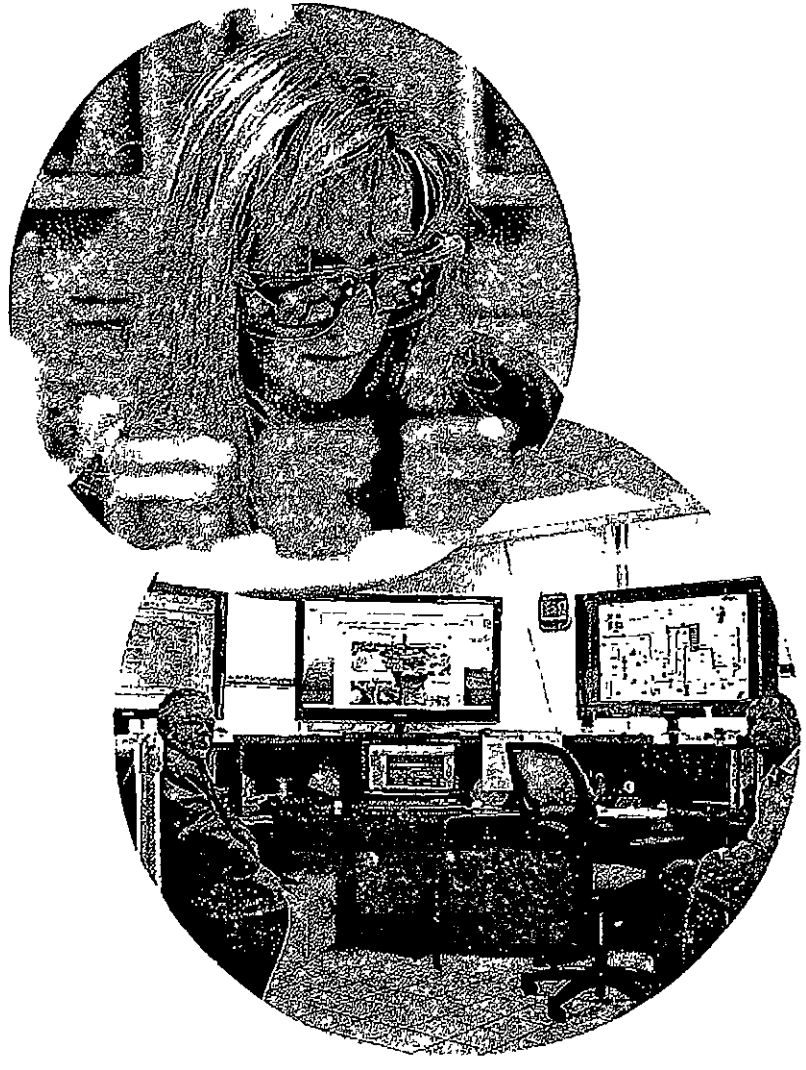
Weather can impact timing

Digging up a water valve for repair
Need good weather to start

Implement Best Management Practices

Activities to Help Operators Maintain Good Water Quality

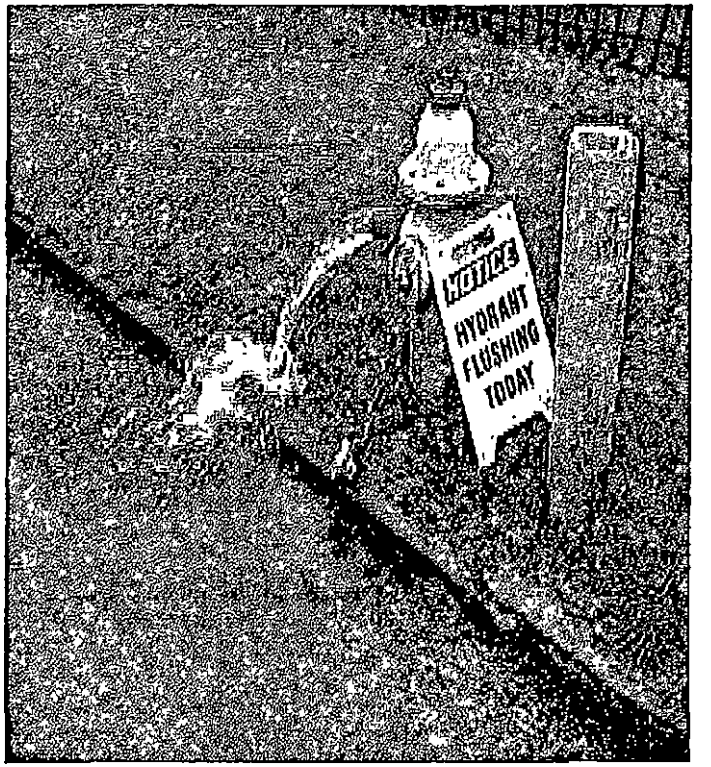
- Process Control Management Plan
- Lab QA/QC Program
- Computerized Maintenance Management System
- Asset Management System
- Training and Certification Program
- Vulnerability Plan



Distribution System Improvements

- Speed up flow of water from plant to homes – 2 weeks plant to house
  - *Find closed valves & open them*
  - *Replace broken valves*
  - *Update hydraulic model*
  - *Reduce system storage*
- Track customer complaints
  - *Test customer water*
  - *Spot flush hydrants to clean areas of stagnant water in the system*

Flushing out discolored water



VEOLIA

Improving Customer Service

Make It Easy to Access Information and People

Develop a proactive customer communication plan

- Create advisory committees to help direct efforts and improve flow of information
- Establish a single point of contact to manage all water quality complaints
- Provide additional customer service training to staff
- Expand neighborhood and community outreach
- Change monthly billing statements from card to envelope with information

Example - Communicate in the field

NOTICE: ANNUAL FLUSHING PROGRAM

We are conducting our annual flushing program to enhance your water quality and clean the distribution system.

DC Water crews will be flushing hydrants in your area 10:00 p.m. to 6:30 a.m. on the following dates:

9/24 **through** 9/30

IMPORTANT INFORMATION

- Your water supply will not be shut off during hydrant flushing.
- You may notice slight water discoloration or low water pressure.
- During this time, customers can continue normal water usage, including drinking, bathing and laundry (unless water is discolored).

If you experience discolored water during this period:

- Run your cold water taps for 15 minutes. If it does not clear up, please contact our Drinking Water Division.
- Do not run your hot water. If you experience discolored water from your hot water tap for several hours, then it is recommended to drain and flush your water heater tank.

Provide field crews with additional communications tools to use to address questions or concerns from the public

- *Create door hangers, flyers, or yard signs to notify neighborhoods about main breaks, hydrant flushing, or system maintenance that may affect the public*
- *Create a business card or other contact card with the name and phone number of the single point of contact with the Department of Public Works who is managing information flow*

**sample door hanger provided by DC Water & Sewer Authority*

Clear, concise information is key

Simplify the reports on the web page dedicated to addressing water system questions

- *Create a single-page, easy to understand report for the public*
- *Use charts or provide other examples to demonstrate water quality testing and system or treatment plant improvements underway*
- *Provide name, phone number and email address for identified point of contact so customers can request more information*
- *Continue to provide Monthly Operation Report and Water Quality Report Summary for those customers interested in more technical information*
- *Use site to provide additional notice of field work that may impact customers*

VEOLIA

What Is Next

Next Steps

Week 1

- Provide a review of current actions
- Engage staff, visit facilities and analyze data
- Make interim report

Week 2

- Carry out more detailed study of initial findings
- Make recommendations for Improving water quality
- Provide a plan, cost and schedule for change

Questions Being Heard

REMEMBER

We just started. Might not have an answer yet to your question

- **When will water improve -** The water has improved with current actions. More changes will occur over weeks and months because of safety reviews
- **Date of next update and final report** – An update will be provided next week and a report the following week.
- **Time frame for implementing recommendations** – The City is already started. Others a few days and some weeks or months due to State approval being required or weather.
- **Cost of changes** – Don't know yet but we are aware of the financial concerns

More Questions Being Heard

- **How are TTHM formed** – It's the reaction of chlorine to organics (leafs, dirt) in the water.
- **How to reduce TTHM** – Reduce organics before introducing chlorine and shorten time chlorine has to react with the organics
- **What causes discoloration** – Older lines, the iron parts of the system will leach iron into the water causing the discoloration. Other times its just air built up.
- **Why no discoloration with DWSD** – There was. Flint had a bad time with breaks of old line and is doing lots of construction. This stirred up the water and caused discoloration.

More Questions Being Heard

- **Can you test my water** – The city will test your water for free. But, only 2 of 20 people have taken the city up on the offer since it began offering the service.
- **Medical problems** – Some people may be sensitive to any water. Talk to your doctor. The City is communicating with the medical community.
- **Confidence that future problems will be avoided** – Recommendations will include putting programs in place to better respond to water changes and assure quality

> Jerry,
> I got some minor comments from Alan Lambert of the AG's Office which I will incorporate in the EM Order on Monday and recirculate it for final sign off. The State Treasurer must approve the Restructuring under 436. John Barton has provided a form of a State Treasurer's Approval letter which I will modify and prepare for this restructuring as well as the memorandum from you to the Treasurer requesting approval. We will also prepare the tax-exemption waivers for the MFA and DEQ. Once these are done I anticipate that you should be able to sign and send the Memorandum and Order to the Treasurer by next Wednesday, if not sooner.

For your thoughts -- Treasury appears willing to allow us to restructure the outstanding DWRF bonds to essentially move the April 2015 principal portion of the debt service payment to the end of the debt service. This would free up about $2.24 million of cash in the water fund to use for other capital projects.. Time of course is of the essence and we will have to define that (or those) capital improvements. Looking at the existing list of projects, the easy answer is additional miles of pipeline replacement. But I do not know right now if that would be the best answer - and no, it cannot be used to reduce rates:). or to put into the GF and then transfer to the Water Fund:). This is one reason the recommendations from Veolia are needed asap.

This is confidential to you until we have a plan. Peter Bade is reviewing...my only question with the draft is what might be the potential of the bonds losing tax exempt status - what is the likelihood and what would it cost us? I am asking Pete to follow up on that...

FYI... bottom line is that this will allow us to postpone the April 2015 principal portion of debt service in teh amount of $2.24 million. This frees up cash which can be used for needed capital improvements...Obviously time is of the essence, given a payment date of April .

Attached for your review is an initial draft of the form of Emergency Manager Order to authorize the restructuring of the debt service schedules for the Flint Water Supply System Revenue Bonds, Series 1999, 2000, 2001 and 2002. I believe this draft incorporates the points we have discussed, but in the interest of time it has not been reviewed by Gerald Ambrose and therefore it is being circulated subject to any comments he may have. Please provide comments at your earliest opportunity.

Thanks,

Harold

EMERGENCY MANAGER
CITY OF FLINT
GENESEE COUNTY MICHIGAN

ORDER No. 5

RESTRUCTURING OF OUTSTANDING WATER SUPPLY SYSTEM REVENUE BONDS, SERIES 1999, SERIES 2000, SERIES 2001 AND SERIES 2002

BY THE POWER AND AUTHORITY VESTED IN THE EMERGENCY MANAGER FOR THE CITY OF FLINT, MICHIGAN, PURSUANT TO ACT 436, PUBLIC ACTS OF MICHIGAN, 2012, THE LOCAL FINANCIAL STABILITY AND CHOICE ACT; GERALD AMBROSE, THE EMERGENCY MANAGER, ISSUES THE FOLLOWING ORDER:

The City of Flint, County of Genesee, State of Michigan (the "City") is in a state of financial emergency under Act 436;

Effective January 13, 2015, Gerald W. Ambrose was appointed as Emergency Manager (the "Emergency Manager") of the City, by the Governor of the State of Michigan (the "State") and the State Treasurer; and

Pursuant to Section 9(2) of Act 436, the Emergency Manager has broad powers in receivership to rectify the financial emergency and to assure the fiscal accountability of the City and its capacity to provide or cause to be provided necessary services essential to the public health, safety and welfare; and

Pursuant to Act 436, the Emergency Manager acts in place of local officials, specifically the Mayor and City Council, unless the Emergency Manager delegates specific authority; and

The City has heretofore issued and presently has the following bonds outstanding in the amounts indicated, the proceeds of which were used to finance the acquisition, construction and installation of Phase I, segments 1 through 4 of the rehabilitation of the Flint Water Treatment Plant (the "Plant"): (i) $2,543,000 Water Supply System Revenue Bonds, Series 1999, (the "1999 Bonds"); (ii) $3,275,000 Water Supply System Revenue Bonds, Series 2000, (the "2000 Bonds"); (iii) $4,256,408 Water Supply System Revenue Bonds, Series 2001 (the "2001 Bonds"); and (iv) $10,694,934 Water Supply System Revenue Bonds, Series 2002, (the "2002 Bonds", collectively with the 1999 Bonds, the 2000 Bonds and the 2001 Bonds, the "Bonds"); and

All of the Bonds were sold to and are currently owned by the Michigan Finance Authority (the "Authority"), as successor to the Michigan Municipal Bond Authority; and

The Plant and the water supply system are in need of further improvements and replacements (the "Improvements") to enhance the treatment of raw water processed by the Plant and the distribution of treated water from the Plant; and

The City does not have sufficient funds on hand to finance the Improvements and the Authority has tentatively agreed to allow the Emergency Manager to restructure and amend the debt service payments on the Bonds, by postponing the principal payments next coming due on April 1, 2015, for the 1999 Bonds of $395,000, the 2000 Bonds of $435,000 and the 2001 Bonds of $485,000 and on October 1, 2015, for the 2002 Bonds of $925,000, all as more particularly described in this Order (collectively, the "Restructuring"), to allow the amounts available for such principal payments to be used to pay for the Improvements; provided, that the current interest payments due on such principal payment dates shall remain due and payable thereon; and

Section 12(1)(x) of Act 436 authorizes the Emergency Manager to: "Enter into agreements with creditors or other persons or entities to restructure debt on terms, at rates of interest, and with security as shall be agreed among the parties, subject to the approval of the State Treasurer;" and

The interest on each series of the Bonds is presently excludable from gross income for federal income tax purposes and the City has covenanted, in each Bond Resolution which authorized each related series of the Bonds, among other things, to do all things necessary to assure that the interest on the respective series of Bonds will be and will remain excludable from gross income for federal income tax purposes (the "Bond Tax Covenant"); and

In connection with the issuance of each series of the Bonds, the City entered into a Supplemental Agreement ("the Supplemental Agreement") with the Authority and the State of Michigan, acting through its Department of Environmental Quality (the "DEQ"), under which the City covenanted, among other things, to the extent permitted by law, to take all actions within its control and not fail to take any action as may be necessary to maintain the exclusion of interest on the Bond from gross income for federal income tax purposes (the "Supplemental Agreement Tax Covenant"); and

In implementing the Restructuring, the City will use its best efforts to maintain the tax-exempt status of the Bonds; however, the Emergency Manager, the MFA and the DEQ desire to allow the Restructuring to occur even if as a result of the Restructuring, Miller, Canfield, Paddock and Stone, P.L.C., as bond counsel to the City ("Bond Counsel") delivers an opinion to the City and the MFA concluding that as a result of the Restructuring, the Bonds have lost their tax-exempt status (an "Unfavorable Tax Opinion"); and

As a precondition to the Restructuring, the Emergency Manager desires for the MFA, as holder of the Bonds, and the DEQ to conditionally waive the respective Tax Covenant and the Supplemental Agreement Tax Covenant related to each series of the Bonds, which waivers shall

be rescinded automatically if Bond Counsel concludes that the Restructuring has not had a negative impact on the tax-exempt status of the Bonds, and

The Emergency Manager further desires to authorize and direct the Mayor, the Director of Finance, the City Clerk and all other authorized persons to perform all acts consistent with this Order, necessary and appropriate to complete the Restructuring as provided in this Order.

IT IS HEREBY ORDERED AS FOLLOWS:

1. The current debt service schedules attached as Exhibit A to each of the Bonds are hereby deleted in their entirety and in lieu thereof shall be attached to each respective Bond the amended and restated debt service schedules attached hereto as Exhibit A for the 1999 Bonds, Exhibit B for the 2000 Bonds, Exhibit C for the 2001 Bonds and Exhibit D for the 2002 Bonds.

2. Except as otherwise amended and restated hereby, all of the other terms and conditions of the Bonds shall remain the same; provided however, that if Bond Counsel delivers an Unfavorable Tax Opinion, the interest on the Bonds shall be taxable for federal income tax purposes; and

3. The Emergency Manager, the Mayor, the Director of Finance and the City Clerk are hereby authorized and directed to perform all acts consistent with this Order and enter into such agreements with the Authority and DEQ and provide such certificates as may be necessary and appropriate to complete the Restructuring.

4. The Restructuring is conditioned upon and shall not become effective unless and until (i) the Restructuring has been approved in writing by the Treasurer of the State of Michigan, pursuant to Section 12(1)(x) of Act 436; and, (ii) the MSF and the DEQ have approved the Restructuring and provided conditional waivers of the Bond Tax Covenants and the Supplemental Agreement Tax Covenants related to each series of the Bonds.

This Order is effective immediately upon the date of execution below.

This Order may be amended, modified, supplemented, repealed or terminated by any subsequent Order issued by the Emergency Manager.

Randy,

You my contact Jerry and inform him that Treasury agrees that he is not required to have City Council approval to restructure the bonds. However, State Treasurer approval is required per Section 12(1)(x).

Because the bonds will be restructured through the MFA, Jerry will be working with John Barton and LAFD approval will not be required.

Ed:

I spoke with Pete Bade, who forwarded a copy of the proposed EM order. As John indicated, reliance is being placed upon § 12(1)(x) of the Act. State Treasurer approval would be required, but due to § 12(1)(x), not due to any dollar value.

Fred,

OFR staff believes that the restructuring of the debt would not need City Council approval. However, because the amount is over $50K we believe it would require the Treasurer's approval. Do you agree?

So, no new borrowing or issuance of debt is to occur? This is merely a restructuring of terms, such as a change in the maturity date?

Subject: RE: City of Flint Emergency Manager Order [MCPS-ACTIVE.FID982479]

I believe the provision referenced is 12(1)(x) of PA 436: Enter into agreements with creditors or other persons or entities to restructure debt on terms, at rates of interest, and with security as shall be agreed among the parties, subject to approval by the state treasurer.

From what I understand from Harold and Bill, the modification of the DWRF loans would not require City Council approval as it is simply a restructuring with the MFA.

Thanks
John

However, he did not state which provision of the Act he had in mind. Can someone in your shop pose that question to Harold or request a copy of the proposed EM order?
>
> One question that I would have is whether the proposed restructuring is a borrowing per § 12(1)(u) of the Act? Perhaps the answer is no. However, if yes, Jerry would have to submit the proposal to the City Council per § 19(1). Depending upon the disposition by the City Council, the matter might have to be submitted to the ELB. All of these steps would extend the approval process and Jerry indicated that time is of the essence given the currently scheduled April payment.

For your thoughts -- Treasury appears willing to allow us to restructure the outstanding DWRF bonds to essentially move the April 2015 principal portion of the debt service payment to the end of the debt service. This would free up about $2.24 million of cash in the water fund to use for other capital projects.. Time of course is of the essence and we will have to define that (or those) capital improvements. Looking at the existing list of projects, the easy answer is additional miles of pipeline replacement. But I do not know right now if that would be the best answer - and no, it cannot be used to reduce rates:). or to put into the GF and then transfer to the Water Fund:). This is one reason the recommendations from Veolia are needed asap.

This is confidential to you until we have a plan. Peter Bade is reviewing...my only question with the draft is what might be the potential of the bonds losing tax exempt status - what is the likelihood and what would it cost us? I am asking Pete to follow up on that...

FYI... bottom line is that this will allow us to postpone the April 2015 principal portion of debt service in teh amount of $2.24 million. This frees up cash which can be used for needed capital improvements...Obviously time is of the essence, given a payment date of April .

Attached for your review is an initial draft of the form of Emergency Manager Order to authorize the restructuring of the debt service schedules for the Flint Water Supply System Revenue Bonds, Series 1999, 2000, 2001 and 2002. I believe this draft incorporates the points we have discussed, but in the interest of time it has not been reviewed by Gerald Ambrose and therefore it is being circulated subject to any comments he may have. Please provide comments at your earliest opportunity.

Thanks,

Harold

Subject: Restructuring of Outstanding Water Debt

There has been some discussion of whether the attached order to restructure water debt is subject to the provisions of PA 436 section 19, which requires submission of certain proposals to council.

Because this order contemplates a restructuring of debt, not new borrowing, it is my opinion that it is not subject to Section 19.

The order references Section 12(1)(x), which empowers an emergency manager to:

(x) Enter into agreements with creditors or other persons or entities to restructure debt on terms, at rates of interest, and with security as shall be agreed among the parties, subject to approval by the state treasurer.

Subject: PRESS RELEASE: 2ND Water Advisory Committee Meeting

For Immediate Release

Water Advisory Committee to Hold Second Meeting at Flint Public Library on Thursday, March 19, 2015

Flint, Michigan – March 17, 2015 – The Water Advisory Committee formed to help aid in communication between the City and the community is holding its second meeting on Thursday, March 19, 2015 from 2:00-4:00pm at the Flint Public Library. The committee will be updated on the current status of improvements to the water system, the next steps to be taken including cost and timing estimates and formatted responses to questions asked at the previous meeting. In addition, the committee will be provided with a comprehensive budget overview with clear cost breakdowns.

The purpose of the Water Advisory Committee is to provide the community with ongoing information on the City's work to maintain a safe water supply and to improve quality. In addition to gathering information from

the City to share during their interactions with the community, committee members will also be expected to share the concerns they receive from the community in order for those concerns to be addressed.

All meetings by the Water Advisory Committee will be open to the public and will be held at easily accessible locations throughout the city. Meetings will be held on a regular basis as work continues at least until the City is receiving its water from the Karegnondi Water Authority, which is anticipated to be in 2016.

ANALYSIS REPORT – City of Flint – Section 17 Report

DATE: March 17, 2015

TO: Randall Byrne, State Administrative Manager; Office of Fiscal Responsibility

FROM: Robert Widigan, Departmental Analyst; Office of Fiscal Responsibility

SUBJECT: City of Flint – January 2015 Section 17 Report

Below is a review of the City of Flint's Section 17 three month report for the period October 1, 2014 through December 31, 2014, submitted by Emergency Manager Darnell Earley.

Analysis:
This report substantially complies with the requirements of the law. The following should be noted:

1. A list of each contract that the Emergency Manager awarded or approved with a cumulative value of $5,000 or more was provided. The City made multiple payments for legal services rendered from October 1st through December 31, 2014.
    - Law Offices of Dean T. Yeotis for legal services in the amount of $103K
    - Miller, Canfield, Paddock and Stone for legal services in the amount of $31.6K
    - Shedd, Frasier, PLC for legal services in the amount of $7.3K
    - Paesano Akkashian, PC for legal services in the amount of $25K

2. The Purchase Order Report for the City with post dates from October 1st through December 31, 2014 totals $5M.

3. A description of all expenditures with a cumulative value of $5,000 that was approved or denied during the reporting period was provided. It should be noted that the City made multiple payments for services rendered from October 1st through December 31, 2014.
    - Dept. 266, Law Office – Suits/Settlements, posted multiple invoices totaling $259K.
    - Dept. 451, Fleet Management, posted multiple invoices totaling $297K.
    - Dept. 000.105, Retiree Health Insurance, posted multiple invoices totaling $2.7M.

4. The City of Flint has not sought, approved or denied any loans during the reporting period of October 1st through December 31, 2014.

5. Per P.A. 436, a description of any new position created or any vacancy filled by the City must be provided to this office. It should be noted the City filled 12 vacancies and eliminated 1 position during this reporting period.

6. It should be noted that update number 8 to the Financial and Operation Plan for the City is included in this report; the full F&O Plan is listed on the City's website. This also includes a seven-point transition management plan, along with a strategic plan for the City's 2014-2019 First Quarter Update.

If additional information is desired, please let me know.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

June 3, 2014

Mr. Scott Kincaid, President
Members of the Flint City Council
1101 S. Saginaw St.
Flint, MI 48502

Dear Mr. Kincaid and Members of the Flint City Council:

Transmitted herewith are the final numbers for the biennial budget beginning FY14-15 and ending FY 15-16

This budget is reflective of some of the recommended revisions offered following the Council's departmental budget hearings. All recommendations put forth by City Council were reviewed and thoroughly vetted at Treasury. The attached budget document was revised upwards by $90,000 and includes the details of the incorporated revisions.

The budget was revised to include your recommendations, along with those of the Mayor, which I felt could be implemented without adversely impacting the organizational structure, management, and the anticipated transition of the City of Flint to a Receivership Transition Advisory Board during the course of this spending plan.

Following the public hearing and consideration of the comments received, it is my intent to execute the order adopting the budget at the next Council meeting scheduled for June 23, 2014. At that time, Council will be able to officially receive the two-year budget consistent with PA 436 and the 7 Point Transition Management Plan.

You should also be aware that effective July 1, 2014, the day-to-day operations of the departments of Planning and Development, and Public Works will be shifted to Mayor Dayne Walling. The Mayor is currently putting together a plan for the allocation of resources within those departments. Similarly, Police Chief Tolbert and Fire Chief Cox are also putting together their work plans to utilize the final resource allocations for public safety.

The assistance and cooperation from you and the Council given to me, the Mayor, and the Administration in this process is greatly appreciated. I think we can agree that this is a responsible and realistic snapshot of the City's financial stability over the next two years, given its myriad financial challenges.

Sincerely,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

CC: Dayne Walling, Mayor
Inez Brown, City Clerk
Administration

Proposed Changes to the City of Flint Proposed FY15 & FY16 Budget

On April 30, 2014, Emergency Manager Darnell Earley transmitted a proposed bi-annual budget to the Mayor and City Council, with a request that the Mayor and Council review and comment on the proposed budget. Accordingly, the City Council, acting as Committee of the Whole chaired by Finance Chair Josh Freeman, met five times to review the budget. At the conclusion, a set of recommendations was adopted and given to the Emergency Manager.

This document summarizes the key recommendations of the Council and Mayor and outlines changes made to the proposed budget as a result.

Summary of Council and Mayor Recommended Changes to FY15 & FY16 Proposed Budget

1. The recommendation of the Council identifies $1,824,510 in additional funds to be used by the Police Department:

- Specifically, $1 million of the $2.5 million in state appropriated revenues for the Lock-Up is proposed to be moved to the Police Budget.
- In addition, $1 million is identified by increasing the allocation in the CIP Fund for the purpose of reducing the deficit, thus freeing up the $1 million in the General Fund which has been identified for deficit reduction. Of that $1 million, $763,000) ($628,000 + $135,000) would be moved to the Police budget. Additionally, $61,510 is identified to be moved from the Finance Budget to the Police Budget.

2. The remaining funds from the proposed re-appropriation of the freed-up General Fund revenues ($237,000) would be used for the following:

- $50,000 - District Court
- $72,000 - City Clerk
- $50,000 - City Council Staff
- $45,000 – Additional Pay Raises for Council
- $10,000 – Brennen Center
- $10,000 – Hasselbring

3. Finally, there is a recommendation to eliminate funding for the Human Relations Commission ($22,547) and split those funds equally between Brennen Center and Hasselbring:

- Brennen - $11,274
- Hasselbring - $11,274

4. The Mayor has also made recommendations in other areas, including:

- Adding capacity to Economic Development by replacing the 20% of 2 DCED staff currently subsidized by the GF with CDBG funds and directing that staff to perform 100%

CDGB activities. The freed-up funds ($51,458) would then be used to contract for economic development services.

- Reduce DCED program staff by 1 FTE and utilize CDBG administrative funds for 50% of administrative staff support in Planning and Development
- Add 1 new FTE in Planning and Development dedicated to the new Business Licensing function
- Add to the Strategic Plan a key objective under Governance and Administration: "Respond to a minimum of 500 constituent services per month, including those formerly addressed by the Human Relations Commission staff."

Changes to the Proposed FY15 & FY16 Recommended Budget in response to Council and Mayor recommended changes

The changes proposed by the Mayor and Council have been reviewed, and changes made as considered appropriate within the context of maintaining a viable financial plan for the next two years. The proposed budget, as submitted to the Mayor and Council on April 30, 2014, will be revised as follows in response:

1. The Proposed Budget anticipates a reduction in public safety staffing of 36 officers and 19 firefighters. However, it also does not anticipate these reductions (other than vacancies occurring through attrition) until the comprehensive study of the police and fire departments is concluded. That study is to be completed prior to the end of 2014. At that time, depending on the study recommendations, a decision will be made as to the need for additional resources, and to the extent that funds in the General Fund which are currently targeted for deficit reduction can be used. Although the State will not agree to utilize funds appropriated for the operation of the Lock-Up to fund Flint police officers and firefighters, the Mayor and Emergency Manager will continue their efforts to obtain other state funding to support police and fire operations in Flint during this critical time.
2. The concern of the City Clerk, and supported by both the Council and the Mayor, of her inability to properly conduct the upcoming elections with the proposed staffing reduction, is acknowledged. Accordingly, the proposed budget is revised to continue FY14 budget level of staffing within the Clerk's Office. The business license position, originally moved to the Planning and Zoning Department in the FY15 and FY16 Proposed Budget, has been restored back to City Clerk's department. The new Business Licensing process is scheduled to be implemented by January 1, 2015; at which time, the responsibility for the process will be assumed by the Department of Planning and Development. Since the Clerk's Office staff will remain the same while reducing the responsibilities of the Clerks' Office, there should be adequate staff to conduct the elections and to provide additional support to the Council Office. Until such time as the

Business Licensing process is assumed by the Department of Planning and Development, the Clerk is authorized to increase the hours of the current part-time employee in the Council Office. $15,000 in temporary wages is added to the Council's budget for FY15.

3. The concern of the Council and the Mayor that financial support be continued to assist in the transition of the senior citizen programming at the Brennen Center and Hasselbring is acknowledged. The end goal is for there to be successful senior citizen programming at these locations, supported in their entirety by the County's senior citizen millage, which has been approved by voters within the City of Flint as well as the rest of Genesee County. Instead of adding additional funding to the FY15 and FY16 budgets, however, an amendment to the FY14 budget is being prepared to make a one-time appropriation to each center in the amount of $20,000, for a total expenditure of $40,000. The purpose of this appropriation is to support this transition.
4. The concern of the Council to add additional resources to the District Court is noted. However, during the presentation by the Court at its budget hearing, it became apparent that the proposed strategy of the Court to utilize part time employees may not be consistent with the requirement that temporary employees working in excess of 29 hours per week must be provided access to health care to the extent that full time employees are. Thus, additional funds in the amount of $40,000 is added to the Court's budget to address this potential problem.
5. The recommendation of the Mayor to add additional capacity to economic development as stated in #4 above is acknowledged. Additional resources for economic development was also a stated priority of the Council. The change recommended by the Mayor provides $50,000 in financial capacity, is revenue neutral, and is incorporated into the budget.
6. The recommendation of the Mayor with respect to reducing DCED staff by 1 FTE and redistributing the funds as noted above are also incorporated into the budget.
7. The recommendation of the Mayor to add one new FTE in Planning and Development dedicated to the new Business Licensing function is also acknowledged as being valuable in helping to assure that the new process is implemented aggressively and successfully. Accordingly, $64,000 for wages and fringes is added to the budget of Planning and Development for that purpose.
8. Finally, the recommendation of the Mayor to add an additional objective to the Governance and Administration section of the Strategic Plan is acknowledged and will be incorporated. Accordingly, while the Human Relations Commission may continue as a volunteer board, the proposed allocation is eliminated. As it has become apparent that the Human Resources Director is fully engaged with managing the Human Resources function, the portion of the Director's salary allocated to the HRC budget will be transferred to the Human Resources Budget.

Implementing the changes noted above require identifying $119,000 in FY15 General Fund appropriations and $104,000 in FY16 appropriations. The revenue and expense projections in the budget have been reviewed, and the necessary funds have been identified from the following sources:

FY15:

- $39,000 - reduction in audit costs
- $ 2,600 – net reduction in HRC budget
- $38,400 - additional projected revenue - income tax revenue
- $39,000 – additional projected revenue – delinquent income tax collections

FY16:

- $31,000 - reduction in audit costs
- $ 2,678 – net reduction in HRC budget
- $32,000 - additional projected revenue - income tax revenue
- $38,322 - additional projected revenue - delinquent income tax collections

Appreciation is extended to the Mayor, Council, and staff for the time and effort spent reviewing the proposed budget. The citizens of Flint will be better served by the changes made.

Proposed Budget FY15 and FY16 Technical Adjustments

1. Included the pension expense in the Office of the Clerk - $29,519

2. Removed wages and fringes for GIS Technician from Assessing Department because it was already budgeted in the Planning and Zoning Department - $60,518

3. Corrected the inclusion of all salaries, wages, and fringes in the Planning and Zoning department for all the approved positions - $123,596

4. Corrected Fund 202 FY15 and FY16 fund balance use. The indirect cost allocation was double reported in FY15. This was a $536,000 reduction in cost in FY15. In FY16, wages in administration was entered in error causing salaries to be overstated by $812,000. This correction was made.

FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint:

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

The Mission of the City Government:

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals:

In order to realize our Mission, residents, businesses, students and visitors can expect that:

The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees

The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play

The City will provide access to dependable and affordable water, sewer, and waste collection

The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs

The City will foster cooperation between business, non-profit, ~~and~~ foundation partners and residents to create a climate that supports community and economic development

The City government will also:

Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission

Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan

Encourage partnerships for recreation and access to open space across the City

Enforce building and occupancy codes and to aggressively work with others to address blighted conditions

Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development

Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

Mayor and Council Priorities for Developing the Two-year (FY15 & FY16) Budget

The Mayor and Council request that the two-year budget to be developed will include a set of objective which, when achieved, will result in significant progress being made towards achieving their stated Vision, Mission, and Goals.

Additionally, the Mayor and Council request that the two-year budget to be developed address the following specific priorities:

1. Maintain police and fire staffing levels at the maximum level feasible
2. Reduce the General Fund deficit by at least $1 million
3. Continue efforts to reduce blight, including demolition
4. Hire an experienced and professional City Administrator
5. Assure that capacity exists to implement the Master Plan
6. Add capacity in the area of Economic Development
7. Fund years 1 & 2 of capital improvements identified in the Master Plan
8. Improve street maintenance
9. Establish parks partnerships
10. Improve customer service through training and technology
11. Increase removal of dead and diseased trees
12. Evaluate ways to reduce water and sewer rates for constituents in the budget process

Section Separator

(c) A description of each loan sought, approved, or disapproved during the reporting period that has a cumulative value of $5000 or more and the proposed use of the funds.

The City of Flint has not sought, approved or disapproved any loan during the reporting period of July 8, 2014 through October 8, 2014.

Section Separator

(d) A description of any new position created or any vacancy in a position filled by the appointing authority.

Vacancy Filled

CITY OF FLINT
Position Description

Class Title:	Receivables Enforcement Officer Trainee	Job Code Number:	20-C-122
Established:	December 18, 1989	Bargaining Unit:	Local 1600

GENERAL STATEMENT OF DUTIES:
In a learning situation, participates in the collection of the City of Flint receivables; performs related work as required. (This is a training position in which the employee will work with increasing independence and decreasing direct supervision over a one year period at the end of which the employee will be promoted to the position of Receivables Enforcement Officer if job performance has been satisfactory.)

SUPERVISION RECEIVED:
Work is performed under the supervision of the Deputy Treasurer or Assistant Customer Service Operations Supervisor.

ESSENTIAL DUTIES AND RESPONSIBILITIES:
1. Learns and assists in implementing and maintaining procedures and methods necessary to conduct a collection and enforcement program for the City of Flint receivables.

2. Assists in initiating enforcement and compliance procedures.

3. Assists in contacting taxpayers, accountants, attorneys and other parties through correspondence, telephone and personal contact relative to the collection of delinquent accounts or remittance of monies due the City.

4. Assists in the development and maintenance of records, and files pertaining to collection and enforcement policies and procedures.

5. Assists in assembling records and preparing documentation for court proceedings and attends hearings and court trials pertaining to such cases.

6. Answer questions concerning the collection process; explains penalties and other consequences of lack of compliance.

7. Learns enforcement procedures based on review of delinquent accounts in automated and manual systems; becomes familiar with City of Flint policies and procedures, ordinances and laws regarding collection and enforcement of City receivables.

MINIMUM ENTRANCE REQUIREMENTS:
A. A Bachelors Degree from an accredited college specializing in Business Administration, Public Administration or related field OR two (2) years of experience in the classification of Accountant, Auditor, Income Tax Examiner, Assistant Income Tax Examiner, Treasury Receivables Examiner or Senior Customer Service Clerk.
B. Knowledge of business English and commercial arithmetic.
C. Ability to effectively communicate both in writing and verbally.
D. Ability to follow written and verbal instructions.
E. Ability to read and interpret ordinances, laws, rules and regulations.
F. Ability to prepare accurate and clear reports and records.
G. Working knowledge of data processing systems and functions.

NECESSARY SPECIAL REQUIREMENT(S):
Possession of a valid State of Michigan Driver's license

PHYSICAL DEMANDS:
While performing the duties of this job, the employee is frequently required to sit and talk or hear. The employee is occasionally required to walk; use hands to finger, handle or feel objects, tools or controls; and reach with hands and arms. The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision and the ability to adjust focus. The noise level in the work environment is usually quiet.

Classification History:
Established: Personnel 12/18/99
Revised: Personnel 05/11/99, 06/14/96, 02/09/01
Revised: Human Resources 03/09/05
Revised: Human Resources 07/27/10
Revised: Human Resources 08/13/13

The job description does not constitute an employment agreement between the employer and employee and is subject to change by the employer as the needs of the employer and requirements of the job change.

Vacancy Filled

CITY OF FLINT
Position Description

Class Title:	Principal Clerk Typist	Job Code Number.	16-A-010
Established:	July 30, 1981	Bargaining Unit:	Local 1600

GENERAL STATEMENT OF DUTIES: Acts as secretary to the administrator of a large department or major operating division; performs difficult and complex clerical work involving a considerable degree of decision; performs related work as required.

SUPERVISION RECEIVED: Works under the supervision of an administrative employee who assigns work and reviews for accuracy, but allows considerable independence of action.

SUPERVISION EXERCISED: Exercises working supervision over a few clerical employees engaged in a variety of clerical duties.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

RESOLUTION TO EMPLOY THE SERVICES OF TIMOTHY SMITH

BY THE EMERGENCY MANAGER:

Pursuant to the authority granted by the Emergency Manager by Public Act 436 of 2012, Timothy Smith shall be employed by the City of Flint in the capacity of Truck and Heavy Equipment Mechanic for the Finance Department. Mr. Smith's employment with the City of Flint shall be at the will of the Emergency Manager until such time as the Emergency Manager determines that his employment shall cease, or until such time as the Emergency Manager's authority terminates by operation of law; and

Mr. Smith shall be compensated at the rate of $30 per hour. Mr. Smith shall be paid in bi-weekly installments consistent with established written policies and procedures of the City of Flint and subject to statutory tax withholding requirements; and

Mr. Smith shall not be entitled to any fringe benefits of employment; and

Mr. Smith's compensation shall be drawn from the budgeted and appropriated funds in line item 661-451.100-702.100, Wages and Salaries. Further, Mr. Smith's salary for the period of December 1, 2014 through March 31, 2015, under the authority of this resolution, shall not exceed $21,600.00.

IT IS RESOLVED, that the Emergency Manager does, on behalf of the City of Flint, authorize the employment of Timothy Smith under the terms and conditions stated above. Compensation shall be at an hourly rate of $30.00 per hour, drawn from the budgeted funds in line item 661-451.100-702.000, Wages and Salaries, and with statutory taxes being withheld as required by law. By virtue of this resolution, Mr. Smith's salary shall not exceed $21,600.00.

RESOLUTION STAFF REVIEW

DATE: November 26, 2014

Agenda Item Title: Resolution to enter to employ the services of Timothy Smith

Prepared By: V. Foster

Background/Summary of Proposed Action: The Fleet Division is requesting to hire Timothy Smith as a temporary employee. It has been very difficult for the City to find permanent qualified individuals for its Truck and Heavy Equipment Mechanic positions.

As winter season approaches, there is much concern about the Fleet Division's ability to effectuate the necessary repairs on a regular basis at its current staffing level. Mr. Smith has agreed to perform these repairs on a temporary basis at the rate of $30 per hour. This agreement shall not include benefits.

Therefore, the Fleet Division is requesting to employ Timothy Smith for the period December 1, 2014 and ending March 31, 2015.

Financial Implications
None.

Budgeted Expenditure? X Yes No Please explain if no:

Account No.:

661-451.100-702.000

Works under the direct supervision of an accounting employee of higher grade who assigns work and checks for accuracy and conformance with standard procedures.

ESSENTIAL DUTIES AND RESPONSIBILITIES:
1. Sorts vouchers; types vouchers; posts vouchers, receipts, and credits to proper account ledger; prepares collection accounts; maintains a file of vouchers.

2. Reconciles totals to individual accounts; verifies extensions and totals; checks for availability of funds for expenditures; runs tape to prove balances.

3. Checks ledger numbers for correct accounts; compiles and organizes pertinent data for processing by the computer.

4. Determines due dates and checks files for unpaid overdue accounts; analyzes computer print-outs and originates corrections and adjustments as deemed necessary after a detailed check or records.

5. Prepares routine reports of transferred accounts; maintains cards and lists of accounts by classification.

6. Answer telephones and assist the public as necessary.

7. Performs occasional typing, such as records, forms, correspondence, or vouchers.

MINIMUM ENTRANCE REQUIREMENTS:
A. Working knowledge of the application of bookkeeping principles to routine accounting transactions, and ability to apply these principles in keeping accounting records.
B. Working knowledge of office methods, procedures, and equipment.
C. Ability to make arithmetical computations quickly and accurately.
D. Ability to understand and follow oral and written instructions.

PHYSICAL DEMANDS:
While performing the duties of this job, the employee is frequently required to sit and talk or hear. The employee is occasionally required to walk; use hands to finger, handle or feel objects, tools or controls; and reach with hands and arms.
The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision and the ability to adjust focus. The noise level in the work environment is usually quiet.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

CONTRACT FOR EMERGENCY MANAGER SERVICES

Rick Snyder, Governor of the State of Michigan (Governor) and the Michigan Department of Treasury retain and appoint Darnell Earley as the Emergency Manager (Emergency Manager) for the City of Flint (City) under Public Act 436 of 2012, the Local Financial Stability and Choice Act, MCL 141.1541 *et seq*, (the Act).

The Emergency Manager will provide services to the City pursuant to the terms and conditions set forth in this Contract and the Act.

The Emergency Manager's role is to remedy the financial distress of the City by requiring, within available resources, prudent fiscal management and an efficient provision of municipal services by exercising the necessary authority conferred herein to take appropriate action on behalf of the City and its residents. In accepting this appointment, the Emergency Manager agrees to leverage all the Emergency Manager's skills and abilities to accomplish these objectives on behalf of City residents.

1. PARTIES, PURPOSE, DUTIES, AND REPORTS

1.1 Parties. The parties to this Contract are the State of Michigan by the Department of Treasury and Darnell Earley.

1.2 Purpose. The parties to this Contract agree that Darnell Earley will act as the Emergency Manager for the City. The Emergency Manager's duties and responsibilities are delineated in the Act and include conducting all aspects of the operations of the City and establishing and implementing a written financial plan as required by Section 11 of the Act.

1.3 Duties. The Emergency Manager shall possess all the powers and duties authorized under the Act, including those specifically related to local governments. In addition, the Emergency Manager shall work cooperatively with the Office of the Governor and the State Treasurer. The Emergency Manager agrees to continue to keep these officials informed of major initiatives to be undertaken in furtherance of this Contract before their public announcement. The Emergency Manager shall seek the approval of the State Treasurer before entering into a new collective bargaining agreement.

1.4 Reports. The Emergency Manager shall file quarterly reports with the Department of Treasury beginning on January 15, 2014, for the immediately preceding quarter and shall file the first report required by Section 17 of the Act within six months of the Emergency Manager's appointment and every three months thereafter.

1.5 Communications. The Emergency Manager shall establish and maintain an appropriate protocol for ongoing communications with officials of the City, City residents, and the media. The communications protocol should include a variety of means, including personal interactions.

2. TERM OF CONTRACT

2.1 The Emergency Manager serves at the pleasure of the Governor except as provided in Section 9(3)(d) and Section 9(6)(c) of the Act.

2.2 Effective Date. This contract is effective on Tuesday October 8, 2013.

3. COMPENSATION FOR SERVICES PROVIDED

3.1 Source of Payment. The State shall pay the compensation of the Emergency Manager for all services rendered under this Contract.

3.2 Salary. The Emergency Manager's salary for services rendered under this Contract shall be $180,000.00 per year. If this Contract is terminated after the Emergency Manager has provided services for a portion of the month, the Emergency Manager shall be entitled, for that portion of that month, to $15,000.00 multiplied by the proportion that the number of days of the month for which services were provided bears to the number of days of the whole month.

3.3 Payment for Services. The Emergency Manager shall be paid in installments consistent with the established written policies and procedures of the Michigan Department of Treasury. If requested by the State Treasurer, the Emergency Manager shall provide to the Michigan Department of Treasury additional information regarding services performed pursuant to this Contract.

3.4 Reimbursement for Actual and Necessary Expenses. The actual and necessary expenses of the Emergency Manager, including customary expenses related to travel, meals, and lodging which are incurred in connection with service to the City will be reimbursed by the City. The Emergency Manager shall provide original copies of all receipts for meals, lodging, and travel reimbursement with any request for reimbursement. Any reimbursement for expenses under this contract shall be reviewed and approved in writing by the City's Chief Financial Officer.

4. ADDITIONAL STAFF AND CONSULTANT FEES

4.1 Staff. The Emergency Manager may, as provided in the Act, appoint additional staff as necessary to fulfill the obligations of the Emergency Manager's appointment and duties under this Contract. Payment of compensation for additional staff will be the obligation of the City. While authority to hire additional staff rests with the Emergency Manager, the Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before extending offers of employment for positions paying $50,000.00, or more, annually. The Emergency Manager shall issue a written employment contract to each individual hired pursuant to this Section, regardless of the compensation paid to that individual. The employment contract

issued pursuant to this Section shall, as of the date the individual is hired by the Emergency Manager, prohibit the individual from engaging in any other employment for remuneration without the express written approval of the Emergency Manager. The Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before approving outside employment for any individual. A breach of this Section shall be a material breach of this Contract.

4.2 Professional Assistance. The Emergency Manager may, as provided in the Act, secure professional assistance as necessary to fulfill the obligations of the Emergency Manager's appointment and duties under this Contract. Payment of compensation for additional professional assistance will be the obligation of the City. The Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before authorizing professional services contracts of $50,000.00, or more, per engagement or project. If a contract under this Section, or under Section 4.1, has a value of $50,000 or more, the Emergency Manager shall not execute the contract unless the contract is subject to competitive bidding by the Emergency Manager or the Emergency Manager receives prior written approval from the State Treasurer.

4.3 Security. The Emergency Manager will be entitled to receive security protection in connection with the Emergency Manager's duties under this Contract. Security personnel will be retained only upon the approval of the State Treasurer, or the designee of the State Treasurer, and only after consultation with the Director of the Michigan Department of State Police, or the designee of the Director of the Michigan Department of State Police. Payment of compensation for security personnel will be the obligation of the City.

5. REPRESENTATIONS

5.1 Qualifications. By signing this Contract, the Emergency Manager, represents that the Emergency Manager meets the minimum qualifications for appointment set forth in the Act. The Emergency Manager shall perform the duties of that office on a full-time basis, except as otherwise approved by the State Treasurer, and shall not accept any other employment or engage in any other activity for remuneration without the express written approval of the State Treasurer.

5.2 Conflict of Interest. The Emergency Manager represents and warrants that the Emergency Manager has no personal or financial interest, and will not acquire any such interest, that would conflict in any manner or degree with the performance of this Contract.

5.3 Non-competition. The Emergency Manager represents and warrants that the Emergency Manager is not subject to any non-disclosure, non-competition, or similar clause with current or prior clients or employers that will interfere with the performance of this Contract. The State will not be subject to any liability for any such claim.

5.4 Facilities and Personnel. The City will provide the Emergency Manager with proper facilities and personnel to perform the services and work required to be performed pursuant to this Contract.

5.5 Records. The Emergency Manager shall maintain complete records in accordance with

generally accepted accounting practices and sound business practices. This requirement applies to all information maintained or stored in the computer system of the Emergency Manager or computer system of the City. The State Treasurer and his designees shall have the right to inspect all records related to this Contract.

5.6 Non-Discrimination.

a) The Emergency Manager shall comply with Public Act 220 of 1976, the Persons with Disabilities Civil Rights Act, MCL 37.1101 *et seq.*, and all applicable federal, State, and local fair employment practices and equal opportunity laws. The Emergency Manager covenants that the Emergency Manager will not discriminate against any employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment, or a matter directly or indirectly related to employment, because of a disability that is unrelated to the individual's ability to perform the duties of a particular job or position. The Emergency Manager shall impose this covenant upon every subcontractor that enters into an agreement for the performance of any obligation imposed by this Contract. A breach of this covenant shall be a material breach of this Contract.

b) The Emergency Manager shall comply with Public Act 453 of 1976, the Elliott-Larsen Civil Rights Act, MCL 37.2101 *et seq.*, and all applicable federal, State, and local fair employment practices and equal opportunity laws. The Emergency Manager covenants that the Emergency Manager will not discriminate against an employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment, or a matter directly or indirectly related to employment, because of race, color, religion, national origin, age, sex, height, weight, or marital status. The Emergency Manager shall impose this covenant upon every subcontractor that enters into an agreement for the performance of any obligation imposed by this Contract. A breach of this covenant shall be a material breach of this Contract.

5.7 Unfair Labor Practices. The Emergency Manager shall not enter into a contract for the performance of any obligation imposed by this Contract with a subcontractor, manufacturer, or supplier whose name appears in the register prepared pursuant to Public Act 278 of 1980, MCL 423.322, of employers found in contempt of court for failure to correct unfair labor practices. The State may void this Contract if the Emergency Manager, or any subcontractor, manufacturer, or supplier of the Emergency Manager that is a party to a contract for the performance of any obligation imposed by this Contract, appears in the above mentioned register.

5.8 Independent Contractor. The relationship of the Emergency Manager to the State and to the City under this Contract is that of an independent contractor. Except as specifically provided in the Act, no liability, benefits, workers compensation rights or liabilities, insurance rights or liabilities, or any other rights or liabilities arising out of, or related to, a contract for hire, nor employer-employee relationship, shall arise, accrue, or be implied to either party under this Contract or to an agent, subcontractor, or employee of either party under this Contract, as a result of the performance of this Contract.

6. NOTICES

6.1 The State Treasurer is the designee for this Contract unless notice of another designa-

tion is provided by the Governor. All notices, correspondence, requests, inquiries, billing statements, and other documents mentioned in this Contract shall be directed to the attention of the State Treasurer, Andy Dillon, and to the following:

For the State:

Michigan Department of Treasury
Office of Legal Affairs
Richard H. Austin Building, 430 West Allegan Street
Lansing, Michigan 48922
Phone: (517) 373-3223

For the Emergency Manager:

Darnell Earley
Flint City Hall
1101 South Saginaw Street
Flint, Michigan 48502

7. LIMITATION UPON LIABILITY

7.1 The State. The State, the Governor, the State Treasurer, and all other State officials are not liable for any obligation of or claim against the City resulting from actions taken in accordance with the Act or this Contract.

7.2 The Emergency Manager. Pursuant to the Act, in performing this Contract the Emergency Manager is engaging in a governmental function and is immune from liability for any action taken which the Emergency Manager reasonably believes to be within the scope of the Emergency Manager's authority granted by the Act or by this Contract.

8. INSURANCE

8.1 General. The Emergency Manager may procure and maintain, at the expense of the City, health, worker's compensation, general liability, professional liability, and motor vehicle insurance for the Emergency Manager and any employee, agent, appointee, or contractor of the Emergency Manager as may be provided to elected officials, appointed officials, or employees of the City. The insurance procured and maintained by the Emergency Manager may extend to any claim, demand, or lawsuit asserted or costs recovered against the Emergency Manager and any employee, agent, appointee, or contractor of the Emergency Manager to the extent permitted by the Act.

8.2 Post-Contract. If, after the date that the service of the Emergency Manager is concluded, the Emergency Manager or any employee, agent, appointee, or contractor of the Emergency Manager is subject to a claim, demand, or lawsuit arising from an action taken during the service of the Emergency Manager, and not covered by a procured insurance policy, litigation expenses, including but not limited to attorney fees, payments in satisfaction of judgments, and

payments made in settlement as specified pursuant to the Act, shall be paid by the City. If such expenses are not paid by the City, they shall be treated as a debt owed to this State pursuant to section 17a(5) of Public Act 140 of 1971, the Glenn Steil State Revenue Sharing Act of 1971, MCL 141.917a.

8.3 Additional Insurance. If the City has purchased, or otherwise obtained, an errors and omissions policy, then the Emergency Manager may choose to be covered under such policy at the expense of the City.

8.4 Payment by City. All insurance required under this Contract shall be acquired at the expense of the City under valid and enforceable policies, issued by insurers of recognized responsibility. The State Treasurer reserves the right to reject as unacceptable any insurer.

9. TERMINATION OF CONTRACT AND APPOINTMENT

9.1 Termination by the State.

a) The State. The Emergency Manager serves at the pleasure of the Governor except as provided in Section 9(3)(d) and Section 9(6)(c) of the Act. The Governor has the power to rescind the appointment and terminate this Contract at any time, and without cause, by issuing a Notice of Termination to the Emergency Manager.

9.2 Termination Process. Upon receipt of a Notice of Termination, and except as otherwise directed, the Emergency Manager shall:

a) Cease work under this Contract upon the date and to the extent specified in the Notice of Termination;

b) Incur no costs beyond the date specified by the Notice of Termination;

c) Submit to the State Treasurer on the date the termination is effective all records, reports and documents as this State shall specify and carry out such directives as the State Treasurer may issue concerning the safeguarding and disposition of files and property; and

d) Submit within 30 calendar days a closing memorandum and final billing, which shall be paid within 30 days.

9.3 Termination by Emergency Manager. The Emergency Manager may terminate this Contract at any time, with or without cause, with 30 days written notice to the State Treasurer. Within 30 days of the Emergency Manager's final day of service, the Emergency Manager shall submit a closing memorandum and final billing, which shall be paid within 30 calendar days.

10. GENERAL PROVISIONS

10.1 Governing Law and Jurisdiction. This Contract shall be subject to, and construed according to, the laws of the State of Michigan, and no action shall be commenced against this State,

its agents, or employees for any matter whatsoever arising out of this Contract, in any court other than a Michigan State court.

10.2 No Waiver. A party's failure to insist on the strict performance of this Contract shall not constitute waiver of any breach of the Contract.

10.3 Other Debts. The Emergency Manager represents and warrants that the Emergency Manager is not, and will not become, in arrears on any contract, debt, or other obligation to the State of Michigan, including taxes.

10.4 Invalidity. If any provision of this Contract or its application to any persons or circumstances shall, to any extent, be determined by a court of competent jurisdiction to be invalid or unenforceable, the remainder of this Contract shall not be affected, and each remaining provision of this Contract shall be valid and enforceable to the fullest extent permitted by law.

10.5 Headings. Section headings contained in this Contract are for convenience only and shall not be used to interpret the scope or intent of this Contract.

10.6 Entire Agreement. This Contract represents the entire and exclusive agreement between the parties and supersedes all proposals or other prior agreements, oral or written, and all other communications between the parties.

10.7 Amendment. No Contract amendment will be effective and binding upon the parties to this Contract unless the amendment expressly makes reference to this Contract, is in writing, and is signed by duly authorized representatives of all parties and all the requisite State approvals are obtained.

10.8 Order of Priority. This Contract and the Act shall be read to be consistent one with the other. However, if a conflict is deemed to exist between the terms of this Contract and the Act, the Act shall supersede the terms of this Contract.

10.9 Counterparts. This Contract may be executed in separate counterparts, each of which when executed shall be deemed an original, but all of which when taken together shall constitute one and the same Contract.

IN WITNESS WHEREOF, the Governor and the Emergency Manager have signed and executed this Contract.

Salary and Benefits of the Emergency Manager:

Per the Emergency Manager's Contract Section 3. Compensation For Services Provided

3.1 Source of Payment. The State shall pay the compensation of the Emergency Manager for all services rendered under this Contract.

3.2 Salary. The Emergency Manager's salary for services rendered under this Contract shall be $180,000.00 per year. If this Contract is terminated after the Emergency Manager has provided services for a portion of the month, the Emergency Manager shall be entitled, for that portion of that month, to $15,000.00 multiplied by the proportion that the number of days of the month for which services were provided bears to the number of days of the whole month.

3.3 Payment for Services. The Emergency Manager shall be paid in installments consistent with the established written policies and procedures of the Michigan Department of Treasury. If requested by the State Treasurer, the Emergency Manager shall provide to the Michigan Department of Treasury additional information regarding services performed pursuant to the Contract.

3.4 Reimbursement for Actual and Necessary Expenses. The actual and necessary expenses of the Emergency Manager, including customary expenses related to travel, meals, and lodging which are incurred in connection with service to the City will be reimbursed by the City. The Emergency Manager shall provide original copies of all receipts for meals, lodging, and travel reimbursement with any request for reimbursement. Any reimbursement for expenses under this contract shall be reviewed and approved in writing by the City's Chief Financial Officer.

(h) The financial and operating plan as required under section 11. Update #8 to the Financial and Operating Plan for the City of Flint.

Financial and Operating Plan for the City of Flint – Update 8
October 8, 2014

Introduction

This update to the Financial and Operating Plan for the City of Flint is submitted by the Emergency Manager for the City of Flint to Governor Rick Snyder, through the Department of Treasury for the State of Michigan, in accordance with Public Act 436, Section 17.

This report includes a summary of the financial conditions and goals for the City of Flint, the plan to conduct the operations of the City, the on-going actions being taken to resolve the financial emergency, and the outline of a plan to prepare for an eventual transition as prescribed in P.A. 436. This update will be posted on the City's website: www.cityofflint.com.

Summary of the EM/EFM Appointment Sequence and Development of the Operating and Financial Plan

The Flint Financial Review Team determined in November 2011 that the City of Flint was in a financial emergency. (See Attachment #1)

On December 1, 2011 Governor Rick Snyder appointed Michael K. Brown as Emergency Manager. EM Brown developed the Financial and Operating Plan utilizing the resources of a five person Advisory Committee as well as five additional advisory committees. EM Brown sought broad expertise to ensure public engagement and to maintain a sense of continuity with the Mayor and City Council. All nine City Council members and over fifty other citizens participated in the advisory committees.

EM Brown's original Financial and Operating Plan (45 Day Plan) was submitted to the State Treasurer on January 15, 2012; the first update to the Plan was submitted on June 1, 2012. On August 8, 2012, PA 4 was suspended and Edward J. Kurtz was appointed Emergency Financial Manager under P.A. 72. (Mr. Brown stepped aside as he was prohibited from serving as EFM due to his recent service as Interim Mayor for the City of Flint.)

EFM Kurtz established a new Advisory Committee in accordance with the requirements of P.A. 72. Utilizing the Advisory Committee and the City of Flint management team EFM Kurtz presented a second update to the Financial and Operating Plan and submitted this to the State Treasurer on February 8, 2013.

When P.A. 436 took effect on March 28, 2013 Mr. Kurtz was re-appointed by Governor Snyder as Flint's Emergency Manager. Mr. Kurtz continued in that capacity until his resignation after the end of fiscal year 2013. At that time Mr. Kurtz submitted his closing memorandum and the third update to the Financial and Operating Plan. Governor Snyder then reappointed Mr. Brown as Emergency Manager. On October 8, 2013 I was appointed by Governor Snyder as Flint's fifth Emergency Manager following Mr. Brown's resignation. On November 21, 2013 1 submitted the

45 Day Plan as required by P.A. 436 Section 11(2); that plan became Update #4. The fifth, sixth and seventh updates to the Financial and Operating Plan fulfilled P.A. 436, Section 17 six month and subsequent three month report requirement.

This report, indicated as Update #8, again fulfills P.A. 436, Section 17 requirement for an update each subsequent three months.

Priority List for the Resolution of the Financial Emergency

- Stabilize the financial future of the City: maintain a balanced budget, eliminate the accumulated General Fund deficit, seek increased revenue, and reduce unfunded pension and OPEB liability.

- Re-establish Flint as one of the safest cities in Michigan both in reality and perception: provide public safety services, focusing on reducing violent crime, commensurate with cities of comparable size and resources, utilizing regional cooperation as appropriate. This includes implementation of the plan for the Flint 9-1-1 Center to join the Genesee County 9-I -1 Consortium.

- Implement the Blight Elimination Plan: manage demolitions, enforce blight ordinances.

- Maintain access to a clean, sustainable water source: implement the steps necessary to participate in the Karegnondi Water Authority (KWA) including interim water supply implementation, disposition of current pipeline sections, City Water Treatment Plant updates, a long term water supply back up plan, and a long term financial plan for the stability of the water and sewer funds.

- Implement the Master Plan of the City of Flint: update the Zoning Ordinance, evaluate the capital investment needs, and incorporate Master Plan activities in the annual budget development.

- Explore Governance Models for the City of Flint: receive report from the citizen's committee which was formed to evaluate city governance models, support the Charter Review Commission preparation as a part of transition discussions.

- Implement the 7 Point Transition Management Plan (Attachment #2) which has been adopted by the Flint City Council and Mayor Walling. This plan incorporates specific objectives which provide a strategy for determining and evaluating criteria for assessing when the City might be prepared to emerge from emergency management to home rule order with oversight of a Receivership Transition Advisory Board. This plan has been further refined with a chart encompassing specific implementation steps and completion dates.

Operations of the City of Flint

Shortly after his appointment as EM, Michael Brown took steps to reorganize the city government operations including: elimination of departments, consolidation of departments, elimination of management level positions, adjustment of the compensation of elected and appointed officials, elimination of the Civil Service operation and the Office of Ombudsman.

Management appointments were made to ensure that the essential services necessary for the public's health, safety and welfare are provided, and to continue conducting all aspects of the City of Flint's operation within the resources available. Necessary employment contracts were extended with the approval of the Treasury Department.

Department management reconfigurations were completed in anticipation of reductions in staffing levels as provided in the FY 13 Budget. Subsequently, as part of the FY 14 Budget process a Strategic Plan was adopted and more changes in the organizational structure occurred. The primary change was the inclusion of a new Planning and Development Department (See Attachment #3 Organizational Chart January 2015). I have made personnel adjustments to complete this reorganization of the Planning and Development Department.

The FY14 15 and FY15 16 biennial budget has been adopted. The budget process involved over 30 hours of active participation by the Mayor and the City Council Finance and Administration Committee sitting as the committee of the whole. As part of this process the Council adopted a five year Strategic Plan and a list of priorities for the development of the two year budget. This document has been updated to show the progress which has been made in each of the department level objectives (See Attachment #4 Strategic Plan of the City of Flint 2015-2019 2nd Quarter Update).

When P.A. 436 became effective in March 2013 the City Council members' and Mayor's compensation was eliminated. EM Kurtz partially restored compensation for Mayor and Council through Orders 1 and 2. These orders also defined specific responsibilities and requirements. For example, the City Council members were required to complete Level One of the Michigan Municipal League (MML) core course for municipal government and receive the MML education award within one year. I determined that this Order was still in effect, and the Council members all individually signed acceptance of these requirements as a condition of receiving compensation. Mayor Walling has fulfilled these obligations. All Council members have begun, but not yet fulfilled these obligations. Through adoption of EM Orders 15 and 16, beginning with the FY14 15 budget, the Mayor and Council received an increase in compensation commensurate with the increased duties assigned to them.

In the November 2014 general election, Councilman Bryant Nolden (Ward 3) was elected to the Genesee County Board of Commissioners and Councilman Sheldon Neeley (Ward 6) was elected to the Michigan House of Representatives. I requested self-nominations for new City Council members from residents of Wards 3 and 6. Upon review of the applicants, three nominees were selected for each Ward for interview and consideration by City Council. On January 5, 2015 Council selected Mr. Kerry Nelson to represent Ward 3, and Mr. Herbert Winfrey to represent Ward 6.

Also in the November 2014 general election six ballot initiatives were voted upon. These were recommended by the report of the Blue Ribbon Committee on Governance.

- The first proposal began the process to open the current Charter for a complete review:
  PROPOSAL I GENERAL REVISION OF CITY CHARTER
  This proposal passed and the election of Charter Commission members is scheduled for May 2015.

- These five initiatives were amendments to the current Flint City Charter:
  PROPOSAL 2 AN AMENDMENT TO REDUCE THE NUMBER OF MAYORAL PRINCIPAL STAFF APPOINTMENTS
  This proposal passed.

  PROPOSAL 3 AN AMENDMENT TO REQUIRE BUDGETARY BEST PRACTICES
  This proposal passed.

  PROPOSAL 4 AN AMENDMENT TO ELIMINATE FLINT CITY CHARTER SECTION 4-203(A), EXECUTIVE DEPARTMENTS
  This proposal passed.

  PROPOSAL 5 AN AMENDMENT TO ELIMINATE THE CIVIL SERVICE COMMISSION
  This proposal failed.

  PROPOSAL 6 AN AMENDMENT TO ELIMINATE THE OFFICE OF THE OMBUDSMAN
  This proposal failed.

All Orders and Directives issued by the Emergency Financial Manager (under P.A. 72) and Orders issued by the Emergency Manager (under PA4 and P.A. 436) are listed in Attachment #5: Orders and Directives of the EFM and EM.

The 7 Point Transition Management Plan which emphasizes re-engagement of the Mayor and City Council has been a top priority. The Council is meeting monthly on a regular basis; five Council Committees are operational: Finance/Administration, Legislative, Public Works, Public Safety, and Planning and Development. Each Committee is meeting regularly and then reporting at the following Council meeting. Order 8 was issued in March 2014 and defines format of action and participation at the Council meetings. Order 9 established monthly Council and Committee meetings; and Order 10 set the format of the Council meeting agenda. Additionally, Mayor Walling has been assigned day to day oversight of the Department of Public Works and the Department of Planning and Development. These steps as outlined in the 7 Point Transition Management Plan are part of preparing the City to resume local control under a Receivership Transition Advisory Board.

The 7 Point Transition Management Plan has been further refined through the development of a chart entitled: Steps to Prepare for Transition from Emergency Manager to a Transition

Receivership Advisory Board. This chart has set target completion dates for essential steps necessary to prepare for this transition (Attachment # 2).

A key element of the Transition Plan is the selection of a City Administrator. A nationwide advertisement was made and twenty-eight applications were received. Five semi-finalists were interviewed. Three finalists were identified. Background checks and second interviews were conducted. Natasha Henderson, current City Manager of Muskegon Heights, Michigan was selected as the new Flint City Administrator. She is expected to begin her new position in February 2015.

Financial Status

FY12 Budget and Audit

The Comprehensive Annual Financial Report (CAFR) for FY12 was completed and was filed with the State in a timely manner. The results were as expected, with fewer auditor comments than in past years. Deficits existed in the General Fund ($19.1 million) and in the Water Fund ($8.8 million).

The $19.1 million accumulated deficit reflected an excess of expenditures in the General Fund for FY12 of $10.2 million plus $8.9 million for FY11. This was anticipated by Emergency Manager Brown shortly after being appointed, which was almost six months into the FY12 year. Given that FY12 was nearly half over, and that significant unplanned reductions in services, primarily public safety, would need to occur if the projected deficit were to be immediately eliminated, the decision of the Emergency Manager, in consultation with Treasury, was to contain costs as much as possible but without significantly reducing services - especially public safety .for the balance of the year.

Pursuant to State statute, Deficit Elimination Plans for both FY11 and FY12 were submitted to the Department of Treasury. Both plans involved a mix of borrowing and expenditure reductions over the next five years. However, no final action was taken to implement the intended courses of action.

FY13 Budget and Audit

FY13 was the first budget developed and administered by the Emergency Manager and his team. Faced with a projected gap of more than $25 million, the FY13 budget was balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Previous reports detail the 25% increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire, conversion of the waste collection millage to a fee and the creation of a special assessment for street lighting, elimination of 20% of the City's workforce, compensation decreases equivalent to a 20% wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan.

Results of FY13 year-end show a surplus of revenues over expenses in the General Fund exceeding $6.2 million. This surplus reduced the City's accumulated $19.1 million deficit as of the end of FY12 to less than $12.9 million. Since the goal of the EM team was to assure that FY13 would not end with any additional deficit, this result significantly exceeded expectations.

The FY13 audit was completed and submitted to Treasury on December 20, 2013. All items surrounding the audit, including submission of the Form F-65 and Comprehensive Annual Financial Reporting Program were completed by December 31, 2013. The audit was presented to City Council as well on January 13, 2014.

FY 14 Budget, Strategic Plan and Audit

The FY14 budget was adopted via Emergency Manager Edward Kurtz Order #4 on June 7, 2013. This budget was developed with the same goal as FY13 - to assure the provision of essential services within the constraint of a balanced budget and continued deficit reduction. Accordingly, the FY14 budget included a $1.0 million commitment from the General Fund to further reduce the deficit. This is considered a minimum level of deficit reduction. The Emergency Manager's team, crafted a draft strategic plan in preparation for the FY14 budget development. Vision, Mission and Goals were established for the City government. Department managers then set specific, measurable objectives. Within the strategic plan was a five year financial projection.

Achieving the balanced budget again required reducing the workforce; however, with significant efforts from department heads and others involved in developing the budget, and building on ongoing reorganization of city processes, the level of services currently provided generally continued at FY13 levels. Most importantly, the quest to at least maintain FY13 levels of police and fire staffing was achieved, although one consequence was that the additional reductions in staffing came from non-public safety areas. This was equivalent to an additional 10% reduction of staffing in those areas.

One set of budget adjustments, with approval of Treasury was implemented in December 2013. A second budget adjustment was approved by Treasury and was adopted on April 3, 2014. The closing budget amendment was approved by resolution on June 25, 2014.

The City's cash flow has improved significantly from the $13 million cash on hand in December of 2011. Thirteen million dollars is less than one month's operating expenses. By comparison, the cash on hand on August 2014 was in excess of $60 million.

The FY 14 Audit has been completed and filed with Treasury on December 24, 2014. It confirmed the reduction in the General Fund deficit from $12.9 million as of June 30, 2013 to less than $9 million as of June 30, 2014.

Deficit Elimination Plan 2014

A deficit elimination plan which also incorporates a reserve accumulation plan was approved by the Department of Treasury and was adopted by EM Order 18 on July 15, 2014. The City recognizes that a goal needs to be set to develop a reserve equal to 15% of

General Fund revenues. This is one of many financial best practices which the City will incorporate to assure a sustainable municipal model. As of June 30, 2014 the deficit stands at less than $9 million. In succeeding budget years,$1.8 million will be committed to deficit reduction and then to reserve accumulation until the deficit is eliminated and a 15% General fund reserve is accumulated. At the current rate, the deficit will be eliminated (without borrowing) by June 30, 2019, slightly ahead of schedule.

FY 15-19 Strategic Plan and FY 15/FY 16 Budget

For the first time ever, the City of Flint has adopted a biennial budget, The FY15/FY16 budgets were developed within the context of an updated five year projection of revenues and expenses, and (for the first time ever) a Strategic Plan. This exercise pointed out the continuing challenge the City of Flint will have in achieving long term financial stability. The Mayor, City Council, Emergency Manager, and departments participated in the developments of the FY15-19 strategic plan and financial projections. The City Council formally adopted the FY15-FY19 Strategic Plan which included Mission, Vision, Goals and a Budget Priorities statement (Attachment #4: Strategic Plan of the City of Flint 2015-2019 2nd Quarter Update). Consulting firm Ernst & Young assisted the City with an update to the five year financial projections.

The Emergency Manager, Finance Director, and departments, working with the Mayor, developed a two year budget for FY15 and FY16. The goal continued to be to provide the best level of service possible within available resources while continuing to restore financial solvency. It is clear that in balancing these budgets the City will continue to be faced with addressing an on-going structural deficit; and the biggest challenge by far remains the outcome of the retiree health care lawsuit. It also demonstrates the vital importance continuing state assistance is to Flint's sustainability, not only in continued state revenue sharing, but in the active support of State Police and funding of the City Lock-Up. The City continues to emphasize the need for a new sustainable revenue source to support city services on an ongoing basis.

The City Council received the recommended two year budget April 30, 2014. The Finance/Administration Committee (sitting as the committee of the whole) used the first two weeks of May to hold five meetings on specific program areas. At the conclusion of the departmental reviews the Council send a list of budget revision proposals to me. Several of the recommendations were incorporated into the revised budget. The Council then held a public hearing on June 9, 2014.

Solely because of financial limitations, the FY15/FY16 budgets include significant staffing reductions in public safety. In the two prior budgets every other General Fund department, with the exception of police and fire, were reduced in size, combined, or contracted services. For this budget cycle, there were no other General Fund areas to reduce, except public safety services.

The targeted personnel reductions in public safety did not result in the lay-off of any police and fire personnel, as the decision was made to accomplish the reductions by attrition. The needed reductions in Police were accomplished for Fire within the first four months of

FY15, and reductions were within two positons of being accomplished by December 31, 2014. As part of the strategy to work successfully with reduced staffing the City contracted for a comprehensive study of the police and fire operations. Based on the results of this study, and the managed attrition reductions, the personnel levels in both Police and Fire will be re-evaluated as the FY16 budget is reviewed and updated, beginning in January, 2015.

The State budget which began October 1, 2014, contained an appropriation of $1.1 million for use in Flint's public safety departments. The boilerplate of the State budget includes:

> *The appropriation of $1,100,000.00 in part 1 for the city of Flint shall be allocated to support city police and firefighters. The emergency manager shall determine which public safety personnel are to be funded from this award. If the city has an appointed receivership transition advisory board, then that board is vested with the authority to make the determination of which personnel are funded from this award.*

The City is grateful to receive this funding and will use this to assist with the downsizing of the police and fire staffing and with implementing the recommendations of the Public Safety study which was concluded in December 2014.

The Emergency Manager's Order 13 adopted the biennial budget; Order 11 adopted the street lighting assessment for FY20 15 and FY20 16; Order 14 adopted the Strategic Plan; Resolution EME3302014 adopted the FY2015 and FY2016 Master Fee Schedule (which includes water and sewer rates, and waste collection fee); Resolution EME33 12014 adopted the 2014 and 2015 operating millage rates (Attachment #6 FY15 & FY16 Biennial Budget).

I additionally note that Mayor Walling and the City Council were fully engaged with City staff and me as this two year budget was developed. Also, as part of FY15, the day-to-day management of the Public Works Department and the Planning & Development Department has been handled by Mayor Walling.

Five Year Projection

FY15/FY16 budgets include more than $5 million each year in increased retiree health care, as a result of an injunction issued by the Federal District Court injunction. FY15 & FY16 is balanced, but projections for FY17 indicate a deficit between projected revenues and status quo expenses of $5 million. If there is no relief from the $5 million in increased retiree health care expenses, or no new revenue source, balancing the FY17 budget without compromising the City's ability to provide even the most basic level of city services . including public safety, will most likely not be possible. During the course of FY15, some progress was made in the challenge to the City's retiree healthcare decisions when the Federal Court's injunction was modified to allow for some of the City's changes to continue on a temporary basis. The impact of this change will be seen when the FY16 budget is reviewed and the FY17 budget prepared, beginning in early 2015.

Retiree Health Insurance Revisions

The City's approach to containing its OPEB liabilities has been to restructure both active and retiree health care benefits, and to eliminate the promise of retiree health care for new employees. The changes have had a significant impact on the City's OPEB liabilities, reducing the total unfunded liability from nearly $900 million to less than $400 million, and reducing the Annual Required Contribution (ARC) from $60 million to $22 million. The most recent valuation has further reduced the OPEB

As previously reported, the City's effort to restructure retiree healthcare was challenged by a group of retirees in a federal lawsuit, Welch v City of Flint. On January 3, 2014, the U.S. 6th Circuit Court of Appeals reinstated an injunction prohibiting the City from modifying retiree health care benefits. The City is aggressively litigating this matter, as it does not have the resources to afford the current level of healthcare coverage, and projected cost increases for the upcoming fiscal years are substantial. If the federal district court's decision is not reversed, the City will be in an extremely precarious financial position, with insufficient resources to meet basic functions

The City has worked to comply with the court's order, beginning with establishment of a reimbursement program for retirees whose expenses since January 3, 2013 are greater than their old plans. Work is also proceeding in anticipation of a court hearing sometime in the future, and settlement options are being explored.

On June 30, 2014 Judge Tarnow issued an order modifying in part his preliminary injunction barring the City from modifying retiree health care benefits. The Judge's order now permits the City to modify retiree health care as the City had proposed in a settlement proposal which was previously submitted to the Court.

Work has been underway since the ruling to implement the changes authorized by the ruling, including the establishment of a hardship program for those most seriously impacted by the changes to retiree health care. Authorized changes in plan design were implemented in November 2014, and the hardship program is being implemented in January 2015. The financial impact of these changes will be incorporated into the FY16 and FY17 budgets as they are being reviewed and developed in early 2015.

The City continues to utilize Cornerstone Municipal Consulting in an ongoing review of various Employee/Retiree health care options including plan design, delivery systems, Medicare Advantage, Medicare Wrap Around, benefit carve-outs, etc. in an effort to control health care costs. Administration of the City's health insurance benefits program is being handled by Cornerstone. In addition to the retiree lawsuit, attention is now focused on minimizing the City's cost for health care (for current employees and retirees) in the FY16 and FY17 budgets.

Operating Plan

The city continues to review all departments and services to reduce costs through contract rebidding, merger, consolidation, contracted service, shared services with other governmental entities, privatization or elimination. As a result of these reviews the City will determine what continuing activities should be subsidized with general property tax dollars, what will be paid by the users, which services can be eliminated, and which services or activities can be handled by lower cost vendors.

The functions, goals and key objectives of each department and functional area of the City of Flint have been encompassed in the Flint Strategic Plan 2015-2019. This plan also contains target dates for completion of each key objective. (Attachment #4: Strategic Plan for the City of Flint 2015-2019: 2nd Quarterly Report)

The progress made in this past second quarter of FY15 is presented in Attachment #4 and includes the narrative and the Strategic Plan with all objectives updated to the current status.

Major Up-coming Activities

68th District Court

- The City currently funds the operation of the 68th District Court; in FY14 this amounted to $3.5 million net. Senate Substitute for House Bill 5125 passed the Senate and the House in March 2014. The Bill authorizes consolidation of the 67th and 68th District Courts. It requires that the consolidation be approved by the City and the County. The County approval requires the affirmative vote of at least two-thirds of the County Board members. This affirmative vote was taken on December 10, 2014. Consolidation will be pursuant to the terms and conditions to be set forth in a Memorandum of Understanding to be approved between the City and Genesee County.

9-1-1 Operation

- On September 9, 2014 the Genesee County 9-1-1 Consortium voted to admit the City of Flint as a member of the Consortium. The goal to complete the incorporation of the Flint 9-1-1 Center operation into the Consortium is June 30, 2015. As part of this process the City of Flint will contribute $325,000 toward the $1.2 million cost for new equipment and building expansion at the Consortium's Corunna Rd. location. The City will also transfer the ownership of the simulcast tower. The City will also provide a no cost lease for the area on which the tower stands. The $325,000 is currently allocated for the Flint 9-1-1 phone system upgrade. This upgrade will not be required with the joining of operations.

Public Safety

- A data-driven public safety study to assess the operations of the City's Police and Fire Departments began in May 2014 utilizing the services of the Center for Public Safety Management. This report will be used to evaluate both departments'

organization and staffing. A presentation of these reports will be made to the Public Safety Committee of the City Council on January 22, 2015.

7 Point Transition Plan

- A City Administrator was selected in December 2014 and will begin work in February 2015.

- The Firefighters (IAFF) contract is before the State Emergency Loan Board awaiting decision. In December 2014 the City Council proposed an alternate contract in accordance with PA 436.

- Implement the revisions to modify retiree health care as the City had proposed in a settlement proposal which was previously submitted to the Court.

Facilities Management

- The Facilities manager is reviewing all city owned assets (both real property and capital equipment) to determine if disposal should be pursued.

- All city owned facilities are under review for energy savings, revenue generation from tenants, or possible liquidation.

- Formal assessment of the values of both Hurley Hospital and the City's utility system have been completed, concluding that no change in ownership status would be beneficial at this time.

Emergency Manager's Conclusions

Significant work has been accomplished to stabilize the financial situation of the City of Flint. The whole organization has been being restructured to reflect a smaller, leaner government operation. Services which were routinely provided are being inspected to determine if they should continue and if so, in what format. Technology solutions which can increase efficiencies are being implemented.

The many improvements to-date and those represented in the Strategic Plan have been based on data-driven management plans. The approval of the KWA participation, water and sewer rates, capital improvements, departments staffing and priorities are all based on using rational data analysis. Collecting, analyzing and then utilizing data concentrates work and dollars where the most beneficial results can be expected.

I acknowledge that substantial progress has been made, and the City is abating the financial emergency. Resolution of the financial emergency will not be complete without providing a basic framework for, and implementation of, an objective model for the organization to follow.

The 7 Point Transition Management Plan and the steps to Transition Chart which I have developed provides the roadmap to resolve the financial emergency and to achieve sustainability for the City of Flint. Significant progress has been made toward completion of the transition objectives.

A sustainable municipal organization incorporates the utilization of best practices financially, structures a governance model which clearly delineates between legislative, policy, and administrative responsibilities, and develops a management plan to provide services to residents in a consistent, reliable manner.

For two years, FY13 and FY14, the goal of containing overspending has been achieved. The city must continuously function within a balanced budget, eliminate the accumulated deficit and further reduce the legacy and pension costs. Projections through 2019 demonstrate Flint's continuing challenges. Projecting current revenues and expenses into the future shows a continuing gap of $2 to $4 million annually.

Stable revenue is necessary in order for this City, and most other cities in Michigan, to continue to avoid a bankruptcy situation. Flint residents have been asked to accept a significant 6 mill Police and Fire Protection Millage; and they have done so. A street lighting assessment and a waste collection fee have been imposed, as have significant water and sewer rate increases. However, our residents have not enjoyed increasing services, increasing property valuations or increasing employment opportunities.

As noted previously, there are very few additional revenue options. We are approaching the limit of the City's borrowing capability. Capital improvement funds are fully committed and the property tax millage rate in within .1 mill of maximum. State Revenue Sharing has increased but minimally. We made a request through our State Legislative representatives and the State Treasurer to push legislation to allow City voters the opportunity to decide to increase the income tax. This action could generate $7 million annually and would eliminate the City's structural deficit. A bill was introduced but was not acted upon in the most recent legislative session.

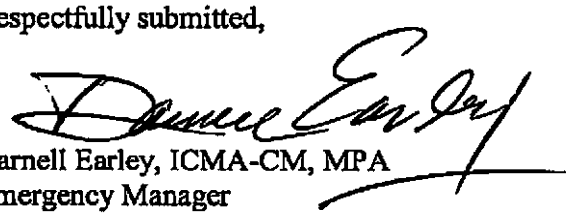
While the City will benefit from the temporary revision of Federal Judge Tarnow's order on retiree healthcare, it is important to remember that this lawsuit continues. Final resolution in the lawsuit will determine if the financial emergency is resolved or if it will force the City to consider bankruptcy. Bankruptcy is the alternative which we have worked diligently to avoid. If, by the beginning of FY17 the City of Flint does not receive permanent relief from retiree health care costs, either in the form of reduced city expenditures or additional revenues, it is unlikely that the City will be able to provide even the most basic level of city services.

I am preparing the process for the transition back to the Mayor Council management of the City. However, the City still has critical on-going budgeting issues. There has been action on several sections of the 7 Point Transition Management Plan, but more needs to be completed. Also, the City Council is still required to complete the Michigan Municipal League Level I Certification as required by Order 2 (04-12-13). So far, only Mayor Walling has met this requirement.

Flint has twice been placed in the hands of a State appointed emergency manager. A third failure should be avoided at all costs. I was very pleased to see that the voters of Flint approved a general revision of the City Charter.

I am now approaching the final quarter of my assignment as Emergency Manager in Flint. Many major steps have been taken to resolve the financial emergency. Flint is on a much more stable footing than it was three years ago when the financial emergency was first being addressed. However, the level of services being provided to the citizenry is at a minimal level, at best. I feel strongly that it is incumbent upon me to make sure that the city reaches its goal of sustained financial solvency. The financial emergency is not fully resolved until the long-term sustainable structure is secured.

Respectfully submitted,



Darnell Earley, ICMA-CM, MPA
Emergency Manager
City of Flint

6. FY15 & FY16 Biennial Budget

Attachment 1. Summary of Findings of the Flint Financial Review Team

Summary of Findings of the Flint Financial Review Team

- The City has a general fund deficit of $14,621,546 as of June 30, 2010 which was not eliminated within the two year preceding period.

- The City previously submitted a five year deficit elimination plan for a cumulative general fund deficit of $7,046,820 as of June 30, 2008. However, by June 30, 2010 the cumulative general fund deficit has grown to $14,621,546. An updated plan was submitted for 2010 does not purport to eliminate the cumulative deficit until 2030 and that relies upon the issuance of an additional $12 million of debt in 2013.

- A structural operating deficit existed in the general fund as of June 30, 2007, 2008, 2009, 2010 and the general fund is projected to have a $6,768,864 deficit as of June 30, 2011.

7 Point Transition Management Plan

Goal: To provide a strategy for determining and evaluating relevant and specific criteria for assessing when the City of Flint might be prepared to emerge from Emergency Manager (EM) oversight to a Transition Advisory Board (TAB), as provided in Public Act 436. The seven points identified provide comprehensive and well defined benchmarks to be reviewed before the determination is made. The Plan also defines a data-driven and measurable process for the objective, results-oriented determination of facts. The Plan establishes the criteria now so that it is clear what the conditions are that will have to be satisfied before the Emergency Manager recommends the establishment of a Transition Advisory Board

GOAL	STRATEGY	OBJECTIVES	STATUS
1. Deficit Elimination Plan	Deficit Elimination Plan and Reserve Accumulation Plan will be presented by the EM/Mayor/Finance Dir. to City Council through its Finance Committee to receive Council support Also a commitment by the Mayor and Council to implement the plan will be required	City Council to pass resolution of support for DEP/RAP from EM/Mayor/Fin. Dir. Receive Treasury acceptance of the DEP/RAP. Confirmation by Mayor and Council that DEP/RAP actions will be a top priority in budgeting	_____ _____ _____
2. Five-Year Financial Analysis	The development, monitoring and updating of a five-year financial analysis is critical to the ongoing challenges of financial solvency. It must remain an ongoing process to measure the City's ability to fund services, produce budgets, and proactively manage expenditures It should be an expectation of the Council that the EM/Mayor/Fin. Dir. shall annually prepare and Council shall review and adopt said projection; and shall continue to use the projection as a basis for future budgeting actions.	EM/Mayor/Fin. Dir to annually prepare a 5 yr. R/E projection. Council Finance Committee review 5 yr. analysis and move to Council. City Council adopts 5 Year Analysis. Finance Committee shall annually review analysis in February each year and send to Council for approval.	_____ _____ _____ _____
3. Governance	The EM will consider recommendations from the Blue Ribbon Committee, National Civic League Model Charter, proposed charter amendments, review of electoral structure, Executive appointments, etc. It is expected that a formal agreement would be reached among the EM, Mayor, and Council as to what governance revisions are to be implemented, including time frames for implementation.	Blue Ribbon Cmte. Complete Report and Submit to EM Mayor and Council Submit Comments on Report to EM EM developes proposed governance structure and sends to Governor. Mayor and Council have an opportunity to review and comment on EM proposal. Completion of City Ordinance review by Council as proposed by EM.	_____ _____ _____ _____ _____

GOAL	STRATEGY	OBJECTIVES	STATUS
4. Organization Development	Review the City's organizational structure including: Public Safety, 9-1-1 plan, courts consolidation plan, recommendations on other long-term services, and role of the city administrator (who will be appointed prior to the TAB). Finalize the organizational relationship among Mayor, Administration and Council. This will result in an agreed upon detailed description of the roles and responsibilities of the Mayor and Council, including items such as respective roles in strategic planning, budgeting, monitoring and assessment of results, appointments, and protocols for addressing citizen complaints.	EM/Mayor determines recommended City organizational structure. EM/Mayor to recommend Council action (ordinance changes) to implement organizational structure Council to review and adopt revised organizational structure. EM/Mayor to hire City Administrator/Manager Finalize organization structure and roles: Mayor, Council, Administration. Labor contracts to be completed for all City unions	
5. Legacy Costs	Retiree Health Care remains the biggest challenge to managing legacy costs and the City is currently facing a legal challenge. It will be unlikely that the financial emergency will be declared resolved until this issue is settled in a manner which does not risk the solvency of the City. Sustaining the changes within RHC are essential to the City's future solvency.	Mayor and Council to support City's position on retiree health care or adopt measures offsetting the increased costs. Annual budgets to include payment of appropriate pension and health care costs and liabilities.	
6. Strategic Plan	The adoption of a long-range strategic plan by the Emergency Manager, Mayor, and Council for the governing actions of the City will provide a guidance mechanism for determining budgeting, priorities, goals and objectives.	EM/Mayor/Fin Dir. to present 5 yr Strategic Plan through Finance Cmte. to Council for approval. Council to set spending priorities. EM/Mayor to utilize Strategic Plan to develop budget. Council to adopt budget in line with Strategic Plan and budget priorities. Council to receive quarterly reports from Mayor/Fin. Dir. on progress of achieving strategic objectives and priorities. Strategic Plan to be updated annually	

GOAL	STRATEGY	OBJECTIVES	STATUS
7. Sustainability			
	Factors for determining sustainability are rooted in the 7 points. More specifically, the measures that will be evaluated include: achievement of consensus decision-making on the part of the Mayor and the Council, adoption of best practices, continuing commitment to training and development for the Mayor and Council members, ongoing monitoring and updating of plans necessary for the financial stability of the City including but not limited to 2-year budgets, 5-year financial analyses, and the ongoing implementation of the Master Plan.	Council and Mayor update methods to develop policy recommendations and achieving consensus	
		Council and Mayor attend all training sessions as scheduled by EM.	
		Council and Mayor to actively participate in development and adoption of 2 yr budget.	
		Implement Master Plan (evidence of Master Plan implementation in annual budget).	
		Define and incorporate financial and organizational best practices.	
		Implement system of performance measurement.	
		Utilize data-driven methods of decision making and performance measurement.

Attachment 4. Strategic Plan for the City of Flint October 1, 2014- December 31, 2014: 2nd Quarter Update

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

DATE: January 5, 2015

TO: Joshua Freeman, President
Flint City Council

FROM: Darnell Earley, Emergency Manager
Dayne Walling, Mayor

RE: City of Flint Strategic Plan, Second Quarter Report

In 2014 the City Council of Flint adopted a Strategic Plan for the City of Flint. This plan announced a vision, mission, and goals to guide the operation of the City government for the next five years and was adopted in the context of the City's recently adopted Master Plan for the community. It was followed by a statement of budget priorities adopted by the City Council and ultimately by a biennial budget for FY15 and 16. The budget also projected the city finances for the following three years – FY17, FY18, and FY19. During this same period a Deficit Elimination Plan and Reserve Accumulation Plan was approved by the State and a Seven Point Transition Management Plan was enacted to guide the way by which the operation of the City will be assumed by the Mayor and City Council. The integration of the Strategic Plan into the organizational processes of the City is a key component of the Seven Point Transition Management Plan.

In total, these actions comprise a broad framework guiding the direction of the Flint City government as it restores financial stability and once again becomes an active leader focused on making Flint a safe, secure city attractive to residents, businesses, students and visitors.

The first quarter of FY15 ended on September 30, 2014 and the results were reported to the public in October. A copy of that report is available on the City's web site.

We are pleased to report on the progress which has been made during the second quarter, which ended on December 31, 2014. While significant progress has been made on many fronts significant challenges and risks remain.

We wish to commend the Management Team and our employees for their dedicated efforts to move the City forward. We look forward to discussing the contents of the report with you.

City of Flint Strategic Plan

Quarterly Report

October 1, 2014 – December 31, 2014

City of Flint Quarterly Report
October 1, 2014 – December 31, 2014

Overview

The progress of the City of Flint is now defined by the steps it takes to achieve its stated vision, mission, and goals. Flint City government is focused on enabling Flint to become an attractive place to live, work, play, study, and visit. In order to do this, the city government must become and remain financially stable, must provide residents, businesses, students, and visitors with an adequate level of municipal services. It must also have the capacity to encourage and guide others in the achieving its vison and goals.

Achievement of the vison will be measured by the progress which is being made towards specific goals and objectives. Over 300 specific objectives are identified in the current plan, with nearly 100 completed. They include increasing public safety, improving infrastructure, creating jobs and development, eliminating blight, engaging citizens and managing the financial and administrative challenges which are reflective of an organization striving to regain sustainable financial solvency. Much of this work is done in partnership with the community and everyone is to be commended for their willingness to embrace change. Important areas of progress from this past quarter include:

- Voters approving the creation of a charter commission and the adoption of three charter amendments to strengthen financial management and reduce administrative costs.
- City Council supported the first reading of a package of ordinance reforms to codify the strategic planning process and the best practices in financial management.
- Flint recorded its lowest number of homicides in more than ten years and the overall violent crime rate was down in nearly all areas, compared to 2013.
- Flint's economy continues to improve steadily with coordinated economic development efforts supporting more than 300 jobs in 2014 including jobs with expanding companies in health care, manufacturing, retail, and environmental technologies along with new small businesses.
- Improvements in infrastructure are progressing in accordance with the strategic plan and nearly completed combined capital improvement plan.
- A new City of Flint website is ready to be launched in January, providing citizens, businesses, students and visitors have access to timely information regarding services and information.
- The FY2014 audit was completed on time and confirms the reduction in the General Fund deficit to less than $9 million and the stabilization of other City accounts.
- The transition from state oversight to home rule is advancing with the announcement of the new City Administrator and the preparation of a final list of items to be completed before April 2015.

Assuring Accountability to Adopted Plans and Budgets

As the City of Flint continues to work towards its adopted Vision of being, "a well-managed, financially stable, and accountable government," there is a shared commitment to continually updating and improving plans and budgets. The City Council is poised to adopt a package of ordinance reforms to codify the strategic planning process and the best practices in financial management. The ordinance reforms will require the City of Flint to establish priorities, regularly update the five year strategic plan, adopt a biennial budget, receive quarterly reports on the status of the budget, consider quarterly budget amendments, and develop appropriate fund balances and retiree health care reserves.

This is a report on the progress made during the three month period ended December 31, 2014. This three month period is the second quarter of the City's Fiscal Year 2014, which began July 1, 2014. A first quarter report was presented to the community in October, 2014, and is available on the City's web site.

Highlights

Increasing Public Safety

The City of Flint is increasing public safety through the involvement of the community, collaboration with the Michigan State Police, Genesee County Sheriff's Department and other law enforcement partners, and, most importantly, the hard work of the Flint Fire Department and Flint Police Department along with the 911 center and courts. While managing force reductions as required by the budget, success is notable in the following:

- The City has selected the State Records Management System for replacement of its current system.
- The Citizens Radio Patrol is now active and planning on expansion in 2015.
- Leads on Line has been implemented and is functional.
- 100% of Flint school children have been provided with fire safety and prevention education and all Senior Centers have been provided with fire safety and prevention information.
- Fire suppression personnel have distributed arson reward literature in the community.
- A reorganization has been implemented within District Court resulting is reduced costs and upgraded technology.
- A reduction in Violent Part 1 Crimes continues, including a 40% reduction in homicides; with the exception of arsons, other major areas are also showing a decline.
- Response time to calls for service for the Police Department has been reduced by 7.5%, but still short of the goal of 8%.
- An alternate plan to calls for service not requiring direct police response is being developed to further reduce response time and to improve effectiveness of available resources.
- An organizational study of the police and fire organization and staffing is nearing final completion, and will give guidance to future organizational and budgetary decisions regarding public safety

Improving Infrastructure

The mission of the City of Flint Government is to assure that residents, businesses, students and visitors receive municipal services in a customer friendly and financially responsible manner. Infrastructure, in the form of utilities, streets, trails, and waste collection, are vital municipal services that require ongoing attention due to the age of current systems and the express desire of the community for modern improvements. Despite evident challenges, the Department of Public Works has developed plans and steps are being taken to strengthen Flint's infrastructure systems. Strategic objectives have been met, or are in progress in these areas:

- A list of capital improvement needs for city facilities was developed and provided to the public for review as part of the development of the Capital Improvements Plan portion of the Master Planning process, which is scheduled for final submission to the Planning Commission and the Flint City Council in January 2015.
- Repairs and improvements to the City's water treatment and distribution system are being made to ensure the water is safe to drink and for all other purposes.
- A written pipe replacement matrix has been developed for determining the priority of pipe replacement annual plans.
- Infrastructure repairs on the water and sewer system continue with nearly 40 valves replaced this quarter alone.
- The process of selecting a vendor to replace all inoperable residential meters is underway.
- Engineering has started for the replacement of seven miles of underground pipe. Replacement is scheduled to begin this spring.
- Work has started on rebuilding manholes as a part of the water infiltration elimination program.
- A list of potential shared services opportunities with Genesee County has been developed.
- The process of selecting a vendor and funding mechanism to provide an energy evaluation of the City Hall campus is underway.

Fostering Jobs and Development

The City's Department of Planning and Development has the mission of organizing and facilitating, "targeted investment and rational, well-designed and physically integrated land use and development that advances economic prosperity, eliminates blight and stabilizes neighborhoods, protects the environment, and provides a better quality of life in the city." With the adopted *Master Plan for a Sustainable Flint* as a framework, the Department is working with partners to support long-term planning, comprehensive economic and community development including effective planning, zoning, business licensing and permitting, and parks maintenance. A number of efforts are being made to implement the specific strategies identified in the master plan, including developing a Capital Improvement Plan and a new zoning code. Other initiatives are underway that leverage grants and opportunities that fit within the community's vision. Areas of progress include:

- Coordinated economic development efforts supporting the creation more than 300 jobs and $850 Million in capital investment in 2014 including jobs with expanding companies in health care, manufacturing, retail, and environmental technologies along with new small businesses.

- A review of the process of submitting planning applications was conducted in order to assure that applications are processed in a timely manner.
- At least three "Adopt a Park" agreements have been executed to fulfill the initial commitment in the Strategic Plan and the "Friends of Berston" has been established as an independent non-profit organization.
- The capacity for conducting rental inspections will be increased shortly as a contract for inspection services is being finalized.
- Significant progress has been made with the sale of homes at Smith village, with only 9 of the 39 remaining unsold.
- Ongoing coordination with the Land Bank to continue demolitions.
- A draft of the City's comprehensive 5-Year Blight Elimination Framework has been completed and is being circulated for review by the public, partners and the Planning Commission with the intention of an adoption as a policy document in the coming quarter.
- An agreement with MDOT has been executed which will allow the construction of the Genesee Valley trail and connection to the new Chevy Commons to begin this spring.
- A preliminary draft of the City's Zoning Code has been completed and is being prepared for public review in 2015.
- A draft of the Capital Improvement Plan has been completed and shared with the public; consideration of adoption by City Council is planned for January 2015.
- A planning grant application to the EPA was submitted in order to provide for additional planning for the area around Chevy Commons.

Managing Financial and Administration Challenges

As the City of Flint moves to resolve the financial emergency, a number of financial and administrative challenges are being managed in accordance with the Strategic Plan. The following objectives have been completed:

- The City's accumulated General Fund deficit has now been reduced to less than $9 million from the $12.9 million which existed as of June 30, 2013, more than double the amount targeted in the state adopted Deficit Elimination Plan.
- A City Administrator has been selected to lead the City government as it transitions from oversight by an Emergency Manager back to home rule.
- A formal assessment of the values of both Hurley Hospital and the City's utility system have been completed, concluding that no change in ownership status would be beneficial at this time.
- A decision has been made to rejoin the County 911 Consortium, which will improve service to the Flint community while reducing overall costs.
- Video capabilities have been improved in City Council Chambers, providing for improved recording of Council proceedings.
- A review of professional development needs for city officials, department heads, and employees has been completed.
- A new fixed asset accounting policy has been implemented.
- The FY14 audit has been completed and filed with state
- An Internship program has been established for the Finance Department.
- Staffing is now in place to enhance delinquent collections.
- The office space for the Assessing Division has been renovated to address health and safety issues.

- New labor contracts were negotiated and implemented with AFSCME 1600 and 1799, and FPD Command officers, providing consistent benefit packages, achieving short and long term costs, and improving efficiency of operations.
- A new labor contract was imposed on FPOA for the same purposes.
- Modifications to exempt employee policies were approved for the same purposes.
- A new Family Medical Leave Act administration program was implemented
- A new Employee Assistance Program was implemented.
- Several specific vehicle and equipment acquisitions were made.
- New lease arrangements for several vehicles were also implemented.
- GPS tracking units were installed on several city vehicles as a pilot project.
- A regular schedule of seasonal meetings with DPW to assess vehicle readiness was established.
- A technology training calendar was established for all employees.

City of Flint Challenges Going Forward

Progress continues on the remaining objectives, with progress to be reported in the next quarterly report. Challenges to the City's progress continue in the form of events such as:

- While the transition from DWSD to KWA is underway, including the use of the Flint River on a temporary basis, the work of producing treated water continues to be complicated by the systems' aging infrastructure and varying temperatures.
- The departure of three key management staff in Finance and Human Resources will affect timelines for completion of some objectives.
- Difficulties in finding qualified candidates for plumbing and mechanical inspectors has affected the timeliness of providing inspections.
- The inability of the City and IAFF to reach a mutually acceptable labor contract patterned after the basic terms and conditions in all other contracts has resulted in a delay in achieving desired cost savings.
- The slow progress of the retiree health care lawsuit continues the uncertainty of the City's financial stability.
- Slow deployment of budgeted personnel assigned to delinquent tax collections may affect the ability to reach targeted revenues amounts.
- Evidence of consistent instances of water theft has required the assignment of public works, finance and public safety personnel to investigate and prosecute offenders.

Objectives Added or Removed

A viable plan must be flexible enough to adjust to unexpected circumstances and these modifications need to be made transparent to the community. Significant adjustments to this plan as of the end of the second quarter include:

- Objectives for improving City 911 operations are being replaced with the objective of transferring City 911 operations to the County 911 Consortium by July 1, 2015.
- An objective of developing an agreement with Genesee County for the consolidation of the 67th and 68th District Courts by January 1, 2016 will be added.
- An objective of improving inventory control in the Utilities and Fleet divisions by June 30, 2015 will be added.
- An objective of selecting permanent replacements for the City Treasurer, Human Resources Director, and Finance Director no later than April 30, 2015 will be added.

- An objective to reduce instances of water theft by 50% no later than June 30, 2015 will be added.
- An objective to develop policy review and recommendation regarding the "My Brother's Keeper Initiative" by February 1, 2015; and to develop and help launch action plan by September 1, 2016 will be added.
- Secure funding and complete construction of a road diet, and addition of bike lane, along Harrison Street by September 1, 2016, per the Master Plan, will be added.

Conclusion

Adoption and implementation of a strategic planning process is one of the elements identified by Flint's Emergency Manager in the 7-point Transition Plan as necessary for the transition back to Home Rule. Progress is being made in accordance with the expectations of the Strategic Plan and its specific objectives. Significant steps are being taken to improve its financial condition and to restructure the organization to improve efficiency and effectiveness. Steps are also being taken to prepare the City for return to traditional Home Rule governance.

The second quarter report shows completion of a number of specific objectives and progress on others. There have also been a number of unexpected events which have or will affect timely completion of objectives, or resulted in the elimination or addition of others. These types of adjustments are to be expected in the implementation of any plan.

The positive progress outlined in this report must be read in the context of the current overall condition of the City of Flint. The level of services currently provided by the City is marginal as it struggles to regain financial solvency. Flint continues to be challenged by population loss, relatively low per capita income, aging infrastructure, and an insufficient revenue stream to support a desired level of services. It still has a significant General Fund deficit to be addressed, along with significant legacy costs. And it still faces the possibility of insolvency should the challenge to changes in retiree health care prevail.

GOVERNANCE AND ADMINISTRATION

VISION Statement

The City of Flint's Governance will adapt to change and be a model of professionalism, transparency, and sustainability in order to provide effective government to each of our City's residents (as written in the Charter Preamble)

MISSION Statement

The Executive Management and Elected Leadership directs and guides the City government in order operate in an open and financially responsible manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits within the context of the City of Flint Master Plan

		Implement Quality Assurance program	C	C

FIRE DEPARTMENT

VISION Statement

A community educated on all matters related to fire safety and fire protection resulting in minimal damage and injury from fire incidents

MISSION Statement

Utilizing available resources, the Flint Fire Department will respond quickly and effectively to fire calls, and will lead efforts to educate the community on all matters relating to fire safety and protection

DIVISIONS		FUNCTIONS	KEY OBJECTIVES FY15 & FY16	1ST QTR STATUS	2ND QTR STATUS
FIRE	ADMINISTRATION & EMERGENCY MANAGEMENT	Department Management; coordination of emergency management activities within city	Maintain average fire response time under 9 minutes in FY2015 and develop plan to reduce response time in FY16 to less than 8 minutes	I	I
			Turnaround time for Fire Inspections to be 5 days or less	C	C
	FIRE SUPPRESSION	Deployment of Fire Fighters to emergencies	Implement new organizational structure based on 75 full-time positions	C	C
	FIRE INSPECTION & ARSON INVESTIGATION	Investigation of suspicious fires; conduct of commercial building inspections	100% Flint School children contacted and provided with fire safety and prevention program	N	C
			100% of Senior Centers provided with fire safety and prevention program	N	C
			100% of City Block Clubs provided fire safety and prevention program	N	I
	COMMUNITY EDUCATION	Education of residents and businesses in fire prevention	At least 4 times per year, the Fire Department will provide the community with information regarding fire safety and prevention	C	C
			Evaluate and define role of the Fire Department in Emergency Management, with report provided to EM	C	C
			Reduce energy in Fire Departments by 20%	I	I
			Continue progressive training once per week	I	I
			Continued training for Suppression Personnel as technology develops for today's high-tech environment	I	I
			Implement physical fitness program	I	I
			"Knock and Talk" Fire Suppression Crews and Prevention Staff to distribute Arson Reward literature to 100% of residents	I	C
			Educate juvenile firesetters by providing one-on-one discussion with 10 juveniles	I	I

68th DISTRICT COURT

VISION Statement

The 68th Judicial District Court will be a leader among Michigan Courts in the provision of quality service, equal access to a fair and effective system of justice, and protection of the public's safety

MISSION Statement

The 68th Judicial District Court will provide timely, fair, and impartial justice in all matters properly presented to the Court.

DIVISIONS	FUNCTIONS	KEY OBJECTIVES FY15 & FY16	1ST QTR STATUS	2ND QTR STATUS
DISTRICT COURT				
ADMINISTRATION	Overall Court Management	To comply with all Trial Court Performance Standards-Annually, as dictated by the State Court Administrative Office	C	C
JUDICIAL PROCESSING	Courtroom activities	Improve Court collections-Annual increases by way of Amnesty and Collections Agency, comparing results at the end of each fiscal year to the previous year	I	I
PROBATION	Provides oversight of probationers	Re-establish Probation Department with (1) Probation Officer	I	I

PUBLIC WORKS

VISION Statement

The vision of the Public Works Department is to be a well managed and well trained workforce that utilizes all available resources, technology, and collaborative means to maintain the City's above and underground infrastructure and facilities

MISSION Statement

The Public Works Department is committed to the development of qualified managers and workers with consistent ongoing training, data driven decisions, and the creation of new job performance measurables

The DPW will aggressively engage in strategic local and state level partnerships while continuously implementing new and improved technologies, procedures, and policies

DIVISIONS	FUNCTIONS	KEY OBJECTIVES FY15 & FY16	1ST QTR STATUS	2ND QTR STATUS
UTILITIES	Water Treatment			
WATER TREATMENT PLANT	Water Distribution	Complete the electrical upgrades on Cedar Street Pumping Facility	I	I
WATER POLLUTION CONTROL	Distribution System Maintenance	Complete the engineering design work for the Hamilton Dam upgrades	I	I
WATER SERVICE CENTER	Sanitary Sewer Operation & Maintenance	Complete the rehabilitation of the Torrey Road Booster Station	I	I
	Storm Water Maintenance	Complete and implement a comprehensive pay scale evaluation for all WTP employees	I	I
	Dam Maintenance	Complete phase II (of III) of the WTP upgrade in preparation of transition to KWA	I	I
	Water Turn On's/Off's	Create GIS maps of utility assets (including base-layer)	N	N
	Cut & Plugs	Implement tracking program for main breaks and sink holes with monthly reporting	I	I
	Wastewater Treatment	Develop and implement a written and sustainable "water loss" program. Program is to target the identification of a "baseline" loss and create means to maintain a loss percentage of under 16%	I	I
	Industrial Pretreatment Compliance	Replace 3,000 residential meters	I	I
		Develop and implement a written root control matrix to reduce infiltration into the sanitary sewer systems	I	I
		Develop a written pipe replacement matrix that uses multiple criteria to identify the priority pipes to replaced annually	I	C
		Identify a consultant to write the scope for a comprehensive energy audit of all Utility facilities and send RFP	I	I
		Develop list of shared service opportunities with Genesee County Drain Commissioner and setup a meeting schedule for talks	I	C
		Complete the de-commissioning of the incinerator and construction of a load out facility at the Wastewater Treatment Plant	I	I
		Complete the upgrade plan of turning methane gas from the digester into energy	I	I
		Complete the development and use of web site access for residents to report main breaks	I	I
		Complete Cut & Plug list for hardest hit demolitions	C	C
		Implement defined response time policy for WSC	N	I
		Develop capacity to effectuate 100% of non-pay water shut-off notices	C	C
		Implement plan for improved inventory control as developed by the Finance Department by June 1, 2015	-	N
		Reduce incidence of water theft by 50% no later than June 30, 2015	-	I

City of Flint 5-Year Financial Plan

Preface

This adopted budget for the City of Flint covers the FY15 and FY16 fiscal years which begin July 1, 2014 and July 1, 2015 respectively. Financial projections for the following 3 fiscal years are included as well.

This budget has been developed within the context of the City's recently adopted Master Plan, the Vision, Mission, and Goals for the City government as adopted by the City Council, and the Budget Priorities as adopted by the City Council. Accompanying this budget is a preliminary statement of objectives initially proposed to be accomplished during the two years.

Taken together, the budget and strategic plan will serve as a template to move the City government forward to become a well-managed, financially stable, and accountable organization focused on creating a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

However, this budget demonstrates the continuing financial challenges facing the City of Flint. Stagnant revenue growth in property tax and income tax revenues, coupled with significant increases in legacy costs, retiree health care in particular, create a significant gap between revenues and expenses which require increases in other revenues and decreases in City staffing and services including the possibility of adjustments in public safety services.

Unfortunately, the financial forecast for the next several years beyond FY16 show a continuing gap between projected revenues and expenses. Within the next few years, without significant means to identify and collect additional revenues, or to further reduce the cost base, the City of Flint will be extremely challenged to provide even the most basic of City services.

Over the last several weeks, this adopted budget has been reviewed by the City Council, which will also held a public hearing to receive citizen input. The Mayor and Council subsequently provided comments and recommendations pertaining to the budget to the Emergency Manager.

Background

The City of Flint has been in state receivership since December, 2011, as a result of consistent deficits in the General Fund, a decline in pooled cash, unrealistic budgeting, and unfunded liabilities for postemployment benefits. Significant progress has been made in addressing these financial issues, as the $19.1 million deficit at the end of FY12 had been reduced to $12.9 million at the end of FY13, cash position had improved, and the FY14 budget was realistically balanced, with further reduction of the deficit anticipated.

The FY14 budget was designed and implemented with the same goals in mind – operating within the constraints of available revenues; restructuring operations and cost factors to enhance future financial stability, and continuing to reduce the remaining $12.9 million deficit. The FY14 budget was constructed with the specific intent of further reducing the deficit by a minimum of $1 million, by budgeting expenses at $1 million less than projected revenues. As of January 31, 2014, seven months into the FY14 year, revenues and expenses are on target.

In order to regain and maintain financial solvency, it is not only necessary to eliminate the remaining accumulated deficit but to have an adequate amount of reserves to protect the City in the event of unexpected financial losses. Planning to accomplish this requires a continual dedication of revenues over the next several years to eliminate the remaining deficit and establish an adequate reserve level. A draft deficit elimination plan to accomplish this is currently under review by the Michigan Department of Treasury.

Making progress to date has required hard decisions and sacrifices for all. The FY13 and FY14 budgets were balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Revenue increase included a 25 percent increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire, establishment of a special assessment district for street lighting, and implementation of a fee sufficient to cover the cost of waste collection. Expenditure reductions included elimination of 20 percent of the City's workforce, compensation decreases equivalent to a 20 percent wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan.

The actions taken to-date to restructure healthcare benefits for current employees and retirees have also had a significant impact on reducing both current costs and long-term liabilities. The 20% reduction in the workforce required significant reorganizational activities focused on reducing current costs. Long term liabilities were reduced by eliminating traditional defined benefit pension programs for new employees in favor of hybrid plans; by moving the City's retirement system into the a state wide retirement system; by restructuring health insurance benefits for current employees and placing retirees into those same plans; and by eliminating the promise of retiree health care for new employees in favor of providing retiree medical savings accounts. Much of the positive financial result in FY13 came from these actions. The restructuring, which was implemented during the course of FY12, reduced the City's OPEB liabilities alone from nearly $900 million to less than $325 million as noted in the FY13 audit.

The efforts of the City to regain financial solvency have been aided by support from numerous Federal, State and private partners. State police troopers have been placed in the City to support local law enforcement efforts, and funds have been allocated to enhance prosecution activities and to operate the City's lock up. The Governor's proposed budget continues this support.

The steps taken to begin to restore the City to financial solvency have not been without conflict and changing circumstances. A significant legal challenge has been made to the decision to move retirees from their historical health insurance plans into the same plans offered current employees. This action resulted in an initial cost reduction in FY13 of $3.5 million to the City and imposed deductibles and co-pays on retirees. This challenge is currently pending in federal court. If the challenge is ultimately upheld, it will pose a significant challenge to the City in its efforts to regain and maintain financial and service solvency. Due to the stay imposed by the federal court, the City must increase its budget for retiree healthcare costs in the FY15 budget by $5 million and may even need to pay more as retirees seek reimbursement for past medical expenses. These healthcare expenses will continue to increase in subsequent years.

Legacy costs in total will continue to be a cost burden to the City of Flint. In FY 14, the City budgeted $30.2 million for its retiree healthcare and pension costs, an amount equal to 17% of its total revenues. The General Fund alone budgeted $16.4 million, an amount equal to 31% of its total revenues. By FY19, it is projected that the City will need to budget over $43 million, an amount equal to 23% of its total revenues. For the General Fund alone, the amount projected to be needed will exceed $21 million, an amount equal to 34% of General Fund revenues.

The future financial solvency of Flint will also be challenged by a continuing structural deficit. As part of the planning for future financial solvency, five year projections and a strategic plan were developed. This exercise indicated a significant financial challenge forthcoming in FY15, due to the current status of the retiree health care lawsuit and the ending of a major grant supporting firefighting resources. Future year projections also show a continuing gap between revenues and projections.

Finally, the most important challenge to be addressed in the City of Flint will be instituting structural changes in the organization of the City to foster financial solvency as a core value and to assure that future governance and management of the City is conducted in a financially responsible manner. To this end, the current Emergency Manager has created a Blue Ribbon Committee on Governance, charged with developing recommended changes to current ordinances, procedures, and the Charter. The recommendations of the Task Force are anticipated within six months.

Overview

The City of Flint has spent considerable time planning for the community's future through the comprehensive master plan and creating an organizational framework focused on the City's new vision, mission, and goals. The 2-Year budget has been developed in a balanced manner to best meet the needs of a variety of service areas and challenges.

However, challenges to changes in retiree healthcare and the loss of grant funds have required that a new service baseline be established; this also poses significant and immediate challenges to the City's financial viability. Current court rulings in regards to the retiree health care lawsuit have increased retiree health care expenses nearly $5 million in FY15, and the loss of the SAFER grant ($ 3.4 million) eliminates funding for 39 of the City's 65 firefighters.

The harsh winter increased the need to remove hundreds (if not thousands) of damaged and fallen trees throughout the city, and to repair damaged roads and sidewalks. The winter also placed additional stress on the antiquated city facilities as they faced water leaks and damage to walkways and sidewalks. Implementing the master plan, and continuing to eliminate blight will also require dedicated resources going forward.

The recently completed study of the water and sewer system finances also demonstrated a shortfall in revenues needed to operate this critical service and provide for necessary maintenance. As much as the high rates for providing water and sewer services pose significant financial challenges and community implications, the alternative of not addressing basic maintenance and adjustments based on guidance in the master plan is equally challenging.

These factors have a significant effect on the adopted staffing levels. Reductions in city staffing over the past two years have come almost exclusively from City services other than police, fire, and 911. As a result, those remaining city services are thinly staffed, and despite valiant efforts of dedicated employees, service levels have been reduced. In some cases, the reductions have been severe and counter-productive. For example, reductions in customer service at Treasury and staffing at Utilities has reduced capacity to effectively pursue collection of delinquent bills. Reductions in Information Technology have slowed the implementation of technology which can improve effective processing. Reductions in Human Resources have slowed the process of hiring employees. Reductions in Building Safety have slowed the process of conducting inspections and issuing permits, and have eliminated much in the way of code compliance efforts.

Therefore, balancing the budget in a financially sustainable way requires addressing the impact of these issues. It also requires that they are addressed within the context of the Mayor's and Council's stated budget priorities. The Council's stated priorities are:

- Maintaining police and fire staffing levels at the maximum level feasible
- Reducing the General Fund deficit by at least $1 million
- Continuing efforts to reduce blight, including demolition
- Hiring an experienced City Administrator
- Assure that capacity exists to implement the Master Plan
- Add capacity in the areas of Economic Development

- Fund years 1 & 2 of capital improvements identified in the Master Plan
- Improve street maintenance
- Establish parks partnerships
- Improve customer service through training and technology
- Increase removal of dead and diseased trees
- Evaluate ways to reduce water and sewer rates for constituents in the budget process

Balancing the budget responsibly in the context of these immediate and significant financial challenges, while addressing stated priorities, is a significantly difficult task. The unplanned addition of $5 million in expenses for increased retiree health care is a "Game-Changer" and seriously undermines the ability of the City government to move forward in becoming a positive force helping to create a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve quality of life.

As the development of the FY15 budget began, there was a significant gap between projected General Fund revenues and General Fund expenses alone. While some revenue sources indicated a slight increase over the current year, projected expenses were significantly above the current year. The expense increases are due primarily to a nearly $5 million increase in costs for retiree health care and an increase in the per person cost of pension contribution. In addition, there was recognition of the need to assure capacity to implement the Master Plan to continue addressing blight, to address increased costs of health care for current employees, and to address critically needed facility maintenance.

The budget presented here is balanced in a financially responsible manner, in that revenues and expenses meet. However, the consequence is that, where possible, revenues have been increased, and where necessary, expenses have been decreased. Whether the result is an acceptable result, in the context of the needs and the future of the City, is uncertain.

It is clear that proposed changes in service levels reflected in this budget are significant, and that at the same time the financial plan is being finalized within the confines of available revenues, considerable efforts will continue to mitigate the impacts. Continued efforts to achieve a satisfactory resolution of the retiree healthcare lawsuit, as well as to continue searching for additional sustainable funding, or to engage in mutually beneficial partnerships will continue. The changes necessary to achieve necessary balancing of revenues and expenses will be done in a managed way, not in a crisis response.

The financial projection for the years following FY15 and FY16 show the continuing challenge of a structural deficit. Without a means to identify a new significant revenue source or to sustain and even make further reductions in the City's cost base, such as retiree health care, Flint will be extremely challenged to provide even the most basic of City services in future years.

Highlights of the Adopted Budget

Costs to taxpayers are increased....

- Property tax levies remain unchanged
- Street lighting assessment increased to $71 in FY15 and $74 in FY16
- Solid Waste fee increased to $163 in FY15 and $169 in FY16
- Water and Sewer rates increased by a total of 6.5% in FY15 and 6% in FY16

Costs to City employees are increased....

- 20% premium share for health insurance implemented
- Premium contribution for non-Medicare eligible employees retiring after July 1, 2014 established
- 50% premium share for dental and vision insurance implemented
- Vacation and sick leave replaced with PTO, new accumulation caps established
- All new employees enrolled in hybrid pension plan
- All new employees enrolled in RMSA in lieu of promise of retiree health care

Legacy costs are increased significantly...

- General Fund costs for retiree health care are increased 25%, from $8 million to $10 million in FY15, increasing on an annual basis thereafter
- General Fund costs for retiree health care and pension in total are projected to increase from $16.4 million (31% of total revenues) in FY14 to $21.5 million (34% of total revenues) by FY19
- For all funds, total costs for retiree healthcare and pension are projected to increase from $30.4 million (or 17% of total revenues)in FY14 to $43.5 million (23% of total revenues) by FY19

City staffing is budgeted at 522 in FY15 and 523 in FY16.....

- Staffing is maintained in District Court, 911, Finance, Assessing, Transportation, IT, and Fleet
- Police Department – Total department staffing will be 115, with 7 vacant positions and 29 additional positions eliminated through attrition by end of FY15. Additionally, a recently offered COPS Hiring grant for six School Resource Officers will not be accepted. The next several months will be focused on mitigating the impact of this through reorganization with the assistance of consultants specialized in police and fire service; seeking additional funds; and obtaining assistance from law enforcement partners in order to achieve the best possible level of police response.
- Fire Department – Total department will be 75, with 19 positions eliminated as the SAFER grant expires. There are several vacant positions to be eliminated as part of this, with a goal of needed reduction no later than December, 2014. The next several months will be focused on mitigating the impact of this through reorganization and restructuring obtained with the assistance of consultants specialized in fire and police service.

- Planning and Development Department - Staffing is at 25, with adding 1 position. The department is being reorganized to assure capacity to implement the newly adopted Master Plan and continue efforts of blight management. Continued assistance in the form of grants and partnerships will be utilized, and general fund support for those activities is increased.
- Public Works Department - 6 positions are added to the Utilities division as the Water Treatment Plant begins operation as the primary source for Flint water; 1 position is added to Facilities to address critically needed maintenance issues.
- Finance and Administration Department - 3 positions are added to the Treasurer's Office to increase delinquent collections, with the added cost to be offset by additional revenues.
- Governance – As efforts to resolve the financial emergency progress, the position of City Administrator will be filled. Additionally, the salaries of Mayor and Council are partially restored as their role in governance increases.

Council budget priorities are addressed as follows:

- Maintaining police and fire staffing levels at the maximum level feasible – Due to revenue shortfall, increased retiree health care, and lack of other options, staffing is reduced. The Police and Fire millage funds will be used to fund 20 fire fighters and 26 police officers through FY15 and FY16. However, the accumulated millage funds will be fully used by the end of FY16.
- Reducing the General Fund deficit by at least $1 million – General Fund expenses are budgeted at $1 million less than revenues, and $800,000 in Capital Improvement Funds will be appropriated to the Utilities, thus reducing the General Funds debt to the Utility Fund by an additional $800,000. The plan is to continue this commitment for the next several years until the deficit is eliminated, and then the commitment will become one of building a financial reserve equal to 15% of General Fund revenues.
- Continuing efforts to reduce blight, including demolition – CDBG funds continue to be used for demolition and General Fund is assuming partial cost of the Blight Coordinator position
- Hiring an experienced City Administrator – Funds are included in budget.
- Assure that capacity exists to implement the Master Plan – General Fund is assuming partial cost of the Planning and Development Director, and Associate Planner, and a position of GIS technician is created, whose funding is shared among various city funds. Lead partners will be identified in each work area. Also, the Mayor has committed to overseeing the process of assuring that Master Plan implementation is an ongoing important part of city operations.
- Add capacity in the areas of Economic Development-The P&D Director is committed to defining a program for small business development, to be funded in FY16 through CDBG funds. Additionally, 20% of staff time of two DCED staffers and a portion of the Director's time will be devoted to economic development. Also, the Mayor has committed to leading the City's economic development efforts with partners and the assistance of this City staff.
- Fund years 1 & 2 of capital improvements identified in the Master Plan – the CIP portion of the Master Plan will be finalized in FY15, and the results will be considered for inclusion in the FY16 budget.

- Improve street maintenance – Due to minimal increases in state funding for streets, maintenance efforts will continue at the current levels. State financial support has been sought and obtained for some major street projects, in particular those related to economic development projects.

- Establish parks partnerships – The Planning and Development Department now has oversight of Parks, and as one of its strategic objectives, has committed to increase the number of parks partnerships in FY15 and FY16. Funding even the most basic of parks maintenance activities is increasingly challenging within the constraints of the parks millage funds. The goal is to eliminate General Fund support of these activities by the end of FY16.

- Improve customer service through training and technology– Human Resources, as it did in FY14, is committed to continuing ongoing training for supervisors and will be extending these efforts to all employees. IT likewise is committed to providing ongoing training for employees. Finally, most departments are including funds for ongoing training for employees. For example, the Treasury's customer service division is committed to specific customer service training for its front line employees.

- Increase removal of dead and diseased trees – Oversight of removal of trees within street right of ways is now the responsibility of the Transportation Division of Public Works, removal of trees within Parks is now the responsibility of Planning and Development; and removal of trees on other city properties is the responsibility of the Facilities Division of Public Works. Unfortunately, there is only a limited amount of funds available for these purposes, and the general effort will be focused on emergency responses. However, the Transportation Division is committed to attempting to secure assistance from other entities to increase capacity to address this problem.

- Evaluate ways to reduce water and sewer rates for constituents in the budget process-The results of the recent rate study confirm that it unlikely that water and sewer rates can be decreased at any time in the foreseeable future, and in fact, rates need to be increased. However, the actions taken to date to join KWA and to temporarily use the Flint River show that future rate increases will be less than had the City stayed with its prior provider.

Absent new sources of funding or reduced expenses in areas such as retiree healthcare, the commitments to progress and the staffing and service levels here are anticipated to continue for both FY15 and FY16. It is anticipated that the slight additional revenues in the General Fund for FY 16 will not be sufficient to cover increased costs, and it will be necessary to utilize additional funding from the police and fire millage to cover the costs of some police or fire positions in the General Fund in FY15. Depending on the rate of attrition in the Police Department, there should be sufficient remaining funds in the Police and Fire millage to avoid additional reductions in police or fire positions in FY16.

Subject: Re: Draft release - restructuring of DWRF bonds

Jason,

Money to be available is $2.24 million.... and the interest rate remains at 2.5%.... Total interest to be paid ($12.1 million) is $228,000 greater than the total interest to be paid in the original issue ($11.9 m) over the life of the issue...

On Wed, Mar 18, 2015 at 4:39 PM, Elizabeth Murphy <emurphy@cityofflint.com> wrote:
Responding to items in the release:
1) is total amount now available $2.24 or $2.4 million? Both numbers are used in statement.
2)is new interest rate 2.5% + 2%? So 4.5%? That is how I am reading last line in the statement.
LIZ

On Wed, Mar 18, 2015 at 4:29 PM, Howard Croft <hcroft@cityofflint.com> wrote:
Jerry,

I think you make the point in the letter but is of note that the DWRF loan was **specific to the water fund** and not sewer. Along that same line is whether or not we intend to tie the the funds to a specific project like the $2 million dollar grant from treasury where there is a direct measurable link from the action to the result.

On Wed, Mar 18, 2015 at 3:45 PM, Gerald Ambrose <gambrose@cityofflint.com> wrote:
Attached for review and comment is a draft release regarding restructuring of the DWRF bonds. It is necessary for me to issue an order to do this, and it is still subject to Treasury approval. Treasury is waiting for the paperwork, so I am expecting approval. Timing is an issue because the restructuring affects debt service payments due April 1.

The plan is to sign the order tomorrow and get it to Treasury same day... so I see it as important to get our message out first.

Note that my discussions with Treasury have been towards freeing up funds for needed capital improvements. Not for reducing rates....

I am asking Jason/Kelly to get this to whomever else at the state should also review. I am copying Terry Stanton.

This needs to be ready for release early in the morning.

Please include Jason in responses regarding editorial comments. let me know if you have issues with substance or timing.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

January 8, 2015

Mr. R. Kevin Clinton, State Treasurer Michigan Department of Treasury
4th Floor Treasury Building
430 West Allegan Street Lansing, MI 48922

Dear Mr. Clinton:

Attached please find the three month report for the period October 9, 2014 through January 8, 2015 as required by Public Act 436, Section 17. This report is being submitted through you to Governor Rick Snyder.

The entire report will be posted on the City of Flint website www.cityofflint.com as soon as it is approved.

Respectfully submitted,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

cc:
Governor Rick Snyder
Arlan Meekof, Senate Majority Leader
Kevin Cotter, Speaker of the House of Representatives
James Ananich, State Senator
Sheldon Neeley, State Representative
Phil Phelps, State Representative
Inez Brown, Clerk of the City of Flint
Wayne Workman, Deputy Treasurer
Edward Koryzno, Bureau Director of Local Government Services
Randall Byrne, Office of Fiscal Responsibility

Public Act 436, Section 17: Three Month Report
January 8, 2015

Introduction

This Three Month Report of the status of the Financial and Operating Plan for the City of Flint is submitted to the Governor Rick Snyder, the Senate Majority Leader, the Speaker of the House of Representatives, and Clerk of the City of Flint through the Department of Treasury for the State of Michigan, in accordance with Public Act 436, Section 17 which requires this report beginning six months after the appointment of the Emergency Manager.

Included are the items detailed below from P.A. 436, Section 17:

a) A description of each expenditure made, approved, or disapproved during the reporting period that has a cumulative value of $5000 or more and the source of the funds.

b) A list of each contract that the emergency manager awarded or approved with a cumulative value of $5000 or more, the purpose of the contract, and the identity of the contractor.

c) A description of each loan sought, approved, or disapproved during the reporting period that has a cumulative value of $5000 or more and the proposed use of the funds.

d) A description of any new position created or any vacancy in a position filled by the appointing authority.

e) A description of any position that has been eliminated or from which an employee has been laid off.

f) A copy of the contract with the emergency manager as provided in section 9(3)(e).

g) The salary and benefits of the emergency manager.

h) The financial and operating plan as required under section 11. Update #8 to the Financial and Operating Plan for the City of Flint.

City of Flint
Water Improvements

DATE	IMPROVEMENT	EFFECT	COST
Nov.	Increased flushing efforts (as weather permits)	Reduced time of water in the system	N/A
Nov.	Adjusted operational softening to no less than 80%	Reduce chlorine demand	N/A
Dec.	Started hydraulic modeling of distribution system	Helps to identify locations of bad valves	$80,000
Dec.	Started evaluation of different polymers	Removal of organic carbon	N/A
Dec.	Started SCADA upgrades inside of Water Plant	Improvement of internal software controls	$424,000 Budgeted
Jan.	Hired vendor to upgrade efficiency of the ozone system	Better oxidation and disinfecting	$7,200
Jan.	Started jar testing	Assists in dosage amounts and polymer aids	N/A
Feb.	Hired consultant Veolia for process review	Professional recommendations	$40,000
Feb.	Leasing a TTHM analyzer	Increased internal testing ability	$8,000
Feb.	Adjustments to reservoir level to match demand	Reduce time of water in system	N/A
Mar.	Implement process controls	Professionalism / efficiency	~$300,000
Mar.	Utilize Granulated Activated Carbon Filtering	Large reduction in TOC	$1,500,000
Mar.	Increase ferric chloride / reduce ozone feed rate / reduce lime dosage	Reduction in hardness	~$600,000
Mar.	Build hydraulic model	Assists in identifying locations of bad valves	Budgeted
Mar.	Communication program	Community awareness	~$80,000

March 30, 2015
Meeting with Governor
Agenda

EMERGENCY MANAGER (EM)

Flint

- Deficit Elimination Plan: Emergency Manager (EM) Gerry Ambrose is preparing an E-Loan application that would provide a $6M E-loan to assist in eliminating the City's $9M General Fund deficit by June 30, 2015.
- The Michigan Department of Environmental Quality (MDEQ) Testing Lab has provided results to the City of Flint showing that test results for total trihalomethanes (TTHM) levels for the month of February are well within Environmental Protection Agency (EPA) guidelines for safe water. However, because EPA regulations require that the four month average for all testing sites be within guidelines, the City is still considered to be out of compliance by the MDEQ.
- The City was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the City's water system through improved waste management and leak detection and pipe assessments.
- EM Ambrose's exit from the City is tentatively scheduled for April 2015; however, to ensure water quality for the residents and eliminate current water issues, the EM's exit date should be delayed until July 2015.
- An EM Order is being prepared that would restructure Water System Revenue Bonds Series 1999 thru 2002 with the Michigan Finance Authority. This would postpone principal payments and free up $2.24M, allowing the City to further improve its water distribution system.

Lincoln Park

- FY 15 is projected to conclude with a $500k deficit, which may be offset by the one-time proceeds from the sale of a cellular tower, expected revenues of $900K.
- Pensions are poorly funded; police and fire pension is 31% funded while the general employees' pension is 22% funded. Retiree healthcare is funded on a pay as you go basis.
- Emergency Manager Coulter's plan to fund pensions to the 60% level by 2035 requires significant reductions to retiree healthcare. The current annual cost of $4.1M will be reduced to $600k, via section 12(1)(k) collective bargaining agreement (CBA) modification.
- An additional police and fire pension millage has been placed on the May 5 ballot. If passed by the electorate, this would raise 6 mills ($3M) for pension funding and other uses.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Ecorse

- The Ecorse RTAB continues to monitor the deteriorating conditions of the City. Preliminary assessment figures show a 26% decline in residential property values citywide.
- The City has been unable, during the past two years, to produce a balanced five-year budget. Such a multi-year budget is mandated by Emergency Manager Order.
- Previous financial projections predict significant operating deficits for FY 2016, and total exhaustion of the General Fund balance in FY 2017.
- The City's pension fund is 41% funded. The City is paying out more in benefits than in contributions to the plan. The Municipal Employees Pension System has suggested several options to improve the funding of the plan.

Hamtramck

- Current budget to actual reports show that the City is on track to realize the General Fund balance predicted in year one of Emergency Manager Square's two-year budget.
- The Police Chief resigned on March 11.

Allen Park

- City Administrator Karen Folks resigned on March 12, 2015, after RTAB approval of a Separation Agreement negotiated with the City Council.
- Finance Director Bob Cady was appointed Interim City Administrator. Treasury will be participating with the City in a search process for a permanent City Administrator.
- Renovation has begun on a temporary City Hall facility. The City expects to relocate to the new facility in May 2015.
- The City is preparing to issue a bond tender offer to reduce its outstanding debt. The tender offer process was previously delayed due to the uncertainty between the City Council and the City Administrator. A meeting is being scheduled.

Benton Harbor

- The City is projected to end the FY with a General Fund balance of $200k.
- The City was awarded $910K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the water system through water main replacements and fire hydrant repairs, and complete a property reappraisal to provide updated and accurate assessing records. Additionally, the City will provide community enhancement through blight management and sidewalk replacement.
- An estimated 35 residents are without water due to frozen water lines. The City has hired a local company to assist the residents in thawing the lines for $150 per residence. Even

though residents are responsible for maintaining the water lines on their property, the City stepping is offering assistance by paying $75 of the $150, and the resident paying the rest.

Pontiac

- The City was awarded $125K through the through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to supplement the City's ongoing blight management programs.
- A new search process to hire a Deputy Mayor will begin shortly after a suitable candidate was not found through a Michigan Municipal League (MML) search.
- A new City Charter has been proposed by the City Charter Revision Commission and will appear on the May 5 ballot for approval by the electorate.

CONSENT AGREEMENT

Royal Oak Township

- The Township is continuing negotiations with the City of Hazel Park for the provision of police services. The Michigan State Police is currently providing dedicated police patrols to the Township on a temporary basis. The proposal from the City of Hazel Park for this service currently exceeds the Township's available revenue by over $200K. Discussions regarding the needed level of dedicated patrols within the Township are continuing between both entities.
- The Township is evaluating a proposal from the Ferndale School System to acquire Grant School (where the Township offices are located) for $1. The Township has retained McKenna & Associates to assist them in evaluating the feasibility of the Township owning and operating this facility. The building's unmet capital needs have been identified at $1.2M.
- Giarmarco, Mullins & Horton, P.C. has been appointed the Township Attorney via the issuance of a Consent Agreement Order. This firm replaces the firm of Pentiuk, Couvreur & Kobiljak. This change is estimated to save the Township $78K in budgeted legal service expenses.

Inkster

- City Treasurer Mark Stuhldreher currently has the Consent Agreement powers; City Manager Richard Marsh has requested that he be given those powers.
- The City was awarded $855K through the Financially Distressed Cities, Villages and Townships Grant Program. These funds will be used to complete a property reappraisal program, repair and replace fire hydrants and enhancing public safety by providing an officer to the multi-jurisdictional narcotic team and the deployment of one additional police officer, and a backup power supply and technology improvements.
- The City anticipates a General Fund surplus of less than $100K by the end of the current fiscal year, June 30, 2015. This is one year sooner than the approved Deficit Elimination Plan had indicated.

- A Consent judgment levy by the Detroit Water and Sewer Department and Wayne County will likely be placed on the July tax roll. The City owes DWSD $682K for unpaid water service and Wayne County $4.9M for unpaid sewer services.

River Rouge

- The City was awarded $592K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting and infrastructure improvements to City Hall.
- A reduction in the healthcare benefits for active employees and retirees was implemented on November 1, 2014. The City estimates an annual savings of $400K.
- The City must develop a sustainable five year budget and have no funds with a deficit in order to exit from the Consent Agreement.

NEUTRAL EVALUATION

Highland Park

- The City has hired Pierce, Monroe & Associates to assess the adequacy and accuracy of billing records, develop a methodology for calculation of amounts due to the City per customer, develop a work plan for implementation of an accounting program, and calculation of outstanding account balances per customer account.
- The City made an initial offer of $2.2M to settle past due accounts to the Detroit Water and Sewerage Department (DWSD). The offer was rejected by DWSD. Discussions are ongoing.
- The City was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the City's water system through meter replacement, leak detection, and system repairs.
- The Request for proposal (RFP) for the selection of a third party to operate and maintain the City's water and sewer systems, as required by the City's Plan of Adjustment, are due on April 20, 2015.
- In August 2015, an emergency loan of $16.4M, which includes the restructuring of $4.8M in existing loans, will be used to refund $2.7M in Fiscal Stabilization Bonds, $5.2M in Financial Recovery Bonds, and $3.7M in State Revolving Fund Bonds.
- BenStaff has been hired by the City to make recommendations to reduce healthcare costs.
- The law firm of Lewis & Munday has been hired to assist the City with the restructuring of the other post-employment benefits (OPEB) benefits.

OTHER COMMUNITIES

Melvindale

- The City was awarded $88K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used enhance public safety through fleet replacement of police vehicles and updated technology.

Wayne

- The City anticipates a General Fund deficit in the next two years.
- The City Manager signed a six month contract. This may lead to more instability in the City's administration.
- The City has approved a May 2015 ballot proposal of 3 mills for five years that if approved by voters, would assist in funding police and fire retirement costs.

Wayne County

- The Michigan Supreme Court ruled unanimously in favor of retirees who receive a 13th check to offset inflation. The County is required to return $32M to the Pension Equity Fund.
- Cash reserves reached its lowest point in August 2014 with pooled cash falling to approximately $73M, the average balance is $170M. This includes proceeds from a short term borrowing of $75M.

Follow Up Flag: Follow up
Flag Status: Flagged

Matt,

Thanks for sending this along. Wayne and I have previously discussed this, I don't have any concerns. Note - I'm copying Ann here because she'll be taking over these PA 436 approvals going forward, keeping her in the loop.

Two things we will need before we can finalize:

1) Please place on City of Flint letterhead
2) The EM should sign the request letter so it's clear that he's supportive before we ask Kevin so sign (see attached example from Detroit)

In terms of timing, Kevin is out of pocket all afternoon on Friday. So, if you can get us the aforementioned changes by tomorrow, that would be optimal. Thanks!

Subject: Flint Drinking Water Loans

Ashley,

As you are probably aware, we are in the process of amending the City of Flint's four Drinking Water loans through the MFA to provide some up-front cash relief. To accomplish this, the Treasurer will be required to give his approval on the attached memo. Please let me know by tomorrow if you have any concerns with this approval. The tentative plan is to have all the documents signed on Friday. If you have any questions, please let me know.

Thanks,

Matt Bowman

MEMORANDUM

To: Governor Rick Snyder
State of Michigan

From: Kevyn D. Orr, Emergency Manager
City of Detroit

Date: March 18, 2014

Re: PA 436 Approval for Contracts Related to the Joe Louis Arena

---

The Emergency Manager ("EM") has determined that it is in the best interests of the City of Detroit (the "City") and is consistent with the City's restructuring efforts and will promote the goals and purposes of Public Act 436 ("PA 436") to enter into the following contracts related to the Joe Louis Arena (the "JLA"):

- Sublease of Riverfront Arena (the "Sublease") between the City, Olympia Entertainment, Inc. ("OEI") and the Detroit Red Wings, Inc. (the "Red Wings")
- The Mutual Waiver and Release Agreement (the "Release") by and among the City, OEI and the Red Wings
- The Operating and Management Agreement (the "Parking Agreement", together with the Sublease and the Release, the "JLA Documents") between the City, OEI for the Riverfront Arena Parking Facility (the "JLA Garage").

The salient terms and benefits of the JLA Documents are as summarized below and shown on the attached term sheet, respectively:

- OEI will continue to sublease, operate and maintain the JLA from the City retroactive to July 1, 2010 through July 15, 2015, with the option to extend for five one-year terms during which time OEI will pay the City $1 million per year in rent less the amounts paid by OEI as property taxes on the JLA;
- OEI and the City each have the right to terminate the Sublease upon completion of a new arena for the Red Wings currently being designed and constructed, provided that OEI can extend the termination date if it were to occur during the NHL season or if it would impact events scheduled within 180 days of the proposed termination date;
- OEI will maintain all insurance for the JLA from January 1, 2014 going forward;
- OEI will have no obligation to make any major capital repairs to the JLA, and the costs of such repairs shall be allocated between the City and the OEI as agreed upon, provided that if such allocation cannot be agreed to, either OEI or the City can terminate the Sublease, provided, further, that the City can only terminate if such capital items are catastrophic capital items;
- OEI will pay an additional $250,000 in security payments to the City for the additional required police services during the initial term of the Sublease and an additional $100,000 per year thereafter;
- Following the termination of the Sublease, the City will demolish the JLA if it receives sufficient funds from the State of Michigan;
- OEI will continue to manage and operate the JLA Garage during such time as the Sublease is in effect and will be reimbursed for all operating expenses and be paid a 7% management fee;
- OEI will repair [600] parking spaces that are currently unusable in the JLA Garage by September 1, 2014;
- The City will be responsible for making any major repairs, i.e., those over $5,000, to the JLA Garage in such a manner as the City decides; and
- The City, OEI and the Red Wings have collectively released and waived all claims with respect to the JLA and the JLA Garage up to the date of execution including, but not limited to, such claims related to back rent, rent attributable to cable revenues, property taxes, operating expenses, capital repairs, or indemnification, provided that OEI shall pay the City $5.175 million over the next three years and the City and OEI shall reconcile current accounts to ensure that no amounts are due or owing on execution of the JLA Documents.

The JLA Documents involve the transfer of certain assets, liabilities, functions and responsibilities of the City, which were not provided in the City's financial and operating plan. Accordingly, pursuant to section 12(1)(r) of PA 436, the EM hereby submits the JLA Documents to you for review and request that you authorize the JLA Documents.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY

RICK SNYDER
GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

DATE: March 17, 2015

TO: Rick Snyder, Governor

FROM: R. Kevin Clinton, Treasurer

SUBJECT: Status of Financially Stressed Local Governments

EMERGENCY MANAGER

Flint
Emergency Manager: Gerald Ambrose
Appointed: January 13, 2015
Anticipated Exit: April 2015

Recent Developments

- The City was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the City's water system through improved waste management, leak detection, and pipe assessments.
- An EM Order is being prepared that will restructure Water System Revenue Bonds Series 1999 through 2002 and the Michigan Finance Authority. This would postpone principal payments and free up $2.2M, allowing the City to further improve its water system.
- The Michigan Department of Environmental Quality (MDEQ) Testing Lab provided results to the City of Flint showing that the total trihalomethanes (TTHM) levels for the month of February are well within the Environmental Protection Agency (EPA) guidelines for safe water. However, because EPA regulations require that the four month average for all testing sites be within guidelines, the City is still considered to be non-compliant by the MDEQ.
- The City hired Veolia North America to provide a preliminary analysis of the City's water system. On February 18, 2015, Veolia North America presented a preliminary report to the City's Public Works Committee. Recommendations included water plant improvements, distribution system improvements, new policies and procedures, and better communication with customers. The estimated costs of implementing Veolia's recommendations will be determined after the second phase of the study is complete.
- An International City/County Management Association (ICMA) comprehensive public safety study has been completed, and was presented to the City Council on January 22, 2015. Several recommendations for both police and fire are currently being reviewed by the City. Of the 16 major recommendations for public safety, the following four are most crucial:

- Establish more aggressive protocols for responding to service demands from the public.
- Equip a minimum of one marked patrol car with an automated external defibrillator (AED) and an automatic license plate reader, and equip every car with e-ticket readers and printers.
- Develop a robust in-service training program.
- Establish and publish a clear multiyear strategic plan that includes specific performance goals and objectives for all units.

Significant Actions/Issues

- The General Fund accumulated deficit for FY 2014 was $9M. In FY 2013, the General Fund had an accumulated deficit of $12.9M. Noted areas of reduced expenditures within the governmental funds included Parks & Recreation reduced by $5.6M, Community Development reduced by $2.6M, Public Safety reduced by $1.8M, and Building Inspections reduced by $1.7 M.

Issues to Resolve before EM Exit

- Eliminate annual operating/structural deficit, which is projected at $1.7M for FY 2017 and grows to $11.9M by FY 2019, if the City loses the lawsuit over retiree healthcare. The City's current budget does not assume this potential additional $5M expense. If the City loses this lawsuit, it will permanently add $5M annually to the cost of retiree healthcare, which will grow at a rate equal to the general rise in healthcare costs.

Lincoln Park

Emergency Manager: Brad Coulter
Appointed: July 3, 2014
Anticipated Exit: January 2016

Recent Developments

- The City was awarded $143.5K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through updated technology.
- A fire union collective bargaining agreement has been approved. The estimated cost savings is approximately $500K by achieving cost reductions associated with overtime and paid leave.
- A Firefighters and Police Officers Retirement Act, has been placed on the May 5, 2015 ballot. If approved by voters this will raise an additional 6 mills, or $3M, for fire and police pension funding and retiree healthcare.
- Due to retiree health care being completely unfunded, Emergency Manager Brad Coulter will utilize P.A. 436 (2012), Local Financial Stability and Choice Act, to change retiree contracts so that health insurance will be replaced by a lower cost stipend. This action is calculated to reduce retiree health care costs by $3M per year.
- FY 2014 ended with a General Fund accumulated deficit of $736K out of a total budget of $21M. This is a significant increase from the FY 2013 accumulated deficit of $89K. Noted areas of increased expenditures within the governmental funds included Public Safety by $1.1M, Public Works by $700K, and Culture and Recreation by $600K.

Significant Actions/Issues

- The police and fire pension plan is 30% funded. The general employee pension plan is 22% funded. (any initiatives underway to address the underfunded pension dilemma?) This was moved to Recent Developments. I moved it back

Issues to Resolve before EM Exit

- Expired collective bargaining agreements must be finalized for police.
- Increase and stabilize pension and other post-employment benefits (OPEB) funding levels.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

FRC Created: November 12, 2014

FRC Members: Bill Martin, Brenda Jones, Darrell Burks, John Roberts, Kevin Clinton, Lorron James, Mike Duggan, Stacy Fox, Tony Saunders

Recent Developments

- The City of Detroit held its first statutorily-required Revenue Estimating Conference on February 20, 2015. The conference principals, Jay Wortley of Treasury, John Hill of the City of Detroit, and George Fulton of the University of Michigan, approved the consensus revenues as presented. The principals agreed that the revenue estimates were conservative.
- At the FRC's February 23, 2015 meeting, the FRC approved, and referred to the newly formed Finance and Enterprise Resource subcommittee for further review, the City's revenue estimates that were presented at the aforementioned Revenue Estimating Conference. The City will be incorporating the revenue estimates into its Four-Year Financial and Operating Plan (Plan) that will be presented to the FRC at its March 23, 2015 meeting for the Commission's review. The FRC also approved the City's debt service requirements report and several operational contracts.
- Treasury hired Ron Rose as the Executive Director (ED) for the Office of the FRC within the Department. His start date was March 2, 2015. Treasury is in the process of filling other key staff positions and has engaged the financial consulting services of UHY. Treasury has also engaged Martha Kopacz and her team from Phoenix Management Services. Ms. Kopacz and her team acted as independent financial experts for Judge Rhodes in the City's Chapter 9 bankruptcy proceedings. Among other duties, the consultants will provide assistance in reviewing and analyzing the Plan for the FRC.

Significant Actions/Issues

- The City will be submitting its Four-Year Financial and Operating Plan to the FRC on March 23, 2015 for review, with FRC action expected on April 20, 2015. The City's Plan will encompass the second year (FY16) of Emergency Manager Orr's two-year budget and use this as its base year with no changes, plus three years (FY17, FY18, and FY19).
- Ensuring that the Plan is based on sound assumptions and that the City's operational budgets and actual spending conform to the Plan will be one of the FRC's most significant tasks.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Hamtramck

RTAB Appointed: December 18, 2014
RTAB Members: Deborah Roberts, Mark Stema, Cathy Square, Karen Young

Recent Developments

- The City was awarded $622K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to complete a property reappraisal which will provide updated and accurate assessing records, upgrade City Hall security, and enhance public safety through improved street lighting.
- The Police Chief resigned on March 11, 2015.
- Deputy City Manager/Treasurer John Gabor started work on February 2, 2015.

Significant Actions/Issues

- A complaint was filed in the federal court by Hamtramck retirees over changes to healthcare benefits in October 2014.
- The annual pension liability is anticipated to increase from $3.5M in FY 2015 to $4.3M in FY 2019. This increase occurred as a result of closing certain pension plans and the Michigan Employee's Retirement System (MERS) policy of accelerating the required contribution for closed plans. These increases were included in Emergency Manager Square's two-year budget.

Allen Park

RTAB Appointed: September 26, 2014
RTAB Members: Suzanne Schafer, Joyce Parker, Fredrick Frank, Karen Barann

Recent Developments

- The City Council voted on January 27, 2015 to suspend City Administrator Karen Folks. This vote was taken despite two Emergency Manager Orders that prohibit termination until October 2015 and establish a process for termination. The City Administrator and City Council negotiated a separation agreement which was approved by the RTAB on March 12, 2015. The RTAB also approved the City Council's appointment of the Finance Director as Interim City Administrator. A search firm will be hired to begin the process of selecting a new City Administrator.
- The City was expecting to issue a bond tender offer beginning in March to reduce the City's outstanding debt. However, the tender offer has been delayed due to the uncertainty between the City Council and City Administrator. A timeline to complete the bond tender process will be developed by the various parties on March 19, 2015.

Significant Actions/Issues

- Litigation was filed by retirees challenging the Emergency Manager's authority to reduce other post-employment benefits (OPEB) liabilities. A motion for summary disposition is pending. No date has been set to hear this motion.
- City Hall will be relocating to a temporary facility in May 2015.

Benton Harbor
RTAB Appointed: March 10, 2014
RTAB Members: Larry Steckelberg, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments
- The City was awarded $910K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the water system through water main replacements and fire hydrant repairs, and to complete a property reappraisal which will provide updated and accurate assessing records. Additionally, the City will provide community enhancement through blight management and sidewalk replacement.
- On February 2, 2015, the City Commission unanimously approved a one-year contract extension for City Manager Darwin Watson.

Significant Actions/Issues
- On January 20, 2015, the City Commission passed a resolution adopting a fund balance policy consistent with Government Finance Officers Association (GFOA) Best Practices. The RTAB approved the resolution on January 28, 2015.
- FY 2014 audited General Fund revenues exceed expenditures by $1M, out of a total budget of $6.1M.

Ecorse
RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joyce Parker

Recent Developments
- The City was awarded $350K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting.
- The City signed a contract with UHY to provide part-time financial services until a permanent solution can be found. The RTAB approved the contract on January 13, 2015.
- The City Council cancelled the contracted City Administrator search with the Michigan Municipal League (MML) and appointed Wayne O'Neal as full-time City Administrator. On February 10, 2015 the RTAB approved the City's resolution appointing Mr. O'Neal.
- The City continues having trouble filling higher level positions.

Significant Actions/Issues
- The RTAB's Annual Evaluation for the Governor was not favorable, citing a lack of local financial literacy, political infighting, and an inability to develop a balanced multiyear budget. For these reasons, the Board did not recommend removal of RTAB oversight at this time.
- Municipal Employee's Retiree System (MERS) pension contributions are anticipated to increase from $1.8M in FY 2015 to $2.4M in FY 2016 because of accelerated funding for closed plans.
- The City has been unable to balance their five-year budget. Significant expense reductions will likely be necessary in upcoming fiscal years.

Pontiac
RTAB Appointed: August 19, 2013
RTAB Members: Edward Koryzno, Louis Schimmel, Keith Sawdon, Robert Burgess

Recent Developments
- The City was awarded $125K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used for community enhancement through blight management.
- In April 2014, the Final Emergency Manager Order was amended to create a Deputy Mayor position. A suitable candidate was not found through a Michigan Municipal League (MML) search. A new search firm has been hired to assist the City in filling this position.
- The General Fund's accumulated fund balance for FY 2014 is approximately $5M, out of a total budget of $27M.
- After receiving a response from the Attorney General's Office, the City Charter Revision Commission submitted a proposed Charter by the February 10, 2015 deadline. The proposed Charter will be placed on the May 2015 ballot.

Significant Actions/Issues
- The General Fund is structurally balanced in FY 2015 but expenditures are projected to exceed revenues by $360K due to deferred projects from FY 2014.
- Oakland County Circuit Court Judge Michael Warren dismissed the City's condemnation lawsuit involving the Phoenix Center because the City failed to include compensation for the lien placed on the property. The City is preparing an appeal of the decision to the U.S. Sixth Circuit Court of Appeals.
- The City of Pontiac Retired Employees Association v. City of Pontiac lawsuit in the United States District Court was reassigned from Judge Lawrence P. Zatkoff to Judge Avern Cohn. The City of Pontiac and the Retired Employees Association are participating in facilitation. The General Employees Retirement System (GERS) Board proposal was submitted to the court on January 30, 2015.
- The lawsuit challenges former Emergency Manager Schimmel's elimination and replacement of retiree healthcare with an annual stipend. The GERS Pension Fund is significantly overfunded and the parties are exploring options to use the overfunded portion to fund retiree healthcare.

CONSENT AGREEMENT

Inkster
Date Executed: February 20, 2012
Consent Agreement Consultant: Mark Stuhldreher

Recent Developments
- The City was awarded $855K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to complete a property reappraisal to provide updated and accurate assessing records, enhance the water system through fire hydrant repairs, and enhancing public safety through the creation of a multi-jurisdictional narcotics team, police officer training, deployment of an additional police officer, providing a backup power source, and updating technology.

Significant Actions/Issues
- The FY 2014 General Fund accumulated deficit is $767K, out of a total budget of $11M.

River Rouge
Date Executed: December 15, 2009
Consent Agreement Consultant: N/A (P.A. 72)

Recent Developments
- The City was awarded $592K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting, along with infrastructure replacements to City Hall.
- Deborah Hayes-Price has been promoted to Chief of Police to replace former Police Chief Jeffrey Harris who retired in January.

Significant Actions/Issues
- U.S. Steel annual $1M tax settlement payment to the City has expired.
- General Fund revenues exceeded expenditures by $885K in FY 2014 and the accumulated fund balance was $1.9M.
- A reduction in healthcare benefits for active employees and retirees was implemented on November 1, 2014. The City estimates an annual savings of $400K.

Royal Oak Township
Effective Date: April 21, 2014
Consent Agreement Consultant: Robert Burgess

Recent Developments
- The Township was awarded $274K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting and increased police services.
- The State Treasurer rejected a decision by the Township Board to extend the contract with the current Township Attorney, Pentiuk, Couvreur & Kobiljak P.C at a cost that was twice the amount of the lowest bidder. The Consent Agreement Consultant, Robert Burgess, issued an order requiring the Township to extend a contract for legal services to the lowest bidder, Giarmarco, Mullins & Horton, P.C. This is but one example of the difficulty the Consent Agreement Consultant has encountered in his efforts to have the Supervisor and Township Board comply with provisions of the Consent Agreement. Distribution of the Township's Financially Distressed Cites, Villages and Townships Grant award has been placed on hold pending the Township's compliance with the Consent Agreement.
- The State Treasurer approved an amendment to the Fire Services Contract with the City of Ferndale on March 11, 2015. This amendment is projected to reduce annual costs to the Township by $4K thru the end of 2015.

Significant Actions/Issues

- The Michigan State Police continues to provide police services to the Township. The Department of Treasury and the Michigan State Police continue to work with the Township and are reviewing a proposal from the City of Hazel Park to provide police services to the Township.
- The State Treasurer approved the Township's 2015 budget on December 16, 2014, with the requirement that the Township work with Treasury to implement additional budget amendments to improve its overall effectiveness. No additional actions have occurred to implement these additional budget amendments as the Township was without the services of a financial consultant from the time of budget adoption through March 1, 2015.
- The Township currently has an aging accounts payable in excess of $200K.

NEUTRAL EVALUATION

Highland Park

Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
PA 436 Option Selected: Neutral Evaluation

Recent Developments

- The City was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the City's water system through meter replacement, leak detection, and system repairs.
- Cathy Square, former Hamtramck Emergency Manager, was hired to fill the position of City Administrator.
- Huron Consulting has been hired to prepare a request for proposal (RFP) to solicit firms to operate and maintain the City's water and sewer systems, as required by the City's Plan of Adjustment. The proposals are due on April 20, 2015.
- BenStaff has been hired by the City to make recommendations that will reduce healthcare costs.
- The law firm of Lewis & Munday has been hired to assist the City with the restructuring of the other post-employment benefits (OPEB).

Significant Actions/Issues

- The City selected Tetra-Tech to prepare a water and sewer rate study. A draft study was completed on February 20, 2015. This study provides the City with proposed rates, which if adopted, will provide adequate revenue to operate and maintain the water and sewer system.
- Liabilities total $117.6M. Some of the major components are: $55.3M debt, including $20.7M owed to the Detroit Water and Sewerage Department (DWSD), $17.7M pension bonds, and $26.1M unfunded other post-employment benefits (OPEB) liabilities.
- Summary of the Plan of Adjustment for the City of Highland Park was adopted on August 28, 2014.
    - Fifth Third Bank has finalized an agreement and settled for 50 cents on the dollar for outstanding debt.
    - By June 30, 2015, Highland Park, as required by terms of the emergency loan, must have a third-party operator for its water/sewer systems.
    - After the selection of this third-party operator, DWSD and Highland Park will negotiate a long-term settlement for outstanding water and sewer debt.

- The City must reduce retiree healthcare benefit costs.
- In August 2015, an emergency loan of $16.4M, which includes the restructuring of $4.8M in existing loans, will be used to refund $2.7M in Fiscal Stabilization Bonds, $5.2M in Financial Recovery Bonds, and $3.7M in State Revolving Fund Bonds.

OTHER COMMUNITIES

Melvindale

Recent Developments

- The City was awarded $88K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through fleet replacement of police vehicles and updated technology.

Significant Actions/Issues

- The General Fund deficit for FY 2013 is $1.9M, an increase of $248K from the FY 2012 deficit. The City's fiscal year runs from January to December.
- The unrestricted annual deficit for the City-owned ice arena in FY 2013 is $1.9M out of a total budget of $10M. This is approximately $160K more than what the City projected.
- Treasury issued a conditional approval of the City's Deficit Elimination Plan. The City is timely submitting monthly financial reports to demonstrate adherence to the plan.

City of Wayne

Recent Developments

- The City has hired Plante Moran to provide accounting services due to the recent resignation of the City's Finance Director.

Significant Actions/Issues

- The City anticipates a General Fund deficit in the next two years.
- The City has approved a May 2015 ballot proposal that would establish a police and fire pension program to remove pension fund costs from the General Fund and approve three mills for five years to fund police and fire retirement costs.

Wayne County

Recent Developments

The Michigan Supreme Court ruled unanimously in favor of retirees who receive a 13th check to offset inflation. The County is required to return $32M to the Pension Equity Fund.

Significant Actions/Issues

- Cash reserves reached its lowest point in August 2014 with pooled cash falling to approximately $73M. The average balance is $170M. This number includes proceeds from a short term borrowing of $75M.
- A letter to the Treasurer from previous County Executive Robert Ficano, indicates that with the significant transfer of revenue from the Delinquent Tax Revolving Fund (DTRF), the General Fund deficit will be reduced to approximately $50M for FY 2014.

- In the same letter, it is indicated that the County has budgeted a transfer of $64M from the DTRF to balance the General Fund in FY 2015. However, this represents the last of the DTRF's unrestricted equity. This will result in a potential budget gap of $20M in FY 2016.
- The preliminary results of the County's actuarial report indicate a drop in other post-employment benefits (OPEB) liability of approximately $409M. This reduction is a result of the City choosing less expensive plans and implementing cost sharing measures. The Plan participants are now paying a larger share of the cost. This does not include any saving opportunities resulting from a proposed change to retiree healthcare.
- The County is working to resolve a disagreement with the Mental Health Authority over services provided to jail inmates. The County currently pays for this service but believes it falls under the purview of the Authority.

Subject: PRESS RELEASE: EM Authorizes DWRF Bond Restructuring
Attachments: DWRF Bond Restructuring.pdf

Flint Emergency Manager Authorizes Bond Restructuring to Afford Additional $2.24 Million toward Capital Improvements in Water

Flint, Michigan – March 19, 2015 – Flint Emergency Manager Jerry Ambrose today authorized a restructuring of four outstanding Drinking Water Revolving Fund (DWRF) bonds to allow postponing current principal payments in the total amount of $2.24 million. This action will allow the $2.24 million budgeted for debt service to be utilized for expenses associated with maintaining safety and improving quality of the Flint water supply. Approval of the State Treasurer is required before the restructuring can occur.

Flint has recently received a final report from Veolia, its water expert advisor, making a series of recommendations to maintain and improve the Flint water supply. These recommendations, and other items identified in the City's current capital improvements plan, will be considered as the City develops and implements its action plan to maintain and improve the Flint water supply. Discussion on the development of the action plan will begin today, March 19, 2015 at the Water Advisory Committee meeting, scheduled to begin at 2:00 pm at the Flint Public Library.

The State of Michigan was instrumental in allowing the restructuring, as approvals are required by both the State Treasurer and the Director of the Michigan Department of Environmental Quality. "At all levels, the State of Michigan has been most cooperative in assisting the City of Flint as it addresses the many issues confronting the Flint water system", said Ambrose. "Access to $2.24 million at this time will be very helpful in moving forward with our action plan."

The proposed restructuring will free up funds to enable the City to more quickly begin implementing recommended improvements to its water treatment and distribution system. Several recommendations for improvement are currently unbudgeted and the $2.24 million will help assure that the most important can be performed.

Recommendations to be considered include the addition of a Granulated Activated Carbon Filter, estimated at as much as $1.5 million; acceleration of the repair and replacement of values, estimated at an additional

$120,000 annually; additional pipeline replacement, estimated at $1 million per mile; and acceleration of the project to automate plant operations, estimated at $450,000. $1.315 million will become available in the City's current fiscal year, and the remaining $925,000 will be available in the next fiscal year.

The bonds are currently financed at a rate of 2.5%, and postponement of the principal payment will incur some additional interest expense over the life of the issue. While the interest rate will not increase, the total interest cost will increase by approximately 2% ($228,000) over the 20 year life of the issues.

Present Value Analysis of 72-inch Water Transmission Main for City of Flint

Final Report – January 28, 2014

Lockwood, Andrews & Newnam, Inc.

Project # 130-10701-001

Lockwood, Andrews & Newnam, Inc.
A LEO A DALY COMPANY

PLANNING ENGINEERING PROGRAM MANAGEMENT

Introduction

Lockwood, Andrews, & Newnam, Inc. (LAN) was retained by the City of Flint (City) to perform a pipeline value assessment of the existing 72-inch water transmission main from the Detroit pipeline connection at the intersection of Baxter and Potter Roads to the Flint Water Treatment Plant (FWTP). The 72-inch transmission main was constructed from 1966 to 1968 to supply the FWTP with water from the Detroit Water and Sewerage Department (DWSD). With the original 30 year contract with DWSD expired, the City of Flint plans to establish a new contract with the Karegnondi Water Authority (KWA) beginning in 2015, which would require the KWA to provide raw water to the FWTP.

In order to provide raw water to the FWTP, the KWA will connect a 36-inch transmission main to the existing City-owned 72-inch water main near the northeast corner of Center and Pierson Roads. The Genesee County Drain Commissioner's Office-Division of Water & Waste is interested in purchasing the east portion of the 72-inch transmission main from this connection to the DWSD connection at Baxter and Potter Roads which is being defined in this analysis as Segment 1, while KWA has requested the use of the 72-inch pipeline west of this connection point to the FWTP which is being classified as Segment 2. Our analysis of these two segments is intended to help the City establish an equitable monetary value of both sections. A schematic of the limits of the pipeline and segments 1& 2 is shown in Attachment A.

Analyses

In order to value the segments of the 72-inch transmission main requested, quantities were derived from original construction drawings. Using the as-built cost established from the quantity take off, two (2) analyses were performed on the water main based on different valuation methods. Original Cost Less Depreciation (OCLD) and Reproduction Cost New Less Depreciation (RCNLD) methods were used in conjunction with the sinking fund depreciation technique to develop a credible current value assessment of the pipeline.

Quantity Take-Off

Using the Consoer, Townsend & Associates construction drawings dated 1966 (Attachment B) and the payment document dated January 1969 (Attachment C), a quantity take-off analysis was performed to determine the original construction cost of the section of 72-inch water main as described above. Line items originally listed as "linear feet" or "each" were summed to determine the value within the evaluation limits. Lump sum line items with information available, such as "gate valves complete in place" and "rubber seated butterfly valves," were counted and the ratio of the items within the limits to the whole project was applied to the lump sum price. For any unit with no quantifiable documentation, such as "sand and gravel refill" and "sand and gravel backfill," the ratio of the 72-inch pipeline within the evaluation limits to the whole project was applied to the total cost for the unknown line item. Line items determined to be outside the limits of the valuation were listed with a zero percent ratio.

OCLD Analysis

The Original Cost Less Depreciation valuation method uses the original cost of the project when constructed minus the depreciated value to determine the current value. The initial asset value was determined using the information established from the quantity take-off analysis and the original cost information found in the payment document dated January 1969.

RCNLD Analysis

Reproduction Cost New Less Depreciation is a valuation method that translates initial project costs to present day cost of construction. A new present day construction cost is calculated based on the original construction, followed by a depreciation method used to calculate the current book

value of the asset. The Engineering News-Record (ENR) Construction Index and the Handy-Whitman Cost Index for Concrete Cylinder Mains were possible references to determine the ratio used in calculating the present day cost. For this evaluation, the ENR index was selected to calculate the RCNLD initial asset value. A ratio of the current ENR index from September 2013 (9551.58) to the bid date ENR index from May 1966 (1014) was multiplied by the OCLD asset value to get the RCNLD initial asset value.

Sinking Fund Depreciation

The sinking fund depreciation method is commonly used within the utility industry. This method of depreciation accurately reflects the service life of a utility line, having a low initial depreciation upon installation due to low maintenance during the early years of a utility. As the service life of a utility progresses and maintenance becomes more frequent and comprehensive, the depreciation of the asset increases over time.

Due to the fact that a transmission pipeline must be functional and meet all necessary standards of service until the day it is taken out of service, an intrinsic value will always remain; therefore, a salvage value must be determined prior to the depreciation calculation. Similarly, the useful life of the asset must be pre-determined. The industry standard for the useful life of a pipeline ranges from 50 to 100 years. Typically, lower useful life values are used for distribution mains, whereas higher values are used for transmission systems. For transmission mains similar to the 72-inch being analyzed, a useful life of 75 to 90 years is common. We have selected a useful life of 80 years for this analysis.

In addition to the salvage value and useful life, sinking fund depreciation requires a sinking fund rate, which was selected as 4.50% and 0.75% for OCLD and RCNLD respectively, reflecting the federal discount rate during the construction time analyzed. Due to the sinking fund rate, the annual depreciation varies depending on the year and can be calculated using Eq. 1 and Eq. 2 below.

Eq. 1 $$D_t = \frac{(A-S)*(1+j)^{(t-1)}}{S_{n|j}}$$

Eq. 2 $$S_{n|j} = \frac{(1+j)^n-1}{j}$$

where:

t	=	Evaluation time (years)
D_t	=	Depreciation at year t
A	=	Initial asset value
S	=	Salvage value of asset
J	=	Sinking fund rate

The sum of the annual depreciation values until the evaluation year is subtracted from the initial value to calculate the current book value of the asset value.

Results

Segment 1

RCNLD and OCLD analyses were performed using a sinking fund depreciation of the 72-inch pipeline and appurtenances from the DWSD connection at Baxter and Potter Roads, west to the

proposed 36-inch KWA connection at Center and Pierson Roads. Due to the size of the project and the portion involved in this segment (similar size piping and valves only) the RCNLD value of $27,400,000 was determined to be unrepresentative of the actual asset value. Utilizing the OCLD values listed below, **a book value of $3,988,000** was calculated for this portion of the pipeline.

Table 1 – Segment 1 OCLD Analysis

ORIGINAL COST LESS DEPRECIATION SINKING FUND DEPRECIATION ANALYSIS	
INPUTS	
Initial Cost	$ 4,735,900
Useful Life (years)	80
Salvage Value at End of Life*	$ 1,184,000
Sinking Fund Rate	4.50%
Evaluation Year	47
OUTPUTS	
$S_{n|j}$	729.56
Total Depreciation at Year 47	$ 748,200
Book Value	**$ 3,987,700**

*25% Salvage value

Segment 2

RCNLD and OCLD analyses were performed using a sinking fund depreciation of the 72-inch pipeline and appurtenances beginning at the KWA tie-in at Center and Pierson Roads, west to the property line of the FWTP. Utilizing the RCNLD values listed below, a book value of $5,269,600 was calculated for this portion of the pipeline using the following evaluation criteria:

Table 2 – Segment 2 RCNLD Analysis

REAL COST NEW LESS DEPRECIATION SINKING FUND DEPRECIATION ANALYSIS	
INPUTS	
Initial Cost	$ 8,953,900
Useful Life (years)	80
Salvage Value at End of Life*	$ 1,790,800
Sinking Fund Rate	4.50%
Evaluation Year	47
OUTPUTS	
$S_{n|j}$	109.07
Total Depreciation at Year 47	$ 3,684,300
Book Value	**$ 5,269,600**

*20% Salvage value

Utilizing the OCLD values listed below, a book value of $790,400 was calculated for this portion of the pipeline using the following evaluation criteria:

Table 3 – Segment 2 OCLD Analysis

ORIGINAL COST LESS DEPRECIATION SINKING FUND DEPRECIATION ANALYSIS	
INPUTS	
Initial Cost	$ 950,600
Useful Life (years)	80
Salvage Value at End of Life*	$ 190,100
Sinking Fund Rate	4.50%
Evaluation Year	47
OUTPUTS	
$S_{n|j}$	729.56
Total Depreciation at Year 47	$ 160,200
Book Value	**$ 790,400**

*20% Salvage value

The asset value of segment 2 was determined using the average of the OCLD and RCNLD analyses. **A current book value of $3,030,000 was calculated.**

Summary

OCLD and RCNLD analyses are an effective method of calculating the depreciation of an installed utility, as well as the opportunity cost to the buyer of purchasing an installed utility. After performing these analyses using the sinking fund method of depreciation, current book values of the segments were determined. The portion of the 72-inch transmission main from the DWSD connection at Baxter and Potter Roads, west to the proposed 36-inch KWA connection at Center and Pierson Road, **Segment 1, has a current book value of $3,987,700.** The portion of the 72-inch transmission main beginning at the KWA tie-in at Center and Pierson Roads, west to the property line of the FWTP, **Segment 2, has a current book value of $3,030,000.**

Genesee County water rates could go up 16 percent following Detroit increase

GENESEE COUNTY, MI -- People in communities that get water from Detroit could see their costs climb as much as 16 percent as soon as this summer, said Genesee County Drain Commissioner Jeff Wright. The Detroit Water and Sewerage Department board last week appro Read More

TO: City of Flint Residents

FROM: Department of Public Works

RE: **Water Advisory Committee Questions**

DATE: March 19th, 2015

Prelude

As the City continues to work diligently to improve water quality and to address rates, we have looked to increase communication and transparency. At our first Water Advisory Committee Meeting there were 61 questions posed by the participants. We have taken the opportunity to answer all sixty-one questions individually.
The responses are broken into the categories in which they were posed as follows;

- Affordability
- Quality
- Safety
- Sustainability
- Miscellaneous

These responses will be posted on the City website. If there is a question that has been missed, please present your question at one of the committee meeting.

AFFORDABILITY QUESTIONS

1. **Will the water rates go down once the infrastructure is repaired? What type of bill reduction can we look forward to?**

   The infrastructure repairs will be ongoing annually. The City is currently in the process of evaluating what the rates will be for the upcoming year.

2. **What is the City of Flint going to do about the high costs, fees etc. that we're charged and have to pay for water we are afraid to use for anything? Drinking, cooking, cleaning, bathing, etc. Can our bills be reduced? When?**

   Local and State officials are working diligently to find ways to keep the system solvent while also addressing the high costs.

3. **This meeting is window dressing, it is not getting to the heart of the matter.**

   Industry experts agree that the solutions being presented and acted upon are the correct measures to take in order to improve the quality of water and to address the infrastructure needs.

   These meetings are an opportunity for more direct dialogue between residents and City officials.

4. **In 2007 my average bill was $35. Now it averages $170 in Flint. However, in Grand Blanc now averages $45. Why?**

   One of the more significant reasons is the fact that there are significant "fixed costs" that are a part of running the system and making repairs. The City has 15,000 fewer users than we had ten years ago to fund an antiquated system. The County has grown in population and users to support a much newer system that needs less maintenance.

5. **Cost is significant barrier for many families – how can the costs (in a sustainable way) be lowered or adjusted for lower income families?**

   Efforts are being made locally and at the state level to keep the system solvent while trying to address the high costs.

6. **Is the State of Michigan willing to subsidize the costs of our water over and above the recent gift of 2 million dollars?**

   City and State officials continue to work diligently to determine where there may be funding sources that can be ascertained for support.

7. **How has the KWA family, friends, board members, land owners profited from the pipeline construction, main. And operation. Who will provide the oversight and the transparency?**
   The City currently holds three seats on the KWA board and there are regular public board meetings each month. These meetings are the venue for the public to ask questions pertaining to all KWA issues such as this.

8. **Notification of bad quality = transparency. Not notified until Jan. 3**
   The City followed DEQ regulations for a tier two violation which calls for notification to be given within 30 days of the notice. The notice is dated December 16th and the mailing did occur January 3rd. Our intention is to become more transparent and consistent going forward which is one of the reasons we have developed the advisory committees.

9. **Notification requirements are set by the Michigan DEQ.**

   The City followed DEQ regulations for a tier two violation which calls for notification to be given within 30 days of the notice. The notice is dated December 16th and the mailing did occur January 3rd. Our intention is to become more transparent and consistent going forward which is one of the reasons we have developed the advisory committees.

10. **Shut-off nonpaying customers quicker, prosecute water theft and fraud.**
    There are current policies in place and the City continues to evaluate them for effectiveness.

    There is also a task force in place that is actively pursuing water theft and fraud with the intent being to ensure that everyone is paying for water they receive.

11. **Where are we at on getting money to fix the bad valves?**
    The City has budgeted $60,000 annually to cycle and repair bad valves. We are looking at raising this line item in the budget to increase the number of valves that we can address. In addition, we have developed a hydraulic model that will allow us to better determine the likelihood of the area where bad valves exist.

12. **There are established affordability rate programs in the US today that serves multiple economic objectives. I have a contact that has developed Affordability Rate programs and as we meet today is meeting in Washington, DC at a Congressional briefing with Detroit US Rep Conyers for City of Detroit.**

    We welcome any and all information that can assist with the current rates. I recommend that you forward that information to a City official and ask that it is delivered to the Treasurer or the DPW Director.

13. **Reduce deposit tenants need to pay to get water on.**

    This policy is currently under review as we go forward into the budget development.

14. **Flint pays one of the highest rates for water/sewer in the country. Does Flint still plan on implementing the 6% increase for the 2015 budget year?**

    This is currently under review and the new rates will be determined in the coming weeks.

15. **What will you do to help people with high bills who have health problems and have been forced to buy bottled water?**
    Every possible effort is being made to address the high rates.

16. **Will there be bill reductions for citizens that have not been able to use their water due to health reasons and other issues?**
    There is no rebate planned but significant effort is going into improving the water quality and addressing the rates.

17. **How can the committee assist in passing information on to Flint residents through our networks and be consistent with messages?**
    We are working to create increased lines of communication through multiple avenues including this advisory committee. One of our goals of the committee is to hear new suggestions and ideas and create a consistent message being delivered. In addition to a new webpage that the City is developing that is dedicated to water I would suggest contacting the City's Public Information Officer and providing information about your specific group.

QUALITY QUESTIONS

18. **Beyond just the water quality – a level of consistency is desired. For businesses that use water – we use a filtration system but the levels of pH are erratic. This makes it difficult to keep the filter working. Is consistency being addressed? When can we expect improvements?**

    The pH level of water leaving the plant is fairly stable and is normally in the range of 7.5 – 8.5 S.U. Other quarterly testing throughout the city at 25 sites has been in the same range as water leaving the treatment plant. If you are measuring pH outside of this range, you should contact the Water Plant and have it independently tested, or have it independently tested yourself.

19. **If my water is brown and smells of rotten eggs, how can you tell me to give that to my kids? Safe on paper is not what is coming from my pipes?**

    If your water is brown or has unusual odors, you should contact the water plant to have a sample of your water collected. I would not advise consuming any water that has unusual color. Water can also be effected by household plumbing and service lines that run from the curb box to the house. The City routinely tests for lead and copper within households.

20. Does River water vs Lake water really matter?

Lake water will require less treatment steps to meet drinking water standards. Lake water will also be more consistent, as river water parameters can change from day-to-day

21. When will we see these actions take place?

The City has been implementing measures to improve the water quality of water since November of 2014. We have already started the engineering process for the most recent recommendations that have been made.

22. I would like to know if you all checked Camp LeJeune health studies to see what TTHM does in the short term and what will you be doing for the people when and if this happen they develop anything from drinking water.

We have not checked the Camp Lejeune health studies, we continue to follow all EPA and DEQ regulatory procedures to provide safe quality water.

23. What determined the 4 hour time frame to test water and be able to capture a problem before it reached the public?

The 4 hour time frame is referring to bacteria testing performed at the treatment plant. , This was determined by water plant staff. Regulations only require one test per day. Other treatment processes are monitored continuously, hourly or daily.

24. When there is a break that will possibly cause poor water quality how difficult is it to notify residents so they will know to be aware and how will we be notified?

The City is in the process of developing an enhanced notification procedures to alert the potentially impacted area when there is a main break. The new procedures will be made available on the City website.

25. Why not add charcoal at end? Put it in beginning so don't need all chemicals.

When charcoal is used in water treatment, it is only useful for a limited time. If charcoal is used at the start of the treatment process, it will be "used" up very quickly resulting in more use of charcoal. It is more economical to place it at the end of the process so it will last longer.

26. You keep saying Water is safe. Yet daily citizens complain rashes, hair falling out and discolor. Water not safe. Why can't we go back to Detroit while you work on river? Sue McCormick said we could go on for 30-60 days. Stop charging for water we cannot use.

Currently, the water meets all Federal and State standards, and is safe to the best of our knowledge. The City will continue to look into and test water anywhere that there is a report of an issue.

27. How long will it take to get state approval for process enhancement?

Anywhere from 30 -120 days depending on the type of process change

28. It is my understanding that the Governor weighed in with $2million to address in part the concerns. What will it take to bring the Flint system to state of the arts quality?

The $2 million dollar grant was targeted at two shovel ready projects;

a) Decommissioning of the incinerator
b) Leak detection on the distribution system

The cost to replace pipe is approximately $1 million dollars per mile. There are ~600 miles of distribution main and another ~500 miles of sanitary and another ~500 miles of sewer. At this rate, it would amount to 1.6 billion dollars to replace the system.

29. Is the Flint River "dirtier" than other rivers used for drinking water?

The Flint River is not necessarily "dirtier" than other rivers used for drinking water. There are rivers that are "cleaner" and others that could be considered "dirtier". It all depends on what chemical or microbiological parameters we are discussing.

In any event, the Flint River water is a suitable water source for a public water supply, with proper treatment. Otherwise, the State DEQ would not have approved the switch in water sources. Finished water from Flint's Water Treatment Plant has consistently met all standards. The only quality issues have been associated with water at the point of usage, not from the plant itself.

30. Will switch to KWA change the problem with the distribution system?

No.

31. There is much discussion regarding TTHMS, but what about pseudomas and legionella and other water borne pathogens?

Each step of our water treatment process contributes to removing water borne pathogens. We use ozone, primary settling, chemical softening, and finally chlorine to remove these pathogens. The combination of treatment can provide 99.99% removal.

SAFETY QUESTIONS

32. What is being used as the disinfectant? Have chloramines been used? Will they potentially be used to disinfect in the future?

Currently chlorine gas is used as our disinfectant. Chloramines have not been used, and would have to be approved by the DEQ for use. Chloramines are a much weaker disinfectant, and may not be strong enough for our distribution system issues.

33. What are we going to do about Toxic Soil and toxins that the EPA doesn't test for? That seeps into our water.

Substances in the soil generally do not "seep into" water systems, even though a leak in a pipe, because the system is under pressure. At a pipe break or leak site, water passes out of the pipe, and into the soil, not the other way around. City policy makers can make determinations to increase testing for any chemical or toxin, should there be any questionable areas.

34. How often will the City check thoroughly for contamination?

The river water and finished drinking water is monitored quarterly for a large number of contaminants, including numerous organic chemicals (petroleum based), pesticides, herbicides, PCB's, and metals.

35. What are we going to do for citizens that are not able to use the water for health reasons?

Health questions have been presented to the Technical Advisory Committee members which includes the EPA, DEQ, and Hospitals for recommendations.

36. How soon can we have the unnecessary, caustic, fluoride stropped? It increases costs and health risks.

The use of fluoride was voted in by the residents years ago. Another vote would have to be initiated to remove the use of fluoride.

37. Can we get the fluoride turned off?

The use of fluoride was voted in by the residents years ago. Another vote would have to be initiated to remove the use of fluoride. The City adds fluoride at very low levels as a preventative measure for tooth decay. It is not considered caustic.

38. What can be expected when the KWA water is received in 2016? Will we be reanalyzing what the new water will mean regarding safety?

We will have to meet the same drinking water regulations, and thorough testing will be conducted. Testing requirements will be set by the MDEQ.

SUSTAINABIITY QUESTIONS

39. You spoke of valves being shut off, doesn't water just sit there and gather bacteria? How can you decrease some of the miles of pipe?

The Master Plan land use map gives us a chance to envision areas of town that are projected to not be populated in the future. This information is critical to determining where we may have an opportunity to reduce miles of existing pipe.

40. Is there a long term plan for infrastructure updates?

Through the Master Planning process along with engineered water reliability studies, the City has developed a Capital Improvement Plan that is designed to regularly invest in the infrastructure.

41. How could this be financed with limited city funds?

The City allocates a certain amount of funding annually to make routine repairs to the system. Larger repairs are considered capital improvements which is a different annual allocation, and more significant capital projects tend to look at the states Drinking Water Revolving Fund for resources.

42. Why haven't we brought in the army corps of engineers to fix our pipes?

The City, along with local engineering firms and local contractors is capable of designing and effectuating repairs. The capital expense is what is largely needed to maintain infrastructure. The Army Corps of Engineers has no direct jurisdiction over either the water distribution system or the wastewater collection system. Their jurisdiction is over navigable streams, such as the Flint River itself. In addition, the funding of their projects generally must be authorized by the U.S. Congress.

43. How can you ensure the water is safe to drink once it leaves the plant and it takes 2-3 weeks circulating in the pipes?

Samples are collected throughout the city regularly to assure that the water is safe. At least 100 samples a month are collected for bacteria testing, and 25 samples are collected quarterly and analyzed for certain water quality parameters.

44. Will Flint City be treating the water from Lake Huron?

Yes.

45. What are you going to do to help people with high levels of lead and iron?

The City conducts routine volunteer testing of homes for lead and iron. Most cases of high iron are related to service lines or household plumbing.

46. Will the crumbling infrastructure poison our KWA water? If not, why?

We would expect to still see occasional instances of "brown" or "yellow" water due to the status of our distribution system, and corroded home and building leads.

47. How do you deal with GM Contamination from the river?

There is always a concern of contamination in the river. Where our water treatment plant is located, there are no significant industrial sites upstream of our plant. Most of our water can be viewed as coming from Holloway Reservoir.

48. How is the bacteria eliminated since it takes 2-3 weeks to reach the homes?

We attempt to add enough chlorine at the treatment plant so that a small amount still remains in the water to continuously provide a level of disinfection.

49. Flint River Huge asset – clean it up and use it. Won't it save us money?

We are evaluating the purchase of equipment that will allow us to test water farther upstream to better prepare for treatment when it enters the plant. The Flint River will serve as the City's permanent backup supply of water.

50. Once KWA water arrives will it require a different treatment process than what the consultant is recommending for Flint River water and will state approval be required?

Yes, there will be differences in the treatment of water being delivered from KWA. The City is actively engaged in the evaluation process of how to properly treat water from Lake Huron.

51. Exactly how bad is our infrastructure: i.e. our pipe network? How costly to repair?

The cost to replace pipe is approximately $1 million dollars per mile. There are ~600 miles of distribution main and another ~500 miles of sanitary and another ~500 miles of sewer. At this rate, it would amount to 1.6 billion dollars to replace the system.

52. We've heard all the problems. Can we have some real solutions that will truly help the citizens?

Several industry experts agree that the solutions being presented and acted upon are the correct measures to take in order to improve the quality of water and to address the infrastructure needs.

53. Why did they tear down the United Way building? Pollution?

We will have to research that answer, it is not utility related.

54. What type of time frame are we looking at for the infrastructure repairs?

Infrastructure repairs and maintenance occur constantly and continuously, whether it is pipes underground, plants and pump stations above ground, or the roads on the ground. In a larger system, the work is never finished. Certain recommendations for treatment related projects are anticipated to be installed by late June.

MISCELLANEOUS

55. Is or has there been consideration for tiered services and rates for the poor, elderly, people on fixed incomes. How will the rates (under KWA) be determined, fixed, and reported? As well, how will fees be determined?

The system has revenue requirements that are necessary in order to stay solvent, City officials are continuously looking for solutions to properly charge all of the users on the system.

56. Need better online access for landlords to manage utility and tax payments.

This request will be forwarded to the Treasurer for appropriate follow up.

57. For about a year people have been complaining about water quality. Why has it taken this long to bring in a consultant and identify steps to make the water better?

The City of Flint has been working diligently on the water issues all along. A consultant was brought in to assure both the public and the City that appropriate actions have been and are being taken, and to see if there might be additional measures to enhance the process.

Much of the work that the City has undertaken has been with professional engineers and includes consultation with the DEQ. This work is largely chronicled on the City website and will continue through the implementation of the KWA.

58. Can you provide more info on Veolia and their expertise/experience with municipal water systems?

There is significant information available about Veolia that can be found online. The City's Purchasing Department can answer questions regarding the qualifications that the City requested in our RFP and what was presented by Veolia to meet those requirements.

59. Special phone number for professionals to use. Also add customer service workers to answer phone calls.

The City is working diligently to provide the best possible customer service for all residents, vendors, and professionals. If you feel that you have not received good service, we would like to know so that we can address it.

60. Why hold meeting in obscure location with limited seating? It should have been publicized better to allow for residents. It should have been held at City Hall to more residents could have attended and microphones were available.

Many residents voiced an interest in holding these events outside of City Hall. When that occurs we have to contend with venues that are sometimes booked or others that may have restrictions or limitations.

61. I am very concerned about the use of chlormines as an alternative disinfectant. Is this being used currently and if not, is it being considered for future use?

Currently chlorine gas is used as our disinfectant. Chloramines have not been used, and would have to be approved by the DEQ for use. Chloramines are a much weaker disinfectant, and may not be strong enough for our distribution system issues. The use of chloramines has been discussed as a way to combat TTHM's.

Good morning, Harvey:

It was good seeing you yesterday.

Below is a summary of yesterday's meeting, with attachments that I sent out this morning. There was a great deal of information discussed at the beginning of the meeting before you arrived. I wanted to pass it along to you.

If you have any questions, comments, or concerns please let me know.

Thank you,

Robert Widigan | Office of Fiscal Responsibility
State of Michigan | Department of Treasury

Subject: Flint Water Advisory Committee Meeting 03-19-15

Randy,

Yesterday's meeting was very informational; however, discussion was cut short by understandably upset water customers. The main points of information relayed during yesterday's meeting are as follows:

1. The City provided a table of water improvements* currently that the City is in the process of implementing or currently evaluating.
    - The City has built a hydraulic model to assist the City in identifying the locations of bad valves.
    - The City restructured four outstanding Drinking Water Revolving bonds allowing the City to afford an additional $2.24M towards Capital Improvements in Water. With $2.24M the City will:
        i. Installing a $1.5M Granulated Activated Carbon Filter (GAC). This will provide the best reduction possible and provide better than 90% removal of total organic carbon (TOC), dramatically reducing the potential for total trihalomethane (TTHM) formation. This entire project needs to be done by early June to assure a flow of water throughout the system. Several months are required for the engineering design, State approval, bidding of work, and installation of the GAC. According to the Veolia report, this process needs to begin now.
        ii. Accelerate repair and replacement of values, estimated at an additional $120K annually.

iii. Implement a process control management plan (PCMP) to increase efficiency and professionalism by allowing operators on the day shift to communicate with the night shift, ensure operators follow the same treatment plan for the water, ensure adjustments are unified between all operators, and inform staff as to what the process is when water quality set points begin to drift away from its desired quality levels. This will help the City transition to lake water. Estimated at $25K annually.
iv. Automate plant operations to allow the City to monitor activities throughout the entire plant, estimated at $450K.

2. Department of Public Works director Howard Croft provided a breakdown of FY 2015 Water and Sewer budgeted expenditures*, and explained 96% of the $70M is needed if the City uses DWSD or river water as its source.

3. Also provided was a document* with answers to all 61 questions asked at the last Water Advisory Committee.

Suggestions for the City:

1. The facilitators seemed to have inexperience in mediating or controlling the flow of the meeting. This lead to upset outbursts from the public, which stopped any information from being communicated to the public. The City may wish to hire professional mediators with experience in facilitating large public meetings.

2. The agenda did not include time for public comment. This gives the perception that the meeting is "closed off" to the opinions of the residents.

3. It was mentioned by the Mayor, that he City charges an initial cost of $425 to new renters. This fee appears to higher than anticipated, and more information should be provided regarding fees and fee structures.

If additional information is desired, please let me know.

*Sources: City of Flint, Water Advisory Committee meeting handouts (once received form the City they will be provided to anyone interested) and Veolia's Water Quality Report, dated: March 12, 2015.

Subject: revolving water loan forgiveness

Dave:
We wrote a story Thursday about Jerry Ambrose restructuring bond repayments to free up money for water system work.
I had a chance to talk to the mayor later and am working on a follow-up. He says he wants loan forgiveness rather than restructuring, and recalled that he requested that in his letter to the governor.
Is loan forgiveness for all or part of Flint's revolving water loans being considered?
Thanks,

Ambrose restructuring:

Hi Terry,

Ron's asking about Flint loan forgiveness. I can tell about the grants, other things we are doing and can pivot. But just so I know, is loan forgiveness a possibility?

Flint mayor wants water loan payments forgiven, not delayed

FLINT, MI -- Mayor Dayne Walling said he appreciates the plan to restructure four drinking water bonds, freeing up $2.2 million to help fix water safety and quality in the city. He'd just like to take it a step further. Walling said that he's continuing to push for Read More

Jerry:

I wanted to follow-up on our earlier telephone conversation on the valuation analysis for this water main. You have approval to discuss this with the Genesee County Drain Office. The number for the sale needs to the book value stated in the study. This will also need to be approved by the Treasurer. Let me know if you have any questions.

Thanks,
Randy,

Subject: Flint Water Advisory Committee Meeting 03-19-15

Randy,

Yesterday's meeting was very informational; however, discussion was cut short by understandably upset water customers. The main points of information relayed during yesterday's meeting are as follows:

1. The City provided a table of water improvements* currently that the City is in the process of implementing or currently evaluating.
    - The City has built a hydraulic model to assist the City in identifying the locations of bad valves.
    - The City restructured four outstanding Drinking Water Revolving bonds allowing the City to afford an additional $2.24M towards Capital Improvements in Water. With $2.24M the City will:
        i. Installing a $1.5M Granulated Activated Carbon Filter (GAC). This will provide the best reduction possible and provide better than 90% removal of total organic carbon (TOC), dramatically reducing the potential for total trihalomethane (TTHM) formation. This entire project needs to be done by early June to assure a flow of water throughout the system. Several months are required for the engineering design, State approval, bidding of work, and installation of the GAC. According to the Veolia report, this process needs to begin now.
        ii. Accelerate repair and replacement of values, estimated at an additional $120K annually.

iii. Implement a process control management plan (PCMP) to increase efficiency and professionalism by allowing operators on the day shift to communicate with the night shift, ensure operators follow the same treatment plan for the water, ensure adjustments are unified between all operators, and inform staff as to what the process is when water quality set points begin to drift away from its desired quality levels. This will help the City transition to lake water. Estimated at $25K annually.

iv. Automate plant operations to allow the City to monitor activities throughout the entire plant, estimated at $450K.

2. Department of Public Works director Howard Croft provided a breakdown of FY 2015 Water and Sewer budgeted expenditures*, and explained 96% of the $70M is needed if the City uses DWSD or river water as its source.

3. Also provided was a document* with answers to all 61 questions asked at the last Water Advisory Committee.

Suggestions for the City:

1. The facilitators seemed to have inexperience in mediating or controlling the flow of the meeting. This lead to upset outbursts from the public, which stopped any information from being communicated to the public. The City may wish to hire professional mediators with experience in facilitating large public meetings.

2. The agenda did not include time for public comment. This gives the perception that the meeting is "closed off" to the opinions of the residents.

3. It was mentioned by the Mayor, that he City charges an initial cost of $425 to new renters. This fee appears to higher than anticipated, and more information should be provided regarding fees and fee structures.

If additional information is desired, please let me know.

STATE TREASURER

DATE: March 23, 2015

TO: Rick Snyder, Governor

FROM: R. Kevin Clinton, Treasurer

SUBJECT: Status of Financially Stressed Local Governments

EMERGENCY MANAGER

Flint
Emergency Manager: Gerald Ambrose
Appointed: January 13, 2015
Anticipated Exit: April 2015

Recent Developments

- The city was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the city's water system through improved waste management, leak detection, and pipe assessments.
- An EM Order is being prepared that will restructure its SRF loans. This would free up approximately $2.2M allowing the city to further improve its water system.
- The City of Flint had informed residents that it is in violation of the Clean Water Standards Act, after unsafe levels of trihalomethanes (TTHM, a disinfectant by-product) were found in the water. Recent testing by the Michigan Department of Environmental Quality (MDEQ) Testing Lab showed that the total TTHM levels for the month of February are well within the Environmental Protection Agency (EPA) guidelines for safe water. However, because EPA regulations require that the four month average for all testing sites be within certain guidelines, the city is still considered to be non-compliant by the MDEQ. Monthly testing will be ongoing, and is being conducted by several parties.
- The city hired Veolia to provide an analysis of the water system, including recommended improvements, and associated costs. Recommendations included water plant improvements, distribution system improvements, new policies and procedures, and better communication with customers. On March 19, 2015, the report was presented to the Flint Water Advisory Committee, but the presentation broke down due to citizen unrest. An International City/County Management Association (ICMA) comprehensive public safety study has been completed, and was presented to the City Council on January 22, 2015. Several recommendations for both police and fire are currently being reviewed. Of the 16 major recommendations for public safety, the following four are most crucial:

- Establish more aggressive protocols for responding to service demands from the public.
- Equip a minimum of one marked patrol car with an automated external defibrillator (AED) and an automatic license plate reader, and equip every car with e-ticket readers and printers.
- Develop a robust in-service training program.
- Establish and publish a clear multi-year strategic plan that includes specific performance goals and objectives for all units.

Significant Actions/Issues

- The General Fund accumulated deficit for FY 2014 was $9M. In FY 2013, the General Fund had an accumulated deficit of $12.9M. Noted reductions included $5.6M from Parks & Recreation, 2.6M from Community Development, 1.8M from Public Safety, and $1.7 from Building Inspections.
- If the city loses the lawsuit over retiree healthcare, the budget does not assume this potential additional $5M to $6M expense, which will grow at a rate equal to the general rise in healthcare costs.

Lincoln Park

Emergency Manager: Brad Coulter
Appointed: July 3, 2014
Anticipated Exit: January 2016

Recent Developments

- The city was awarded $143.5K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through updated technology.
- A fire union collective bargaining agreement has been approved. The estimated annual cost savings is approximately $500K by reducing overtime and paid leave.
- A Firefighters and Police Officers Retirement Act proposal has been placed on the May 2015 ballot. If approved by voters this will raise an additional 6 mills, or $3M, for fire and police pension funding and retiree healthcare.
- Poor actuarial advice has lead retiree health care in the city to be underfunded. EM Coulter has proposed changing retiree contracts to replace cost of city-provided health insurance with a stipend for retirees to purchase their own health coverage. The EM's plan would offer a single retiree roughly $150/month, a couple could receive $350/month, with a family cap set at $425/month. This change would reduce retiree healthcare costs from $4.1M to 600K annually.
- The EM submitted his proposed changes to City Council in March; and they did not act within the statutory deadline. The Treasurer's approval will be needed before the plan can be implemented. It is anticipated that the changes would be implemented in June or July of 2015.
- FY 2014 ended with a General Fund accumulated deficit of $736K out of a total budget of $21M. This is a significant increase from the FY 2013 accumulated deficit of $89K. Noted areas of increased expenditures within the governmental funds included Public Safety by $1.1M, Public Works by $700K, and Culture and Recreation by $600K.

Significant Actions/Issues

- The police and fire pension plan is 30% funded. The general employee pension plan is 22% funded. The aforementioned Firefighters and Police Officer Retirement Act ballot proposal attempts to address the pension funding shortfall.

Issues to Resolve before EM Exit

- Police collective bargaining agreements must be finalized.
- Increase and stabilize pension and other post-employment benefits (OPEB) funding levels.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

FRC Created: November 12, 2014

FRC Members: Bill Martin, Brenda Jones, Darrell Burks, John Roberts, Kevin Clinton, Lorron James, Mike Duggan, Stacy Fox, Tony Saunders

Recent Developments

- The City of Detroit held its first statutorily-required Revenue Estimating Conference on February 20, 2015. The conference principals, Jay Wortley of Treasury, John Hill of the City of Detroit, and George Fulton of the University of Michigan, approved the consensus revenues as presented. The principals agreed that the revenue estimates were conservative.
- At the FRC's February 23, 2015 meeting, the FRC approved, and referred to the newly formed Finance and Enterprise Resource subcommittee for further review, the city's revenue estimates that were presented at the aforementioned Revenue Estimating Conference. The city will be incorporating the revenue estimates into its Four-Year Financial and Operating Plan (Plan) that will be presented to the FRC at its March 23, 2015 meeting for the Commission's review. The FRC also approved the city's debt service requirements report and several operational contracts.
- Treasury hired Ron Rose as the Executive Director (ED) for the Office of the FRC within the Department. His start date was March 2, 2015. Treasury is in the process of filling other key staff positions and has engaged the financial consulting services of UHY. Treasury has also engaged Martha Kopacz from Phoenix Management Services. Ms. Kopacz and her team acted as independent financial experts for Judge Rhodes in the city's Chapter 9 bankruptcy proceedings. Among other duties, the consultants will provide assistance in reviewing and analyzing the Plan for the FRC.

Significant Actions/Issues

- The city will be submitting its Four-Year Financial and Operating Plan to the FRC on March 23, 2015 for review, with FRC action expected on April 20, 2015. The city's Plan will encompass the second year (FY16) of Emergency Manager Orr's two-year budget and use this as its base year with no changes, plus three years (FY17, FY18, and FY19).
- Ensuring that the Plan is based on sound assumptions and that the city's operational budgets and actual spending conform to the Plan will be one of the FRC's most significant tasks.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Hamtramck
RTAB Appointed: December 18, 2014
RTAB Members: Deborah Roberts, Mark Stema, Cathy Square, Karen Young

Recent Developments
- The city was awarded $622K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to complete a property reappraisal which will provide updated and accurate assessing records, upgrade City Hall security, and enhance public safety through improved street lighting.
- The Police Chief resigned on March 11, 2015. Lieutenant Ann Moise was appointed Acting Police Chief.
- Deputy City Manager/Treasurer John Gabor start date was February 2, 2015.

Significant Actions/Issues
- A complaint was filed in the federal court by Hamtramck retirees over changes to healthcare benefits in October 2014. The potential exposure to the city is currently unknown, but the city is confident that the benefits in question were improperly offered and were rightfully terminated.
- The annual pension liability is anticipated to increase from $3.5M in FY 2015 to $4.3M in FY 2019. This increase is a result of closing certain pension plans and the Michigan Employee's Retirement System (MERS) policy of accelerating the required contribution for closed plans. These increases were included in Emergency Manager Square's two-year budget.

Allen Park
RTAB Appointed: September 26, 2014
RTAB Members: Suzanne Schafer, Joyce Parker, Fredrick Frank, Karen Barann

Recent Developments
- The City Council voted on January 27, 2015 to suspend City Administrator Karen Folks. This vote was taken despite two Emergency Manager Orders that prohibit termination until October 2015 and establish a process for termination. The City Administrator and City Council negotiated a separation agreement which was approved by the RTAB on March 12, 2015. The RTAB also approved the City Council's appointment of the Finance Director as Interim City Administrator. A search firm will be hired to begin the process of selecting a new City Administrator.
- The city was expecting to issue a bond tender offer beginning in March to reduce outstanding debt. However, the tender offer has been delayed due to the uncertainty between the City Council and City Administrator. A timeline to complete the bond tender process will be developed by the various parties in late March 2015.

Significant Actions/Issues
- Litigation was filed by retirees challenging the Emergency Manager's authority to reduce other post-employment benefits (OPEB) liabilities. A motion for summary disposition is pending. No date has been set to hear this motion.
- City Hall will be relocating to a temporary facility in May 2015. The present facility is in poor condition.

Benton Harbor
RTAB Appointed: March 10, 2014
RTAB Members: Larry Steckelberg, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments
- The city was awarded $910K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the water system through water main replacements and fire hydrant repairs, and to complete a property reappraisal which will provide updated and accurate assessing records. Additionally, the city will provide community enhancement through blight management and sidewalk replacement.
- On February 2, 2015, the City Commission unanimously approved a one-year contract extension for City Manager Darwin Watson.

Significant Actions/Issues
- On January 20, 2015, the City Commission passed a resolution adopting a fund balance policy consistent with Government Finance Officers Association (GFOA) Best Practices. The RTAB approved the resolution on January 28, 2015.
- FY 2014 audited General Fund revenues exceed expenditures by $1M, out of a total budget of $6.1M.

Ecorse
RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joyce Parker

Recent Developments
- The city was awarded $350K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting.
- The city signed a contract with UHY to provide part-time financial services until a permanent solution can be found. The RTAB approved the contract on January 13, 2015.
- The City Council cancelled the contracted City Administrator search with the Michigan Municipal League (MML) and appointed Wayne O'Neal as full-time City Administrator. On February 10, 2015, the RTAB approved the City's resolution appointing Mr. O'Neal.
- The city continues to have trouble attracting qualified candidates, and filling higher level administrative positions.

Significant Actions/Issues
- The RTAB's Annual Evaluation for the Governor was not favorable, citing a lack of local financial literacy, political infighting, and an inability to develop a balanced multi-year budget. For these reasons, the Board did not recommend removal of RTAB oversight at this time.
- Municipal Employee's Retiree System (MERS) pension contributions are anticipated to increase from $1.8M in FY 2015 to $2.4M in FY 2016 because of accelerated funding for closed plans.
- The city has been unable to balance their five-year budget. Previous budgets project deficit spending in FY 2016, and exhaustion of all resources in FY 2017. To avoid this eventuality, significant expense reductions will be necessary in upcoming fiscal years. However, an action plan to reduce expenses is not forthcoming from the city.

Pontiac
RTAB Appointed: August 19, 2013
RTAB Members: Edward Koryzno, Louis Schimmel, Keith Sawdon, Robert Burgess

Recent Developments
- The city was awarded $125K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used for community enhancement through blight management.
- In April 2014, the Final Emergency Manager Order was amended to create a Deputy Mayor position. A suitable candidate was not found through a Michigan Municipal League (MML) search. A new search firm has been hired to recruit a Deputy Mayor as part of the transition back to Home Rule.
- Per the audit, the General Fund's accumulated fund balance for FY 2014 is approximately $5M out of a total budget of $27M.
- The City Charter Revision Commission submitted a proposed Charter by the February 10, 2015 deadline and the proposed Charter will be on the May 2015 ballot.

Significant Actions/Issues
- The General Fund is structurally balanced in FY 2015 but expenditures are projected to exceed revenues by $360K due to deferred projects from FY 2014.
- Oakland County Circuit Court Judge Michael Warren dismissed the city's condemnation lawsuit involving the Phoenix Center because the city failed to include compensation for the lien placed on the property. The city is preparing an appeal of the decision to the U.S. Sixth Circuit Court of Appeals.
- The City of Pontiac Retired Employees Association v. City of Pontiac lawsuit in the United States District Court was reassigned from Judge Lawrence P. Zatkoff to Judge Avern Cohn. The lawsuit challenges former Emergency Manager Schimmel's elimination of retiree healthcare and replacement with an annual stipend. The General Employees Retirement System (GERS) Pension Fund is significantly overfunded and the parties are exploring options to use the overfunded portion to fund retiree healthcare.
- On March 17, the Michigan Court of Appeals reversed and remanded for trial a previous lower court dismissal of a previous 2013 suit which challenged the EM ordered nonpayment of $3.9 million into a VEBA trust for the fiscal year ending 2012. This appellate order is not a judgment against the city, rather it allows the previously dismissed lawsuit to proceed. The actual liability of the city will be determined either by a future settlement or by a final determination of the Oakland County Circuit Court.
- The GERS Board proposal was submitted to the court on January 30, 2015.

CONSENT AGREEMENT

Inkster
Date Executed: February 20, 2012
Consent Agreement Consultant: Mark Stuhldreher

Recent Developments
- The city was awarded $855K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to complete a property reappraisal to provide updated and accurate assessing records, enhance the water system through fire

hydrant repairs, and enhancing public safety through the creation of a multi-jurisdictional narcotics team, police officer training, deployment of an additional police officer, providing a backup power source, and updating technology.

Significant Actions/Issues
- The FY 2014 General Fund accumulated deficit is $767K out of a total budget of $11M.

River Rouge
Date Executed: December 15, 2009
Consent Agreement Consultant: N/A (P.A. 72)

Recent Developments
- The city was awarded $592K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting, along with infrastructure replacements to City Hall.
- Deborah Hayes-Price has been promoted to Chief of Police to replace former Police Chief Jeffrey Harris who retired in January.

Significant Actions/Issues
- U.S. Steel annual $1M tax settlement payment to the city has expired.
- General Fund revenues exceeded expenditures by $885K in FY 2014 and the accumulated fund balance was $1.9M.
- A reduction in healthcare benefits for active employees and retirees was implemented on November 1, 2014. The city estimates an annual savings of $400K.

Royal Oak Township
Effective Date: April 21, 2014
Consent Agreement Consultant: Robert Burgess

Recent Developments
- The township was awarded $274K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting and increased police services.
- The State Treasurer rejected a decision by the Township Board to extend the contract with the current township attorney at a cost that was twice the amount of the lowest bidder. The Consent Agreement Consultant, Robert Burgess, issued an order requiring the township to extend a contract for legal services to the lowest bidder, Giarmarco, Mullins & Horton, P.C. This is one example of the difficulty the Consent Agreement Consultant has encountered in his efforts to have the Supervisor and Township Board comply with provisions of the Consent Agreement.
- The State Treasurer approved an amendment to the Fire Services Contract with the City of Ferndale on March 11, 2015. This amendment is projected to reduce annual costs to the township by $4K thru the end of 2015.

Significant Actions/Issues
- The Michigan State Police continues to provide police services to the township. The Department of Treasury and the Michigan State Police continue to work with the township and are reviewing a proposal from the City of Hazel Park to provide police services to the township.

- The State Treasurer approved the township's 2015 budget on December 16, 2014, with the requirement that the township work with Treasury to implement additional budget amendments to improve its overall effectiveness. No additional actions have occurred to implement these additional budget amendments as the township was without the services of a financial consultant from the time of budget adoption through March 1, 2015.
- The township currently has an aging accounts payable in excess of $200K.

NEUTRAL EVALUATION

Highland Park
Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
PA 436 Option Selected: Neutral Evaluation

Recent Developments
- The city was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the city's water system through meter replacement, leak detection, and system repairs.
- Cathy Square, former Hamtramck Emergency Manager, was hired to fill the position of City Administrator.
- Huron Consulting has been hired to prepare a request for proposal (RFP) to solicit firms to operate and maintain the city's water and sewer systems, as required by the city's Plan of Adjustment. The proposals are due on April 20, 2015.
- BenStaff has been hired by the city to make recommendations that will reduce healthcare costs.
- The law firm of Lewis & Munday has been hired to assist the city with the restructuring of the other post-employment benefits (OPEB).

Significant Actions/Issues
- The city selected Tetra-Tech to prepare a water and sewer rate study. A draft study was completed on February 20, 2015. This study provides the city with proposed rates, which if adopted, will provide adequate revenue to operate and maintain the water and sewer system.
- The city's liabilities total $117.6M. Some of the major components are: $55.3M debt, including $20.7M owed to the Detroit Water and Sewerage Department (DWSD), $17.7M pension bonds, and $26.1M unfunded other post-employment benefits (OPEB) liabilities.
- Summary of the Plan of Adjustment for the City of Highland Park was adopted on August 28, 2014.
    - Fifth Third Bank has finalized an agreement and settled for 50 cents on the dollar for outstanding debt.
    - By June 30, 2015, Highland Park, as required by terms of the emergency loan, must have a third-party operator for its water/sewer systems.
    - After the selection of this third-party operator, DWSD and Highland Park will negotiate a long-term settlement for outstanding water and sewer debt.
    - The city must reduce retiree healthcare benefit costs.
    - In August 2015, an emergency loan of $16.4M, which includes the restructuring of $4.8M in existing loans, will be used to refund $2.7M in Fiscal Stabilization Bonds, $5.2M in Financial Recovery Bonds, and $3.7M in State Revolving Fund Bonds.

OTHER COMMUNITIES

Wayne County

Recent Developments

- In December 2014, the Michigan Supreme Court ruled unanimously in favor of retirees who receive a 13th check to offset inflation. The county is required to return $32M to the Pension Equity Fund.
- A Financial and Operating Plan and a voluntary Consent Agreement are being drafted.

Significant Actions/Issues

- Cash reserves reached its lowest point in August 2014 with pooled cash falling to approximately $73M. The average balance is $170M. This number includes proceeds from a short-term borrowing of $75M.
- A letter to the Treasurer from previous County Executive Robert Ficano, indicates that with the significant transfer of revenue from the Delinquent Tax Revolving Fund (DTRF), the General Fund deficit will be reduced to approximately $50M for FY 2014.
- In the same letter, it is indicated that the County has budgeted a transfer of $64M from the DTRF to balance the General Fund in FY 2015. However, this represents the last of the DTRF's unrestricted equity. This will result in a potential budget gap of $20M in FY 2016.
- The preliminary results of the county's actuarial report indicate a drop in other post-employment benefits (OPEB) liability of approximately $409M. This reduction is a result of the county choosing less expensive plans and implementing cost sharing measures. The Plan participants are now paying a larger share of the cost. This does not include any saving opportunities resulting from a proposed change to retiree healthcare.
- The county is working to resolve a disagreement with the Mental Health Authority over services provided to jail inmates. The county currently pays for this service but believes it falls under the purview of the Authority.

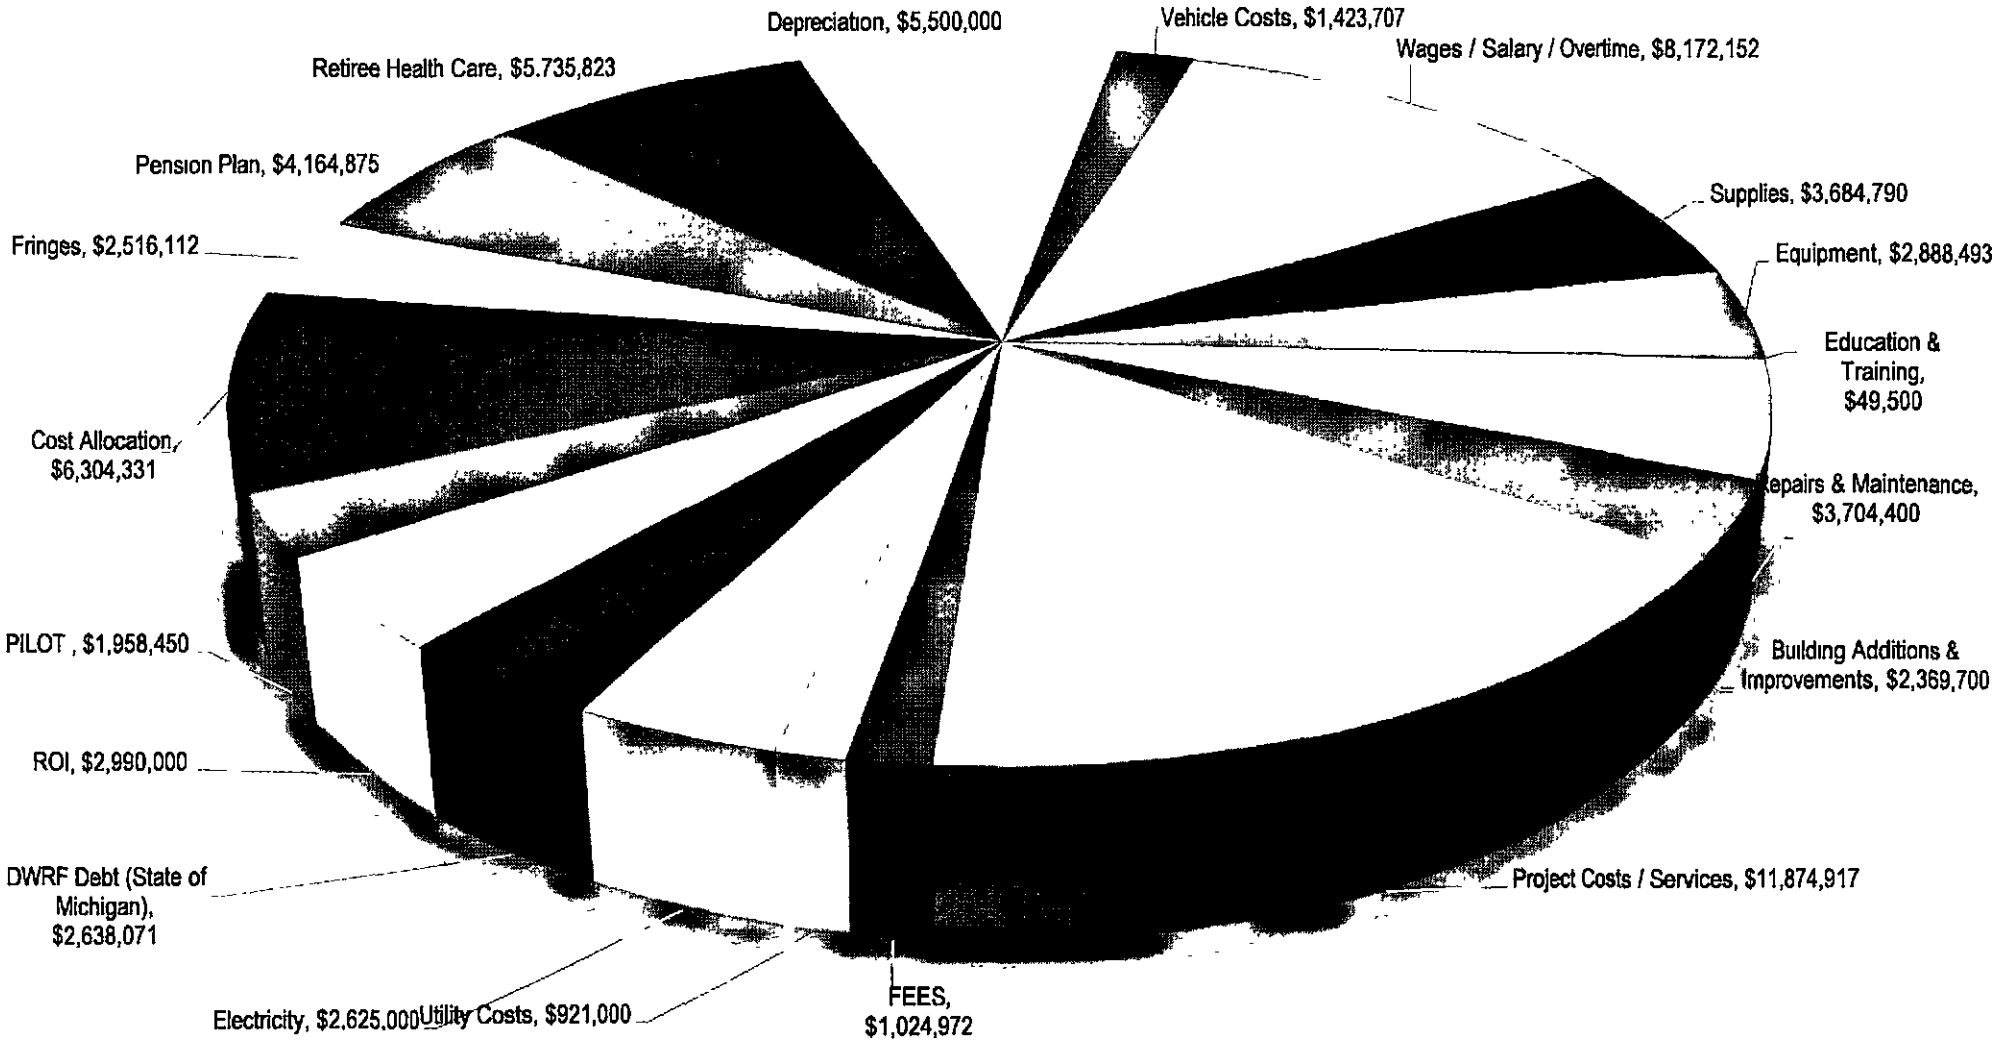
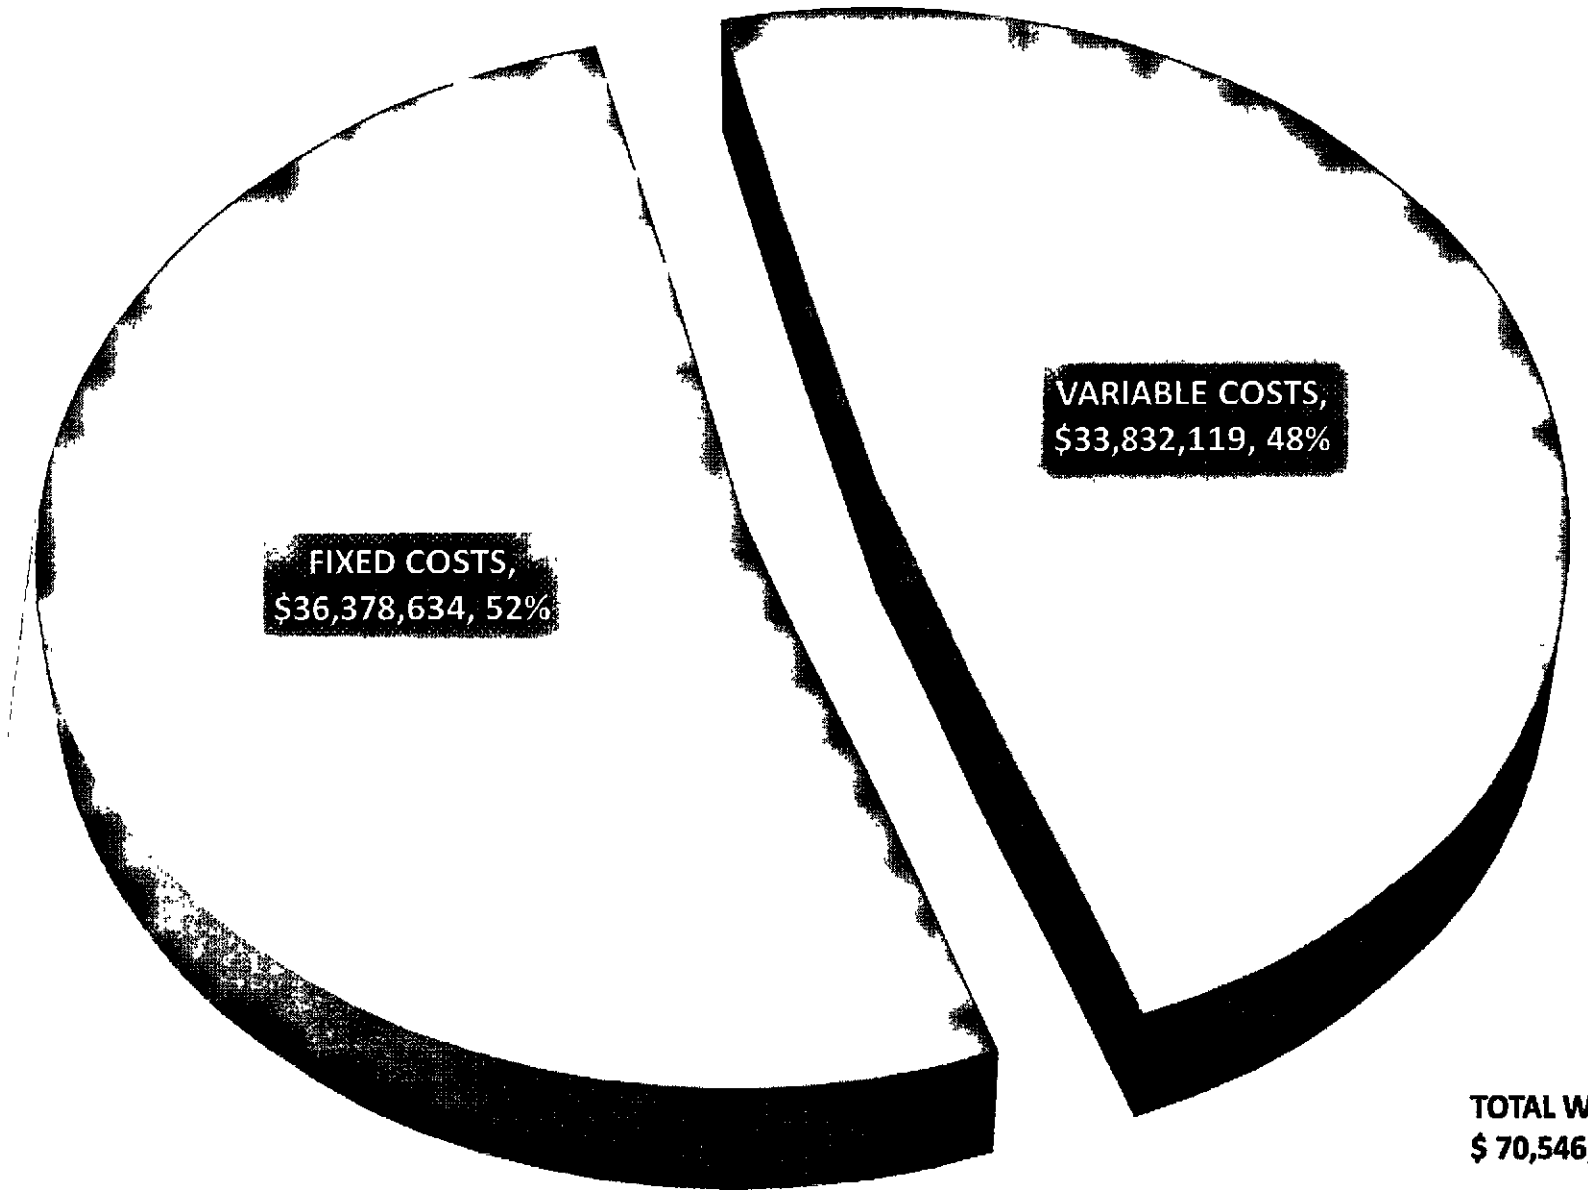
FY 2015 Water & Sewer Budget



Vehicle Costs	Wages / Salary / Overtime	Supplies	Equipment
Education & Training	Repairs & Maintenance	Building Additions & Improvements	Project Costs / Services
FEES	Utility Costs	Electricity	DWRF Debt (State of Michigan)
ROI	PILOT	Cost Allocation	Fringes
Pension Plan	Retiree Health Care	Depreciation	

FY 2015 Water & Sewer Budget



TOTAL Water & Sewer
$ 70,546,29 3

Budget Specifics:

FEES		
	Compiance Fees	$131,972.00
	KWA Fee	$584,000.00
	Printing / Publishing / Postage	$40,200.00
	Street Services	$154,000.00
	Computer Software	$31,200.00
	Uniforms	$83,600.00
	TOTAL	**$1,024,972.00**

UTILITY COSTS		
	Gas	$595,000.00
	Water & Sewer	$326,000.00
	TOTAL	**$921,000.00**

Water System Facts:

Over 46,000 Users on the system in 2006
Under 30,000 Users on the system in 2015

3	Buildings to maintain
118	Vehicles
~138	Full-time employees
~600	Miles of distribution mains
~ 500	Miles of sewer mains
~ 500	Miles of sanitary mains
~3900	Hydrants
~7,300	Valves

Over 1,300 field water tests performed Annually
Over 300 Water main breaks to repair annually
Over 100 Valves replaced/repaired annually
Over 1000 Cut & plug services performed annually
Over 100 Catch basins cleaned/replaced annually
Over 100 Street cut repairs performed annually
Over 300 Miss Dig orders staked annually
Over 300 Sewer inspections performed annually
Over 300 Curb boxes orders performed annually

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system recently violated a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, November 20 of 2014, and February 17, 2015). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the MCL. The standard for TTHMs is 80 micro grams per liter (µg/L). The location reporting the highest TTHM level was 105 ug/L; thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. These people may be at increased risk and should seek advice about drinking water from their health care providers.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015. Our most recent individual sample results were all less than half the 80 µg/L standard, however since compliance is calculated using a locational running annual average (LRAA) of the most recent four quarters, we are still out of compliance with the MCL at two of eight locations.

For more information, please contact Mr. Brent Wright at 517-787-6537, or the Flint Water Plant at 4500 North Dort Highway, Flint, Michigan 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION. F2 S3 WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

Signature	Title	Date Distributed
	Plant Supervisor	March 25, 2015

Reminder to water supplier: This notice/certification must be sent to the Department of Environmental Quality.

City of Flint

Date: March 18, 2015

Re: PA 436 Approval of Restructuring of City of Flint's Outstanding Water Supply System Revenue Bonds, Series 1999, Series 2000, Series 2001 and Series 2002

The Emergency Manager ("EM") of the City of Flint, County of Genesee, State of Michigan (the "City") has determined that it is in the best interest of the City and is consistent with the City's restructuring efforts and will promote the goals and purposes of Act 436, Public Acts of Michigan, 2012 ("Act 436"), for the City to restructure the debt service schedules for all of the City's outstanding water supply system revenue bonds, to provide funding to finance improvements and replacements (the "Improvements") to the City's Water Treatment Plant and water distribution system from the Plant. The salient terms and benefits of the transaction are as summarized below:

- The City presently has the following bonds outstanding, the proceeds of which were used to finance improvements to the Flint Water Treatment Plant, (the "Plant"): (i) $2,543,994 Water Supply System Revenue Bonds, Series 1999 (the "1999 Bonds"); (ii) $3,275,000 Water Supply System Revenue Bonds, Series 2000 (the "2000 Bonds"); (iii) $4,256,408 Water Supply System Revenue Bonds, Series 2001 (the "2001 Bonds") and (iv) $10,694,934 Water Supply System Revenue Bonds, Series 2002 (the "2002 Bonds" and collectively with the 1999 Bonds, the 2000 Bonds and the 2001 Bonds, the "Bonds").

- All of the Bonds were sold to and are presently owned by the Michigan Finance Authority (the "MFA"), as successor to the Michigan Municipal Bond Authority.

- In connection with the issuance of each series of the Bonds, the State of Michigan, acting through its Department of Environmental Quality (the "DEQ") entered into a Supplemental Agreement with the City (collectively, the "Supplemental Agreements"), providing certain covenants of the City and approving the issuance of the Bonds.

- The City does not have sufficient available funds on hand to finance the Improvements.

- The Emergency Manager proposes to restructure, amend and restate the debt service payment schedules on the Bonds, by postponing the principal payments, but not the interest payments, next coming due on April 1, 2015 for the 1999 Bonds of $395,000, the 2000 Bonds of $435,000 and the 2001 Bonds of $485,000 and the payment due on October 1, 2015 for the 2002 Bonds of $925,000, all as more particularly described in the Emergency Manager's Order (the "Order") accompanying this Memorandum (collectively, the "Restructuring"), to allow the total amount on hand and available for such principal payments of $2,240,000 to be used to pay for the Improvements.

- Except for the amendment and restatement of the debt service schedules for the Bonds, all other terms of the Bonds including the security, the interest rates and the final maturity dates will remain unchanged.

- The City, the MFA and the DEQ shall approve the Restructuring pursuant to a certain Agreement Related to Restructuring of Debt Service Schedules of City of Flint Water Supply System Revenue Bonds, Series 1999, Series 2000, Series 2001 and Series 2002.

Pursuant to Section 12(1)(x) of Act 436 the Emergency Manager is authorized to enter into an agreement with the MFA to allow the Restructuring subject to the approval by you as State Treasurer. Accordingly, the Emergency Manager hereby submits the proposed Restructuring to you for review and requests that you authorize the Restructuring contemplated herein.

APPROVED

Emergency Manager Statement on Water: Spending Extra $12 Million on Detroit Water "Incomprehensible" When Flint Water Just as Safe

Flint, Michigan – March 24, 2015 – At the City Council meeting held on Monday, March 23, 2015, Flint City Council made a motion to "do all things necessary" to return to using water purchased from Detroit and discontinue use of the Flint River as a water source. The following statement from Emergency Manager Gerald Ambrose addresses that point:

"Flint water today is safe by all EPA and MDEQ standards and the City is working daily to improve its quality. Users also pay some of the highest rates in the state because of the decreased numbers of users and the age of the system.

"It is incomprehensible to me that 7 members of the Flint City Council would want to send more than $12 million a year to the system serving southeast Michigan, even if Flint rate payers could afford it. Water from Detroit is no safer than water from Flint.

"If $12 million annually were available for discretionary use, it would be far better spent reducing rates paid by Flint customers and/or modernizing the City's system."

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Gerald Ambrose
Emergency Manager

TO: Wayne Workman, Deputy Treasurer
Treasury Department
State of Michigan

FROM: Jerry Ambrose, Emergency Manager
City of Flint

DATE: March 3, 2015

As the Emergency Manager for the City of Flint, I am charged with restoring the City government to financial solvency, and working to assure that the City moves forward on a financially sustainable basis. The steps taken over the past three years have been difficult. Taxes and fees have been raised, services and workforce reduced, and ongoing costs, including legacy costs, have been constrained.

The current controversy surrounding the provision of water, and the path for resolution, has a potentially significant impact on the progress that is being made. I am satisfied that the water provided to Flint users today is within all MDEQ and EPA guidelines, as evidenced by the most recent water quality results conducted for MDEQ. We have a continuing commitment to maintain water safety and to improve water quality, and have dedicated resources to assure this commitment will be made.

The oft-repeated suggestion that the City should return to DWSD, even for a short period of time, would, in my judgment, have extremely negative financial consequences to the water system, and consequently to the rate payers. By the most conservative estimates, such a move would increase costs by at least $12 million annually, with that amount achieved only by eliminating virtually all budgeted improvements in the system. For a system with Unrestricted Assets of only $740,745, according to the June 30, 2014 audited financial statements, the only recourse within the City's control would be to increase revenues significantly. And in my judgment, that would come from raising rates for water by 30% or more . Further, changing the *source* of the city's water would not necessarily change any of the *aesthetics* of the water, including odor and discoloration, since those appear to be directly related to the aging pipes and other infrastructure that carry water from the treatment facility to our customers.

This direction of discussion also deviates from what, in my judgment, should be the focus: How can we not only operate and maintain a system to assure the delivery of safe and quality water dependably, but significantly reduce the cost of water and sewer to the users? At an average of $149 per month for water and sewer service for a residential user, the cost is extremely high in comparison to surrounding areas, as well as most areas across the state, and creates a significant financial burden for many users. In my judgment, we should all be concentrating on how to reduce rates by 50% or more. Unfortunately, there are no easy or evident answers, and continuation of the status will be an impediment to the sustainable recovery of the City of Flint. It is a conversation that I expect we will have with the recently created Water Quality Advisory Committee.

My reasoning for this conclusion is as follows:

One of the decisions made in the context of beginning to eliminate deficits and to restore financial stability to the City of Flint was to increase water and sewer rates significantly – the only choice available to financially stabilize a system that as of June 30, 2012, had a deficit of $8,758,091. Another was to leave DWDS for the KWA because it offered the opportunity to lower future rate increases. A third decision was to utilize the Flint River on an interim basis when DWSD unilaterally terminated the City's contract for water purchase. That decision was made because it also offered an immediate cost savings opportunity which translated into the ability to upgrade the Water Treatment Plant without having to seek financing. It was a reasonable decision because of our experience in using the river in a back-up capacity, including test runs on a quarterly basis for several decades.

Unfortunately, the switch to the river as a primary source was more challenging than anticipated, and the harsh winter of 2013-2014 resulted in much more damage to the aging water infrastructure than in previous years. The result was the issuance of required notices that water exceeded established guidelines for safety as it could affect certain vulnerable populations, and some users of the system experienced unpleasant odors and discoloration. Some users also appeared to have had some negative reactions to the new source of water. However, as soon as the test results were known, City staff took immediate actions to address the concerns. These actions are evidenced today by the fact that MDEQ has certified that our most recent testing shows water from all testing sites to be well within acceptable guidelines. Additionally, the City is continuing to taking the necessary actions to assure that the water supply remains safe and that water quality continues to improve.

As the City has moved to address the situation, the suggestion continues to be made that the City should re-engage with DWSD and purchase water at least until the KWA pipeline is supplying water. As evidenced by the most recent letter from DWSD, such a decision would immediately increase the City's cost by $846,700 per month, or $10,160,400 per year, just for the fixed cost portion of the price. The actual *purchase* of water would be an additional fee, and dependent upon

the quantity purchased. We estimate the actual water purchase cost to average more than $1 million per month, for a grand total of approximately $22 million per year. Finally, the DWSD offer is conditioned upon the City (or presumably the KWA) agreeing to negotiate a long term contract (30 years) for back-up.

The $22 million annual estimate of increased costs to purchase water from DWSD would be minimally offset by an approximate $3 million in reduced operating costs, and could be further offset by an additional $9 million, but only if all funding for capital improvements to the system are eliminated. To eliminate all funding dedicated to repairing, stabilizing, and improving the system would be totally irresponsible and would have long term negative consequences to the City and to future rate payers.

As you are aware we have recently brought in outside expert assistance to evaluate the steps we have taken to assure that the water is safe and to continue to improve water quality. We are expecting specific recommendations within the next few weeks, and are committed to implementing those recommendations in a timely manner. Many steps have already been taken. I am confident that implementing their recommendations will assure a continuing supply of safe water as well as improved quality, and at far less cost than re-engaging DWSD.

We have also created a 40-member Water Advisory Committee and a 13-member Technical Advisory Committee to assure two-way communication with the public and users of the system. Those committees will begin to meet this week, and we look forward to answering their questions and receiving their input.

It is unfortunate that problems and concerns with quality have arisen, and we are working every day to address the issues that caused them. Maintaining safe water and improving quality is a top priority as we work to make the City of Flint an attractive place to live, work, study, and play.

Subject: Water - fixed charges
Attachments: Fixed charge calculation1.docx; EM Statement on Water 3.24.2015.pdf

Harvey,

You had requested additional information on the fixed charges used in Flint's water rates. Hopefully the attached helps. I have also included some additional information showing that that many of the recent increases in rates were done prior to the EM being appointed. And also, a reminder that the system was in a deficit position when the EM came on board, making additional increases necessary.

While the system is now solvent, it is not as strong as it once was. And the real challenge for all of is to figure out how to get rates down to an affordable level. But is cannot be done by simply reducing rates!

I am sure you are aware that the Council voted last night to "do everything in their power" to return to the Detroit system. I am attaching my statement in response.

Call if you have questions.

Jerry

RESIDENTIAL WATER/SEWER RATES - FIXED AND COMMODITY CHARGES

General statistics indicate that the average person uses between 80 and 100 gallons of water per day, or between 2,400 and 3,000 gallons per day. The City's general estimate for the average residential bill is based on consumption of approximately 5,200 gallons per day (7 units * 745 gallons. So the average we use is not out of line if the average number of users in a residence is around 2.

At $149 average costs per month, Flint's charges are very high in comparison to other systems, and an issues which must be addressed. Unfortunately, the Flint system, which has the capacity to serve a population of more than 200,000, now serves a population of approximately 100,000. The system, as currently configured today, needs between $65 million and $70 million in revenues annually to operate. One cannot simply reduce rates without affecting the ability of the system to operate.

Like many systems, Flint charges both a fixed charge and a commodity charge to generate revenues. The concept of the fixed charge is that there is a certain amount of the utility system which must operate regardless of how much of the commodity is used. Operation and maintenance of the system, including building, treatment, and distribution infrastructure, as well as debt service, are examples.

On the other hand, chemicals, utilities, and staffing to a certain extent vary with the amount of the commodity and can thus be linked to usage.

In Flint, the total fixed charge for the water and sewer bill accounts for approximately 40% of the average residential users bill. The amounts determined to be "fixed charges" were established many years ago, and the water rate study done for the City in 2014 made no recommendations for change.

The Flint system, which more than 10 years ago was very stable financially, had declined into a deficit financial position by June 30, 2012. Significant rate increases, many of which were enacted before the State assigned an Emergency Manager in late 2011, were necessary to stabilize the financial position of the system. Other decisions, including the decision to partner with Genesee County in the KWA, and the decision to utilize the Flint River for an interim period, were made with the goal of stabilizing rates and moderating future increases. Safety, quality, and affordability are the key priorities going forward.

Following is the detail of the water and sewer rate components.

WATER/SEWER RATES

Average Residential User

WATER COMMODITY CHARGE PER UNIT	Water Service Charge* 5/8" remote	SEWER COMMODITY CHARGE PER UNIT	Sewer Service Charge	Units for Ave. Bill	WATER COMMODITY	Service Charge* 5/8" remote	SEWER COMMODITY	Sewer Service Charge	Total
$ 7.92	$ 22.90	$ 5.17	$ 34.48	7.00	$55.44	$22.90	$36.19	$34.48	$149.01

AVERAGE	Water Charges			Sewer Charges			Water and Sewer		
RESIDENTIAL									
UTILITY	29%	$22.90	Fixed Charge	$34.48	49%		$57.38	39%	Fixed Charge
CHARGE	71%	$55.44	Commodity	$36.19	51%		$91.63	61%	Commodity
	100%	$78.34		$70.67	100%		$149.01	100%	

RECENT RATE INCREASES

Overall cost to residential users for water and sewer have increased significantly since 2003 – almost three-fold. Note, however, that much of the recent increases were made prior to the appointment of an EM...

Increases Enacted by EM		**Increases Enacted Prior to EM**		
EM		**PRE-EM**		
Aug 2014	July 2012	July 2011	Jan 2011	Oct 2003
$78.34	$74.42	$66.12	$48.99	$29.60
$70.67	$66.60	$45.24	$33.50	$27.47
$149.01	**$140.02**	**$111.36**	**$82.49**	**$57.07**
$8.99	**$28.66**	**$28.87**	**$25.42**	
6%	26%	35%	45%	

Change in the Financial Position of the Water and Sewer System

The financial position of the water and sewer system in 2003 was strong. However, by 2011 the financial position had declined to the point where the system was in deficit. In spite of increases made prior to the appointment of an Emergency Manager, the utility system was still in a deficit position in 2012. While the financial position of the system is now positive, it is still less strong than in 2003:

Water and Sewer (Assets in Millions)

	2003	2011	2012	2013	2014
		Status Pre EM		Status under EM	
Capital Assets	$82,288	$65,877	$84,182	$78,066,635	$76,670
Restricted	$0	$0	$5,585	$4,385	$5,847
Unrestricted	$53,076	($423)	($8,459)	$8,817	$13,552

Please find attached the executed version of the Emergency Manager Memorandum for the City of Flint's Drinking Water loans. We are still in the process of obtaining the MFA and DEQ signatures on the restructuring agreement, and will send the executed version when available. If you have any questions, please do not hesitate to contact me.

EMERGENCY MANAGER
CITY OF FLINT
GENESEE COUNTY, MICHIGAN

ORDER No. 2

RESTRUCTURING OF OUTSTANDING WATER SUPPLY SYSTEM REVENUE BONDS, SERIES 1999, SERIES 2000, SERIES 2001 AND SERIES 2002

BY THE POWER AND AUTHORITY VESTED IN THE EMERGENCY MANAGER FOR THE CITY OF FLINT, MICHIGAN PURSUANT TO ACT 436, PUBLIC ACTS OF MICHIGAN, 2012 ("ACT 436"), THE LOCAL FINANCIAL STABILITY AND CHOICE ACT; GERALD W. AMBROSE, THE EMERGENCY MANAGER, ISSUES THE FOLLOWING ORDER:

WHEREAS, the City of Flint, County of Genesee, State of Michigan (the "City") is in a state of financial emergency under Act 436;

WHEREAS, effective on January 13, 2015, Gerald W. Ambrose was appointed as emergency manager (the "Emergency Manager") of the City, by the Governor of the State of Michigan (the "State") and the State by the Treasurer of the Department of Treasury; and

WHEREAS, pursuant to Section 9(2) of Act 436, the Emergency Manager has broad powers in receivership to rectify the financial emergency and to assure the fiscal accountability of the City of Flint and its capacity to provide or cause to be provided necessary services essential to the public health, safety and welfare; and

WHEREAS, pursuant to Act 436, the Emergency Manager acts in place of local officials, specifically the Mayor and City Council, unless the Emergency Manager delegates specific authority; and

WHEREAS, the City has heretofore issued and presently has the following bonds outstanding in the amounts indicated, the proceeds of which were used to finance the acquisition, construction and installation of Phase I, segments 1 through 4 of the rehabilitation of the Flint Water Treatment Plant (the "Plant"): (i) $2,543,994 Water Supply System Revenue Bonds,

Series 1999, (the "1999 Bonds"); (ii) $3,275,000 Water Supply System Revenue Bonds, Series 2000, (the "2000 Bonds"); (iii) $4,256,408 Water Supply System Revenue Bonds, Series 2001 (the "2001 Bonds"); and (iv) $10,694,934 Water Supply System Revenue Bonds, Series 2002, (the "2002 Bonds", collectively with the 1999 Bonds, the 2000 Bonds and the 2001 Bonds, the "Bonds"); and

WHEREAS, all of the Bonds were sold to and are currently owned by the Michigan Finance Authority (the "Authority" or "MFA"), as successor to the Michigan Municipal Bond Authority; and

WHEREAS, the Plant and the water supply system are in need of further improvements and replacements (the "Improvements") to enhance the treatment of raw water processed by the Plant and the distribution of treated water from the Plant; and

WHEREAS, the City does not have sufficient funds on hand to finance the Improvements and the Authority has tentatively agreed to allow the Emergency Manager to restructure and amend the debt service payments on the Bonds, by postponing the principal payments next coming due on April 1, 2015 for the 1999 Bonds of $395,000, the 2000 Bonds of $435,000 and the 2001 Bonds of $485,000 and on October 1, 2015 for the 2002 Bonds of $925,000, all as more particularly described in this Order (collectively, the "Restructuring"), to allow the amounts available for such principal payments to be used to pay for the Improvements; provided, that the current interest payments due on such principal payment dates shall remain due and payable thereon; and

WHEREAS, Section 12(1)(x) of Act 436 authorizes the Emergency Manager to: "Enter into agreements with creditors or other persons or entities to restructure debt on terms, at rates of interest, and with security as shall be agreed among the parties, subject to the approval of the State Treasurer;" and

WHEREAS, the interest on each series of the Bonds is presently excludable from gross income for federal income tax purposes and the City has covenanted, in each Bond Resolution which authorized each related series of the Bonds, among other things, to do all things necessary to assure that the interest on the respective series of Bonds will be and will remain excludable from gross income for federal income tax purposes (the "Bond Tax Covenant"); and

WHEREAS, in connection with the issuance of each series of the Bonds, the City entered into a Supplemental Agreement ("the Supplemental Agreement") with the Authority and the State of Michigan, acting through its Department of Environmental Quality (the "DEQ"), under which the City covenanted, among other things, to the extent permitted by law, to take all actions within its control and not fail to take any action as may be necessary to maintain the

exclusion of interest on the Bond from gross income for federal income tax purposes (the "Supplemental Agreement Tax Covenant"); and

WHEREAS, in implementing with the Restructuring the City will use its best efforts to maintain the tax-exempt status of the Bonds, however, the Emergency Manager, the MFA and the DEQ desire to allow the Restructuring to occur even if as a result of the Restructuring, Miller, Canfield, Paddock and Stone, P.L.C., as bond counsel to the City ("Bond Counsel") delivers an opinion to the City and the MFA concluding that as a result of the Restructuring, the Bonds have lost their tax-exempt status (an "Unfavorable Tax Opinion"); and

WHEREAS, as a precondition to the Restructuring, the Emergency Manager desires for the MFA, as holder of the Bonds, and the DEQ to conditionally waive the respective Tax Covenant and the Supplemental Agreement Tax Covenant related to each series of the Bonds, which waivers shall be rescinded automatically if Bond Counsel concludes that the Restructuring has not had a negative impact on the tax-exempt status of the Bonds, and

WHEREAS, the Emergency Manager further desires to authorize and direct the Mayor, the Director of Finance, the City Clerk and all other authorized persons to perform all acts consistent with this Order, necessary and appropriate to complete the Restructuring as provided in this Order.

NOW THEREFORE, IT IS HEREBY ORDERED AS FOLLOWS:

1. The current debt service schedules attached as Exhibit A to each of the Bonds are hereby deleted in their entirety and in lieu thereof shall be attached to each respective Bond the amended and restated debt service schedules attached hereto as Exhibit A for the 1999 Bonds, Exhibit B for the 2000 Bonds, Exhibit C for the 2001 Bonds and Exhibit D for the 2002 Bonds.

2. Except as otherwise amended and restated hereby, all of the other terms and conditions of the Bonds shall remain the same; provided however, that if Bond Counsel delivers an Unfavorable Tax Opinion, the interest on the Bonds shall be taxable for federal income tax purposes; and

3. The Emergency Manager, the Mayor, the Director of Finance and the City Clerk are hereby authorized and directed to perform all acts consistent with this Order and enter into such agreements with the Authority and DEQ and provide such certificates as may be necessary and appropriate to complete the Restructuring.

4. The Restructuring is conditioned upon and shall not become effective unless and until (i) the Restructuring has been approved in writing by the Treasurer of the State of Michigan, pursuant to Section 12(1)(x) of Act 436 and (ii) the MFA and the DEQ have approved the Restructuring and provided conditional waivers of the Bond Tax Covenants and the Supplemental Agreement Tax Covenants related to each series of the Bonds.

5. This Order is effective immediately upon the date of execution below.

6. This Order may be amended, modified, supplemented, repealed or terminated by any subsequent Order issued by the Emergency Manager.

AGREEMENT RELATED TO RESTRUCTURING OF DEBT SERVICE SCHEDULES OF CITY OF FLINT WATER SUPPLY SYSTEM REVENUE BONDS, SERIES 1999, SERIES 2000, SERIES 2001 AND SERIES 2002

THIS RESTRUCTURING AGREEMENT ("AGREEMENT") is entered into as of March 20, 2015 by and among, the City of Flint, County of Genesee, State of Michigan (the "City"), the Michigan Finance Authority (the "MFA"), and the State of Michigan, acting through its Department of Environmental Quality (the "DEQ").

RECITALS

WHEREAS, the City presently has the following bonds outstanding, the proceeds of which were used to finance improvements to the Flint Water Treatment Plant, (the "Plant"): (i) $2,543,994 Water Supply System Revenue Bonds, Series 1999 (the "1999 Bonds"); (ii) $3,275,000 Water Supply System Revenue Bonds, Series 2000 (the "2000 Bonds"); (iii) $4,256,408 Water Supply System Revenue Bonds, Series 2001 (the "2001 Bonds") and (iv) $10,694,934 Water Supply System Revenue Bonds, Series 2002 (the "2002 Bonds" and collectively with the 1999 Bonds, the 2000 Bonds and the 2001 Bonds, the "Bonds").

WHEREAS, The Emergency Manager ("EM") of the City has determined that it is in the best interest of the City and is consistent with the City's restructuring efforts and will promote the goals and purposes of Act 436, Public Acts of Michigan, 2012 ("Act 436"), for the City to restructure the debt service schedules for all of the outstanding Bonds, to provide funding to finance improvements and replacements (the "Improvements") to the City's Water Treatment Plant and water distribution system from the Plant.

WHEREAS, all of the Bonds were sold to and are presently owned by the Michigan Finance Authority (the "MFA"), as successor to the Michigan Municipal Bond Authority.

WHEREAS, the interest on each series of the Bonds is presently excludable from gross income for federal income tax purposes and the City has covenanted, in each Bond Resolution which authorized each related series of the Bonds, among other things, to do all things necessary to assure that the interest on the respective series of Bonds will be and will remain excludable from gross income for federal income tax purposes (the "Bond Tax Covenant").

WHEREAS, in connection with the issuance of each series of the Bonds, the DEQ entered into a Supplemental Agreement with the City (collectively, the "Supplemental Agreements") under which the City covenanted, among other things, to the extent permitted by

law, to take all actions within its control and not fail to take any action as may be necessary to maintain the exclusion of interest on the Bond from gross income for federal income tax purposes (the "Supplemental Agreement Tax Covenant").

WHEREAS, the Emergency Manager has adopted his Order No. 2, dated March 18, 2015 (the "Order"), to restructure and amend the debt service payments on the Bonds, by postponing the principal payments next coming due on April 1, 2015 for the 1999 Bonds of $395,000, the 2000 Bonds of $435,000 and the 2001 Bonds of $485,000 and on October 1, 2015 for the 2002 Bonds of $925,000, all as more particularly described in the Order (collectively, the "Restructuring"), to allow the amounts available for such principal payments to be used to pay for the Improvements; provided, that the current interest payments due on such principal payment dates shall remain due and payable thereon.

WHEREAS, in implementing with the Restructuring the City will use its best efforts to maintain the tax-exempt status of the Bonds, however, the Emergency Manager, the MFA and the DEQ desire to allow the Restructuring to occur even if as a result of the Restructuring, Miller, Canfield, Paddock and Stone, P.L.C., as bond counsel to the City ("Bond Counsel") delivers an opinion to the City and the MFA concluding that as a result of the Restructuring, the Bonds have lost their tax-exempt status (an "Unfavorable Tax Opinion").

WHEREAS, as a precondition to the Restructuring, the Emergency Manager desires for the MFA, as holder of the Bonds, and the DEQ, as a party to the Supplemental Agreements to conditionally waive the respective Bond Tax Covenant and the Supplemental Agreement Tax Covenant related to each series of the Bonds, which waivers shall be rescinded automatically if Bond Counsel concludes that the Restructuring has not had a negative impact on the tax-exempt status of the Bonds.

NOW THEREFORE, the parties hereto agree as follows:

1. The terms for the Restructuring of the Bonds in accordance with the Order and debt service schedules attached hereto as Exhibit A and incorporated herein by this reference are hereby approved.

2. Except for the amendment and restatement of the debt service schedules for the Bonds, all other terms of the Bonds shall remain unchanged.

3. The City shall use its best efforts to maintain the tax-exempt status of the Bonds in connection with the Restructuring.

4. In the event that as a result of the Restructuring Miller, Canfield, Paddock and Stone, P.L.C. delivers an Unfavorable Tax Opinion to the City, the MFA and the DEQ, the MFA

hereby waives the City's Bond Tax Covenant, and the DEQ hereby waives the City's Supplemental Agreement Tax Covenant with respect to each series of the Bonds.

IN WITNESS WHEREOF, the City, the MFA and DEQ, by and through their duly authorized officers and representatives, have executed this Agreement as of the date first written above.

Okay, I will get with Ed and Randy to have something in the next couple of days. I will get with DEQ as well if that does not cause issues; they are the department that actually receives the federal funding and is responsible for program compliance.

This will probably come up again so we should get a statement together with all the reasons, both rules and credit issues

Subject: Re: Loan Forgiveness

Nothing ready made, we would have to craft something. DEQ may be able to provide specific guidance from the EPA.

I would suggest starting with the following:

The DWRF is a pooled loan program whereby loans to local units are pledged to the repayment of a larger pooled bond issues. The pooled bond issues rely on the repayment from the local units for debt service. Absent a dollar-for-dollar replacement of the local loan revenue, the pooled bond issues would default. Further, the program is required to maintain all funds received in perpetuity as it is truly a revolving fund.

Subject: FW: Loan Forgiveness

Do we have a succinct statement on why we cant forgive Flint DWRF?

Good afternoon –

Do you have anything in writing from the Governor or any state department indicating that they are statutorily limited from forgiving the loans? Is so, are you willing to share? It would be very helpful to us in trying to make a case with the EPA that they should allow forgiveness.

Thanks!

FYI..

Here is an advance copy of the communications to be mailed to Flint customers at the end of this week. April 1 is the deadline.

Will not hit mailboxes until Friday at the earliest. We will have a media event on Friday announcing the communication.

Water Quality Update

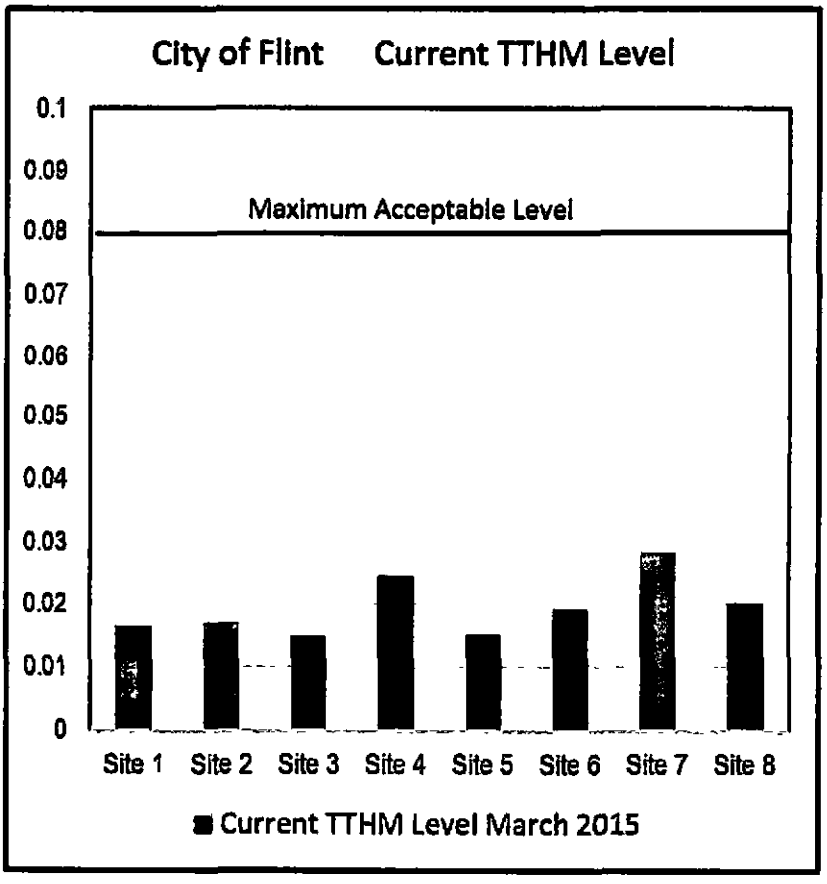
City of Flint Resident:

We are pleased to report that City of Flint water is safe and meets U.S. Environmental Protection Agency guidelines. While we continue to work on improving aesthetic qualities, such as discoloration or odor, you can be confident that the water provided to you today meets all safety standards. Maintaining safety and quality in our water is a top priority of the City.

We accomplished this by:

- Upgrading the ozone treatment process at the Water Treatment Plant
- Increasing water main/hydrant flushing to reduce stagnation
- Conducting additional testing of treatment to identify areas of improvement
- Improving water circulation by repairing valves and adjusting reservoir levels

Our most recent testing in February showed that every testing site was well below allowable levels, as shown below:

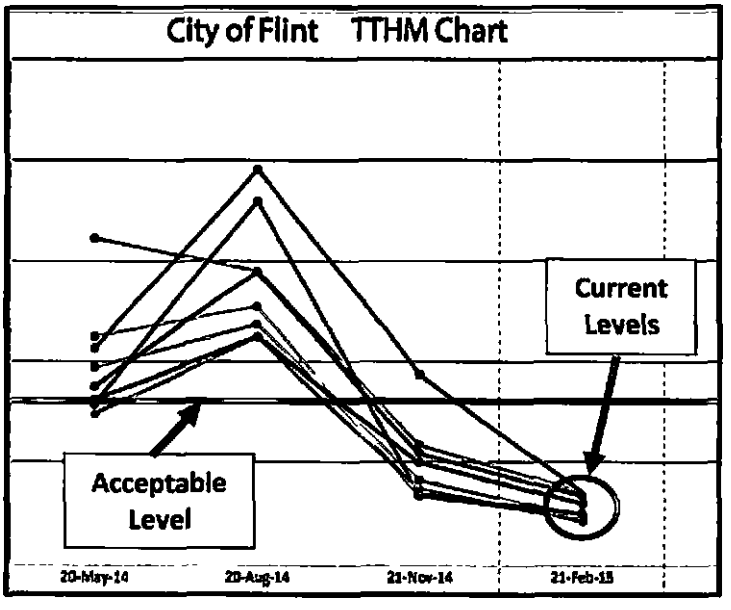


Water Quality Update

The Michigan Department of Environmental Quality (MDEQ) has acknowledged our progress:

"We are encouraged by the results from the most recent round of compliance samples collected on February 17, 2015, which now show individual TTHM levels at less than half of the 0.080 mg/L standard at all locations throughout the City's system. Operational Evaluation Reports from December 2014, and February 2015, have identified possible causes and corrective measures for the previous elevated TTHM levels, which we encourage the City to continue implementing." -MDEQ

Notification is based on four quarters of test results. Because of last year's test results, the City's *annual* quarterly testing average is not yet below the state's allowable average and the City is required to issue the attached notice ***("Important Information about Your Drinking Water")***.



If you have any questions about this report or would like a test done at your home, free of charge, please call us at 810-787-6537.

Maintaining safe water and improving its quality is a top priority for all of us at the City of Flint, and we apologize for the concerns these notices have raised. We have taken many steps to improve the safety and quality of our water supply and will be taking more. As you may know, we have recently received a series of recommendations from several sources, including a report from international urban water system consultant, Veolia North America. We will be taking further action steps to assure that water remains safe and that water quality is improved, and we will be working with our recently created Citizen Advisory Committee and our Technical Advisory Committee as we progress. Please track our progress on our website **cityofflint.com**.

City of Flint

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system recently violated a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, November 20 of 2014, and February 17, 2015). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the MCL. The standard for TTHMs is 80 micro grams per liter (µg/L). The location reporting the highest TTHM level was 105 ug/L; thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. These people may be at increased risk and should seek advice about drinking water from their health care providers.

- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015. Our most recent individual sample results were all less than half the 80 µg/L standard, however since compliance is calculated using a locational running annual average (LRAA) of the most recent four quarters, we are still out of compliance with the MCL at two of eight locations.

For more information, please contact Mr. Brent Wright at 517-787-6537, or the Flint Water Plant at 4500 North Dort Highway, Flint, Michigan 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F2 S3 WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

Signature	Plant Supervisor Title	March 25, 2015 Date Distributed

Reminder to water supplier: This notice/certification must be sent to the Department of Environmental Quality.

Subject: RE: Loan Forgiveness

I think they would have concerns as to where it would stop; the slippery slope argument. The program tenants are based on sound business practice and are looked to as a program strength. If the path of principal forgiveness is opened up, they would view that as negative which would certainly impact the outlook, but maybe not the overall rating in the near term.

Subject: RE: Loan Forgiveness

What would the rating agencies say about forgiveness?

Subject: RE: Loan Forgiveness

Below is the response from DEQ:

Here's information that you can share with Amy Hovey, staffer for Congressman Dan Kildee, regarding how Michigan has used principal forgiveness in the Revolving Loan Programs. EPA has talked with Congressman Kildee on this issue at least twice.

Principal forgiveness came around with the American Recovery & Reinvestment Act (ARRA). All of Flint's drinking water loans were prior to ARRA. In May 2009, Flint submitted a project plan that comprised various projects the city wanted to pursue. Flint had 2 projects on the project priority list to receive funding in 2010 thru 2013. Initially the projects did not rank high enough to receive funding. When funding became available for Flint, the city declined to move forward with the projects. Some principal forgiveness was offered as part of the funding.

Annually EPA requires the state to describe how principal forgiveness will be used (Intended Use Plan) and then report at the end of the fiscal year (Annual Report) how the funds were allocated. EPA audits the data during their annual visit. In Michigan, we have used principal forgiveness to assist disadvantaged communities and for projects that are water or energy efficient (i.e. green) consistent with EPA guidance. There is no provision to randomly provide principal forgiveness to a project or use it to refinance a prior loan.

The purpose of the funds are to revolve in perpetuity (as stated in federal statute) so that communities can continue to receive financial assistance. Michigan has never completely forgiven an entire loan as it would greatly reduce the capacity of the fund to offer assistance to future projects.

For a succinct statement I would suggest:

There is no provision or program capacity to provide principal forgiveness outside the scope mandated by the EPA for disadvantaged communities (populations less than 10,000) or green infrastructure projects. The purpose of the funds are to revolve in perpetuity (as stated in federal statute) which allows communities to receive financial assistance in the future. Further, DWRF loans are pledged as security to various bond issues which provide the up-front capital to fund projects. Without a dollar-for-dollar replacement of revenue due to the loss of principal, the bonds could default.

Good afternoon –

Do you have anything in writing from the Governor or any state department indicating that they are statutorily limited from forgiving the loans? Is so, are you willing to share? It would be very helpful to us in trying to make a case with the EPA that they should allow forgiveness.

Thanks!

Amy

Attachment: Status of Financially Distressed Local Governments

Status of Financially Stres...

STATE OF MICHIGAN
DEPARTMENT OF TREASURY

RICK SNYDER
GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

DATE: March 23, 2015

TO: Rick Snyder, Governor

FROM: R. Kevin Clinton, Treasurer

SUBJECT: Status of Financially Stressed Local Governments

EMERGENCY MANAGER

Flint
Emergency Manager: Gerald Ambrose
Appointed: January 13, 2015
Anticipated Exit: April 2015

Recent Developments

- The city was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the city's water system through improved waste management, leak detection, and pipe assessments.
- An EM Order is being prepared that will restructure its SRF loans. This would free up approximately $2.2M allowing the city to further improve its water system.
- The City of Flint had informed residents that it is in violation of the Clean Water Standards Act, after unsafe levels of trihalomethanes (TTHM, a disinfectant by-product) were found in the water. Recent testing by the Michigan Department of Environmental Quality (MDEQ) Testing Lab showed that the total TTHM levels for the month of February are well within the Environmental Protection Agency (EPA) guidelines for safe water. However, because EPA regulations require that the four month average for all testing sites be within certain guidelines, the city is still considered to be non-compliant by the MDEQ. Monthly testing will be ongoing, and is being conducted by several parties.
- The city hired Veolia to provide an analysis of the water system, including recommended improvements, and associated costs. Recommendations included water plant improvements, distribution system improvements, new policies and procedures, and better communication with customers. On March 19, 2015, the report was presented to the Flint Water Advisory Committee, but the presentation broke down due to citizen unrest. An International City/County Management Association (ICMA) comprehensive public safety study has been completed, and was presented to the City Council on January 22, 2015. Several recommendations for both police and fire are currently being reviewed. Of the 16 major recommendations for public safety, the following four are most crucial:

- Establish more aggressive protocols for responding to service demands from the public.
- Equip a minimum of one marked patrol car with an automated external defibrillator (AED) and an automatic license plate reader, and equip every car with e-ticket readers and printers.
- Develop a robust in-service training program.
- Establish and publish a clear multi-year strategic plan that includes specific performance goals and objectives for all units.

Significant Actions/Issues

- The General Fund accumulated deficit for FY 2014 was $9M. In FY 2013, the General Fund had an accumulated deficit of $12.9M. Noted reductions included $5.6M from Parks & Recreation, 2.6M from Community Development, 1.8M from Public Safety, and $1.7 from Building Inspections.
- If the city loses the lawsuit over retiree healthcare, the budget does not assume this potential additional $5M to $6M expense, which will grow at a rate equal to the general rise in healthcare costs.

Lincoln Park

Emergency Manager: Brad Coulter
Appointed: July 3, 2014
Anticipated Exit: January 2016

Recent Developments

- The city was awarded $143.5K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through updated technology.
- A fire union collective bargaining agreement has been approved. The estimated annual cost savings is approximately $500K by reducing overtime and paid leave.
- A Firefighters and Police Officers Retirement Act proposal has been placed on the May 2015 ballot. If approved by voters this will raise an additional 6 mills, or $3M, for fire and police pension funding and retiree healthcare.
- Poor actuarial advice has lead retiree health care in the city to be underfunded. EM Coulter has proposed changing retiree contracts to replace cost of city-provided health insurance with a stipend for retirees to purchase their own health coverage. The EM's plan would offer a single retiree roughly $150/month, a couple could receive $350/month, with a family cap set at $425/month. This change would reduce retiree healthcare costs from $4.1M to 600K annually.
- The EM submitted his proposed changes to City Council in March; and they did not act within the statutory deadline. The Treasurer's approval will be needed before the plan can be implemented. It is anticipated that the changes would be implemented in June or July of 2015.
- FY 2014 ended with a General Fund accumulated deficit of $736K out of a total budget of $21M. This is a significant increase from the FY 2013 accumulated deficit of $89K. Noted areas of increased expenditures within the governmental funds included Public Safety by $1.1M, Public Works by $700K, and Culture and Recreation by $600K.

Significant Actions/Issues

- The police and fire pension plan is 30% funded. The general employee pension plan is 22% funded. The aforementioned Firefighters and Police Officer Retirement Act ballot proposal attempts to address the pension funding shortfall.

Issues to Resolve before EM Exit

- Police collective bargaining agreements must be finalized.
- Increase and stabilize pension and other post-employment benefits (OPEB) funding levels.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

FRC Created: November 12, 2014
FRC Members: Bill Martin, Brenda Jones, Darrell Burks, John Roberts, Kevin Clinton, Lorron James, Mike Duggan, Stacy Fox, Tony Saunders

Recent Developments

- The City of Detroit held its first statutorily-required Revenue Estimating Conference on February 20, 2015. The conference principals, Jay Wortley of Treasury, John Hill of the City of Detroit, and George Fulton of the University of Michigan, approved the consensus revenues as presented. The principals agreed that the revenue estimates were conservative.
- At the FRC's February 23, 2015 meeting, the FRC approved, and referred to the newly formed Finance and Enterprise Resource subcommittee for further review, the city's revenue estimates that were presented at the aforementioned Revenue Estimating Conference. The city will be incorporating the revenue estimates into its Four-Year Financial and Operating Plan (Plan) that will be presented to the FRC at its March 23, 2015 meeting for the Commission's review. The FRC also approved the city's debt service requirements report and several operational contracts.
- Treasury hired Ron Rose as the Executive Director (ED) for the Office of the FRC within the Department. His start date was March 2, 2015. Treasury is in the process of filling other key staff positions and has engaged the financial consulting services of UHY. Treasury has also engaged Martha Kopacz from Phoenix Management Services. Ms. Kopacz and her team acted as independent financial experts for Judge Rhodes in the city's Chapter 9 bankruptcy proceedings. Among other duties, the consultants will provide assistance in reviewing and analyzing the Plan for the FRC.

Significant Actions/Issues

- The city will be submitting its Four-Year Financial and Operating Plan to the FRC on March 23, 2015 for review, with FRC action expected on April 20, 2015. The city's Plan will encompass the second year (FY16) of Emergency Manager Orr's two-year budget and use this as its base year with no changes, plus three years (FY17, FY18, and FY19).
- Ensuring that the Plan is based on sound assumptions and that the city's operational budgets and actual spending conform to the Plan will be one of the FRC's most significant tasks.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Hamtramck
RTAB Appointed: December 18, 2014
RTAB Members: Deborah Roberts, Mark Stema, Cathy Square, Karen Young

Recent Developments
- The city was awarded $622K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to complete a property reappraisal which will provide updated and accurate assessing records, upgrade City Hall security, and enhance public safety through improved street lighting.
- The Police Chief resigned on March 11, 2015. Lieutenant Ann Moise was appointed Acting Police Chief.
- Deputy City Manager/Treasurer John Gabor start date was February 2, 2015.

Significant Actions/Issues
- A complaint was filed in the federal court by Hamtramck retirees over changes to healthcare benefits in October 2014. The potential exposure to the city is currently unknown, but the city is confident that the benefits in question were improperly offered and were rightfully terminated.
- The annual pension liability is anticipated to increase from $3.5M in FY 2015 to $4.3M in FY 2019. This increase is a result of closing certain pension plans and the Michigan Employee's Retirement System (MERS) policy of accelerating the required contribution for closed plans. These increases were included in Emergency Manager Square's two-year budget.

Allen Park
RTAB Appointed: September 26, 2014
RTAB Members: Suzanne Schafer, Joyce Parker, Fredrick Frank, Karen Barann

Recent Developments
- The City Council voted on January 27, 2015 to suspend City Administrator Karen Folks. This vote was taken despite two Emergency Manager Orders that prohibit termination until October 2015 and establish a process for termination. The City Administrator and City Council negotiated a separation agreement which was approved by the RTAB on March 12, 2015. The RTAB also approved the City Council's appointment of the Finance Director as Interim City Administrator. A search firm will be hired to begin the process of selecting a new City Administrator.
- The city was expecting to issue a bond tender offer beginning in March to reduce outstanding debt. However, the tender offer has been delayed due to the uncertainty between the City Council and City Administrator. A timeline to complete the bond tender process will be developed by the various parties in late March 2015.

Significant Actions/Issues
- Litigation was filed by retirees challenging the Emergency Manager's authority to reduce other post-employment benefits (OPEB) liabilities. A motion for summary disposition is pending. No date has been set to hear this motion.

- City Hall will be relocating to a temporary facility in May 2015. The present facility is in poor condition.

Benton Harbor
RTAB Appointed: March 10, 2014
RTAB Members: Larry Steckelberg, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments
- The city was awarded $910K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the water system through water main replacements and fire hydrant repairs, and to complete a property reappraisal which will provide updated and accurate assessing records. Additionally, the city will provide community enhancement through blight management and sidewalk replacement.
- On February 2, 2015, the City Commission unanimously approved a one-year contract extension for City Manager Darwin Watson.

Significant Actions/Issues
- On January 20, 2015, the City Commission passed a resolution adopting a fund balance policy consistent with Government Finance Officers Association (GFOA) Best Practices. The RTAB approved the resolution on January 28, 2015.
- FY 2014 audited General Fund revenues exceed expenditures by $1M, out of a total budget of $6.1M.

Ecorse
RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joyce Parker

Recent Developments
- The city was awarded $350K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting.
- The city signed a contract with UHY to provide part-time financial services until a permanent solution can be found. The RTAB approved the contract on January 13, 2015.
- The City Council cancelled the contracted City Administrator search with the Michigan Municipal League (MML) and appointed Wayne O'Neal as full-time City Administrator. On February 10, 2015, the RTAB approved the City's resolution appointing Mr. O'Neal.
- The city continues to have trouble attracting qualified candidates, and filling higher level administrative positions.

Significant Actions/Issues
- The RTAB's Annual Evaluation for the Governor was not favorable, citing a lack of local financial literacy, political infighting, and an inability to develop a balanced multi-year budget. For these reasons, the Board did not recommend removal of RTAB oversight at this time.
- Municipal Employee's Retiree System (MERS) pension contributions are anticipated to increase from $1.8M in FY 2015 to $2.4M in FY 2016 because of accelerated funding for closed plans.
- The city has been unable to balance their five-year budget. Previous budgets project deficit spending in FY 2016, and exhaustion of all resources in FY 2017. To avoid this

eventuality, significant expense reductions will be necessary in upcoming fiscal years. However, an action plan to reduce expenses is not forthcoming from the city.

Pontiac

RTAB Appointed: August 19, 2013

RTAB Members: Edward Koryzno, Louis Schimmel, Keith Sawdon, Robert Burgess

Recent Developments

- The city was awarded $125K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used for community enhancement through blight management.
- In April 2014, the Final Emergency Manager Order was amended to create a Deputy Mayor position. A suitable candidate was not found through a Michigan Municipal League (MML) search. A new search firm has been hired to recruit a Deputy Mayor as part of the transition back to Home Rule.
- Per the audit, the General Fund's accumulated fund balance for FY 2014 is approximately $5M out of a total budget of $27M.
- The City Charter Revision Commission submitted a proposed Charter by the February 10, 2015 deadline and the proposed Charter will be on the May 2015 ballot.

Significant Actions/Issues

- The General Fund is structurally balanced in FY 2015 but expenditures are projected to exceed revenues by $360K due to deferred projects from FY 2014.
- Oakland County Circuit Court Judge Michael Warren dismissed the city's condemnation lawsuit involving the Phoenix Center because the city failed to include compensation for the lien placed on the property. The city is preparing an appeal of the decision to the U.S. Sixth Circuit Court of Appeals.
- The City of Pontiac Retired Employees Association v. City of Pontiac lawsuit in the United States District Court was reassigned from Judge Lawrence P. Zatkoff to Judge Avern Cohn. The lawsuit challenges former Emergency Manager Schimmel's elimination of retiree healthcare and replacement with an annual stipend. The General Employees Retirement System (GERS) Pension Fund is significantly overfunded and the parties are exploring options to use the overfunded portion to fund retiree healthcare.
- On March 17, the Michigan Court of Appeals reversed and remanded for trial a previous lower court dismissal of a previous 2013 suit which challenged the EM ordered nonpayment of $3.9 million into a VEBA trust for the fiscal year ending 2012. This appellate order is not a judgment against the city, rather it allows the previously dismissed lawsuit to proceed. The actual liability of the city will be determined either by a future settlement or by a final determination of the Oakland County Circuit Court.
- The GERS Board proposal was submitted to the court on January 30, 2015.

CONSENT AGREEMENT

Inkster

Date Executed: February 20, 2012

Consent Agreement Consultant: Mark Stuhldreher

Recent Developments

- The city was awarded $855K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to complete a property reappraisal to provide updated and accurate assessing records, enhance the water system through fire hydrant repairs, and enhancing public safety through the creation of a multi-jurisdictional narcotics team, police officer training, deployment of an additional police officer, providing a backup power source, and updating technology.

Significant Actions/Issues
- The FY 2014 General Fund accumulated deficit is $767K out of a total budget of $11M.

River Rouge
Date Executed: December 15, 2009
Consent Agreement Consultant: N/A (P.A. 72)

Recent Developments
- The city was awarded $592K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting, along with infrastructure replacements to City Hall.
- Deborah Hayes-Price has been promoted to Chief of Police to replace former Police Chief Jeffrey Harris who retired in January.

Significant Actions/Issues
- U.S. Steel annual $1M tax settlement payment to the city has expired.
- General Fund revenues exceeded expenditures by $885K in FY 2014 and the accumulated fund balance was $1.9M.
- A reduction in healthcare benefits for active employees and retirees was implemented on November 1, 2014. The city estimates an annual savings of $400K.

Royal Oak Township
Effective Date: April 21, 2014
Consent Agreement Consultant: Robert Burgess

Recent Developments
- The township was awarded $274K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting and increased police services.
- The State Treasurer rejected a decision by the Township Board to extend the contract with the current township attorney at a cost that was twice the amount of the lowest bidder. The Consent Agreement Consultant, Robert Burgess, issued an order requiring the township to extend a contract for legal services to the lowest bidder, Giarmarco, Mullins & Horton, P.C. This is one example of the difficulty the Consent Agreement Consultant has encountered in his efforts to have the Supervisor and Township Board comply with provisions of the Consent Agreement.
- The State Treasurer approved an amendment to the Fire Services Contract with the City of Ferndale on March 11, 2015. This amendment is projected to reduce annual costs to the township by $4K thru the end of 2015.

Significant Actions/Issues

- The Michigan State Police continues to provide police services to the township. The Department of Treasury and the Michigan State Police continue to work with the township and are reviewing a proposal from the City of Hazel Park to provide police services to the township.
- The State Treasurer approved the township's 2015 budget on December 16, 2014, with the requirement that the township work with Treasury to implement additional budget amendments to improve its overall effectiveness. No additional actions have occurred to implement these additional budget amendments as the township was without the services of a financial consultant from the time of budget adoption through March 1, 2015.
- The township currently has an aging accounts payable in excess of $200K.

NEUTRAL EVALUATION

Highland Park

Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
PA 436 Option Selected: Neutral Evaluation

Recent Developments

- The city was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the city's water system through meter replacement, leak detection, and system repairs.
- Cathy Square, former Hamtramck Emergency Manager, was hired to fill the position of City Administrator.
- Huron Consulting has been hired to prepare a request for proposal (RFP) to solicit firms to operate and maintain the city's water and sewer systems, as required by the city's Plan of Adjustment. The proposals are due on April 20, 2015.
- BenStaff has been hired by the city to make recommendations that will reduce healthcare costs.
- The law firm of Lewis & Munday has been hired to assist the city with the restructuring of the other post-employment benefits (OPEB).

Significant Actions/Issues

- The city selected Tetra-Tech to prepare a water and sewer rate study. A draft study was completed on February 20, 2015. This study provides the city with proposed rates, which if adopted, will provide adequate revenue to operate and maintain the water and sewer system.
- The city's liabilities total $117.6M. Some of the major components are: $55.3M debt, including $20.7M owed to the Detroit Water and Sewerage Department (DWSD), $17.7M pension bonds, and $26.1M unfunded other post-employment benefits (OPEB) liabilities.
- Summary of the Plan of Adjustment for the City of Highland Park was adopted on August 28, 2014.
    - Fifth Third Bank has finalized an agreement and settled for 50 cents on the dollar for outstanding debt.
    - By June 30, 2015, Highland Park, as required by terms of the emergency loan, must have a third-party operator for its water/sewer systems.

- After the selection of this third-party operator, DWSD and Highland Park will negotiate a long-term settlement for outstanding water and sewer debt.
- The city must reduce retiree healthcare benefit costs.
- In August 2015, an emergency loan of $16.4M, which includes the restructuring of $4.8M in existing loans, will be used to refund $2.7M in Fiscal Stabilization Bonds, $5.2M in Financial Recovery Bonds, and $3.7M in State Revolving Fund Bonds.

OTHER COMMUNITIES

Wayne County

Recent Developments

- In December 2014, the Michigan Supreme Court ruled unanimously in favor of retirees who receive a 13th check to offset inflation. The county is required to return $32M to the Pension Equity Fund.
- A Financial and Operating Plan and a voluntary Consent Agreement are being drafted.

Significant Actions/Issues

- Cash reserves reached its lowest point in August 2014 with pooled cash falling to approximately $73M. The average balance is $170M. This number includes proceeds from a short-term borrowing of $75M.
- A letter to the Treasurer from previous County Executive Robert Ficano, indicates that with the significant transfer of revenue from the Delinquent Tax Revolving Fund (DTRF), the General Fund deficit will be reduced to approximately $50M for FY 2014.
- In the same letter, it is indicated that the County has budgeted a transfer of $64M from the DTRF to balance the General Fund in FY 2015. However, this represents the last of the DTRF's unrestricted equity. This will result in a potential budget gap of $20M in FY 2016.
- The preliminary results of the county's actuarial report indicate a drop in other post-employment benefits (OPEB) liability of approximately $409M. This reduction is a result of the county choosing less expensive plans and implementing cost sharing measures. The Plan participants are now paying a larger share of the cost. This does not include any saving opportunities resulting from a proposed change to retiree healthcare.
- The county is working to resolve a disagreement with the Mental Health Authority over services provided to jail inmates. The county currently pays for this service but believes it falls under the purview of the Authority.

March 30, 2015
Meeting with Governor
Agenda

EMERGENCY MANAGER (EM)

Flint

- Deficit Elimination Plan: Emergency Manager (EM) Gerry Ambrose is preparing an E-Loan application that would provide a $6M E-loan to assist in eliminating the City's $9M General Fund deficit by June 30, 2015.
- Veolia North America has completed a Water Quality Report that provides the City with their recommendations, conclusions, and costs estimates to improve the water quality. The report identifies approximately $3M of expenditures including $1.5M for installation of granular activated carbon filtration for the water plant.
- The City was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the City's water system through improved waste management and leak detection and pipe assessments.
- EM Ambrose's exit from the City is tentatively scheduled for April; however the exit date should be reviewed.
- An EM Order is being prepared that would restructure Water System Revenue Bonds Series 1999 thru 2002 with the Michigan Finance Authority. This would postpone principal payments and free up $2.24M, allowing the City to further improve its water distribution system.

Lincoln Park

- FY 15 is projected to conclude with a $500k deficit, which may be offset by the one-time proceeds from the sale of a cellular tower, expected revenues of $900K.
- Pensions are poorly funded; police and fire pension is 31% funded while the general employees' pension is 22% funded. Retiree healthcare is funded on a pay as you go basis.
- Emergency Manager Coulter's plan to fund pensions to the 60% level by 2035 requires significant reductions to retiree healthcare. The current annual cost of $4.1M will be reduced to $600k, via section 12(1)(k) collective bargaining agreement (CBA) modification.
- An additional police and fire pension millage has been placed on the May 5 ballot. If passed by the electorate, it would raise 6 mills ($3M) for pension funding and other uses.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

- Treasury hired Ron Rose for the Executive Director (ED) position for the Office of the FRC within the Department and his start date was March 2, 2105.
- The firm of UHY has been retained to provide financial consulting services.
- Treasury has engaged Martha Kopacz and her team from Phoenix Management Services. Ms. Kopacz and her team acted as independent financial experts for Judge Rhodes in the City's Chapter 9 bankruptcy proceedings. Among other things, the consultants will provide assistance in reviewing and analyzing the Plan for the FRC.
- The City will be submitting its Four Year Financial and Operating Plan to the FRC on March 23 for review, with FRC action expected on April 20. The Plan will encompass the second year (FY16) of the Emergency Manager Orr's two year budget plus three years (FY17, FY18, and FY19).

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Ecorse

- The Ecorse RTAB continues to monitor the deteriorating conditions of the City. Preliminary assessment figures show a 26% decline in residential property values citywide.
- The City has been unable, during the past two years, to produce a balanced five-year budget. Such a multi-year budget is mandated by Emergency Manager Order.
- Previous financial projections predict significant operating deficits for FY 2016, and total exhaustion of the General Fund balance in FY 2017.
- The City's pension fund is 41% funded. The City is paying out more in benefits than it contributes to the plan. The Municipal Employees Pension System has suggested several options to improve the funding of the plan.

Hamtramck

- Current budget to actual reports show that the City is on track to realize the General Fund balance predicted in year one of Emergency Manager Square's two-year budget.
- The Police Chief resigned on March 11.
- The City was awarded $622K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to complete a property reappraisal, upgrade City Hall security, and upgrade street lighting.

Allen Park

- City Administrator Karen Folks resigned on March 12, 2015, after RTAB approval of a Separation Agreement negotiated with the City Council.
- Finance Director Bob Cady was appointed Interim City Administrator. Treasury will be participating with the City in a search process for a permanent City Administrator.
- Renovation has begun on a temporary City Hall facility. The City expects to relocate to the new facility in May 2015.
- The City is preparing to issue a bond tender offer to reduce its outstanding debt. The tender offer process was previously delayed due to the uncertainty between the City Council and the City Administrator.

Benton Harbor

- The City is projected to end the FY with a General Fund balance of $200k.
- The City was awarded $910K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the water system through water main replacements and fire hydrant repairs, and complete a property reappraisal to provide updated and accurate assessing records. Additionally, the City will provide community enhancement through blight management and sidewalk replacement.

Pontiac

- The City was awarded $125K through the through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to supplement the City's ongoing blight management programs.
- A new search process to hire a Deputy Mayor will begin shortly and will take 120 days to complete.
- A new City Charter has been proposed by the City Charter Revision Commission and will appear on the May 5 ballot for approval by the electorate.
- On March 17, the Michigan Court of Appeals reversed and remanded for trial a previous lower court dismissal of a 2013 suit which challenged the EM ordered nonpayment of $3.9 M into a VEBA Trust for the fiscal year ending in 2012. This appellate order is not a judgment against the City; rather it allows the previously dismissed lawsuit to proceed. The actual liability of the City will be determined either by a future settlement or by a final determination of the Oakland County Circuit Court (Judge Daniel P. O'Brien).

CONSENT AGREEMENT

Royal Oak Township

- The Township is continuing negotiations with the City of Hazel Park for the provision of police services. The proposal from the City of Hazel Park for this service currently exceeds the Township's available revenue by over $200K. Discussions regarding the

needed level of dedicated patrols within the Township are continuing between both entities.

- The Township is evaluating a proposal from the Ferndale School System to acquire Grant School (where the Township offices are located) for $1. The Township has retained McKenna & Associates to assist them in evaluating the feasibility of the Township owning and operating this facility. The building's unmet capital needs have been identified at $1.2M.
- Giarmarco, Mullins & Horton, P.C. has been appointed the Township Attorney via the issuance of a Consent Agreement Order. This firm replaces the firm of Pentiuk, Couvreur & Kobiljak. This change is estimated to save the Township $78K in budgeted legal service expenses.

Inkster

- City Treasurer Mark Stuhldreher currently has the Consent Agreement authorities; City Manager Richard Marsh has requested that he be given those authorities.
- The City was awarded $855K through the Financially Distressed Cities, Villages and Townships Grant Program. These funds will be used to complete a property reappraisal program, repair and replace fire hydrants and enhancing public safety by providing an officer to the multi-jurisdictional narcotic team and the deployment of one additional police officer, and a backup power supply and technology improvements.
- The City anticipates a General Fund surplus of less than $100K by the end of the current fiscal year, June 30, 2015. This is one year sooner than the approved Deficit Elimination Plan had indicated.
- A Consent judgment levy by the Detroit Water and Sewer Department and Wayne County will likely be placed on the July tax roll. The City owes DWSD $682K for unpaid water service and Wayne County $4.9M for unpaid sewer services.

River Rouge

- The City was awarded $592K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting and infrastructure improvements to City Hall.
- A reduction in the healthcare benefits for active employees and retirees was implemented on November 1, 2014. The City estimates an annual savings of $400K.
- The City must develop a sustainable five year budget and have no funds with a deficit in order to exit from the Consent Agreement.

NEUTRAL EVALUATION

Highland Park

- The City has hired Pierce, Monroe & Associates to assess the adequacy and accuracy of billing records, develop a methodology for calculation of amounts due to the City per customer, develop a work plan for implementation of an accounting program, and calculation of outstanding account balances per customer account.

- The City made an initial offer of $2.2M to settle past due accounts to the Detroit Water and Sewerage Department (DWSD). The offer was rejected by DWSD. Discussions are ongoing.
- The City was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the City's water system through meter replacement, leak detection, and system repairs.
- The Request for proposal (RFP) for the selection of a third party to operate and maintain the City's water and sewer systems, as required by the City's Plan of Adjustment, are due on April 20, 2015.
- In August 2015, an emergency loan of $16.4M, which includes the restructuring of $4.8M in existing loans, will be used to refund $2.7M in Fiscal Stabilization Bonds, $5.2M in Financial Recovery Bonds, and $3.7M in State Revolving Fund Bonds.
- BenStaff has been hired by the City to make recommendations to reduce healthcare costs.
- The law firm of Lewis & Munday has been hired to assist the City with the restructuring of the other post-employment benefits (OPEB) benefit.

OTHER COMMUNITIES

Melvindale

- The City was awarded $88K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used enhance public safety through fleet replacement of police vehicles and updated technology.

Wayne County

- The Michigan Supreme Court ruled unanimously in favor of retirees who receive a 13th check to offset inflation. The County is required to return $32M to the Pension Equity Fund.
- Cash reserves reached its lowest point in August 2014 with pooled cash falling to approximately $73M, the average balance is $170M. This includes proceeds from a short term borrowing of $75M.
- The County's deficit issue is a serious problem. The Delinquent Tax Revolving Fund has retained excess assets in past years which are now being transferred to the General Fund. The effect of the transfer is a reduction of the accumulated deficit.
- The FY 2014 audit is due at the beginning of April.

Subject: RE: Flint Court Consolidation

One question ... assuming that we're still planning to remove Jerry in April, can an alternative proposal still be sent to the ELB for consideration or does this issue become moot?

Just looking at the timeline - if the plan goes to the city council immediately after the county board (presumably) approves on 4/13, the 17-day window for city council to vote and propose an alternative (assuming a denial of the EM's proposal) would end on 4/30. How could this still go forward if Jerry leaves as EM prior to that time?

BTW if it's in the cards I'd argue for keeping Jerry on board at least until you can get 4 consecutive months of clean water tests to alleviate the Clean Water Standards Act/DEQ issue. If the court consolidation can happen in that window too, great. Just my two cents ... perhaps something to talk through at Monday's meeting.

Subject: Flint Court Consolidation

FYI - Jerry Ambrose just called with an update on the process. You will recall that the Genesee County Board of Commissioners approved court consolidation subject to negotiating an acceptable MOU with the City.

- A meeting took place yesterday between the principals and they are ready to move forward.
- The County Board will consider the MOU at a special meeting 4/13/15. Jerry said the county Board Chair is confident he has the necessary votes for passage.
- If approved Jerry will issue an EM order to proceed.
- He will be meeting with the affected union members in advance of the public announcement
- The consolidated court will not require the same number of employees so union members will be offered incentives to retire.
- Consolidation is schedule to take place on 1/1/16
- This plan must be presented to city council and Jerry believes they will not approve it, but will be unable to present an alternate plan with comparable savings.
- Most likely an ELB meeting in May or June

Re: Chief Financial Officer (CFO) Appointment

Chief Financial Officer (CFO) Appointment

I am pleased to request your approval of the appointment of Ms. Jody Lundquist as the CFO. She currently serves as the Finance Director/Treasurer of Benton Harbor, Michigan, which exposes her to the financial challenges present in a distressed community. Further, she has been instrumental in developing financial processes to ensure the fiscal stability of Benton Harbor as an appointed member of the restructuring team of the Emergency Manager. I believe it is imperative that the candidate serving as the next CFO of this community have experience with turnaround cities, and she has exemplified that in her professional experiences. It should also be noted that Ms. Lundquist founded, owned and operated an independent company that required her to deal with Housing and Urban Development (HUD) regulations, which is a valuable asset, having working knowledge of the remediation of foreclosed property and the inspections of such properties. Given the aforementioned experience Ms. Lundquist has exemplified, I am confident in recommending her appointment. Accordingly, I have attached her resume for your information.

Signed,

Natasha L. Henderson

March 25, 2015

Michigan Municipal League
ATTN: Flint CFO Search
1675 Green Road
Ann Arbor, MI 48105

Dear Ms. Parker:

I am writing to express my interest in the Chief Financial Officer position for the City of Flint. I am an experienced professional with a strong background in finance and community-focused organizations currently serving as the Finance Director and Treasurer for the City of Benton Harbor.

The City of Benton Harbor (the "City") has a population of approximately 10,000 and a total operating budget of $12.2 million. As you may have seen in the news, the City was under the leadership of a state-appointed emergency manager since 2010. I was hired in November 2012 by the City's emergency manager to be a part of the restructuring team.

In order to establish a more structurally sound budget, it was necessary to make tough decisions regarding expenses while seeking out and developing community relationships as additional sources of revenue. I implemented a variety of internal controls, policies and procedures, and financial planning practices that were simply absent upon my arrival in 2012. I created sophisticated cash flow models and began providing pertinent timely data crucial to monitoring and improving the City's financial position. By making sweeping reforms to the Finance Department, the City has benefited from more consistent, accurate and timely data; improved cash management capabilities; and stronger audited financial statements that are monitored closely by the State, elected officials and the public.

As a community emerging from financial distress, I have worked to re-establish the City's reputation with community stake-holders and business partners. I have also established a higher level of communication amongst departments, elected officials and residents regarding the interconnectivity and value of all City services with the City's overall financial position. As a team-leader, communicating our vision and purpose has aided in the understanding of how each function benefits the entire organization and has been crucial in developing a strong culture of dedication to the services we provide to the community. By reinforcing this commitment to service and the role of the individual to the whole, I have created a culture that inspires staff to strive for excellence and encourages pursuit of further professional development.

In each position I have held, I have demonstrated my resourcefulness, problem-solving skills, ability to adapt, build relationships, and lead diverse teams in a variety of settings. I hope to speak with you further about the ways in which my experience and skill will make a valuable and positive contribution to the City of Flint. Please do not hesitate to contact me if you have any questions. Thank you for your consideration.

Sincerely,

Jody N. Lundquist

Subject: Weekly Flint Call

Here are my suggestions for the first Weekly Call with Flint:

- **Purpose of the Weekly Call:** Discussed

- **Update on City Charter Election:** Discussed, election went well, begin duties: Attorney is working on that. Outside counsel will work w/ commission.
  - Any tech assistance: pass along to CA. (MSU currently involved)
- **Update on Water Issue:** GAC [redacted] in process, on schedule working w/ LAN[redacted]
  Mid-July to be up running.
  - Leak detection in process — city to send update.
  - Value work is ongoing.
- **Timeline for Position Hiring's:** HR: interviews scheduled (4 people)

HR, FD, Treasurer

CA has a CFO to recommend Jodie. Treasurer — to ask CFO candidates if interested plus one.

- **Update on Election Issues:**
  - Requesting Circuit Court to allow names to be on ballot Miller + Canfield.
  - Preforming internal investigation on Clerk
- **Priorities for the Week:**
  - Date for RTAB? Working on date
  - City to hire Court recorder — treasury to reimburse city
  - Any issue regarding B. Larkin? Mayor thinks highly of B. Larkin.

First RTAB Meeting

CITY OF FLINT WATER QUALITY STATUS REPORT
May 7, 2015

We are still working with the Water Treatment Plant staff to establish set criteria for raw and treated water data for your use. Most information is already in place but few are still in the works. Question marks will be eliminated when data are available.

I. Issues of Concern
   A. THM level in Dort is 100
   B. Reservoirs are intended to be used minimally prior to sampling; however, emergency type events (Large water main break or a major fire) may require the use of water from those reservoirs which could contain potentially high THM levels. THM levels needs to be analyzed weekly to understand trend changes in the levels before reuse.
   C. Bids for Phase 1 of the 24" water main replacement have not been received yet and therefore, the work will not be completed prior to the August THM sampling period. Some of this work will be needed to help ensure low THM levels in August.
   D. Cleaning of all reservoirs is needed and proper water circulation, within the reservoirs, is recommended to help eliminate old age and warm water from developing high THM levels.
   E. Water age in system is possibly being adversely affected by pump station(s) operations and flow back to WTP/Elevated tank. To be evaluated further with water model
   F. The City needs to proceed with the design and developing plans for transfer pump station to Dort reservoir.
   G. Lime sludge removal from Bray Road needs to be planned soon to meet the agreed to limits discussed with the MDEQ. None has been removed to date.

II. Raw Water
   A. TOC = ~10.8 mg/l, note internal values are showing higher than DEQ lab results
   B. Temp = 15.6° C (60° F) on 5/6/15
   C. THM = ???

III. Treated Water
   A. TOC = 3.7 (65% removal)
   B. THM = ~40
   C. Distribution THM
      1. Sample Sites 1, 5, 6 – near 80

IV. WTP Operations
   A. 17.3 MGD on 5/6/15
   B. Un-softened stream currently around 1 MGD
   C. Items to be postponed until after May THM testing
      1. East clarifier repair
      2. Cleaning of plate settlers
      3. Clean/repair slakers
   D. RFP for polymer pumps to clarifiers is out – work to commence when awarded with intent to be operational well in advance of the August THM sampling
   E. Security improvements at the main gate are ongoing
   F. One pump at Cedar St. PS is operational and SCADA control is possible by laptop until communication issues are addressed.

V. LAN
   A. Contract amendment is being signed. Liability language and scope for the construction work will need to be incorporated as an amendment to the contract.
   B. Hydraulic Water Model
      1. Rob B provided additional information with help from billing.
      2. LAN is working on model update which is to be completed approximately 1 month after all existing water system information is received

C. GAC Media
   1. Design is underway: basis of design is being developed
   2. Plan is to set up meeting with MDEQ, likely second or third week of May

VI. Distribution
   A. Chlorine residuals are currently holding well
   B. Flushing will begin week of May 11th

VII. Preparation for Upcoming THM Sampling
   A. A strategy meeting was held on 5/5/15 w/ Rob B, WTP staff & LAN
   B. All Reservoirs will be taken off line prior to sampling
   C. Recommend flushing for sample sites 1 (McDonalds), 4 (Taco Bell), 5 (Univ. Market), and 6 (Salem Housing) with 5 being the most critical.
   D. Staff will increase ferric dosage prior to sampling
   E. Eliminate the softening bypass stream completely if possible
   F. Decrease Cl_2 feed (already implemented)

Tracking Data

Primary TTHM Sample Indicators					
Date	**Flint River Water Temp**	**Flint River TOC**	**Chlorine Feed at WTP**	**TTHM Leaving WTP**	**Average System TTHM**

Attachments: FY16-17 Proposed Budget - Final.pdf

Ed,

After review of Flint's FY 2015-16/2016-17 budget there is a line item for the Carter Commission (page 32/70 in attached PDF.)

FY 2015 projected budget is $10K, FY 2016 amended budget is $49K, and FY 2017 is budgeted at $0.

If further information is desired please let me know.

Thank you,
Rob,

City of Flint 5-Year Financial Plan

Introduction

The City of Flint will be in a positive financial position at the start of the FY2016 budget year for the first time in a decade. None of the City's funds, including its General Fund, will have a deficit. City governance and management will likely be in the hands of the Mayor, City Council, and its professional management team, with oversight from a state appointed Receivership Transition Advisory Board.

Newly enacted charter amendments, ordinances, policies, and procedures provide a path for the City of Flint to move forward in achieving and maintaining sustainable financial solvency. It is only through being a financially stable organization that the City can hope to serve its citizens by working to achieve its stated vision mission, and goals.

The public has recognized the importance of a fiscally responsible approach as well as the value of long-term planning for sustainability. The newly adopted City Charter amendment reads that the budget and corresponding document:

"Shall explain the budget both in fiscal terms and in terms of the work programs, demonstrating how spending priorities are guided by and adherent to the City's Master Plan. It shall outline the proposed financial policies of the City for the ensuing fiscal year and the impact of those policies on future years. It shall describe the important features of the budget, indicate any major changes from the current year in financial policies, expenditures, and revenues together with the reasons for such changes, summarize the City's debt position, including factors affecting the ability to raise resources through debt issues, and include such other material as the Mayor deems desirable. The budget shall provide a complete three (3) year financial plan of all City funds and activities, with five (5) years of revenue projections."

Accountability for achieving and maintaining sustainable financial solvency rests ultimately with the Mayor and City Council, guided and supported by its professionally trained management team. It is their actions which will determine when the City of Flint can be released from state oversight.

The financial plan described here has a five year timeframe, extending from July 1, 2015 through June 30, 2020, or commonly referred to as FY16 through FY20. Budgets are included for FY16 and FY17, and financial forecasts are included for FY18, FY19, and FY20.

The budgets for FY16 and FY17 have been developed within the context of the City's recently adopted Master Plan, the Vision, Mission, and Goals for the City government as recently updated by the City Council, as well as the Budget Priorities adopted by the City Council. The budgets have also been developed in compliance with expectations of achieving and maintaining sustainable financial solvency, as reflected in recently enacted ordinances regarding adequate levels of reserves in the General Fund, Special Revenue funds, and Enterprise funds.

Taken together, the Master Plan, Strategic Plan, and multi-year financial plan constitute the template for moving the City government forward towards the Vision of being, "a well-managed, financially stable, and accountable organization focused on creating a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life."

The long range financial outlook demonstrates the continuing financial challenges facing the City of Flint. Anticipated growth in current revenue streams are forecasted to be less than the anticipated growth in the expense base, leaving a gap between revenues and expenses every year which must be

addressed. Minimal revenue growth in property tax and income tax revenues, coupled with consistent increases in personnel and operating costs, create a gap which must be addressed by obtaining additional sources of revenue, reducing staffing and services, or identifying further efficiencies. Given the low level of services currently provided by the City, further reductions in services would be very difficult; however, attempting to provide services at a level which cannot be supported financially is unacceptable.

There are also more near term financial challenges which must be addressed as well. Public safety services are supported by two separate voted millages generating more than $5 million annually in total. Both are up for renewal in 2017 and greatly affect the projected budgets. Failure of either would be disastrous, in that those two sources provide 20% of the financial support for police and fire services.

At the same time, the State of Michigan's more than $2.5 million appropriated annually for the City lock-up, the state troopers provided to support city police officers, and the assistant prosecutors supporting County law enforcement provide invaluable assistance in support of local public safety services. Replacement of these resources and revenues from other city revenue sources would be impossible. This fact illustrates the persistent financial challenges that the City will continue to face with its finances and the necessity of continued partnerships and support from all.

A third major potential challenge to the City's financial solvency remains the issue of retiree health care. Decisions to reduce – but not eliminate – health care for current retirees accomplished some $5 million in cost reductions for the City, and was an essential part of the City's financial recovery. However, the lawsuit filed over the action remains active, and should there be an unfavorable decision against the City, the financial repercussions would significantly impair the City's return to financial solvency.

This document is designed to provide information and tools for understanding the difficult choices that will continue to need to be made and also the way that City services are being planned and delivered in a manner consistent with the Master Plan, Strategic Plan, and Capital Improvement Plan in order to fulfill the mission of the City of Flint Government and "assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly, financially responsible, and equitable manner in order to insure equality of opportunity for all persons."

Background

The City of Flint has been in state receivership since December, 2011, as a result of consistent deficits in the General Fund, a decline in pooled cash, unrealistic budgeting, and unfunded liabilities for postemployment benefits. This was all compounded by the effects of the recession of 2008, which greatly reduced state and local revenues. Significant progress has been made in addressing these financial issues, as the $19.1 million deficit at the end of FY12 was reduced to $9.0 million at the end of FY14, and legacy costs were reduced from $850 million to $240 million. The City's cash position has been significantly improved, and the FY15 budget was realistically balanced and is on target to reduce the deficit to $7 million. Plans are underway to finance the remaining $7 million deficit with a loan from the state.

Organizational changes have been made and new financial policies and procedures put into place to provide the tools for achieving and maintaining financial solvency. Flint voters approved the creation of a Charter Commission, charged with reviewing the decades old City Charter. New ordinances have been adopted requiring long range strategic planning, multi-year budgeting and forecasting, and the maintenance of adequate financial reserves in city funds.

With the financial progress made, including the elimination of the deficit, and with the organizational changes in place, City operations will soon be taking the next step towards returning to home rule, consistent with PA436. Mayor and Council will resume their executive and legislative roles, subject to the organizational changes made by the various Emergency Manager Orders, and the oversight by a state appointed Receivership Transition Advisory Board.

The City will fully exit state receivership at the point in time that the actions of the Mayor, Council, and Administration demonstrate to the satisfaction of the Governor that the City is financially stable, on a path which assures continued financial stability, and is no longer in need of state oversight.

Financial Challenges

Resolving the near financial insolvency of the City has required hard decisions and sacrifices for all. The FY13 and FY14 budgets were balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Revenue increases included a 25 percent increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire; establishment of a special assessment district for street lighting; and implementation of a fee sufficient to cover the cost of waste collection. Expenditure reductions included elimination of 20 percent of the City's workforce; compensation decreases equivalent to a 20 percent wage reduction for remaining employees; and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan. Further reductions were necessary in FY15, and of necessity, required significant reductions in public safety positions. Even with the voter approved millages, the City was left with police staffing far below the levels in comparable cities.

Restructuring

Significant organizational changes have been made as well. City waste collection is now operated under contract with a private company; City 911 operations are being consolidated with the Genesee County 911 Consortium; and on January 2, 2016, the City-funded 68th District Court will become part of the County-funded 67th District Court. All of these actions, as well as others, have resulted in significant cost savings to the City while at the same time maintaining or improving those services.

The actions taken to restructure healthcare benefits for current employees and retirees have also had a significant impact on reducing both current costs and long-term liabilities. The 20% reduction in the workforce required significant reorganizational activities focused on reducing current costs. Long term liabilities were reduced by eliminating traditional defined benefit pension programs for new employees in favor of hybrid plans; by moving the City's retirement system into the state wide retirement system; by restructuring health insurance benefits for current employees and placing retirees into those same plans; and by eliminating the promise of retiree health care for new employees in favor of providing retiree medical savings accounts. This restructuring, which was implemented during the course of FY12, has reduced the City's OPEB liabilities alone from $850 million to $240 million at the end of FY14.

Legacy Costs and Legal Challenges

The steps taken to begin to restore the City to financial solvency have not been without conflict and changing circumstances. A significant legal challenge has been made to the decision to move retirees from their historical health insurance plans into the same plans offered current employees. This action resulted in an initial cost reduction in FY13 of $3.5 million to the City and imposed deductibles and co-pays on retirees. Because of a stay initially imposed by the federal court in FY14, the City was required to increase its budget for retiree healthcare costs in the FY15 budget by $5 million. However, the injunction was subsequently modified, and the City was permitted to implement a significant portion of the initial changes. This action provided some financial relief to the City, but the risk remains that budgeted healthcare costs will increase significantly should the lawsuit result turn out to be unfavorable for the City.

Legacy costs in total will continue to be a cost burden to the City of Flint. In FY 16, pension and retiree health care is now projected to cost $31.7 million, or approximately 20% of total projected expenses. $17.3 million is borne by the General Fund which equates to 33% of general fund expenses. $8.5 million is borne by the Utilities Funds, which equates to 13% of expenses. These amounts, while still significant, are less than the $38.6 million originally budgeted for FY16. By 2020, the obligation for these expenses are projected to increase to nearly 39.6 million, or some 23% of projected total expenses.

Partnerships

The efforts of the City to regain financial solvency have been aided by support from numerous federal, state and private partners. Federal grants for police, fire services and blight elimination and demolition, as well as for transportation, planning and development have substantially assisted Flint's recovery from the bottom of the recession. The White House Strong Cities, Strong Communities (SC2) partnership has provided support for implementation of the Master Plan, including brownfield redevelopment, public safety, and blight strategies. State police troopers have been placed in the City to support local law enforcement efforts, and funds have been allocated to enhance prosecution activities and to operate the City's lock up. The Governor's proposed budget continues this support. New partnerships with Genesee County and surrounding municipalities in courts and 911 will provide significant savings and improved services. Many foundation, nonprofit, business, faith and community partners have come together in the best interest of the city and this collaboration will be critical to continue.

FY16-FY20

The future financial solvency of Flint will continue to be challenged by a continuing structural deficit. Property tax, income tax, revenue sharing and other general sources of revenue are projected to grow by an average of 1.2% annually, while expenses are projected to grow by 2.4%. While a 1.2% gap may not

seem large, it equates to nearly $1 million on an expense base of $83 million, which is the projected base for FY18. Addressing this gap on an annual basis is necessary and critical if the City is to regain and maintain its financial solvency.

Overview

The City of Flint has spent much time and effort to plan for the community's future through the adoption of a comprehensive master plan and capital improvement plan, and through creation of an organizational framework focused on the City's updated vision, mission, and goals. The Vision, Mission, and Goals of the City of Flint are detailed in this document, as are specific budget priorities identified by the City Council. It is a core mission of the City that all who live, visit, work, and study in Flint can expect to receive city services in a customer friendly, financially responsible, and equitable manner which insures equality of opportunity for all.

The budgets for FY16 and FY17 have been reviewed and developed consistent with that framework; balanced in a manner reflecting current desire to maintain services, to foster financial stability and to reflect the budget priorities adopted by the City Council.

The decisions incorporated into the FY16/FY17 budget reflect the financial realities of a financially strapped City working to move out of state receivership. Revenues are growing marginally, and the City does not have adequate financial reserves to foster any appreciable degree of security. The anticipated loan which will eliminate the accumulated General Fund deficit does not solve the City's financial problems but does enable beginning to establish adequate reserves.

Financial Outlook

The financial outlook for the City is improved in the short term from the outlook presented last year. With the financial impact of the changes to retiree health care, a lower than expected pension contribution for FY16 and FY17, and the cost reductions from the 911 consolidation and the district Court consolidation, the budgets for FY16 and FY17 are able to maintain the status quo in terms of staffing and programming. This improved condition, however, is not sufficient to significantly increase service levels in any area. It will, however, allow some advance time for considering how future revenue and expense challenges associated with a continuing structural deficit will be met within the context of the City's Master Plan and Strategic Plan priorities.

The spending plan for the City is still reliant upon financial and programmatic support from state, federal, and other sources. Operation of the City's lock up is assumed to be continued based on state financial support in excess of $2.5 million, while state troopers will continue to assist the Flint Police Department. Activities related to blight management, and implementation of the City's Master Plan are still supported significantly with programmatic and financial support from grant sources.

Staffing

Current staffing for city services is 523 full time equivalents. That number is projected to be reduced to 502 in FY16 and to 470 in FY17. The staffing reductions reflect primarily the 911 consolidation in FY16 and the District Court consolidation in FY17. Other adjustments are also made, including the elimination of 1 fulltime position in Human Resources and Law, as a result of reorganization; the addition of a third position in the Council Office, the addition of an engineering position in Transportation, and the addition of one position in Development and Planning to assist in economic development and business case processing. Funds are also set aside for a contracted service for economic development, and funding for ten part-time police officers is included, seven of which will be paid for and assigned to Hurley Hospital.

Costs, Fees and Assessments

Costs to citizens will be reduced in FY16 as the waste collection fee is reduced by $20, and property tax, water and sewer rates, remain unchanged. In addition, the $350 water deposit fee for renters is reduced to $250. The previously adopted FY16 budget anticipated a 6% increase in water and sewer rates, but that has been eliminated.

FY17 continues the status quo, with the exception of water and sewer rates. A 5% increase in water and utility rates is tentatively included in FY17, but will be reviewed next year prior to implementation. The City is in the process of reviewing the utility rate schedule, and will be using those results, as well as updated expectations associated with the move to KWA, and the results of current efforts to reduce water loss and improve operational efficiencies with the water and sewer systems.

In comparison to the projected total taxpayer impact for the current year, the collective impact in terms of taxes, fees, and charges, including water and sewer, is projected to be a total increase of approximately 1% over the next two years.

Priority issues addressed

Key actions in the FY16 and FY17 budgets which specifically address Council priorities include:

Increasing Public Safety

- Police staffing, which currently includes 99 sworn officers and 15 civilians, is increased by the addition of 10 part-time police officers, and a Telephone Response Unit is added as a result of the 911 consolidation. Even though a majority of the new positions in the Police Department will be assigned to Hurley Hospital under a contract for services, the addition will give the department more flexibility to deploy full time officers where needed. Fire Department staffing of 75 is maintained, and the current level of service will be continued.
- The foundation for increased efficiency in both Police and Fire is being laid with migration to the State Records Management System, and with implementation of appropriate recommendations from the ICMA.
- Reductions in health care and pension costs, and the cost reductions achieved through the 911 and court consolidations have allowed the continuation of current public safety staffing levels through FY16 and FY17, which is one year longer than predicted last year. Going forward, however, voters will need to renew both special millages, or even current low levels of staffing will be at significant risk.
- Over the next two years the Police Department will focus on emerging crime issues as they appear and on increasing community engagement, specifically increasing the number of community centers and building community trust. The Fire Department, in addition to maintaining its response time to alarms at improved levels, will continue to reach out to the community to promote fire protection education.

Reducing Utility Rates and Costs

- The Utilities Division of DPW is committed to providing dependable quality water with investments in both the treatment process in the form of a new filter media and in the distribution system with the first significant pipe replacement project in over a decade. These system improvements will afford a greater opportunity to have stable water and sewer rates while continuing to perform needed maintenance on the system.
- Unfortunately, the maintenance and quality needs of the utility system, coupled with the prior financial deficits in the Utility funds, does not permit a decrease in rates. However, the long term impacts of capital investments in the system, including the decision to participate in KWA, assures that future rate increases will be less than had the City continued to purchase its water from DWSD.
- With the timing of the capital projects, the restructuring of water related debt, the cost reductions gained from temporarily using the Flint River for supply, and reductions in staffing in the Utilities Division, the 6% water and sewer rate increase included in the original FY16 budget has been eliminated, and so water and sewer rates will be held constant in FY16. However, a 5% increase is tentatively included in the FY17 budget, but that will be reviewed prior to the beginning of the FY17 fiscal year.
- The City's action plan to improve water quality will continue, as will the process of reviewing rate schedules, deposit and turn-on/off fees, with the goal of assisting those who are truly unable to pay.

Eliminating the General Fund Deficit

- With the pending receipt of a $7 million loan from the State of Michigan, the General Fund deficit will be eliminated by June 30, 2015. In accordance with the City Council's recently adopted financial stability ordinances, the FY16 and FY17 budgets will begin to build reserves at the rate of $1 million annually. As the Mayor and Council continues this practice in future years, it is projected that the financial reserve in the General Fund will reach 10% of General Fund revenues by 2020. While the goal is 15%, these actions represent significant commitment and progress towards sustainable financial solvency.

Increasing Capacity for Master Plan Implementation, Blight Management, and Economic Development

- The newly merged Planning & Development Department (DPD) is focused on creating a vibrant and growing community with a high quality of life for residents, businesses, students, and visitors. Through comprehensive planning, building and safety, blight elimination and neighborhood stabilization, community and economic development, street lighting, and parks and recreation, DPD is actively working to address all of the Council priorities. In addition, DPD is charged with coordinating the implementation of the community's Master Plan adopted in late October of 2013.
- In FY 16 and FY 17, the DPD will prioritize blight elimination and neighborhood stabilization through proactive code enforcement, waste removal, demolition, and housing rehabilitation. Other priorities include: economic development through entrepreneurship and small businesses growth in underserved neighborhoods, construction of quality housing, creation of safe, healthy places for youth to learn and thrive, and enhanced partnerships to provide new resources to the City to carry out the Master Plan. The Department will also improve regulatory procedures like zoning and will develop a business friendly permitting counter to streamline the review and approval processes to facilitate redevelopment.
- Through creative use of grant funding, the City has been able to add much needed positions in code enforcement and blight elimination without impacting the General Fund budget. In total, the budget represents 27 full-time and 2 part-time positions. DPD will continue to pursue new partnerships and resources in order to grow our capacity to implement the Master Plan and improve services to Flint residents, businesses, students, and visitors.
- Additional resources are added to Planning and Development to assure staff is available to support and assist businesses in obtaining necessary approvals from the City, and funds are set aside for contracted services with the Flint Genesee Chamber of Commerce

Improving Energy Efficiency

- Addressing a significant goal of improving energy efficiency, a vendor has been identified to develop specifications to improve the carbon footprint of the City, including city facilities and utilities. In FY16 the DPW will identify an energy baseline to work from and prioritize a list of projects, based on anticipated savings. FY16 will also see the completion of converting methane gas from the digester at the Waste Water Plant into energy, which will be used to reduce energy costs. Further cost savings will be realized from securing a fixed rate for natural gas for the next two years

Maintaining Streets and Sidewalks

FY16 and FY17 budgets utilize available funds to address maintenance and improvement of priority needs for bridges, roads and sidewalks, while assuring adequate staff and equipment within budgetary limits to responds to weather events and emergency repairs.

A City Engineer position is added to facilitate engineering services and activities required to design and construct major projects and City performed infrastructure improvement projects. The engineer's work will include routine bridge inspections.

The Street Maintenance Operator/Maintainer Trainee Program will also be resurrected in FY16. Four new trainees will participate in a two-year training series to increase capacity of City crews to perform street maintenance and winter maintenance activities. Winter Maintenance activities will include an allocation to rent three Fendt tractors to supplement City equipment available to perform winter maintenance activities.

Ongoing department activities will include maintaining in-house traffic services, such as installations/repairs/replacement/ and routine maintenance of traffic signals, signs, pavement markings, barricading activities, and traffic control services. Additionally sign upgrades will be conducted in three areas of the City to conform with the Federal Highway Administration's sign reflectivity regulatory mandate. Traffic signals will also be modernized at the intersection of Averill @ Davison; traffic signal upgrades at Ballenger @ Welch, Lapeer @ Court, Lapeer @ Fifth St.; and traffic signals retrofitted at Grand Traverse @ Welch and Dayton @ Welch.

Routine street maintenance activities will continue, including pothole patching, guardrail repair, street sweeping, crack sealing, concrete sectional repairs and paving activities. Funds received from the special state appropriation in FY15 will be utilized in FY16/FY17 to provide supplemental funding for additional paving activities within the local street system (residential areas, approximately 6.5 miles), contracted grass cutting services within the public right-of-way areas (between the sidewalk and curb), in addition to the clearance of tall grass at intersections to maintain sight distance clear vision areas.

Specific projects contained in the FY16 and FY17 budgets include:

<u>Bridge Projects: Preventative Maintenance</u>

- Kearsley Park Blvd over Gilkey Creek
- Barton Street over Thread Creek
- Torrey Road (12th St.) over Carmen Creek
- Atherton Road over Carmen Creek
- Other minor bridges identified in Annual Bridge Reports

<u>Road Resurfacing Projects</u>

- Fenton Road (Hemphill to I-69)
- Kearsley Street (Chevrolet Ave to Beach St)
- Harrison Street Enhancement

<u>Road Diet Projects</u>

- South Saginaw Street (Fourth to Hemphill)

<u>Infrastructure Needs Assessment</u>

- Analysis of Sidewalks/Street Network Needs as defined in the Master Plan

Sidewalk repair

- Two Sidewalk Repair Programs will address trip and fall hazards and sidewalks that residents desire to repair. Approximately 250 trip and fall hazardous sidewalk squares will be repaired by City crews under the traditional Sidewalk Repair Program and approximately 295 sidewalk squares will be repaired by prequalified contractors under the 50/50 Sidewalk Repair Program.

Tree Management

- Tree Management activities will be funded in partnership with Genesee Conservation District (GCD), including emergency hazardous tree and stump removals, tree trimming and tree plantings. Work with GSD will include the development of a Forestry Management Plan to guide future activities.

Improving Customer Service

Department specific and city wide training needs are budgeted, and customer service training has been identified as a priority. Human Resources, as it did in FY15, is committed to continuing ongoing training for supervisors and will be extending these efforts to all employees. Information Services likewise is committed to providing ongoing training for employees. Finally, most departments are including funds for ongoing training for employees.

Maintaining Parks

The Parks millage fund is being fully utilized to provide as much maintenance as possible. Vendor relationships and expectations are being reviewed and efforts continue to increase the number of partnerships for care and maintenance of Parks.

Parks and Recreation continues actively and aggressively peruse park partnerships with the community and funding for park capital improvements. Parks and Recreation currently has over $2.17 million in on-going improvements and acquisition projects. Major projects include the construction of the Genesee Valley Trail, improvements to River Bank and McKinley Parks, and the acquisition of property for the Grand Traverse Greenway. Currently, 43 of the 63 parks, community centers and golf courses have formal partnership agreements to improve service, quality, and make minor improvements to the park facilities. Of those 43 formal partnerships, 12 are new for 2015.

In order to increase the level of service, improve maintenance, and leverage additional funding for parks, the City has entered into a number of formal partnerships. Currently 43 of the City's 63 parks, community centers, and golf courses have formal partnerships. 12 of these 43 partnerships were created in the last year. Parks and Recreation department is working to increase this number and the capacity of each partnership group.

Through the Keep Genesee County Beautiful Adopt-a-Park program, 32 community organizations have partnered in Flint parks. With City of Flint assistance, Adopt-a-Park provides organizational capacity, planning, and clean up supplies to all Park Adopters as well as funding for improvements through their Park Tender and Park Keeper programs. Since 2011, $501,778 has been invested through the Adopt-a-Program. In 2015, KGCB agreed to be the $25,000 match on a $100,000 Department of Natural Resources grant for Longway Park Improvements. The 2015 Park Tender program currently has $56,000 in funding to be spent in 4 City Parks.

Formal use agreements also exist with a magnitude of different community partners for the Berston Center, Haskell Center and Bassett Park, Mott Park Golf Course, Dewey Park, Mobley Park, and Kearsley Park. In July of 2015, Flint Parks and Recreation entered into an agreement with Genesee County Parks Commission to provide maintenance and program in Max Brandon, Flint Lake Park, Thread Lake Park and McKinley Park. At the cost of less than the City spent on mowing, the County provides Park Ranger patrols, mowing and forestry work, and free public programing.

Increasing Community Partnerships

Partnerships with Human Service organizations will be strengthened with the return of a staff position focused on fair housing and other citizen issues that will require outside assistance such as the Keep the Water Flowing fund with the United Way, Salvation Army and Catholic Charities.

Ombudsman and Civil Service

No funding is included for either the Ombudsman Office or Civil Service, pending final action by voters on any Charter changes. Legal complaints will be directed to the City Attorney's Office and employee issues will be handled through the Human Resources Department.

Business licensing

Business licensing will be retained in the Clerk's Office, utilizing BS&A systems, and operating in accordance with established performance standards.

CITY OF FLINT STRATEGIC PLAN

2016 - 2020

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint

A well-managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life

The Mission of the City Government

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly, financially responsible, and equitable manner in order to insure equality of opportunity for all persons

The Goals

In order to operate per our Mission and realize our Vision, residents, businesses, students and visitors can expect that the City of Flint will:

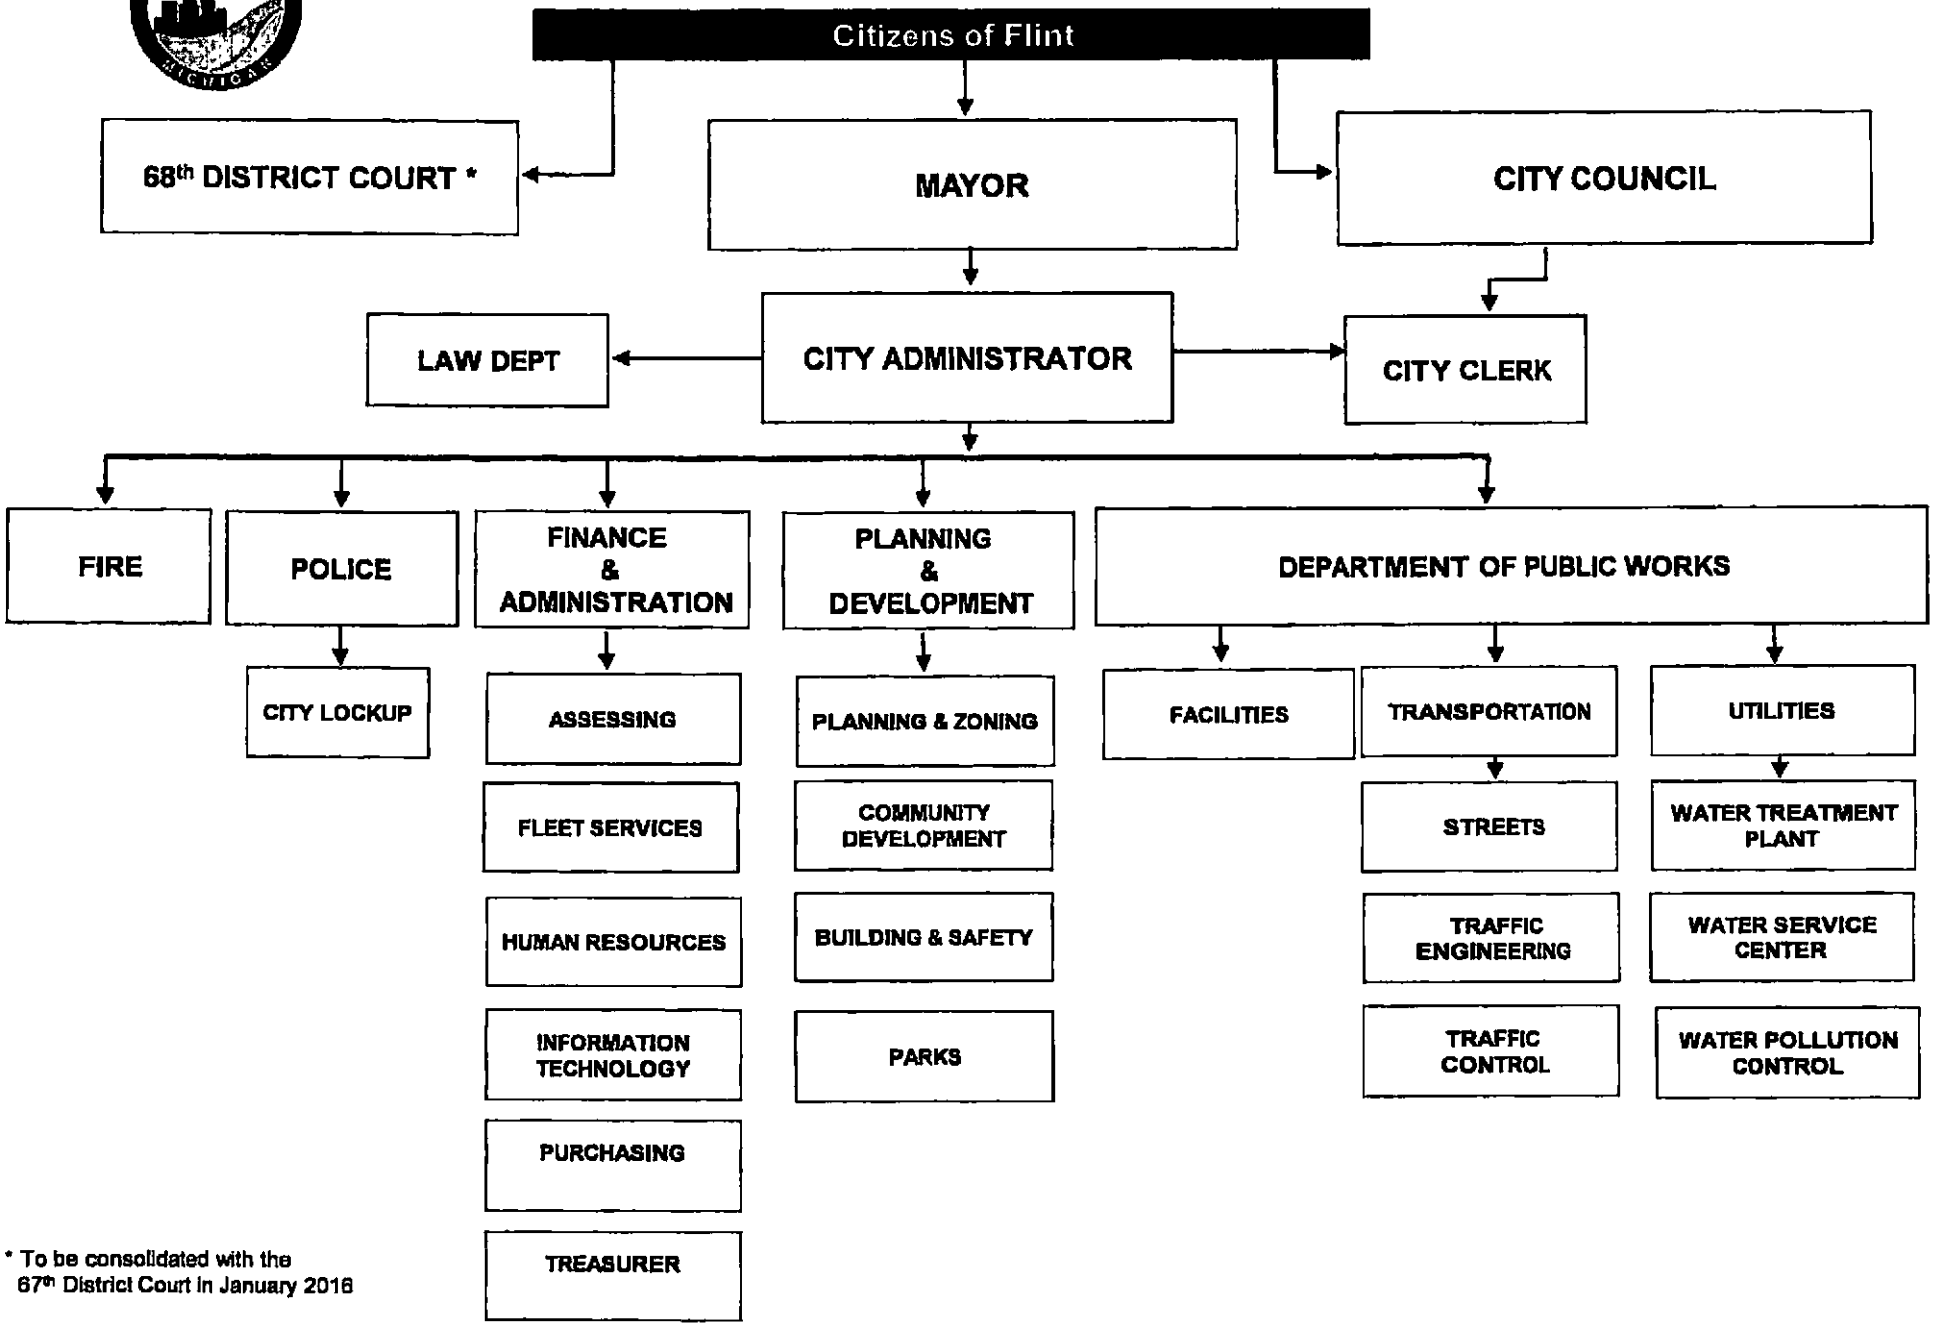
1. The City will operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position and eliminating accumulated deficits
2. The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees
3. The City will provide for a safe, secure, healthy and clean environment in which to live, work, learn and play
4. The City will provide access to dependable, quality and sustainable water and sewer
5. The City will provide access to an adequate and well maintained transportation network for all modes of travel serving motorized, non-motorized, and pedestrian needs
6. The City will foster cooperation among business, non-profit, higher education, foundation partners, and residents to create a climate that supports economic development with a focus on small business and entrepreneurs in order to build local wealth and enhance the tax base
7. The City will seek partnerships with Local, State and Federal governmental partners, and other private entities in order to maximize efficiencies and resources in meeting its Mission
8. The City will promote the equal protection of the law for each person in accordance with fundamental human rights

CITY COUNCIL PRIORITIES ▪ 2016 and 2017

- Increase Police and Fire staffing levels and increase starting pay for Firefighters
- Decrease water and sewer rates while increasing quality
- Reduce the General Fund deficit by at least $2 million
- Increase capacity to reduce blight, including demolition
- Increase capacity to engage in economic development – including hiring Economic Development Director
- Reduce energy costs for the City by 25%
- Ensure the Department of Public Works has tools necessary to provide for street maintenance, sidewalk maintenance, snow removal, and right-of-way tree maintenance
- Improve customer service across all departments through training and technology
- Ensure parks are maintained to the greatest extent feasible, including mowing and tree maintenance
- Ensure capacity and partnerships to continue implementation of Master Plan and Capital Improvement Plan
- Create partnerships with Human Service organizations within the community
- Fund Ombudsman Office in accordance with vote of the public in 2014
- Fund Civil Service Office in accordance with the vote of the public in 2014
- Retain Licensing in the City Clerk's Office

CITY OF FLINT – ORGANIZATIONAL CHART

FY16-17

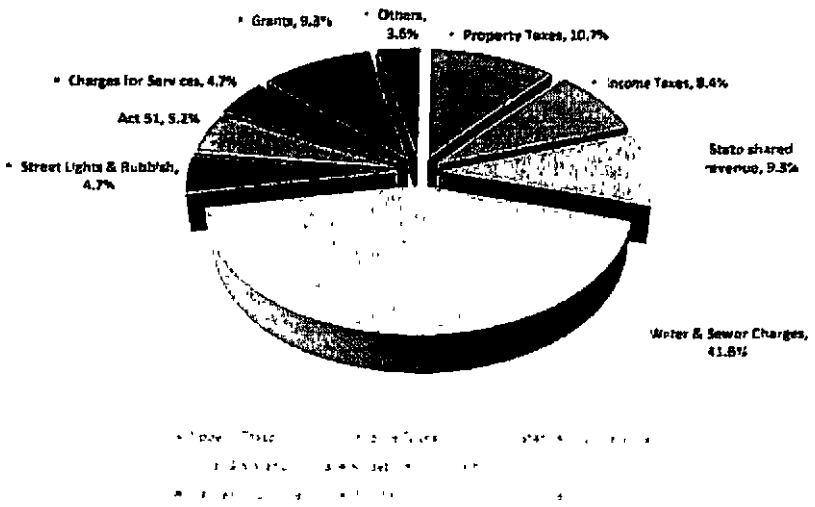


* To be consolidated with the 67th District Court in January 2016

ALL FUNDS
REVENUE PROJECTIONS
FY16 & FY17

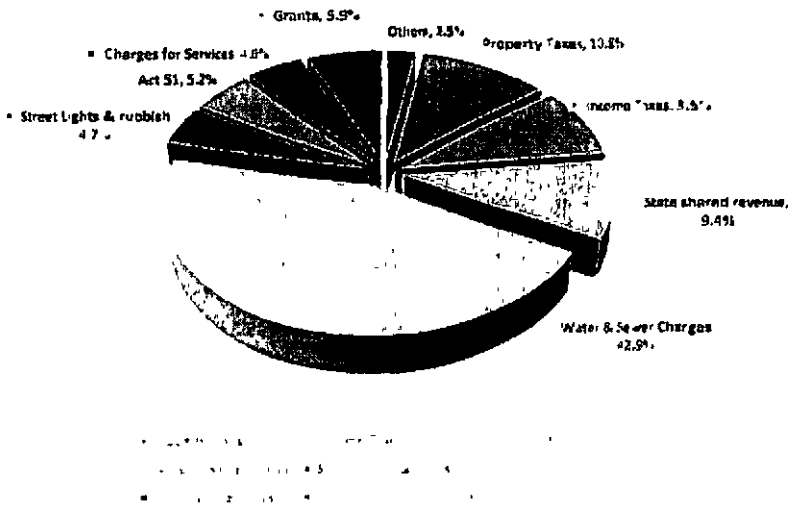
FY16

$162,143,580



FY17

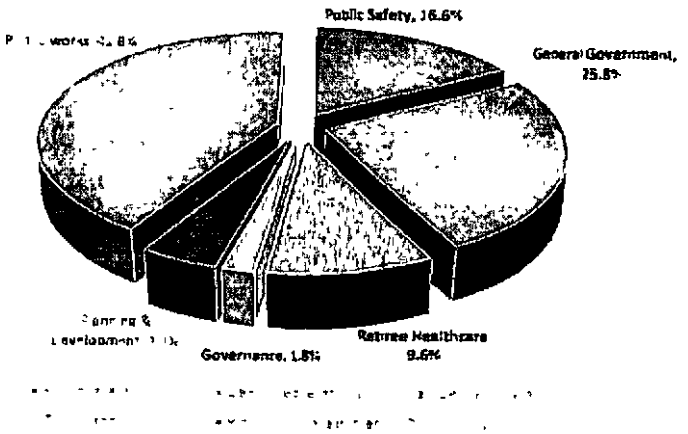
$162,090,443



ALL FUNDS
EXPENSE PROJECTIONS
FY16 & FY17

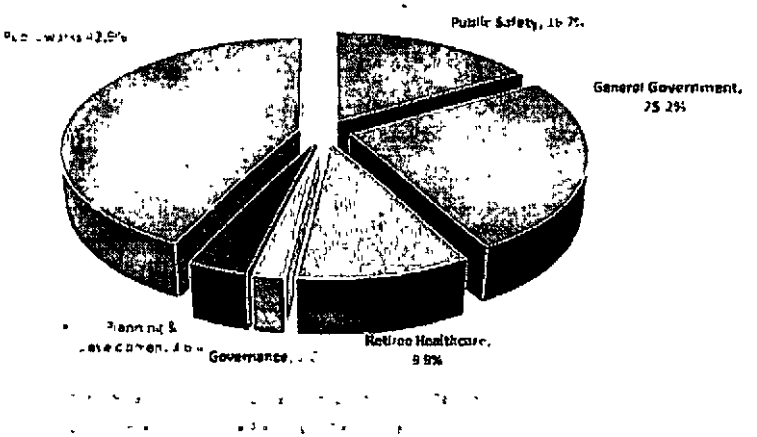
FY16

$162,143,580



FY17

$162 090,443



BUDGETS & PROJECTIONS BY FUND

FY16 & FY17; FY18-FY20 PROJECTIONS
General, Special Revenue and Enterprise Funds FY16-FY20

Funds Supported by General Tax Dollars or Millages:

General Fund
Police/Fire Millage
Neighborhood Police Millage
Parks
Public Improvement

Funds Supported by Dedicated Funds, Fees, or Assessments:

Major Streets
Local Streets
Street Light Assessment
Waste Collection
Drug Forfeiture
Building Safety

Special Revenue Grant Funds

CDBG, ESG, HOME
Other Grants

Enterprise Funds:
Sewer
Water

Budgets and Projections by Fund

(FY16;FY17 Budgets; FY18, FY19,FY20 are Projections Only)

(FY16;FY17 Budgets are adopted at expense level; Revenues plus Use of Fund Balance equal expenses)

Funds Supported by General Tax Dollars or Special Millages

	Budget FY16	Budget FY17	*Projected FY18*	*Projected FY19*	*Projected FY20*
General Fund (101)					
Revenues	$51,239,208	$50,029,123	$50,638,175	$51,180,184	$51,762,300
Expenses	$51,239,208	$50,029,123	$51,232,153	$52,468,950	$53,740,508
Budgeted Use of Fund Balance (FY16 and FY17 only)	$0	$0	($593,978)	($1,288,766)	($1,978,208)
Budgeted Use of Fund Balance for Reserve Accumulation	$1,000,000	$1,000,000	$1,000,000	$1,000,000	$1,000,000
Beginning Fund Balance*	$0	$1,000,000	$2,000,000	$2,406,022	$2,117,256
Ending Fund Balance	$1,000,000	$2,000,000	$2,406,022	$2,117,256	$1,139,048
Fund Balance as % of Revenues - Actual	2%	4%	5%	4%	2%
Fund Balance as % of Revenues - Policy	15%	15%	15%	15%	15%
Designated Reserve Per Policy	$7,685,881	$7,504,368	$7,595,726	$7,677,028	$7,764,345
Variance - Actual to Policy	($6,685,881)	($5,504,368)	($5,189,704)	($5,559,771)	($6,625,297)

**Assumes $7 million loan eliminates deficit in 2015; $1 million surplus committed annually for reserve accumulation/OPEB reduction per ordinance*

** Projections for FY18, FY19,FY20 do not show revenue expense gap eliminated annually; reserve accumulation will be greater when that gap is eliminated*

Park Capital Improvements

Parks and Recreation Department currently has a number of active improvement projects, including $1.8million in State grants for capital investment and acquisition.

- Genesee Valley Trail $730,000: The City was awarded an MDOT grant to create to extend the Genesee Valley Trail from the Flint Township border to Chevrolet Avenue. Construction is projected to be complete by the fall of 2016.
- Grand Traverse Greenway $500,000: The City is working on acquiring former CSX rail line for the eventual construction of a multi-use trail. Parks and Recreation is currently seeking an MDOT Administrative Settlement to close the $95,000 gap in funding.
- River Bank Park Improvements $400,000: The City was awarded a DNR grant to create an ADA accessible ramp to the amphitheater and stage in River Bank as well as the creation of a canoe launch on the Flint River. Construction is projected to be complete by the fall of 2016.
- McKinley Park Improvements $300,000: The City was awarded a DNR grant for improvements to the pavilion, playscape, walking paths, and canoe launch. Construction is projected to be complete in the spring of 2016.
- Max Brandon Park $75,000: The City was awarded a Ruth Mott Foundation grant for park and wet land improvements as well as public environmental education programs. Improvements are projected to be complete in the fall of 2016.
- Brennan Park $80,000: The City has a combined $80,000 project, which includes a $50,000 grant from the Ruth Mott Foundation for new playscape equipment, park benches, and adult fitness equipment.
- Park Tenders $56,000: Keep Genesee County Beautiful will be making approximately $56,000 in improvements and repairs in 4 City parks this summer.
- Berston Field House $22,000: The City has dedicated CDBG funding for energy efficiency and capital improvements to the 100 year old community center.
- Haskell Center $14,000: The City has dedicated CDBG funding for improvements to the soccer and lacrosse fields at the community center.

RESERVE ANALYSIS

General, Special Revenue and Enterprise Funds Projection FY16-FY20

Policy Overview
Reserve Requirements by Fund

Projections by Fund:

Funds Supported by General Tax Dollars or Millages:
General Fund
Police/Fire Millage
Neighborhood Police Millage
Parks
Public Improvement

Funds Supported by Dedicated Funds, Fees, or Assessments:
Major Streets
Local Streets
Street Light Assessment
Waste Collection
Drug Forfeiture
Building Safety

Enterprise Funds:
Sewer
Water

(Special Revenue Grant Funds not included)

Reserve Policy by Fund

Sustainable financial solvency requires that the City have the ability to address unexpected events affecting revenues and/or expenses in a manner which avoids immediate crisis oriented responses. One means of accomplishing this is to maintain adequate financial reserves which will enable the City, should it be faced with sudden unexpected and unavoidable revenue decreases or expenditure increases in the course of a fiscal year, to immediately address most such issues without requiring immediate decisions which seriously disrupt the provision of city services by providing access to a financial resource for a short time. This will allow the City to provide a more well thought out and considered response to the financial impact, preferably in the context of the annual planning and budget review process. Such reserves also have an impact on the City's ability to borrow funds if necessary, by assuring that the City has such capability.

Unexpected events can be such items as: unexpectedly high property tax chargebacks from the county; unanticipated decline in income tax revenues; reduction in constitutional revenue sharing payments; unexpected decrease in water and sewer revenues; unexpected number of water main breaks, road and sidewalk repairs; major equipment failure; unexpected need for major building repairs.

Consequently, reserve requirements are established for funds as shown on the following pages.

Reserve requirements for funds of the City of Flint

Funds supported by General Taxes and/or millages		Reserve requirement
101	General Fund	15% of the current years adopted amount of General Fund revenues, of which any amount above 5% shall be transferred to the Budget Stabilization Fund
205	Police/Fire Millage	10% of the current years adopted revenue for the fund
207	Neighborhood Police Millage	10% of the current years adopted revenue for the fund
208	Parks	10% of the current years adopted revenue for the fund
402	Public Improvement	One years annual debt service for all debts budgeted to be paid from the fund plus $800,000
Funds supported by Dedicated Funds, Fees or Assessments		
202	Major Streets	15% of the current years adopted amount of Act 51 revenues for Major Streets plus one years annual debt service
203	Local Streets	15% of the current years adopted amount of Act 51 revenues for Local streets plus one years annual debt service
219	Street Light Assessment	15% of the current years adopted revenue for the fund
226	Waste Collection	15% of the current years adopted revenue for the fund
265	Drug Forfeiture	100% of the annual budgeted expense from the fund
542	Building Safety	15% of the current years adopted revenue for the fund
Enterprise Funds		
590	Sewer Fund	25% of the current years adopted budget for operating expenses plus one years annual debt service for any debt paid for from the fund
591	Water Fund	25% of the current years adopted budget for operating expenses plus one years annual debt service for any debt paid for from the fund.
Special Revenue Grant Funds		
Special Revenue Grant Funds 274,298,297 in which revenues and expenses are to be self supporting, do not have reserve policy requirement		

Projection Summary

Purpose: The purpose of a projection summary is to illustrate the degree to which current revenue and expense trends will affect the City's financial position, if left unaddressed. The amount of unreserved fund balances at the end of each year are compared to the amount established as necessary in the fund, according to the City's reserve policies.

Comments and observations: While a substantial number of the funds are in compliance for FY16, several funds will drop out of compliance in FY17 and nearly all funds will be out of compliance by FY19, if actions are not taken annually to address the excess of expenses over revenues, which is systematic of the City's structural deficit. Solvency of the water fund for all years is a clear concern, and while the anticipated loan to finance the GF accumulated deficit will eliminate its deficit, the fund still does not reach the desired level of reserves by FY20. In addition to concerns about the solvency of the water fund without more than a 3% rate increase in FY17, the status of the Police and Fire Millage Fund will be the most challenging to address. While the utilization of millage proceeds over the past few years and into FY16 and FY17 have enabled a continuation of current staffing levels through FY17, the fund will have a $3.3 milllion deficit which will have to be addressed through additional sources of revenue (such as a SAFER grant) or reductions in staffing in FY18. Balancing other funds can likely be achieved by reducing proposed expenditures, such as road repair projects, but it will impact the already low level of maintenance. In short, maintaining the City on a path to sustainable financial solvency will require constant attention to the City's financial status, and difficult decisions every year. Without an additional sustainable revenue stream, the City will lbe challenged just to maintain its current low level of services, let alone increasing services.

Subject: Flint Weekly Call

Here are my suggestions for the Weekly Call with Flint:

- **State of the City Address:** Very optimistic, GTH SotC, private investments etc...
  Well received, CANUSA games back on for Flint (started after WWII)
  3 rtab members attended, charter commission members attended
- **City Charter Commission:** First Meeting Date?
  Spoke to attorney (sworn in need to be) on May 19, 5/5:30 speakers and commission to set meeting times.
- **Priorities for the Week:**
  On back
- **Update on Election Issues:** CA spoken w/ Rep. Neeley — legislation may pass to address the issue. Also ~~pass~~ persuing legal action. Must be solved by end of May.
- **Update on Water Issue:** 1) Next Water Advisory Committee Meeting; 2) New Mediators Selected?; 3) Other Updates. Technical water committee in May 20?
  - GAC instal — on schedule, need DEQ approval, LAN working to get approval.
  - Positive between DPW and CA.

6-17 Mayor wants as per cals interviewed

→ city to send a detailed report today
- Accepted bid for leak detection project — to council on May 27

- **Position Hiring's:** 1) Finance Director; 2) HR Director; 3) Other Positions.
  1. CFO → offer accepted by Jodie
  2. HR → interviewing today; will meet w/ Joyce Parker
  3) ~~Finance~~ readvertise, CFO candidates weren't interested.

~~Finance Director interviewed via phone — not in person interested.~~

- **Police Operations:**

- **RTAB Court Recorder:** Status of this issue. First meeting scheduled for June 10.

Nothing on recorders — Tentative RTAB June 10, 1 or 2 PM
— Need to confirm schedules
— CDBG action plan passed by council, must be submitted by ~~Friday~~ May 15.
  • Will send to EC.

Subject: Flint Call Notes 05/13/15

Flint Weekly Call Notes 05/13/2015 9:00 PM
R. Byrne, E. Cline R. Widigan, D. Walling, N. Henderson, J. Freeman

- **State of the City Address:** Speech was very optimistic, 6th SOTC address done by the Mayor, and was well received.
  - CANUSA games are back on for Flint, started after WWII.
  - 3 RTAB members attended along with Charter Commission members.

- **City Charter Commission:** City attorney said the members will be sworn in on May 19 around 5/5:30.

- **Update on Election Issues:** N. Henderson spoke with Representative Neeley – legislation may pass to address the issue.
  - City is also pursuing legal action, issued must solved by the end of May.

- **Update on Water Issue**: City will send a detailed report to OFR
  - Accepted a bid for leak detection project – will be presented to Council on May 27.
  - GAC installation is on schedule, needs DEQ approval, LAN is working on the approval.
  - Positive working relationship between the DPW and the City Administrator.

- **Position Hiring's**:
  - Finance Director: Offer accepted by Jody Lundquist – will be submitted to the RTAB for approval.
  - HR Director: Interviews will take place today. Mayor is concerned that a local candidate will not be hired. N. Henderson and the Mayor will discuss with Joyce Parker.
  - Treasurer: City will re-advertise for the positon.

- **RTAB Court Recorder**: Still working on this.
  - Tentative RTAB date June 10, 2015 at 1 or 2 PM.
  - Eric will work on the plan of action for the City's CDBG Action Plan that was passed by Council. It must be submitted by May 15.

- **Other**:
  - New park at the old Genesee Towers site will be completed in 3-5 weeks – Up-Town Group is developing a recreation space.
  - Harrison Street will be re-opened
  - Riverbank Park will be receiving safety improvements and ADA upgrades.

Byrne, Randall (Treasury)

Subject: Water Quality Update
Attachments: Water Quality Update 05132015 pdf

Per our conversation, I have attached information about the GAC/Leak Detection status.

Also, the next Water Technical Advisory Committee Meeting will be Wednesday May 20th 2:00 pm at City Hall.

Thanks,

Natasha

Natasha L. Henderson, City Administrator
City of Flint, Michigan

City of Flint
Water Quality Update
Tuesday May 13th 2015

Leak Detection

What: $900,000 Treasury Distressed City Grant for Leak Detection / Pipe Wall Assessment

Status: On schedule

An amended RFP for Services was returned and a qualified vendor "Echologics" has been identified. This company is based in Georgia with strong financials and capacity to accomplish the work.

The bid for services was ~$895,000. (Bid sheet included for review)

The resolution is being routed through Legal and Finance and will make it to the City Administrator this week.

The company has confirmed that if the contract is signed in the next two weeks that they can mobilize and begin work sometime in June.

The company has given a window of 10 – 14 weeks to complete the full scope of work.

Next steps: Complete the resolution approval process.

GAC Installation

What: $1,601,740 contract with LAN to design and install new filter media at the Water Plant

Status: On schedule

LAN has embedded someone in the Treatment Plant as a project manager for 15 – 20 hrs. per week for prep work, testing, and updates. (Most recent update included for review)

Weekly updates come with a status report on all aspects of water quality concerns and improvements.

LAN has been in contact with the DEQ and expects to have final design plans submitted for discussion by the end of this week.

A contractor and supplier have been contacted by LAN and are awaiting approval of the final design specifications.

Next steps: Obtain design approval by the DEQ.

APPENDIX A –
APPROVED BUDGET AMOUNTS

Water Main Leak Detection Survey and Condition Assessment

Below is the approved budget for your grant project. Please note, we have assigned budget categories to each of your original budget line items. Use these categories when submitting your reimbursement requests*.

Budget Category	Budget Description	Application Budget Amount	Award Budget Amount	Comments
Infrastructure - Repair	Project Planning	$90,000.00	$90,000.00	
Infrastructure - Repair	Mobilization of Crew to Site	$27,000.00	$27,000.00	
Infrastructure - Repair	Leak Detection < 16" Diameter	$378,000.00	$378,000.00	
Infrastructure - Repair	Leak Detection > 16" Diameter	$270,000.00	$270,000.00	
Infrastructure - Repair	Pipe Condition Assessment	$135,000.00	$135,000.00	
	Budget Total	**$900,000.00**	**$900,000.00**	

*Reimbursement requests must include copies of invoices and cancelled checks (or equivalent) supporting the costs.

Prior to the release of funds, the grantee will provide to Treasury an updated work plan / timeline, related to the line items for which grant funding was received. The work plan / timeline should include estimated completion dates and a description of the deliverable for each step.

Between the Start Date and the End Date specified on page 1, water and sewer rates may not be reduced.

Part II: Cost Proposal

7. Pricing

Pricing for this project is presented in below. All quantities are estimated based on information provided by Flint. It is estimated that site work will take 10-14 weeks to complete for 2 Echologics' Field Specialists.

Item	Rate	Units	Est. Qty.	Total
Project Planning & Standard Report	$3,500	Lump Sum	1	$3,500
Mobilization	$4,950	Per Trip	1	$4,950
ePulse™ condition assessment and EchoWave™ leak detection, for transmission main pipe. (≥16" diameter)				
First mile rate	$38,218	Lump Sum	1	Waived
ePulse™ condition assessment and EchoWave™ leak detection, for transmission main pipe. (≥16" diameter)				
Up to 35 additional miles	$21,200	Per Mile	35	$742,000
Small diameter leak detection listening survey with acoustic correlation (<16" diameter)				
Up to 300 miles	$425	Per Mile	300	$127,500
Non-Revenue Water Study				
	$17,900	Lump Sum	1	$17,900
Emergency Mobilization Fee*	$5,000	Lump Sum	0	-
Re-booking Fee*	$5,000	Lump Sum	0	-
Standby Fee*	$2,200	Per Day	0	-
Estimated Project Total				**$895,850**

*If Echologics' staff are unable to work due to any cause within the reasonable control of Client, a standby rate of $2,200 per day will be billed

Echologics invoices monthly for completed work. Field tests and analysis will be considered 80% complete upon the conclusion of the field tests, and 100% complete upon the submission of the draft report Each payment is due within 30 days. Payment terms are subject to approval by the Echologics Credit Department. All prices are in USD, and do not include applicable taxes. Pricing is based on the standard terms and conditions provided in this proposal, and is valid for 120 days

CITY OF FLINT WATER QUALITY STATUS REPORT
May 7, 2015

We are still working with the Water Treatment Plant staff to establish set criteria for raw and treated water data for your use. Most information is already in place but few are still in the works. Question marks will be eliminated when data are available.

I. Issues of Concern
   A. THM level in Dort is 100
   B. Reservoirs are intended to be used minimally prior to sampling; however, emergency type events (Large water main break or a major fire) may require the use of water from those reservoirs which could contain potentially high THM levels THM levels needs to be analyzed weekly to understand trend changes in the levels before reuse.
   C. Bids for Phase 1 of the 24" water main replacement have not been received yet and therefore, the work will not be completed prior to the August THM sampling period. Some of this work will be needed to help ensure low THM levels in August.
   D. Cleaning of all reservoirs is needed and proper water circulation, within the reservoirs, is recommended to help eliminate old age and warm water from developing high THM levels.
   E. Water age in system is possibly being adversely affected by pump station(s) operations and flow back to WTP/Elevated tank. To be evaluated further with water model
   F. The City needs to proceed with the design and developing plans for transfer pump station to Dort reservoir.
   G. Lime sludge removal from Bray Road needs to be planned soon to meet the agreed to limits discussed with the MDEQ. None has been removed to date.

II. Raw Water
   A. TOC = ~10.8 mg/l, note internal values are showing higher than DEQ lab results
   B. Temp = 15.6° C (60° F) on 5/6/15
   C. THM = ???

III. Treated Water
   A. TOC = 3.7 (65% removal)
   B. THM = ~40
   C. Distribution THM
      1. Sample Sites 1, 5, 6 – near 80

IV. WTP Operations
   A. 17.3 MGD on 5/6/15
   B. Un-softened stream currently around 1 MGD
   C. Items to be postponed until after May THM testing
      1. East clarifier repair
      2. Cleaning of plate settlers
      3. Clean/repair slakers
   D. RFP for polymer pumps to clarifiers is out – work to commence when awarded with intent to be operational well in advance of the August THM sampling
   E. Security improvements at the main gate are ongoing
   F. One pump at Cedar St. PS is operational and SCADA control is possible by laptop until communication issues are addressed.

V. LAN
   A. Contract amendment is being signed. Liability language and scope for the construction work will need to be incorporated as an amendment to the contract.
   B. Hydraulic Water Model
      1. Rob B provided additional information with help from billing.
      2. LAN is working on model update which is to be completed approximately 1 month after all existing water system information is received

C. GAC Media
   1. Design is underway: basis of design is being developed
   2. Plan is to set up meeting with MDEQ, likely second or third week of May

VI. Distribution
   A. Chlorine residuals are currently holding well
   B. Flushing will begin week of May 11th

VII. Preparation for Upcoming THM Sampling
   A. A strategy meeting was held on 5/5/15 w/ Rob B, WTP staff & LAN
   B. All Reservoirs will be taken off line prior to sampling
   C. Recommend flushing for sample sites 1 (McDonalds), 4 (Taco Bell), 5 (Univ. Market), and 6 (Salem Housing) with 5 being the most critical.
   D. Staff will increase ferric dosage prior to sampling
   E. Eliminate the softening bypass stream completely if possible
   F. Decrease Cl_2 feed (already implemented)

Tracking Data

Primary TTHM Sample Indicators					
Date	**Flint River Water Temp**	**Flint River TOC**	**Chlorine Feed at WTP**	**TTHM Leaving WTP**	**Average System TTHM**

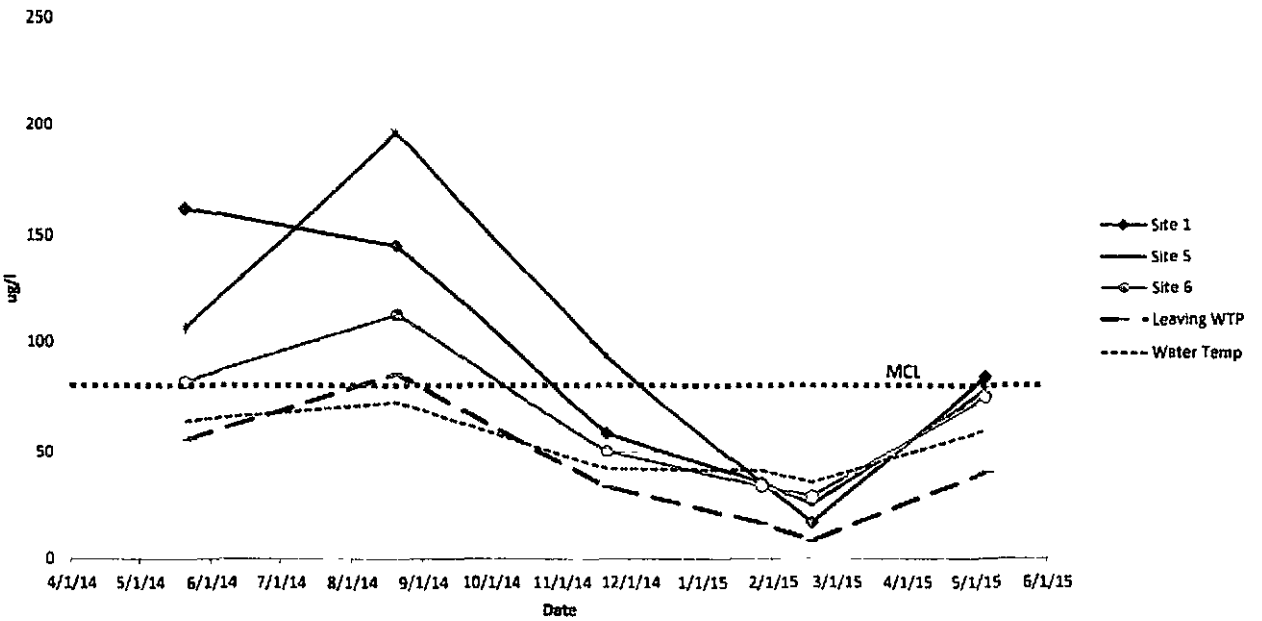
THM Sampling Test Results



STATE OF MICHIGAN
DEPARTMENT OF TREASURY

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

DATE: May 15, 2015

TO: Rick Snyder, Governor

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: Status of Financially Stressed Local Governments

EMERGENCY MANAGER

Lincoln Park
Emergency Manager: Brad Coulter
Appointed: July 3, 2014
Anticipated Exit: January 2016

Recent Developments
- After conducting preliminary interviews for the City Administrator position, a request was made by the Emergency Manager to identify additional qualified candidates.
- A fire union collective bargaining agreement was approved on February 6, 2015. Changes to overtime and paid leave will yield an estimated cost savings of $500K annually.
- Voters rejected the Firefighters and Police Officers Retirement Act proposal that was on the May ballot by a margin of 47% to 53%. Had it been approved it would have raised an additional 6 mils, or $3M annually to fund fire and police pension and healthcare costs.
- EM Coulter has modified retiree collective bargaining agreements to reduce healthcare benefits. These changes will be implemented on July 1, 2015 and will reduce retiree healthcare costs from $4.1M to $600K annually.
- FY 14 ended with a General Fund accumulated deficit of $736K, out of a total budget of $21M. This is a significant increase from the FY 13 accumulated deficit of $89K. Salient increases were in Public Safety - $1.1M, Public Works - $700K, and Culture and Recreation - $600K.

Significant Actions/Issues
- On February 3, 2015, the city was awarded $143.5K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through updated technology.

Issues to Resolve before EM Exit
- Police collective bargaining agreements must be finalized.
- Increase and stabilize pension and other post-employment benefits (OPEB) funding levels.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

FRC Created: November 12, 2014

FRC Members: Nick Khouri, Bill Martin, Brenda Jones, Darrell Burks, John Roberts, Lorron James, Mike Duggan, Stacy Fox, Tony Saunders

Recent Developments

- The city submitted its Four-Year Financial and Operating Plan (Plan) to the FRC in March 2015 for review. Upon its review and determination that the Plan was based on sound assumptions and met all of the requirements under statute, the FRC approved the Plan on April 20, 2015. The city's Plan encompassed the second year (FY16) of Emergency Manager Orr's two-year budget and used this as its base year with no changes, plus three years (FY17, FY18, and FY19).
- The city's CFO John Hill hosted a "mini" revenue estimating conference on May 14, 2015, to review revenue estimates approved in February 2015 at the statutorily required Revenue Estimating Conference. After reviewing the city's revenue trends for income tax, state revenue sharing, wagering taxes, property taxes, utility users tax and all other general fund revenues, among other major fund accounts, and discussing economic trends since February, the city elected to maintain revenue estimates agreed upon at the February 2015 Revenue Estimating Conference.
- In addition to the recent hire of Ron Rose for the position of Executive Director for the Office of the FRC, Treasury has hired Steven Watson, who is currently with the State of New Jersey Office of Budget and Management, to fill the Administrative Manager position. Mr. Watson is expected to start on May 26, 2015. Treasury does not expect to hire any additional staff beyond an executive administrative assistant.
- The most intense work that the FRC will perform going forward is measuring the effectiveness of restructuring initiatives in light of the large annual pension obligations the city will incur beginning in 2024.
- The next FRC meeting is scheduled for May 18, 2015, and the Commission will be asked to approve various contracts and leases related to the Detroit Water and Sewerage Department transaction.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Allen Park

RTAB Appointed: September 26, 2014

RTAB Members: Suzanne Schafer, Joyce Parker, Fredrick Frank, Karen Barann

Recent Developments

- The RTAB approved City Council's appointment of the city's Finance Director as Interim City Administrator, effective March 12, 2015. A professional search firm has been hired to help find City Administrator candidates. Treasury will be participating with City Council in the selection process.
- The city was expecting to issue a bond tender offer beginning in March but was delayed due to the uncertainty around the City Administrator position. Completion of the bond tender process is now projected to be June 2015.
- In April, the RTAB approved the creation of an Interim Deputy City Administrator position to assist in overseeing city operations until the bond tender and City Hall projects are

completed. Mark Kibby, former City Manager of the City of Woodhaven, was appointed to this position.
- The Michigan Municipal League and Plante Moran were retained by the city to conduct salary and classification studies of all department head and key manager positions within the city. The city has not established a timeline for this project at this time.
- The city remains without a Director of Public Services after the leading candidate for the position rejected the city's offer of employment. A department foreman is serving as interim while the city evaluates how to fill this position.

Significant Actions/Issues
- Litigation was filed by retirees challenging the EM's authority to reduce other post-employment benefit (OPEB) liabilities. A motion for summary disposition is pending. No date has been set to hear this motion.
- City Hall will be relocating to a temporary facility in May 2015. The present facility is in poor condition and beyond repair.

Benton Harbor
RTAB Appointed: March 10, 2014
RTAB Members: Larry Steckelberg, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments
- The city's Finance Director has accepted a position as Finance Director in the City of Flint. Her last date of employment is June 5, 2015.
- The city's Deputy Finance Director, multiple public safety officers, and two public works department employees have resigned due to other employment opportunities.
- On April 6, 2015, the City Commission passed resolutions adopting a procurement policy, investment policy, and a credit card policy.

Significant Actions/Issues
- On February 3, 2015, the city was awarded $910K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the water system through water main replacements and fire hydrant repairs, and to complete a property reappraisal which will provide updated and accurate assessing records. Additionally, the city will provide community enhancement through blight management and sidewalk replacement.
- FY 14 audited General Fund revenues exceed expenditures by $1M, out of a total budget of $6.1M.

Ecorse
RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joyce Parker

Recent Developments
- On May 12, 2015, the RTAB approved a narrowly balanced FY 16 budget, though significant deficits are projected in future fiscal years.
- The City Administrator has requested a new City Controller (third in six months) however; the RTAB rejected this appointment at the May meeting.
- The RTAB has recommended that the State Treasurer amend the final EM order to provide RTAB oversight for all hiring and terminations.

Significant Actions/Issues

- On February 3, 2015, the city was awarded $350K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting.
- The City Council cancelled the contracted City Administrator search with the Michigan Municipal League (MML) and appointed Wayne O'Neal as full-time City Administrator. On February 10, 2015, the RTAB approved the city's resolution appointing Mr. O'Neal.
- The RTAB's Annual Evaluation for the Governor was not favorable, citing a lack of local financial literacy, political infighting, and an inability to develop a balanced multi-year budget. For these reasons, the removal of RTAB oversight cannot be recommended at this time.
- The city continues to have trouble attracting qualified candidates, and filling higher level administrative positions.
- The city signed a contract with UHY to provide part-time financial services until a permanent solution can be found.
- Municipal Employee's Retiree System (MERS) pension contributions are anticipated to increase from $1.8M in FY 15 to $2.4M in FY 16 because of accelerated funding for closed plans.
- The city has been unable to balance its five-year budget. Previous budgets project deficit spending in FY 16, and exhaustion of all resources in FY 17. To avoid this eventuality, significant expense reductions will be necessary in upcoming fiscal years.

Flint

RTAB Appointed: April 29, 2015

RTAB Members: Frederick Headen, Brian Larkin, David McGhee, Beverly Walker-Griffea, Robert McMahan

Recent Developments

- A clerical error by the Flint City Clerk's Office gave candidates the wrong cutoff deadline to file nominating petitions, April 28 instead of April 21. Consequently, in the Mayor's race, Mayor Dayne Walling, Councilman Wantwaz Davis, and Dr. Karen Weaver will all be left off the August Primary ballot and will have to run as write-in candidates in November. Councilman Eric Mays did not submit the required number of signatures and will likewise be left off the ballot for Mayor and will also have to run as a write-in candidate. Councilman Herbert Winfrey will be on the ballot and is unopposed for the Sixth Ward seat on the City Council. There were four candidates who filed petitions for the Third Ward City Council seat. Legislators will be asked to provide a statutory fix to allow names on the ballot. If this isn't successful, all will be forced to run as write-in candidates in the General Election.
- Jodi Lundquist has accepted the employment offer as CFO. Her start date is to be determined subject to RTAB approval.
- On April 29, 2015 the city exited emergency manager status and an RTAB was appointed. The first RTAB meeting will be held on June 10, 2015.
- On April 29, 2015, the Emergency Loan Financial Assistance Board approved a $7M Emergency Loan that will eliminate the city's remaining deficit when combined with the FY surplus of $20M.
- EM Gerry Ambrose issued an EM Order on March 19, 2015 that restructured the State Revolving Fund loans and provides approximately $2.2M, allowing the city to invest in capital improvements to the water system.

- EM Gerry Ambrose implemented new Budget Purchasing Ordinances and a Fund Balance Policy during April 2015.
- The Executive Director of the State Tax Commission notified the city that it must maintain adequate assessment records in compliance with state statute, State Tax Commission rules, and implement any corrective actions necessary. In addition, the city shall implement a full appraisal within a time frame agreed with the State Tax Commission.
- The City of Flint continues to inform residents that it is in violation of the Clean Water Standards Act, after unsafe levels of trihalomethanes (TTHM, a disinfectant by-product) were found in the water. Recent testing by the Michigan Department of Environmental Quality (MDEQ) Testing Lab showed that the total TTHM levels for the month of March are well within the Environmental Protection Agency (EPA) guidelines for safe water. However, because EPA regulations require that the four month average for all testing sites be within certain guidelines, the city is still considered to be non-compliant by the MDEQ. Monthly testing remains ongoing and is being conducted by several parties.
- The city hired Veolia to provide an analysis of the water system, including recommended improvements and associated costs. Recommendations included water plant improvements, distribution system improvements, new policies and procedures, and better communication with customers. The city is installing a $1.5M granulated active-charcoal filter to improve water quality. This filter installation will be completed in mid-July.
- In April, EM Gerry Ambrose issued two EM Orders that adopted a two-year budget for FY 17 and FY 18 and outlined the relationship between the Administrator, Mayor, and City Council.
- On April 13, 2015, EM Order 4 was issued that restored the pay of the Mayor and City Council members.
- The City Council approved a memorandum of understanding that will consolidate the 67th District Court with the 68th District Court in January 2016. The city has estimated that the consolidation will save the city $8M over a ten year period.
- The Michigan Municipal League is recruiting qualified candidates to fill the open Human Relations Director, Finance Director, and City Treasurer positions.
- Voters elected John Cherry, Charles Metcalf, Barry Williams, Cleora Magee, Jim Richardson, Brian Larkin, Victoria McKenze, Marsha Wesley, and Heidi Phaneuf to serve on the Charter Commission.

Significant Actions/Issues

- On February 3, 2015, the city was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the city's water system through improved waste management, leak detection, and pipe assessments. Pre-planning for implementation of these activities is underway.
- If the city loses a lawsuit over retiree healthcare, the EM's two-year budget does not assume this additional $5M to $6M annual expense, which will grow at a rate equal to the general rise in healthcare costs.

Hamtramck

RTAB Appointed: December 18, 2014

RTAB Members: Deborah Roberts, Mark Stema, Cathy Square, Karen Young

Recent Developments

- The Police Chief resigned on March 11, 2015. Lieutenant Ann Moise was appointed Acting Police Chief.

- Per the 2014 audit, the General Fund's accumulated fund balance is $2.8M out of a total budget of $16.2M.

Significant Actions/Issues

- On February 3, 2015, the city was awarded $622K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to complete a property reappraisal which will provide updated and accurate assessing records, upgrade City Hall security, and enhance public safety through improved street lighting.
- A complaint was filed in the federal court by Hamtramck retirees over changes to healthcare benefits in October 2014. The potential exposure to the city is currently unknown.
- The annual pension liability is anticipated to increase from $3.5M in FY 15 to $4.3M in FY 19. This increase is a result of closing certain pension plans and the Michigan Employee's Retirement System (MERS) policy of accelerating the required contribution for closed plans. These increases were included in EM Square's two-year budget. The Segal Group has been hired to provide the city with recommendations on funding its pension obligations.

Pontiac

RTAB Appointed: August 19, 2013

RTAB Members: Edward Koryzno, Louis Schimmel, Keith Sawdon, Robert Burgess

Recent Developments

- On April 22, 2015, the RTAB postponed consideration of an amendment to the city's retirement ordinance that would have granted early retirement status to 69 former employees. This ordinance amendment was adopted by the City Council at its April 9, 2015 meeting with no prior announcement or analysis of the issue. No actuarial study was conducted for this change, but the best available estimates indicated the impact to the city's pension system could be approximately $9M-$13M per year. The Mayor, City Administrator, and Finance Director are opposed to this amendment.
- On April 29, 2015, the City Administrator informed Treasury that the City Council is considering adopting an amendment to the city's retirement ordinance that would permit the pension system to absorb $659,000 in COLA overpayments that were made to city retirees. Such an action is permissible under new rules adopted by the Internal Revenue Service. The City Council may consider this ordinance amendment at a future Council meeting. The RTAB postponed action on this issue until City Council takes action. Treasury is monitoring this situation.

Significant Actions/Issues

- On February 3, 2015, the city was awarded $125K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used for community enhancement through blight management.
- The City Charter proposal was rejected by voters by a 45% to 55% margin.
- In April 2014, the Final Emergency Manager Order was amended to create a Deputy Mayor position. A suitable candidate was not found through a Michigan Municipal League (MML) search. TJA Staffing and Associates has been hired to recruit a Deputy Mayor as part of the transition back to Home Rule.
- Per the audit, the General Fund's accumulated fund balance for FY 14 is approximately $5M out of a total budget of $27M.

- Oakland County Circuit Court Judge Michael Warren dismissed the city's condemnation lawsuit involving the Phoenix Center because the city failed to include compensation for the lien placed on the property. The city is preparing an appeal of the decision to the U.S. Sixth Circuit Court of Appeals.
- The City of Pontiac Retired Employees Association v. City of Pontiac lawsuit in the United States District Court was reassigned from Judge Lawrence P. Zatkoff to Judge Avern Cohn. The lawsuit challenges former EM Schimmel's elimination of retiree healthcare and replacement with an annual stipend. The General Employees Retirement System (GERS) Pension Fund is significantly overfunded and the parties are exploring options to use the overfunded portion to fund retiree healthcare.
- On March 17, 2015, the Michigan Court of Appeals reversed and remanded for trial a previous lower court dismissal of a 2013 lawsuit which challenged the EM ordered nonpayment of $3.9M into a VEBA trust for the fiscal year ending 2012. This appellate order is not a judgment against the city; rather it allows the previously dismissed lawsuit to proceed. The actual liability of the city will be determined either by a future settlement or by a final determination of the Oakland County Circuit Court.

CONSENT AGREEMENT

Inkster

Date Executed: February 20, 2012
Consent Agreement Consultant: Mark Stuhldreher

Recent Developments

- On May 14, 2015, the City Council agreed to settle the Dent lawsuit regarding police misconduct for $1.37M. The cost of the settlement will be placed on the tax roll by a judgement levy.
- On April 20, 2015, Wayne County Prosecutor Kym Worthy announced charges of assault and mistreatment of a prisoner (Richard Dent) against William Melendez, former Inkster police officer.
- In the wake of a violent interaction between Inkster police and a suspect, Inkster Police Chief Vicki Yost announced her resignation on April 22, 2015. The city hired a search firm to recruit qualified candidates to fill the Police Chief position, which is expected to be filled by the end of June.
- On April 20, 2015, the city adopted a working capital reserve policy for the Water and Sewer Fund which will provide funds for emergency situations.

Significant Actions/Issues

- On February 3, 2015, the city was awarded $855K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to complete a property reappraisal to provide updated and accurate assessing records, enhance the water system through fire hydrant repairs, and enhancing public safety through the creation of a multi-jurisdictional narcotics team, police officer training, deployment of an additional police officer, providing a backup power source, and updating technology.
- The FY 14 General Fund accumulated deficit per the most recent audit is $767K out of a total budget of $11M.

River Rouge
Date Executed: December 15, 2009
Consent Agreement Consultant: N/A (P.A. 72)

Recent Developments
- A fire union collective bargaining agreement (CBA) was approved on March 10, 2015, resulting in a reduction in health care costs.

Significant Actions/Issues
- On February 3, 2015, the city was awarded $592K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting, along with infrastructure replacements to City Hall.
- General fund revenues exceeded expenditures by $885K in FY 14 and the accumulated fund balance was $1.9M.
- A reduction in healthcare benefits for active employees and retirees was implemented on November 1, 2014. The city estimates an annual savings of $400K, which includes savings expected under the approved fire union CBA.

Royal Oak Township
Effective Date: April 21, 2014
Consent Agreement Consultant: Robert Burgess

Recent Developments
- Treasury has been informed that the Township Supervisor is regularly approving overtime for employees. Overtime is not included in the 2015 budget, and the Consent Agreement requires State Treasurer approval prior to any overtime expenditures. This is another example of the township's inability to comply with the terms of the Consent Agreement. Treasury is working with Robert Burgess on a response to this development.
- On April 7, 2015, Oakland County notified the township that they rejected the proposed ballot language for 4½ mils for general operations because the township's proposed language did not conform to guidelines. The township adopted newly proposed ballot language on April 23, 2015. This language has been resubmitted to Oakland County.
- An Order was issued by Mr. Burgess on May 9, 2015 to contract for financial consulting services with the Rehmann Group that will assist the township in preparing records for its annual audit and budget amendments.

Significant Actions/Issues
- On February 3, 2015, the township was awarded $274K through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance public safety through improved street lighting and increased police services. 195 street lights would be converted to LEDs; it is anticipated that work will be completed by August 2015.
- The Michigan State Police (MSP) continues to provide police services to the township. The Department of Treasury and the MSP continue to work towards an alternative to MSP services. A proposal from the City of Hazel Park is not financially feasible due to expense and the city's unwillingness to amend the proposal to better accommodate the township's ability to pay. Mr. Burgess has met with the City of Detroit to determine if the city is interested in submitting a proposal to provide police services to the township.

- The State Treasurer approved the township's 2015 budget on December 16, 2014, with the requirement that the township work with Treasury to implement additional budget amendments to improve its overall effectiveness. No additional actions have occurred to implement these additional budget amendments and Mr. Burgess is questioning the ability of the township's newly hired financial analyst to provide service to the township.
- The township has paid its aging accounts payable that was in excess of $200K. Mr. Burgess has requested the Township Board adopt budget amendments to the 2015 budget totaling $220K to accommodate these unanticipated expenditures. The Township Board has refused to adopt the requested amendments. Treasury is working with the CAC Burgess on a response to this issue.

NEUTRAL EVALUATION

Highland Park

Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
PA 436 Option Selected: Neutral Evaluation

Recent Developments

- Treasury staff is continuing to monitor the city's progress or lack thereof, in complying with the terms of the Loan Agreement dated September 23, 2014. There are concerns about their ability to successfully restructure their finances and they have failed to implement the health insurance benefit cost reductions as planned in FY 15. In addition, failure to reach an agreement with DWSD resulted in a $20M judgement levy against the city. Finally, there have been problems in implementing the regular billing of water and sewer service to its customers and the calculation and collection of past due amounts owed to the city. since regular billing ceased in mid-2012.
- On April 24, 2015, the Detroit Water and Sewerage Department (DWSD) was granted a judgment levy to collect $20M for sewer service that is currently owed to DWSD.
- The DWSD Director has threatened to terminate water and sewer services if the city doesn't pay its arrearage and current charges.
- A Wayne County Circuit Judge issued a temporary restraining order on April 29, 2015 blocking DWSD's efforts to cut off water service to the City of Highland Park. In addition, the judge also set aside the $20M judgment against the City of Highland Park for failure to pay DWSD for water and sewer services. The judge has set a conference hearing on this matter for June 4, 2015.

Significant Actions/Issues

- On February 3, 2015, the city was awarded $2M through the Financially Distressed Cities, Villages, and Townships Grant Program. These funds will be used to enhance the city's water system through meter replacement, leak detection, and system repairs.
- Huron Consulting was retained to prepare a request for proposal to solicit firms to operate and maintain the city's water and sewer systems, as required by the city's Plan of Adjustment. The city received one proposal from Wade Trim by the submission deadline of May 4, 2015. This proposal is under review by the City and Treasury.
- The city's liabilities total $117.6M. Some of the major components are: $55.3M debt, including $20.7M owed to the DWSD, $17.7M pension bonds, and $26.1M unfunded other post-employment benefits (OPEB) liabilities.

- Summary of the Plan of Adjustment for the City of Highland Park was adopted on August 28, 2014:
    - The city must make major reductions to retiree healthcare benefit costs.
    - In August 2015, an emergency loan of $12M plus restructuring of $4.8M existing loans will be requested by the city to refund $2.7M in Fiscal Stabilization Bonds, $5.2M in Financial Recovery Bonds, and $3.7M in State Revolving Fund Bonds. The status of this request will be reviewed in the context of benchmarks the city committed to in their last emergency loan in September 2014.

OTHER COMMUNITIES

Wayne County

Recent Developments

- The Recovery Plan has been released to the public and Treasury has begun an analysis of the plan.

Significant Actions/Issues

- Cash reserves reached its lowest point in February 2014 with pooled cash falling to approximately $22M. The August 2014 cash balance was approximately $150M. This number includes proceeds from a short-term borrowing of $75M.
- The County's annual structural general fund deficit is approximately $50M prior to any of the proposed remedial actions.
- The preliminary results of the county's actuarial report indicate a drop in other post-employment benefits (OPEB) liability of approximately $409M. This reduction is a result of the county choosing less expensive plans and implementing cost sharing measures. The Plan participants are now paying a larger share of the cost. This does not include any saving opportunities resulting from a proposed change to retiree healthcare.
- The county is working to resolve a disagreement with the Mental Health Authority over services provided to jail inmates. The county currently pays for this service but believes it falls under the purview of the Authority.
- The county has not yet proposed a long-term solution to its jail problems.

Cline, Richard (Treasury) RTAB Analyst, CA, Mayor, SAM

From: Cline, Richard (Treasury)
Sent: Wednesday, May 20, 2015 8:26 AM
To: Byrne, Randall (Treasury); Widigan, Robert (TREASURY)

City of Flint
Technical Advisory Committee

5/20/2015 Meeting Summary

-Introductions

- ✓ Introduced the new Utilities Administrator Mike Glasgow
- ✓ Introduced the City Administrator Natasha Henderson
- ✓ Roundtable introductions of other participants

-Updates

- ✓ Update on current water status (Mike Glasgow, Utilities Administrator).
  - Water is not as hard (hardness between 150 – 180) down from 210- 230
  - Quarterly TTHM testing submitted and expecting all eight sites to be below the MCL
- ✓ Update on GAC installation (Samir Matta, LAN).
  - Installation ahead of schedule
  - Design has been submitted to DEQ, quick approval expected
  - Vendor is identified and capable of supply and installation
  - Vendor is testing flint water samples
  - Flint will install one filter ahead of time for actual results
  - Full installation now scheduled for late June (moved up from mid-July)
- ✓ Update on remaining initiatives, (Howard Croft, DPW Director).
  - Leak detection is expected to begin by July(will take 10 – 14 weeks to complete)
  - New pipe installation has been tentatively pushed back to a July start
  - Aggressive water meter installation (9,000 meters in one year) is on track to start in July
  - New "water webpage" chronicling all events set to launch in the next week

-Discussions

- ➢ Genessee County Health Department, Flint Water Plant, & Flint City Hall have received no water complaint calls in over 60 days.
- ➢ Health department has listed several items such as "hard water rash" on the front page of their website with explanations.
- ➢ Some attention has shifted to lead and copper concerns, recent internal testing numbers still show approximately 2 -3 out of 100 with high levels.
- ➢ Lead and copper issues trace back to household plumbing and service lines nationally.
- ➢ All independent area testing continues to show water quality to be in line with EPA standards.
- ➢ Question was raised about "Bromite" levels in the water, Mike Glasgow will address how the implementations are addressing this in the next meeting.
- ➢ The DEQ acknowledged that their requirements for notification are the minimum levels and additional efforts can be undertaken.

-Objectives

- ✓ The health department will present a proposal to the City of Flint DPW to partner in a social media campaign designed for community outreach.
- ✓ A plan was set to maintain a 24 hr. advance notification to this group of future low residuals, or potentials of boil water advisories.
- ✓ The annual Consumer Confidence report will go out in July and if a violation notice is required then it will go with this report. (DEQ agrees with this approach).

-Next Steps

- Next meeting is targeted for late July or Early August after the GAC has been installed.
- Meeting will focus on the results of the implementation measures and what internal testing is showing for water quality in the late summer months.
- We plan to invite several community leaders to participate in this forum, candidates are:
  - Mike Sargent – Flint Strong
  - Pastor Harris – Concerned Pastors
  - Rebecca Fedewa / Jack Minore – Flint River Watershed Coalition
- The subsequent meeting is targeted for September (after the late summer TTHM results are in) and we intend to start directing attention towards Lake Huron water and the upcoming transition to the KWA.

-Attendees

Hilda McShane - Genesee County Health Department
Jim Henry - Genesee County Health Department
Samir Matta – LAN Engineering
Warren Green – LAN Engineering
Larry Kohler – Mott Community College
Mike Lane – University of Michigan Flint
Rusty Hudson – McLaren Hospital
Norb Birchmeier – Hurley Hospital
Gerald Natzke – DO-Genesys Regional Medical Center
Kirk Smith – Greater Flint Health Coalition
Pete Levine – Genesee County Medical Society
Mike Prysby – Department of Environmental Quality
Dr. Michael Wright - Environmental Protection Agency
Mike Glasgow – City of Flint - Utilities Administrator
Howard Croft – City of Flint - DPW Director
Natasha Henderson – City of Flint - City Administrator

RESOLUTION NO.: CA009 2015

PRESENTED: MAY 20 2015

ADOPTED: _____

RESOLUTION TO ESTABLISH THE INTEREST RATE CHARGED ON WATER AND SEWER BILL BALANCES THAT ARE PAST DUE

Chapter 46, Utilities; Article III, Rates and Charges; Division 1, Water; Section 46-52.2 of the Flint City Code of Ordinances has been amended and restated so that the interest charged on past due water and sewer bill amounts is established by resolution and shall be applied to any unpaid balance.

The City of Flint relies on timely payment of water/sewer bills to provide for the water and sewer system needs and recognizes the financial challenges certain customers face.

IT IS RESOLVED that the interest charged on City of Flint past due water and sewer bill amounts shall be 0.5% per month charged no sooner than ten (10) days after the due date, provided that the guidelines for late payment interest for financially challenged customers include:

- waiver of late payment interest for low-income customers who provide proof as to their eligibility for food stamps, or that their income is at or below the most current Federal Poverty Guidelines;
- waiver of penalty for customers who are not in arrears on the schedule defined in their payment arrangements; and
- waiver of late payment interest for veterans, senior citizens, and other persons, whether a homestead property owner or not, who would qualify for the Michigan Homestead Property Tax Deferment based on the income threshold in MCL 211.51 (2).

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

Natasha L. Henderson, City Administrator

APPROVED AS TO FINANCE:

Dawn Steele, Deputy Finance Director

Dayne Walling, Mayor

APPROVED BY COUNCIL:

S:\P. Bade\Resolutions\Resolution to Establish Past Due Interest Charge 5.13.15.doc

RESOLUTION STAFF REVIEW

DATE: 05-12-15

Agenda Item Title: Resolution to establish the interest charged on past due water and sewer bill amounts and provide for certain waivers.

Prepared By: Albert Mooney – Interim City Treasurer

Background/Summary of Proposed Action: Staff has reached out to Dr. Roger D. Colton, co-founder of Fisher, Sheehan & Colton, an economics consulting firm near Boston that specializes in working with public finance, economics, and poverty law. Dr. Colton has provided guidance on several simple steps the City of Flint might take to address some affordability concerns for water and wastewater rates. The attached resolution will follow certain aspects included in his recommendations and lower the interest rate charged on late balances from 1.5% per month to 0.5% per month and provide waivers of late charges for low-income customers who provide proof as to their eligibility for food stamps. Waivers also will be provided to customers who are not in arrears on the schedule defined in their payment arrangements and for those with proof their income is at or below the most current Federal Poverty Guidelines.

2015 POVERTY GUIDELINES FOR THE 48 CONTIGUOUS STATES AND THE DISTRICT OF COLUMBIA

Persons in family/household	Poverty guideline
1	$11,770
2	15,930
3	20,090
4	24,250
5	28,410
6	32,570
7	36,730

Lastly, customers listed below who would qualify for deferring property tax payments (this includes all customers, not just property owners) who substantiate their eligibility would be granted waivers.

SENIOR CITIZEN (62 YEARS OR OLDER), BLIND PERSONS, PARAPLEGICS, QUADRIPLEGICS, TOTALLY AND PERMANENTLY DISABLED, ELIGIBLE SERVICEMEN, ELIGIBLE VETERANS, OR ELIGIBLE WIDOWS.

In order to be eligible for the waivers (pursuant to the law on property tax deferments), the person must:

a) have total income, including Social Security, tax exempt pensions, and all other income except the first $300 of gifts, lottery, bingo, or gambling winnings, that totals $40,000 or less; and

b) live at the property address as their primary residence.

RESOLUTION FOR ADDITIONAL COUPLINGS/CONNECTORS, CURB BOXES, FITTINGS AND HYDRANT REPAIR PARTS WITH ETNA SUPPLY CO.

BY THE MAYOR

RESOLUTION

On October 17, 2014, the Emergency Manager by resolution number EME5712014 authorized the Department of Purchases & Supplies to issue a purchase order to the Etna Supply Co., 529 – 23rd St. SE, Grand Rapids, Michigan for water service supply parts couplings/connectors, curb boxes, fittings and fire hydrant repair parts as requested by the DPW Utilities/Water Service Center in the amount of $65,000.00; and

The DPW Utilities/Water Service Center has exhausted the purchase order for said parts and has requested the need for additional water service supply parts couplings/connectors, curb boxes, fittings and fire hydrant repair parts for the current fiscal year in the amount of $49,000.00. Funding for said supplies will come from the following account: 591-540 202-726.000; and

IT IS RESOLVED, that the Department of Purchases & Supplies, upon the City Council's approval, is hereby authorized to issue an additional purchase order to Etna Supply Co. for additional water service supply parts couplings/connectors, curb boxes, fittings and fire hydrant repair parts in an amount not to exceed $49,000.00 for a revised aggregate FY15 total of $114,000.00. RESOLUTION FOR CONTRACT CHANGE ORDER #3 TO ROWE ENGINEERING SERVICES FOR THE NEW IROQUOIS & DUPONT WATERMAIN DESIGN

BY THE MAYOR

RESOLUTION

On October 17, 2014, the Emergency Manager by resolution number EME5672014 authorized the Proper City Officials to enter into change order #2 to contract #F13149 with Rowe Engineering, PO Box 3748, Flint, Michigan for professional engineering services in the amount of $190,000.00 and a new contract total amount of $315,000.00; and

The DPW Utilities/Water Service Center has requested the need for additional professional engineering services for the construction and installation design of the new Iroquois and Dupont Street watermain project in the amount of $210,000.00. Funding for said services will come from the following account: 591-540.300-801.000; and

IT IS RESOLVED, that the Appropriate City Officials, upon the City Council's approval, are hereby authorized to issue a change order #3 to Rowe Engineering for additional professional engineering services for the construction and installation design of the new Iroquois and Dupont Street watermain project in an amount not to exceed $210,000.00 for a revised aggregate FY15 total of $525,000.00. Weekly Conference Call Notes – May 26, 2015

Allen Park –May 22nd – Mayor Matakas, M. Kibby, B. Cady, R. Byrne, E. Cline

- **Priorities for the Week**:
  - The City of Dearborn has apparently agreed to provide jail services to the City for two years.
  - The call with S&P on the bond tender went very well.
  - The City's L4029 was filed. The City's millage rate may decline 0.9712 mills due to judgment levy removals.
  - The Mayor provided an update on the Brownfield issue. The State may need to consider a change to the EM Order regarding this.
  - An update to the County wastewater issue was discussed. The question is what the assets are really worth.
- **Status of City Administrator Search Process:** The City has updated the job description; posting of the advertisement is pending.
- **City Hall Relocation Status**: City Hall will begin moving on Friday, June 5. The City is exploring a possible contract violation over the tower issue. The City has also erected a temporary tower for use until the issue is resolved. The Mayor stated that an Intern will be retained to assist those with accessibility issues when they enter the new City Hall until the elevator issue is resolved. It is hoped this will be completed in 3-4 weeks.
- **Five-Year Budget**: Eric will send Treasury's analysis to the City.
- **Status of Fire & Police Negotiations**:
  - The Police Department apparently rejected the City's offers. The Interim City Administrator will be meeting with the City Council on June 9 to discuss this issue.
  - The City met last week with the Fire Department. A possible resolution on the Tentative Agreement issue may be at-hand.

Benton Harbor –May 14th – D. Watson, R. Widigan

- **Priorities for the Week**:
  - **Started Negotiations with AFSCME** – They are looking to reverse everything EM Saunders did.
  - **FLSA Complaint** – Response was received from the Dept. of Labor; the City is required to pay $19K to settle the complaint. Money is available.
  - **Modern Plastics Case** – Darwin was in a meeting with the County Treasurer and New Products to settle the taxable value of Modern Plastics.
    - As of now, the Judge is siding with the City and County.
  - **City's Assessor** – Darwin is preparing an RFP for the position.
    - The current Assessor mentioned the position may need to be a part-time position, at three days a week (currently only at one day a week).
- **Board Appointments:** Still an issue with the City Commissioners.
  - City Commissioners attend a Committee Meeting, discuss the agenda items, and then come back to the City Commission meeting and table because they "don't have any information."
  - Commissioners want to appoint the same individuals with absolutely no experience or training on the subject.

- **Commissioner with five consecutive meeting absences**: Mayor Pro-Temp sent an email to the Commission stating that a resolution needs to be passed to remove Commissioner Seats.
  - Commissioner Seats says the Commission needs to excuse his absences.
  - Per the Charter – the Commission shall excuse a Commissioner's absences BEFORE they occur.
  - Darwin has instructed the City Attorney to issue an opinion by the first meeting in June.
- **FDCVT Grants**: The City is issuing RFPs for the water main and fire hydrant replacements.
  - Working on the RFP for the assessment with the Assessor.
  - The City has not done an overall assessment in 20-25 years.
  - Sidewalk replacement is more than anticipated - $50K will do six blocks of sidewalk replacement.
  - Blight elimination – The Code Enforcement Officer is working on a list of condemned homes.
  - The City is meeting every other week to discuss the grants.
- **Public Safety Director Lawsuit/Chief**: Trial begins on June 15.
  - The City will speak with their insurance provider on May 20 to discuss payment options.
- **Deputy Finance Director/Finance Director**: Darwin has reached out to Plante Moran. They are willing to help as an Interim Finance Director.
  - The job will be posted with the MML, GFOA, MGFOA, and the Berrien County Treasurers Association.
  - Darwin would like someone from Treasury/State to assist with the vetting and hiring process.
  - What technical support can Treasury provide?

Ecorse – May 5th – W. O'Neal, J. Pepperman, R. Byrne, E. Cline, D. Van de Grift

- Five-year budget – waiting for Tim Sadowski to be hired first.
- Power outages at City Hall.
- The Mayor interested in the DDA project.
- There has been little progress on fire consolidation, despite the stated finalization goal of July 1, 2015.
- Wayne was unable to answer basic questions about his own budget (i.e. how much taxation, expenses of the District Court, etc.)
- Significant increases in PA 33 Special Assessments. Wayne stated that the public supports these increases, though it likely means that levies will exceed 100 mils.
- Library sharing with River Rouge? 60/40 split?

Flint – May 13th – D. Walling, N. Henderson, J. Freeman, R. Byrne, E. Cline, R. Widigan

- **State of the City Address:** The speech was very optimistic, 6th SOTC address done by the Mayor, and was well received.
  - CANUSA games are back on for Flint, started after WWII.
  - 3 RTAB members attended along with Charter Commission members.
- **City Charter Commission:** The City Attorney said the members will be sworn in on May 19 around 5:00 or 5:30.
- **Update on Election Issues:** N. Henderson spoke with Representative Neeley – legislation may pass to address the issue.
  - City is also pursuing legal action, issued must solved by the end of May.
- **Update on Water Issue**: The City will send a detailed report to OFR.

- Accepted a bid for leak detection project – will be presented to Council on May 27.
- GAC installation is on schedule, needs DEQ approval, LAN is working on the approval.
- Positive working relationship between the DPW and the City Administrator.

- **Position Hiring**:
  - Finance Director: Offer accepted by Jody Lundquist – will be submitted to the RTAB for approval.
  - HR Director: Interviews will take place today. Mayor is concerned that a local candidate will not be hired. N. Henderson and the Mayor will discuss with Joyce Parker.
  - Treasurer: City will re-advertise for the positon.
- **RTAB Court Recorder**: Still working on this.
  - Tentative RTAB date June 10, 2015 at 1 or 2 PM.
  - Eric will work on the Plan of Action for the City's CDBG Action Plan that was passed by Council. It must be submitted by May 15.
- **Other**:
  - The new park at the old Genesee Towers site will be completed in 3-5 weeks; the Up-Town Group is developing a recreation space.
  - Harrison Street will be re-opened.
  - The Riverbank Park will be receiving safety improvements and ADA upgrades.

Hamtramck – March 19th – K. Powell, D. Van de Grift

- Discussed improvements for City RTAB submissions; Angela will send another packet example illustrating the proper way to submit items.
- According to Katrina, moral has improved. She is taking all employees out to lunch in groups as well as organizing a municipal softball team.
- Ann Moise, previously a Lieutenant, is acting Chief of Police. Katrina intends to keep her in this position for 3-6 months.
- From the City Manager's perspective, relations between her and the Mayor are improving.
- The City Council continues to be quarrelsome and divided; however Katrina feels she is gaining support from them.

Inkster – January 9th – M. Stuhldreher, R. Byrne

- The police chief search is underway. Meetings have been scheduled with City Council members.
- A draft water and sewer billing settlement has been prepared for a tax levy by Wayne County and DWSD. It will be levied on the July tax bill.
- Mark hopes that the deficit will be eliminated at the end of FY 2015.
- The new police and court building is now fully occupied.
- A fund balance policy was adopted.
- Mark believes that chargebacks will be substantially reduced.
- The City Manager and Mark have a good working relationship.

Lincoln Park – March 11th – B. Coulter, D. Van de Grift *(May 6th call cancelled)*

- The bid for the Cell Tower is up to $943k. Proceeds will balance the budget this year if realized.
- The City Manager search is ongoing.
- The 345 Pension Millage is supported by fire and police unions.
- Brad is considering a legal claim against GRS for underfunding of pension.
- RFP for ambulance services is underway.

Pontiac – May 22nd – D. Waterman, N. Nazarko, J. Sobota, R. Byrne, R. Widigan

- **Upcoming Priorities**:
  - The City was informed that the SEC filed an OIP against the GERS Board pension manager, Grey & Co., for issues unrelated directly to the City. There is strong concern that the system will likely lose the services of this firm but the precise impact on the system is unclear at this time. The City will provide the OFR with a copy of the SEC filing.
  - Randy noted that the Deputy Mayor posting was listed on MML but inquired about a posting on ICMA. Randy further stated that TJA had inquired with him on an unpaid invoice to the City in the amount of $10K, dated April 9, 2015. Joseph stated that this invoice had been paid and the check cashed.
- **Annual Budget Process:** Joseph informed us that the City Council took no action on the budget at last night's meeting. He stated that he has reached out to the Council to see if they have any questions on the draft. The Mayor indicated that she would follow-up with the Council President. Joseph did say the two Councilmembers want to see 10-15 deputies added to road patrol in the next budget. Joseph noted that each deputy costs approximately $130K.
- **Proposed Compensation Package:** Eric stated that questions from the RTAB will be provided today.
- **Meetings with Council Members**: Joseph stated that he has not yet approached the Councilmembers on this issue. However, he did discuss the idea with the Mayor and she is in full support.

Royal Oak Township – May 11th – R. Burgess, D. Squalls, E. Cline

- **Upcoming Priorities**:
  - The Township is working on a demolition project of an abandoned house. Seven more demolition projects are pending. This project is funded through a blight grant program. *The Supervisor leaves the call after this discussion.*
  - A discussion with the Consultant was held regarding Township staffing levels.
  - The Township Attorney is doing well and having some positive impact on Board operations.
  - The Township has hired a CDBG Coordinator. The Consultant will forward information to the OFR on this matter.
- **Budget Issues**: Rehmann's work is ongoing; they should be finished by the end of this week.
- **UHY Payments**: UHY has been paid over $50K and all funds to be paid by the State have been transmitted. Robert Burgess thought all bills had been paid but recently received invoices for over $12K from UHY for work directly commissioned by ROT. The Township Treasurer believes that no invoices should be paid until reconciliation statements from the time in question are provided by UHY. The ROT Board apparently voted to authorize no funds until such statements are received

from UHY. Robert noted that Rehmann was going to generate the statements in question as part of their current activities. Robert hopes this will resolve the issue.

- **Police Services**: It is believed that a proposal from the City of Detroit will be received this week.
- **Voted Millage**: The Election Date is scheduled for August 4.
- **Memorial Day Call & Future Weekly Calls**: Eric informed Mr. Burgess that the call for Memorial Day is cancelled. Eric also informed Mr. Burgess that bi-weekly calls, starting June 1, will be implemented.

Subject: Weekly Flint Call

Randy,

Some thoughts for tomorrow's Weekly Call with Flint:

1) An update on Election-related issues, including the Internal Investigation.
2) An update on Water issues, including if they are going to have to send additional violation notices.
3) An update on the HR Director position.
4) I think an update on public safety, especially police given the spike in shootings.
5) Regarding the RTAB, have they found a Court Recorder? Do they have more information to send us prior to our phone call tomorrow?

ROLL CALL

Present: Councilperson: Councilperson Poplar, Councilperson Nelson, Freeman, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: Councilperson: Davis

PUBLIC HEARINGS

150387 Public Hearing/Obsolete Property Rehabilitation Exemption Certificate Application/URC 600 South, L.L.C.

A Public Hearing to consider an Obsolete Property Rehabilitation Exemption Certificate Application for URC 600 South, L.L.C.'s 600 S. Saginaw Street Project will be held Wednesday, May 27, 2015, at 6:00 p.m., in City Council Chambers, 3rd Floor, City Hall, 1101 S. Saginaw Street, Flint.

HEARING HELD

RESOLUTIONS

150390 Contract/Echologics, LLC/Water Main & Pipe Leak Detection Assessment Services

Resolution resolving that the proper city officials, upon the City Council's approval, are hereby authorized to enter into a contract with Echologics, LLC, for acoustical watermain and pipe leak detection assessment services, as requested by Utilities/Water Service Center, an an amount NOT-TO-EXCEED $895,850.00 [Water Fund Acct. No. 591-540.300-801.000].

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150391 Resolution/Establishing the Interest Rate Charged on Past Due Water & Sewer Bill Balances

Resolution resolving that the interest charged on City ofo Flint past due water and sewer bill amounts shall be 0.5 percent per month charged no sooner than ten (10) days after the due date, provided that the guidelines for late payment interest for financially challenged customers include: waiver of late payment interest for low-income customers who provide proof as to their eligibility for Food Stamps or that their income is at or below the most current Federal Poverty Guidelines; waiver of penalty for customers who are not in arrears on the schedule defined in their payment arrangements; and waiver of late payment interest for veterans, senior citizens and other persons, whether a homestead property owner or not, who would qualify for the Michigan Homestead Property Tax Deferment based on the income threshold in MCL 211.51 (2). [NOTE: The City of Flint relies on timely payment of water/sewer bills to provide for water and sewer system needs, (but also) recognizes the financial challenges certain customers face.]

SEPARATED FROM MASTER RESOLUTION

150396 Public Hearing Date/Industrial Facilities Exemption Certificate (IFEC)General Motors LLC/Body Shop/3100 Van Slyke

Resolution resolving that such a hearing to consider an Industrial Facilities Exemption Certificate (IFEC) (P.A. 198 of 1974, as amended) for General Motors LLC., shall be held on the 22nd day of June 2015, in City Council Chambers, Flint City Hall, 1101 S. Saginaw Street, and that the City Clerk shall cause notice of such hearing to be published in an official paper of general circulation not less than ten (10) days prior to said hearing, AND, resolving that at said hearing the above referred to and any other interested parties shall have the opportunity to be heard relative to said application. [NOTE: The exemption certificate is for General Motors' Body Shop at 3100 Van Slyke.] [City Administrator Submission No. CA0072015.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150397 CO#1/Contract/Nan McKay & Associates/Rental Inspection Services

Resolution resolving that the proper city officials, upon the City Council's approval, are hereby authorized to enter into change order #1 to the contract (for rental inspection services) with Nan McKay & Associates to extend the contract until June 30, 2016, and add an additional $100,000.00 to said contract for FY2016, for a revised contractual amount NOT-TO-EXCEED $400,000.00, as requested by Building Inspections [Building Inspection Fund Acct. No. 542-371.100-801.000]. [City Administrator Submission No. CA0062015.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150437 Charitable Gaming License/State of Michigan Lottery Charitable Gaming Division/Flint Children's Museum/Raffle

Resolution recognizing the Flint Children's Museum as a non-profit organization operating in the City of Flint for the purpose of obtaining a charitable gaming license, issued by the Michigan Lottery Charitable Gaming Division, relative to conducting a 50/50 raffle during their SUMMER FUNdraiser on June 12, 2015, at the Flint Golf Club, Flint, Michigan.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

RESOLUTIONS - MAY BE REFERRED FROM FINANCE & ADMINISTRATION COMMITTEE

150431 Reprogramming of Funds/Community Development Block Grant [CDBG] Funds/HOME Investment Partnership Program Funds

Resolution authorizing the appropriate City Officials to do all things necessary to process a budget amendment, in the amount of $115,311.73, from FHOMEPRIOR accounts, $197,241.678 from FHUD13HOME accounts, and $250,000.00 from FHUD14CDBG accounts, and make said funds available for reprogramming. [NOTE: Said funds are available for reprogramming due to developer GDC Smith Village's completion of construction for the 39-unit Smith Village Development.]

SEPARATED FROM MASTER RESOLUTION

150432 Etna Supply Co./Additional Couplings-Connectors, Curb Boxes, Fittings, and Hydrant Repair Parts

Resolution authorizing the Department of Purchases and Supplies, upon City Council approval, to issue an additional purchase order to Etna Supply Co. for additional water service supply parts, couplings/connectors, curb boxes, fittings and fire hydrant repair parts, as requested by DPW Utilities/Water Service Center, in an amount NOT-TO-EXCEED $49,000.00 for a revised aggregate FY15 total of $114,000.00 [Water Fund Acct. No. 591-540.202-726.000].

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150433 CO#1/Contract/Ace-Saginaw Paving Co./Additional Asphalt Paving Materials

Resolution authorizing the proper City Officials, upon City Council approval, to enter into change order to #1 to the contract with Ace-Saginaw Paving Co. for additional asphalt paving materials, as requested by Street Maintenance, in an amount NOT-TO-EXCEED $57,650.00, for a revised contract amount of $240,411.00 [Local Street Fund, Major Street Fund].

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150434 CO#3/Contract/Rowe Engineering/Additional Professional Engineering Services/Iroquois and Dupont Streets Watermain Project

Resolution authorizing the proper City Officials, upon City Council approval, to enter into change order to #3 to the contract with Rowe Engineering for additional professional engineering services for the construction and installation design of the new Iroquois and Dupont Streets watermain project, as requested by DPW Utilities/Water Service Center, in an amount NOT-TO-EXCEED $210,000.00, for a revised aggregate FY15 total of $525,000.00 [Water Fund Acct. No. 591-540.300-801.000].

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150435 CO#2/Purchase Order/Central Concrete/Additional Concrete

Resolution authorizing the Department of Purchases and Supplies, "upon the Finance Department's approval", to issue change order #2 to Purchase Order No. 14-465 to Central Concrete for additional concrete to fulfill requests for sidewalk repairs, pavement breaks and any other urgent repairs, as requested by Street Maintenance, in an amount NOT-TO-EXCEED $34,000.00, for an aggregate amount of $137,004.00 [Local Street Fund, Major Street Fund].

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

Passed The Consent Agenda

A motion was made by Councilperson Kincaid, seconded by Councilperson Poplar, including all the preceding items marked as having been adopted on a Consent Agenda. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 1 - Vice President Davis

150436 Acceptance of Funds/Charles Stewart Mott Foundation/Harrison Street Improvements

Resolution authorizing the appropriate City Officials to do all things necessary to enter into a grant agreement with the Charles Stewart Mott Foundation to fund construction of improvements to Harrison Street, in an amount NOT-TO-EXCEED $40,576.00, and to create appropriate revenue and expense accounts under grant code LCSMOTT16HAR, AND, to comply with all terms and conditions of the grant award including, but not limited to, allocating an expense appropriation within the Department of Transportation, 202 Major Street Fund Acct. No. 202-441.702-801.000 (FY16 Budget), to be applied toward the local share of the total project cost.

SEPARATED FROM MASTER RESOLUTION

150387.1 Approval/Obsolete Property Rehabilitation Exemption Certificate/URC 600 South, LLC/600 S. Saginaw Street Project

Resolution resolving that the Flint City Council hereby approves and grants a

12-year Obsolete Property Rehabilitation Act exemption for URC 600 South LLC's 600 S. Saginaw Street Project, located within the URC 600 South District (which consists of real property at 600 S. Saginaw St. and 550 S. Saginaw St.), with the exemption period beginning December 31, 2015.

SEPARATED FROM MASTER RESOLUTION

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be ADOPTED AS AMENDED. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 1 - Vice President Davis

150387.1 Approval/Obsolete Property Rehabilitation Exemption Certificate/URC 600 South, LLC/600 S. Saginaw Street Project

Resolution resolving that the Flint City Council hereby approves and grants a 12-year Obsolete Property Rehabilitation Act exemption for URC 600 South LLC's 600 S. Saginaw Street Project, located within the URC 600 South District (which consists of real property at 600 S. Saginaw St. and 550 S. Saginaw St.), with the exemption period beginning December 31, 2015.

A motion was made by Councilperson Kincaid, seconded by Councilperson Poplar, that this matter be Adopted. The motion failed by the following vote:

Aye: 3 - Councilperson Poplar, Chairperson Freeman and Councilperson Kincaid

No: 5 - Councilperson Nelson, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren and Councilperson Mays

Absent: 1 - Vice President Davis

ORDINANCES - First Reading

150392 Amendment/Ordinance/Chapter 46 (Utilities)/Article III (Rates & Charges)/Division I (Water)

An ordinance to amend Chapter 46 (Utilities) of the Code of the City of Flint by amending Article III (Rates & Charges), Division I (Water) by amending and restating existing Section 46-52.2 (When Bills Due; Interest on Past Due Amount).

A motion was made by Councilperson Kincaid, seconded by Councilperson Poplar, that this matter be ACKNOWLEDGED FOR FIRST READING. The motion carried by the following vote:

Aye: 6 - Councilperson Poplar, Councilperson Nelson, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren and Councilperson Kincaid

No: 2 - Chairperson Freeman and Councilperson Mays

Absent: 1 - Vice President Davis

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

MEMORANDUM

TO: Randall Byrne, State Administrative Manager
FROM: Darnell Earley, Emergency Manager
RE: Proceeds From the Sale of the City of Flint Water Main
Date: May 28, 2014
CC: Gerald Ambrose, Daugherty Johnson, Howard Croft, Peter Bade

During our regular meeting this morning you mentioned that there was an inquiry regarding the possible use of a portion of the $3.9 million proceeds that the City of Flint will receive from Genesee County, to supplement the cost for maintaining sworn positions in the Flint Police Department. As you know, in order to produce a balanced biennial budget as required by PA 436, my proposed budget eliminates 36 sworn officer positions for fiscal years 2014/15 and 2015/16.

I have discussed this matter with staff, and as a practical matter will not be recommending the use of these proceeds for any purpose other than reinvestment into the City's water system for the following reasons:

1. The pipeline is clearly part of the infrastructure of the water and sewer system, paid for with water and sewer fees. Thus, the proceeds should in normal circumstances be returned to the water and sewer system.

2. In addition, the current state of the water and sewer infrastructure clearly demonstrates that significant reinvestment in that infrastructure is needed, in the amount of approximately $15 million annually. The recent analysis by the Raftelis Group substantiates this need, as does the number of repairs necessary to the infrastructure this past winter, and the demonstrated increase in the amount of unbilled water. By focusing the proceeds on the systems water loss issues such as metering and infrastructure, the City stands to receive a quick return on the reinvestment through the capture of lost revenue.

3. The City of Flint Water Reliability Study commissioned in 2013 projects that increased accuracy in metering and reducing the number of main breaks through infrastructure repairs could result in recovering as much as $3 million

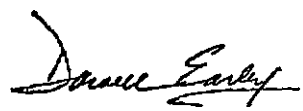
annually to the Water and Sewer Fund. This is an initiative that we are pursuing in hopes of further stabilizing water and sewer rates.

4. Also, the decision to move to KWA, as well as the opportunity to discontinue the purchase of water from DWSD, required an immediate and unplanned $6 million - $8 million upgrade to the Water Treatment Plant in this fiscal year. Doing so, while financially beneficial to the system over the next few years, required postponing other needed capital improvements. The sale of the pipeline offsets the unexpected cost by half.

5. Finally, the use of one-time proceeds for ongoing operational purposes, whether for the water and sewer system, or for non- utility purposes (such as police), only works for one year. Use of one-time proceeds is not a sustainable revenue source, and does not address the long term funding needs for police.

While these factors in and of themselves present a compelling argument to place the proceeds in the Water Fund to reduce the cost of expanding the Water Treatment Plant and to meet the our new supply and distribution obligations going forward, just as important is the outcome of the data-driven, comprehensive public safety study currently underway. The study will be used to design a public safety model for police and fire services into the future. This will put the City in a better position to identify long-term solutions rather than short-term, as the suggestion for the use of these funds for public safety services would indicate, based upon the factors stated above.

Should you have any questions or would like to discuss this matter in greater detail, please don't hesitate to contact me.



Byrne, Randall (Treasury)

Subject: FW: Flint Weekly Call

Randy: This is a rough draft of the notes; the final version will be more polished. Please respond with any additions/subtractions/comments that you have.

Thanks,
Carmen

Flint Weekly Call

Participating: Josh, Natasha, Mayor

Need extension for assessment, State Tax Commission – need 7-10 years, estimated at 3.5-4 million, need help – forwarding letter, want response before June 5th, would like to request meeting before due date
(from Kelly Sobel) – Funding available? What is the penalty if assessment is not completed? How many other communities are in a similar position?

City has spent time working around things that should've been done, eventually need to get them done – how do we start work? How do we pay for this?

- **Priorities for the Week**

Council Meeting tonight, finance committee meeting before, 1st Wednesday and 4th Monday of each month now
Mock up, conference call RTAB packet
Purchases – multiple over $75K that they will be taking to Council tonight
Abatement
Finalize lead detection

- **Update on Election Issues:**

Senate approved bill, house should pass bill today, will have some language regarding accountability
Natasha thinks that both house and senate can agree if there is a resignation

- **Update on Water Leak Detection Study**:

Natasha will provide update, land project ahead of schedule

- **City Charter Commission:**

First meeting tomorrow night

- **Position Hiring's**: 1) Finance Director; any possible Tier 2 candidates that may want to work for a smaller unit 2) HR Director; 3) Other Positions.

Jodi starting June 15th as Finance Director

Qualified Tier 2 candidates that would work for smaller unit? Natasha: One candidate just accepted a job with City of Detroit (female), other candidate would depend on location, would like CFO title. Didn't think others would be qualified, but will talk to Joyce and get back with

HR Director: Meet and greet with Mayor took place yesterday, Mayor now needs to approve the appointment, decision will be made very soon

- **Police Operations:**

Spoke with Chief Tolbert re: Southwestern shooting yesterday for an hour, all are isolated incidents – meeting next week with key faith leaders concerning events, efforts underway Community Police officers, school officers, etc. –
Southwestern incident was group of young adults, not related to school – school needs to post that people cannot loiter during non school hours
Take high profile steps this summer – tough enforcement as well as opportunities

- **RTAB**: First meeting scheduled for June 11. A telephone call has been scheduled on Packet Preparation.

Daily contact with Natasha on preparation for first meeting
Media attention – fred possibly do 1:1 interviews? Important part of city's governance moving forward

GM Expansion: Tax abatement on agenda 22, RTAB in July and OFRA?? Tonight

Minutes completed? Depends on clerk, (Natasha), Mayor? Said they can have something next day

Order regarding committee structure – proposing change in structure, does this involve amending the order? Eric will look at, if order needs to be changed, State Treasurer must approve

4th Quarter process implemented, present to Council end of June

DDA meeting – new lights going in this week downtown, $50,000 from MEDC project, bulbs strung across the streets, roof of lights through alley

Weekly Conference Call Notes – Nov. 02, 2015

Allen Park –Oct. 30 –Mayor Matakas, M. Kibby, B. Cady E. Cline, P Dostine

Priorities

- Cady wondered if AP, with a fund balance of $6.4M, could use $1M to pay off the cost of the issuance. But Cady said Order 37 prevents that. OFR is reviewing Order 37.

Retiree Healthcare changeover

- At the Sept. 22 Allen Park council meeting, Pres. Of the Allen Park Retiree Association reported that some retirees were complaining about the new Humana insurance. Humana was limiting coverage to only its coverage-area. Kibby follow through on the individual complaints. The city is working with Humana and Humana is working with individual retirees' doctors in the cases where this has happened.

Bond tender updates

- Allen Park didn't get the rating (BBB+) it wanted from S & P.
  - If it were to sell bonds with this rating, the savings for AP from the tender would be next to nothing. Instead of the $900K AP had hoped.
- For now, the structure is for BAML to lend them money at 4% for 270 days.
- Meanwhile, AP believes at the end of 270 days, it would receive a better rating which would allow them to sell the bonds at a more favorable interest rate.
- AP asked Treasury if it could lend it $18 MM (like an emergency loan) for the same time period, rather than BAML. AP said it would rather pay the state 3% than BAML. Treasury said they are noting it and sending forward.
- City Administrator Kibby was told to put the request in writing to Treasury.

Old City Hall sale

- The appraisal is complete. The front-7 acres with the building is worth $1M. The front-7 acres without the building is worth $1.250M. The back 4 acres is worth $1M, but AP does not want to sell it.
- There is a bit of dispute with the railroad over boundary lines on the back 4 acres.

Miscellaneous

- Allen Park will be swearing in new council Monday, Nov. 9 (which will be a council meeting in place of the regularly scheduled meeting Nov. 10). The city expects as many as three new members.

Benton Harbor –Oct. 22 – D. Watson, R. Widigan, E Cline, P Dostine

- **Weekly Priorities:**
  - Some commissioners won't speak during commission meetings because they are afraid of being yelled at/attacked in the meeting.
    - If the Mayor gavels the individual down for being out of order, a commission will "challenge" his decision and with a majority vote will override the Mayor's ruling of being out of order.
  - The City Commission is removing people from the Planning Commission because they aren't acting/voting the way the City Commission wants them to.
  - ASFME contract is complete, agreed to a 5 year contract. 2% raise in the first year, none after that. After year 1 they will do wage re-openers based on City's financial standing.
    - This contract will cost the City only $1,800.
  - FOP discussions – will get together November 18 and attempt to hammer out the contract.
    - Currently the FOP is looking for what was taken away by the EM and EFM.

- **Lange, O'Brien/Unruh Lawsuits:** No update at this time.

- **Update on Vacant Positions:**
  - **Finance Director:** The MML search for finance director was not approved by the City Commission.
  - **Water Department Superintendent:** Agreement will be signed tomorrow and should start Monday.
  - **Community Development Director:** City is still in the search process. May need to use MML for a search.
    - During the 12/13 FY under Joe Harris, CDBG allocations costs totaling $25K were improperly spent, the City may owe HUD $25K.
  - **Assessor:** Assessor and assessing services agreement is close to being completed and signed. Should be in place by the first of November.

- **City Manager Evaluation Discussion**:
  - A resolution was brought up for the first time at the Oct 19 meeting by Commission Henry asking Darwin to submit a "summary of his past achievements and challenges since his last evaluation."

- This was not discussed before the meeting, Darwin was unaware this was going to be brought up.

- **October 19 Commission Meeting**:
  - The Commissioners seem to be "stirred-up" seem to want to exercise power by browbeating staff and stakeholders in the community.
  - Commissioners don't review the packet and information given until the meeting.
  - Darwin called the commissioners on Friday before the meeting to see if there were any questions on any agenda items, they told him they had no questions.
  - Darwin then talked to each commissioner on Monday, before the meeting, and again they had no questions.
  - During the meeting the commissioners said they haven't had enough time to review the information and couldn't act.
  - These agenda items are discussed in committee meetings and then minutes from the commission meetings are sent to each commissioner for review.
  - Darwin said it may be wise for one of us to attend the next commission meeting on November 2.

Ecorse – Oct. 20 – W. O'Neal, R. Byrne, D. Van de Grift, P. Dostine, A. Heimann

Priorities

- Water audit. Ecorse is in the process of doing a water audit. The city found that 24 % of the bills are estimates. Ecorse loses approximately $940K worth of water annually. The city has discovered the use of straight pipes in 3 houses. O'Neal believes there are more in the city.
- O'Neal reported that the Water and Sewer fund currently has a positive cash flow.
- O'Neal said there is a lack of communication between the water billing department and the DPW. Broken or defective meters are not being reported to DPW. O'Neal also said the city will be raising the minimum water rate.

Fire Dept.

- Firemen are campaigning for Mayor Pro Tem Miller for mayor. O'Neal said at least three department heads have said they will resign if Miller is elected mayor.

OPEB benefit audit

- O'Neal said that the OPEB benefit audit has been completed. "Some discrepancies were found. But overall, it's wasn't bad," O'Neal said. A deceased female was still receiving BCBS coverage. Ecorse is going to request a refund from BCBS.

DPW Business Plan

- O'Neal said the potential savings from taking DPW in-house is approximately $57K annually. But this would depend on the wages Ecorse would pay workers. O'Neal said he is finding it difficult to find even part-time workers for DPW. O'Neal said it's unlikely the in-house plan will be implemented at this point.

Flint – Oct. 28 – N. Henderson, Mayor Walling, F. Headen, E. Cline, P. Dostine, A. Heimann, D. Hudson

Priorities

1. Crime/Safety

- Flint is preparing for this weekend (Halloween/Devil's Night) with an crime/arson prevention program that utilizes a volunteer citizen network
- Violence Reduction Network – National program to use analytics to help reduce crime by helping to identify individuals who are likely to accelerate crime. Had a press conference that was very well received to announce this partnership with the FBI/ Justice Dept.
- Police Recruitment – Going well, have already hired some staff, and will be sending 5 people to the Police Academy. Also, will be using the KRAM to hire some part-time community officers. The KRAM is a dedicated funding source and will have a net neutral impact on the budget.

Status of Water Situation

1. Revenues/Expenditures

- Flint is continuing to lose money, they are currently down about $11Million this period, and even after the shut off notices are sent out, they anticipate that they will still have a roughly $6-8 Million loss
- Will be amending the budget to show the revenue loss, will be sending along a spreadsheet that has their cash flow estimates

2. Litigation

- Flint is currently absorbing the entire cost of the litigation against the City, and they feel as though the state should pay for part of these costs considering that the State has "some responsibility on this". They say that the decisions that led to this litigation were made in part by Mike Brown and that the State should offer to help pay some of the extra litigation costs. She intends to discuss this further with the Treasury Department when she makes her visit to Lansing in November.

3. KWA Bond Payment

- N. Henderson was unclear when this payment was actually due. Does know that it is around $6M, and that the payment will need to be made in this fiscal year. N. Henderson agreed to follow up with Eric when she comes across the due date for the payment.

Miscellaneous

1. Mayoral Election

- Mayor Walling stated that the elected Mayor will be sworn into office the Monday following the election (November 9th) and as such, this may be his last phone call with the group. He expressed that this group has developed a very positive working relationship, and that he has enjoyed working with the people on the call

Hamtramck – Oct. 22 – K. Powell, P. Dostine, D. Van de Grift, A Heimann, D Hudson

Priorities

- RTAB packet will be out shortly
- Developing an online marketing video at no cost to the City. Will be available on the City's website next week
- Website will be up and running by next week
- Going to court 10/23 to address the City Council vacancy, court is going to have decision at that time, and a new Council Member should be present for the City Council meeting next Tuesday.
- There is a flier being distributed that calls for the removal of all the City's Muslims.
    - City is meeting with Yemeni Muslim leaders later in the week
    - City suspects that this flier is created by leaders in the Muslim community to create trouble.
- Election approaching, still dealing with scandal
    - Needed some advice on how to investigate this further, Pat offered some suggestions
- Parks, DPW, Water all going well
    - Sill "shutting people's water off" for non-payment, looking to reduce the amount of delinquency time before a shut off can happen.

- Operating surplus, currently projected at around $900K
- Will likely need to spend some of that upgrading some City software products, Adobe was specifically mentioned.
- Projecting a $3M fund balance, will be "shooting" for a 20-25% balance
- Water fund is saving money by utilizing some part-time staff hours

Auditor Search

- Katrina has selected a candidate
- Is approved by City Council, and Drew seemed positive that RTAB will likely approve as well.

Police Study

- Not much has been done on this issue since last meeting, this issue is "not been a priority".
- Drew and Pat wanted to see some positive movement on this project within the next two weeks

Highland Park– Oct. 14 – C. Square, R. Byrne

- The collection firm has approximately $7M in past due accounts to collect. However, many of these accounts are no longer active.

- Meadowbrook will be providing an updated report on OPEB costs which show a substantial reduction of the annual costs. The new estimated annual costs will be between $200K and $300K.

- New water bills with the new water and sewer rates have been sent out to the customers.

- Wade-Trim has opened its customer service center on Woodward Avenue.

- BSA software installation has been completed.

- The City will be submitting several FDCVT grant applications including master water meters, LED streetlights, and building improvements.

- Wade-Trim has received several shipments of residential water meters that will be installed soon.

Inkster – Sept 16 – M. Stuhldreher, R. Byrne, P. Dostine

Priorities

- Redevelopment Ready Community program. Inkster is interested in following through with MEDC to achieve RRC certification. Treasury to forward brief report on the program's requirements.

Police chief

- New chief is fully engaged. He's attended several community events. He's been in the neighborhoods. Chief is in the process of hiring an officer to work narcotics. Inkster Police administration has lots of training dollars. Mark said Inkster has $47K remaining from the FDCVT grant earmarked for training as well.

Pastors

- Mark had a meeting with Rev. George Williams, an outspoken critic of the upcoming Parks & Recreation millage. Mark stressed the importance of millage passing and that Rev Williams should at most remain neutral on the matter.

'16 FDCVT grant

- Inkster has not started its application process yet, but does plan to apply. Last year the city received $900K in grant monies from Treasury.

Lincoln Park – Oct. 21 – B Coulter, R Byrne, D. Van de Grift, P Dostine

Priorities

- PA 345. Three councilpersons endorsed the millage at last council meeting. Efforts continue in the evenings at neighborhood elementary schools. Coulter and others recently met with local pastors. News Herald has been giving it a lot of coverage.
- Matt Coppler, new city manager. Coulter asserts Coppler was the right choice. Everything is going better than expected.

Lincoln Park Retiree Lawsuit

- A status conference took place Oct. 20. Everything was pushed back. Coulter had informal meeting with retiree attorney Porter. Coulter told Porter he hopes they can work together if PA 345 passes. Coulter said there would be enough money in his estimation to satisfy the plaintiffs' demands.

RTAB recruitment membership

- Coulter has collected two names of potential RTAB members. He is developing an application as an early screening instrument.

Final Order

- Coulter completed first draft of FO. Has given a copy to John Clark and Howard Shifman to review. The draft should be ready for Treasury review next week. Depending on what happens with PA 345, the FO may or may not have to be revised.

City Charter

- Coulter is having Miller Canfield provide advice on putting model provisions into the Charter. Coulter is leaning toward leaving any finally formulation and adoption of model provisions to the future RTAB.

Miscellaneous

- Coulter is worried about DPS. Three more employees resigned in recent weeks without any notice, forgoing vacation. It's rumored that a supervisor may leave for the Metro Airport.
- The Government, Employees Labor Contract has been forwarded to Treasury for approval.

Pontiac – Oct. 30 - Mayor Waterman, Deputy-Mayor Jane Bais-DiSessa, J. Sobota, R. Widigan, P. Dostine

- **Weekly Priorities:**
  - HUD has sited the City in regards to their NSP3 Programs for incomplete data entry, all supporting information has been found and will be submitted. Should be submitted today.
  - Contract for the Sherriff is completed – base amount is decided by Oakland Co. Commission.
    - City has added on two additional officers for patrol.
  - Dep. Mayor – noticed a lot of passion from the council, they have a strong desire for change.
    - She will be reviewing the process for budget adjustments, and preparing council packets, etc…
      - Would like to make things as simple as possible for staff and council.

- **Deputy Mayor:** Has started work at the City, is catching up and beginning duties.
  - Will assist with transition goals for the city council and city to accomplish.

- **$6M with Gray Financial Group:**
  - City is currently looking for a replacement for Gray, until then the $6M will remain with Gray.
  - Currently compiling a chronology of events regarding the dealings with Gray group.

- **Budget Amendment/Audit:**
  - One set of amendments were voted on by city council last night, another vote to approve further amendments (street sweeping, grass cutting, etc…) will be presented at next Thursday's council meeting.
  - Mayor is ready to submit 16/17 budget as soon as budget amendments are approved.

- **Community Development Positions**:
  - At last night's council meeting, they council refused to fund the positions.
  - Same reasons as before.
  - Council wants their own attorney, until they receive one they won't fund the positions.

Royal Oak Township – Oct 5 – R. Burgess, R. Byrne, P. Dostine

- **Priorities for the Week/Miscellaneous Items**
  - Hired an accountant – Nicholas Fedewa -- approximately $55 to $60 /hr. Fedewa was recommended by Pontiac Finance Director. He initially will work full time to catch the township up in the books. Produce a cash flow analysis from Aug till Dec. Work up till the end of the year. Treasury recommended the new accountant stay on pass the end of the fiscal and perhaps even longer. The work is needed.
  - Montgomery has reduced its price from $17K to $10K. Still no deal, no close out of this invoice. Robert requested an Order so he can void the contract. Treasury noted that Montgomery could still take the township to court over the matter.
  - There is an office employee that the township must provide rights and benefits under the union contract. Robert did not budget for these costs. The township attorney has counseled against eliminating her position or denying her benefits because she will grieve the case.

- **FY '16 budget**
  - Robert said a draft of the budget is completed. He's met with all the directors and elected officials regarding their budgets. He's ready to show it to the Board at the next meeting (Oct. 15) or maybe earlier for review. In the budget are CIPs which have $50,000 place holders.
  - Robert has distributed project applications for FY 16 CIPs to all the dept directors. That process is underway.
  - Robert said tax revenues will be slightly higher in FY '16 budget.
  - Oakland Co told Robert that chargebacks for 2016 will be small.
  - In 2017, the Fire, Street and Disposal funds should all break even.
  - The projected fund balance for Year End FY 16 is approximately $200K, which is less than the 15 percent recommended of the total budget amount ($2MM).
  - No money budgeted for township offices. Robert said he would have to do an amended budget should the issue arise in '16.
  - Treasury requested a copy of the draft budget.

- **Police Update**
  - Robert met with Oak Park regarding police services. Last week Robert gave Oak Park a written proposal. Oak Park has promised a response in two to three weeks.

Grant School

- Robert said this is not a priority until ROT gets a police contract first.

Township-owned house

- Update: This property has not been sold yet for $975. At its last meeting, the Board approved the *selling* of the property, not the *sale* of it. At the same meeting, the Board did not approve of the rehabbing of the house for $3K. Municipal Risk (sp) sent a

crew in to dry the basement out (the basement experienced water damaged due to clogged drains from area restaurants using them as grease bins) remove damaged drywall etc. It has been estimated that $3K of rehab on the house would elevate the house in price on the market from $10K to $30K.

McKenna

- In 2014 the township paid approximately $100K for McKenna's services. This year, the figure is approximately $64K. Robert has talked to the DDA and Parks about what their share in the cost will be going forward. He hopes to get a reduced price from McKenna for FY '16.

Good Afternoon,

I have reviewed the *MSU Extension paper titled, The Flint Fiscal Playbook: An Assessment of the Emergency Manager Year (2011-2015).* In general, it is an accurate summary of the emergency manager administrations of Mr. Brown, Mr. Kurtz, Mr. Brown (2nd time), Mr. Earley, and finally Mr. Ambrose. The paper first discusses the demographics of the City, including the economic and housing trends contributing to the financial emergency. Next, the City's personnel costs are examined, with particular attention to the OPEB costs which were not funded. EM Brown's modifications to retiree healthcare is a major topic, and the paper fairly documents the competing interests of retiree contract claims and the continued solvency of the City. The history of emergency managers increasing water and sewer rates is also noted. Perhaps the only controversy is found on page 25, where the paper couches the use of the Flint river as a local decision, which it was. A considerable portion of the paper is devoted to graphical illustrations of data from previous municipal audits.

I am available for further review upon request.

Kindly,
Drew

Sent: Tuesday, November 03, 2015 2:07 PM
To: Dostine, Patrick (TREASURY)
Subject: RE: draft Flint list

Patrick,

A couple of minor adjustments.

I want to hit elections right out of the gate, since it will be foremost on everyone's mind anyway.

I put a couple of notes as to why I added things. This is for your understanding, but I don't think they need to be included on the list.

- Elections
- Priorities
- Devil's Night / Halloween report
- Water System Update ~~DWSD water in the system~~
- Aging Accounts Payable – *We have heard that they may have very significant levels of aging payables on top of what the water system is already short*
- KWA bond payment date
- Planning Director Start Date – *We want to know when his start date is as it might come into play at the RTAB level*
- Miscellaneous

Subject: Flint Call - November 4th

Hello all,

Here are my notes from the call today with the City of Flint. Please notify me if you identify any factual errors, and I will be happy to remedy for the records:

Flint – Nov. 4

Mayor Walling, N. Henderson, J. Freeman, F. Headen, W. Lamphiery, E. Cline, P. Dostine, D. Hudson, A. Heimann – All in attendance

Elections

1. Mayor Walling – Reiterate a few things already shared, hopes that this group can continue to meet, and involve City Council, Council presence has been essential. Saying that we are going to be met with an entirely different approach, one of "anger and resentment". Will need to be much more "Hands On".
2. Called for additional investments to help deal with the elevated lead levels in high risk people's blood
3. Believes that the new administration will be very destructive
4. We "have his number"
5. ALL- Nervous about new administration, and are looking for the State to be more involved to ensure that the atmosphere does not become too destructive.
6. N Henderson – Suggested that all department heads are at risk because new mayor has made promises to people for these department head jobs.
7. J Freeman – Not likely going to be elected for City Council president

Priorities

1. Grants: Received three grants from the Ruth Mott Foundation

- $1.5M (three yr) from the Ruth Mott foundation for Police work in the North End of the City. Not for operational policing, but for public safety programs.
- Neighborhood planning grant $300K, can work with previous grant, and are waiting on agreements
- Park Grant $70K

Devil's Night / Halloween report

1. No Major issues
2. One fire, basement fire. Two more brush fires, nothing major. Sat it rained

Water System Update

1. Switched to DWSD
2. Waiting on a finalized permit, to add more phosphate to the water. Already have phosphate in water, but they believe that more is needed, and special permit is needed to add more. Recommendation from that there is substantially more Phosphate in the water.
3. Technical advisory committee meeting on November 9th

4. N Henderson will have a private EPA Meeting
5. EPA will have a task force meeting on Tuesday (Not public information)

KWA bond payment date

1. November 2016 - Working on it now (called Jodi? While we were on call to find date)

Planning Director Start-date

1. First day will be November 9th

Miscellaneous

1. RTAB vacancy – The Governor's office is taking names and then they will be making the decision. Unclear how long that process will take.
2. Veterans Day – will not be having a phone call with Veteran's day being Wednesday, Thursday will be the RTAB meeting not Wednesday, confirmed that they had posted the RTAB meeting appropriately.

REPLY TO THE ATTENTION OF

MEMORANDUM

DATE: November 4, 2015

SUBJECT: Transmittal of Final Report - High Lead at Three Residences in Flint, Michigan

FROM: Tinka G. Hyde
Water Division Director

TO: Jim Sygo
Deputy Director
Michigan Department of Environmental Quality

Howard Croft
Director of Flint Public Works

Enclosed please find for your file a final redacted version of a report prepared by EPA Scientist, Miguel Del Toral, regarding lead in drinking water at three residences in Flint, Michigan. The redactions remove personally identifiable and medical information. This report has been finalized and is also being provided to the National Drinking Water Advisory Council (NDWAC) for discussion during their upcoming meeting on November 17-19, 2015. We understand you saw an earlier version of this document; and note that most of the recommendations in that interim report are already being implemented (e.g., the City of Flint has switched back to Detroit water; filters have been provided to residents; and additional corrosion control treatment will be implemented).

The final report contains important new information indicating that physical disturbances of lead service lines can dislodge the protective coating that prevents lead from leaching into drinking water. The final report recommends notifying residents about the potential risks of increased lead levels in drinking water when work is undertaken that may disturb lead service lines.

High Lead Levels in Flint, Michigan

The purpose of this report is to present the findings of activities conducted in response to high lead levels in drinking water reported to the United States Environmental Protection Agency Region 5 Office (EPA) by a resident in the City of Flint, Michigan.

Background Information

Prior to April 30, 2014, the City of Flint purchased water from the City of Detroit. On April 30, 2014, the City of Flint switched from utilizing purchased water from Detroit to a new water source, the Flint River. Subsequent to the change in source water, the City of Flint experienced a number of water quality issues resulting in violations of National Primary Drinking Water Regulations (NPDWR) including acute and non-acute Coliform Maximum Contaminant Level (MCL) violations and Total Trihalomethanes (TTHM) MCL violations (see Appendix A).

Beginning in January 2015, [redacted], a resident of Flint, called the Flint Water Department (FWD) regarding the water quality in her home. In response to the initial and subsequent calls, the FWD visited the [redacted] home on a number of occasions and also collected tap water samples. [redacted] also contacted EPA regarding these same water quality issues and medical issues she believes are associated with the water quality in Flint.

Following initial calls on the general water quality, on February 26, 2015, [redacted] contacted EPA regarding high lead levels found in her drinking water by the City of Flint. The result of the initial lead in water sample collected by the City of Flint on February 18, 2015 from the [redacted] home was 104 µg/L and the level of iron in the water exceeded the capability of the instrument to measure (>3.3 mg/L). On February 26, 2015, upon receiving the lead results from [redacted], the EPA contacted the Michigan Department of Environmental Quality (MDEQ) regarding the high lead result. The MDEQ advised that the City of Flint collect a follow-up sample for lead at the [redacted] home.

On March 3, 2015, the City of Flint collected a follow-up sample for lead at the [redacted] residence and the result of this second sample was 397 µg/L[1]. Subsequent to receiving her second result, EPA spoke to [redacted] via phone on March 19, 2015, and the following information was provided by [redacted]:

- The [redacted] home is a HUD home which was gutted and renovated in 2011. All existing plumbing had been removed and the [redacted] installed plastic plumbing.
- Due to high iron levels in the tap water, the [redacted] installed an iron filter downstream of the service line inlet into the home.
- [redacted] indicated that at this time they are not drinking the water or using it for cooking. She stated that her child's blood lead level (BLL) was originally at [redacted] in 2012 and that a more recent test showed it had increased to [redacted], but she noted that

[1] *Note: A third water sample had been collected on April 2, 2015, but the results had not been provided to the [redacted] at the time the interim report was written. The third lead in water sample result was 707 µg/L*

the BLL testing was done well after the child had stopped drinking the water and may have been higher during the time the child was consuming the water.

- Water samples collected by the City of Flint from her home were collected from the kitchen tap after the iron filter was physically removed.
- The Flint Water Department (FWD) informed [redacted] that her service line does not connect to the water main in front of her home as is typically the case for most homes.
- On March 18, 2015, City of Flint personnel went to the [redacted] home to locate the external shut-off valve in conjunction with the planned replacement of the [redacted] service line and were unsuccessful. Eventually it was discovered that the external shut-off valve was located at the corner of [redacted] and Bryant Street, two houses down from the [redacted] home.

As part of EPA's effort to respond to [redacted] concerns regarding her water results, EPA contacted the FWD. The following information was provided to EPA by the FWD:

- [redacted] home is one of the first homes built on the block and the service line runs for approximately 50-60 yards, connecting to the water main on Bryant Street which runs perpendicular to [redacted] (see Appendix A).
- Flint has a large number of lead service lines, so it would not be surprising to find that this is a very long lead line.
- The first sample from the [redacted] home was collected with the iron filter in place, and the second was with the iron filter physically removed. The iron filter was located just after the water meter.
- [redacted] showed FWD a video of her son 10 minutes after taking a bath, and that he had a full body rash in the video.

It was a common practice in the early 1900s to purchase large parcels of land and later subdivide them. Since service lines are typically run from the water main to the nearest location on a property and it is possible that the [redacted] home may have originally been part of a larger parcel of land that encompassed the two homes that now exist adjacent to the [redacted] home and was subsequently divided, leaving the original home connected to the same service connection and water main, while the newer homes were connected to a more recent water main installed along [redacted].

Based on a suspected conflict of interest at the healthcare facility that originally tested her son's BLL, [redacted] took her son to a different healthcare facility to have his blood lead tested again. On April 1, 2015, [redacted] provided EPA with a copy of her child's blood lead testing performed on March 27, 2015, showing a higher BLL ([redacted]) than the original test.

Due to the persistently high lead results, the FWD shut off the water service to the [redacted] home on April 3, 2015. Per agreement between the FWD and [redacted], her home was then connected to her neighbor's home via a garden hose, from one hose bib to another. This was understood to be a temporary measure until the [redacted] service line could be replaced. The [redacted] used this water connection only for bathing, washing dishes and washing clothes.

At the invitation of [redacted], EPA visited the [redacted] home on April 27, 2015, and reviewed the internal plumbing and information provided by [redacted], including water samples and spent filter cartridges. During this visit, EPA observed that the internal pipes, valves and connectors at the [redacted] residence were made of CPVC plastic, approved by NSF for potable drinking water applications, with a few minor metal connectors. A review of the treatment units in the home by EPA found that there was no iron filter in the home as had previously been thought. The only active treatment device in the home was a whole-home sediment filter which utilizes NSF certified Whirlpool WHKF-WHWC cartridge filters for sediment removal and taste/odor. There was also a non-functioning 'Water Resources International Hydro-Quad Commercial Water Processor' which was bypassed (see Appendix A).

At the request of [redacted], Dr. Marc Edwards at Virginia Tech provided sampling instructions to [redacted] for collecting a series of samples from her home. As part of the instructions, on the night of April 27, 2015, the water at the [redacted] residence was turned back on temporarily and the kitchen tap was flushed for 25 minutes at low flow prior to letting the water sit overnight. A series of sequential samples were collected the following morning (April 28, 2015) and sent to Dr. Edwards for analysis.

Dr. Edwards provided [redacted] with the results of the analyses and also shared the results with EPA on May 5, 2015, along with information regarding other chemical parameters tested (see Appendix B). In addition to very high lead levels in all sample results, the analytical data shows a correlation between lead and phosphate as well as lead and aluminum in all samples. On April 24, 2015, EPA had learned that Flint did not have corrosion control treatment in place and also learned that Flint was using ferric chloride as a coagulant. Consequently, as the City of Flint is not utilizing phosphate or alum as treatment chemicals since the source switch, the results indicate that it is likely that the phosphate and aluminum were being released from the scale within the distribution system network. This scale would have formed on the inside of the pipes in Flint during the time when the City was purchasing water from Detroit, as Detroit utilizes orthophosphate for corrosion control and alum as a coagulant in their water filtration process.

Research conducted by EPA on lead content in pipe scales has shown that scales which form on the inside of lead pipes can be released or dislodged into the water and may contain a high percentage of lead (Appendix C). Although the results received from Virginia Tech were indicative of the presence of a lead service line, the FWD indicated that no records existed to confirm whether any portion of the service line connecting to the [redacted] home was made of lead. However, given the high lead levels found, it was presumed that at least a portion of the service line was likely made of lead. In the course of following up on the high lead at the [redacted] home, additional sample results provided to EPA from other residences in Flint also showed high lead levels.

Primarily from a public health standpoint, but also from a research standpoint, it was important to try to find out what the cause of these very high lead levels might be. EPA Region 5, EPA's Office of Research and Development and others have been working

together collaboratively to better understand lead release mechanisms from lead service lines in anticipation of upcoming revisions to the Lead and Copper Rule (LCR) and as part of a collaborative effort in EPA Region 5 to study potential options for optimizing phosphate treatment to control lead in water and the need to reduce phosphorus discharges into the environment. Since the [redacted] service line was scheduled for replacement on May 6, 2015 and the presumption was that at least a portion of the service line was lead, EPA visited the [redacted] home on the day of the service line replacement to gather information and service line pipe samples that could provide additional information as to how lead levels could get as high as they did in this case.

The original service line to the [redacted] home was disconnected and two service line pipe segments from this service line were extracted on May 6, 2015. Additional tap water samples were collected also from two homes on Bryant Street that were connected to the same water main as the [redacted] home (Appendix A). The samples were collected from these homes as they had more typical service line lengths as compared with the [redacted] home. During the same visit, patches of asphalt were also noted along the curb on Browning Avenue, indicating that excavation had occurred. These patches, which were in proximity of the [redacted] service line in the parkway (see Appendix C) may be one of the potential factors contributing to the high lead at the [redacted] home, as it has been shown that physical disturbances to pipes can dislodge the scales within those pipes.

The two service line segments that were extracted were subsequently identified as galvanized iron pipe. Analyses conducted by Virginia Tech on the extracted portions of the pipe indicate that the galvanized iron pipe was fairly typical in terms of composition (see Appendix C). The galvanized iron portion ran from inside the [redacted] home to the external shut-off valve at the corner of [redacted] and Bryant Street. The remainder of the [redacted] original service line from the shut-off valve to the water was made of lead.

Although the service line had been disconnected from the [redacted] home, it was not possible to retrieve a segment of the lead portion of the service line as it was beyond the shut-off valve which had been closed and left in place. Following the disconnection of the original service line, a new service line made of copper was installed from the [redacted] home to the water main in front of the home on [redacted]. Subsequent to the replacement of the service line at the [redacted] home, water samples were also collected from the [redacted] home and sent to the EPA Chicago Regional Laboratory for analysis. In all three homes, the sequential samples were collected using standard protocols used in prior sequential sampling efforts to capture water samples reflecting lead levels from the kitchen tap to the water main. Two additional samples were collected from the water heater drain valve at the [redacted] home to determine if lead deposits had accumulated in the water heater, and a final sample was collected from the bathroom tap. The sequential sampling results indicate that the service line replacement eliminated the high lead levels and that no residual lead had accumulated within the plastic plumbing of the [redacted] residence, which was a potential concern and possibility based on prior research. One of the two samples collected from the [redacted] hot water heater had high lead (32 µg/L), likely from lead particulate that had accumulated in the tank, and the sample collected from the bathroom was 5.5 µg/L.

The sequential samples collected from the two homes on Bryant Street had differing results. At the first home (Site 2), a series of 15 sequential one-liter samples were collected and the results are indicative of a service line that does not contain any portion that is made of lead. Consequently the lead results were low overall for samples representative of the service line. The first sample in the sequential sampling series was the highest, which potentially indicates the presence of leaded brass in the faucet or underlying sink fixtures. Some leaded brasses manufactured prior to the 2011 lead-free law have been shown to release high levels of lead in certain water qualities. Leaded-solder was ruled out as the home plumbing consisted of galvanized iron pipe, and it is presumed that if the galvanized iron pipe were contributing the higher lead, the lead levels would be more consistent in all 15 samples.

At the second home (Site 3), a series of 15 sequential one-liter samples were collected from the kitchen tap and the results indicated that there were no significant sources of lead within the home plumbing but that a portion of the service line is likely made of lead, as indicated by the characteristic peaking of lead levels in the liters capturing water from the service line between the property and the water main, where the portions of many service lines in Flint are made of lead.

All three sets of sequential samples were analyzed for lead, copper, iron, phosphorus and cadmium. In contrast to the samples analyzed by Virginia Tech from the [redacted] home prior to the removal of the original service line, no phosphorus was present in the sequential samples at the [redacted] home following the replacement of the service line. In addition, no phosphorus was detected in the sequential samples from the two homes on Bryant Street. These results indicate that the source of high lead, aluminum and phosphorus in the analyses conducted by Virginia Tech was likely dislodged or disintegrated scale from within the [redacted] original service line.

The sequential sampling results from the [redacted] home before and after service line replacement, as well as the results from the two homes on Bryant Street are included in Appendix B.

Although relative contributions cannot be determined, there are a number of factors that could have contributed to the high lead levels found at the [redacted] home as follows:

1) Corrosiveness of water and lack of mitigating (corrosion control) treatment

The corrosiveness of the water and the absence of mitigative treatment to control lead release are well known factors that can contribute to high lead release.

2) Presence of a lead service line

Lead service lines are the largest source of lead, when present, and can contribute up to 75 percent of the total mass of lead released into the water. The portion of the original service line from the water main to the external shut-off valve at the corner of [redacted] and Bryant Street, estimated to be approximately 25 feet in length, was found to be a lead

pipe. In addition, studies have also shown that the scales within galvanized iron pipe downstream of lead pipe segments can be 'seeded' with lead from the lead portion of the service line. The [redacted] service line was much longer than most typical service lines which would allow accumulation of a greater total mass of scale within the pipe.

3) Physical disturbances

A recent EPA study indicates that physical disturbances in proximity to lead service lines can cause the dislodging of the protective scales from within the service lines. The photograph in Appendix C shows the scale that was dislodged from inside a lead service line during routine maintenance work in another city due to a physical disturbance of the line. The dislodged scale and sediment contained a very high concentration of lead. At the time of the EPA visit to the [redacted] home, there were two patches of new asphalt visible on [redacted] along the parkway where the [redacted] original service line was located, indicating recent excavation and possible recent physical disturbances to the [redacted] service line (Appendix C). These potential disturbances were along the galvanized iron section of the service line and as noted above, research has shown that the presence of lead pipe upstream can 'seed' the galvanized iron pipe downstream with lead, which results in an accumulation of lead-bearing scales within the galvanized pipe downstream of the lead portion of the service line. It is reasonable to assume that these physical disturbances to the galvanized iron portion of the service line could therefore result in the same dislodging of scale and sediment as studies have shown can happen with lead service lines.

The street disturbances on [redacted] occurred after the [redacted] moved into the home along the portion of the service line made of galvanized iron pipe. There were no visible signs of disturbance on Bryant Street where the lead portion of the [redacted] service line was situated (see Appendix C). It is likely, given the extremely high lead levels found and the co-occurrence of aluminum, phosphorus and lead, that the long segment of galvanized iron pipe was seeded with lead over the entire length of the pipe and the physical disturbances and other factors such as the water chemistry resulted in the release of large amounts of the high-lead bearing scale and sediment into the water. Virginia Tech also found nearly perfect correlations between the lead in water and markers for galvanized pipe scales including zinc.

Recommendations

As indicated by the results from the [redacted] home and previous EPA work, the presence of lead pipes over many years has likely resulted in the accumulation of lead in the scales within non-lead pipes downstream of the lead pipe and physical disturbances to the leaded or non-leaded portions of the service lines have the potential to release large amounts of scale and sediment that could pose an immediate and acute health hazard to the residents. Consequently, even with corrosion control treatment in place in the future, physical disturbances will be capable of dislodging the high lead-bearing scale and sediment from non-lead pipes as well as lead pipes, as was the case in the earlier EPA study.

Obtaining information on the lead reservoirs in the scales within the lead and non-leaded portions of intact service lines is essential for determining the potential risk to residents

from lead-bearing scale released as lead lines are replaced as well as the risk that may remain following removal of the lead lines, where the non-leaded portions of service lines are left in place.

As the [redacted] service line was very long compared to the length of most typical service lines, it is important to assess the potential risk posed by the scale reservoirs in more typical lengths of service lines by extracting both the leaded and non-leaded portions of service lines which have not been physically disturbed. The service lines chosen for extraction and analysis should be representative of the materials commonly used downstream of the lead pipe (e.g., galvanized iron, copper, plastic). Extraction/handling procedures should be developed by EPA to ensure that damage to the scales from the excavation, extraction and delivery of the service line segments is minimized. Sequential sampling should also be conducted on a representative group of homes with common plumbing materials (e.g., galvanized iron, copper, plastic) to determine the extent to which the lead from the service line has seeded the interior plumbing in homes.

It is also critically important to develop and incorporate ongoing training and public education on the potential for high lead release from the scales as a result of any future physical disturbances to service lines and mitigative actions that residents can take to lower their exposure risk. The training and educational material should be assessed for clarity, meaningfulness, and accessibility by a group of residents and health experts to ensure the effectiveness of the communications.

At a minimum, immediate training and public education on the potential risks posed by physical disturbances to service lines should be developed by communications experts and provided to residents, community groups, elected officials, health departments, pediatricians and gynecologists, water and non-water utilities (gas, electric, cable, etc.), plumbing organizations and contractors. Residents should be notified of scheduled work by water and non-water utilities and informed of the potential risk of increased lead levels due to these disturbances.

Appendix A – Background Information

National Primary Drinking Water Regulations (NPDWR) Violations – City of Flint

Following the switch to the Flint River, the City of Flint experienced a series of NPDWR violations as follows:
Acute Coliform MCL violation in August 2014
Monthly Coliform MCL violation in August 2014
Monthly Coliform MCL violation in September 2014
Average TTHM MCL violation in December 2014
Average TTHM MCL violation in March 2015
Average TTHM MCL violation in June 2015

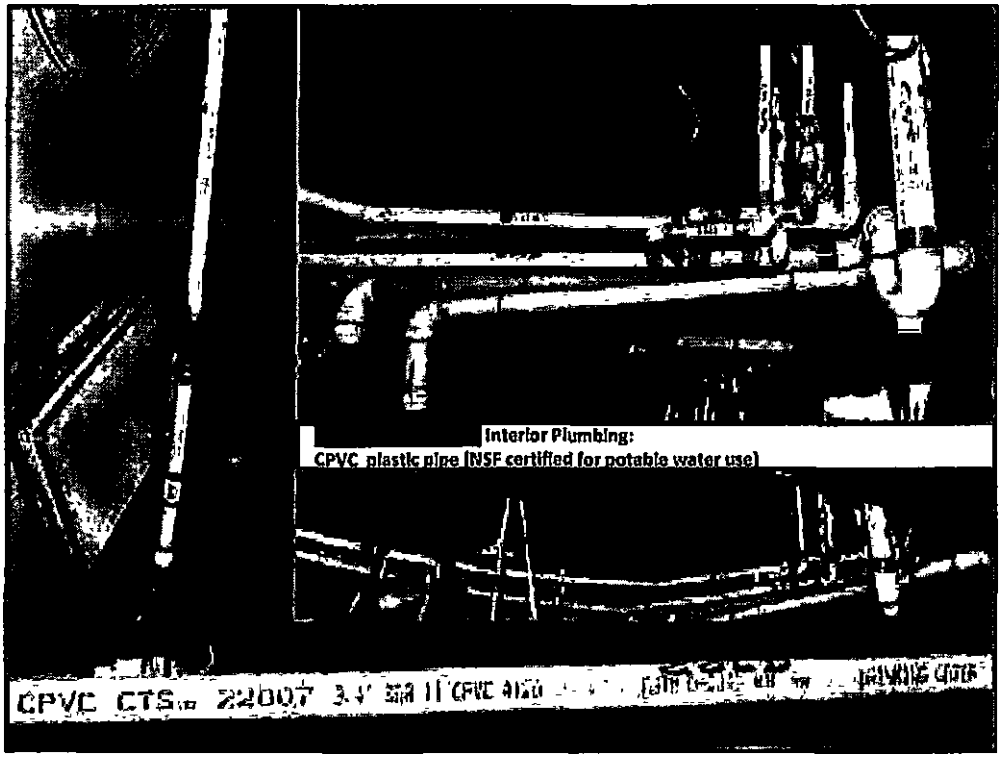
Sampling Sites

The map below shows the three homes that were sampled as provides information on the length of the service lines and the plumbing material. Two portions of the original service line were extracted and analyzed and a third portion was collected from the entry point into the home, but not analyzed.

[map redacted because it shows Personally Identifiable Information]

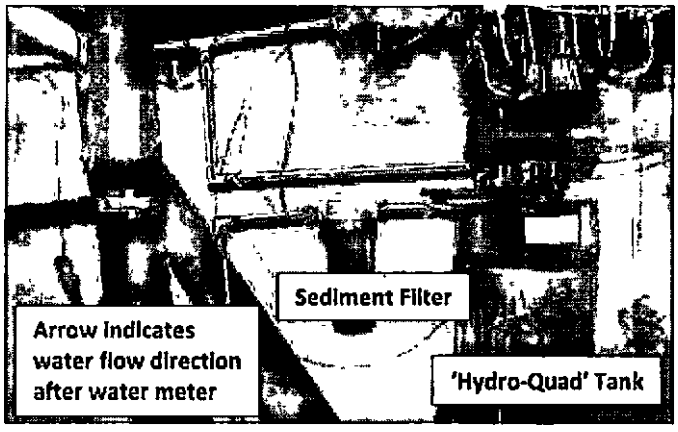
Internal Plumbing – [redacted]

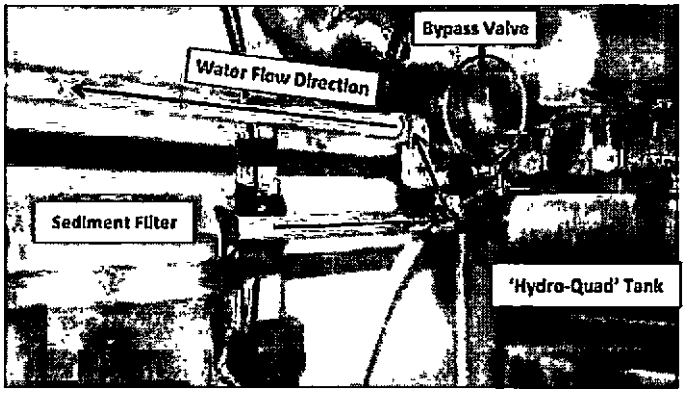
The following pictures were taken at the [redacted] home located at [redacted]. With the exception of a a few minor metallic connectors, all potable water plumbing in the home was found to be CPVC plastic pipe which is NSF-certified for drinking water use.

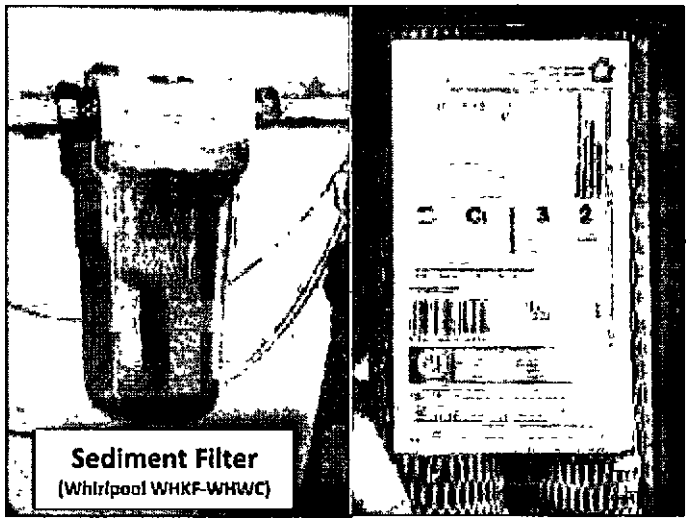


Treatment Units – [redacted]

The [redacted] home has a whole-home sediment filter, as well a non-functioning 'Hydro-Quad Commercial Water Processor' which is bypassed. There was no iron filter in the home as had been previously reported.







Appendix B – Analytical Results

Lead in water sampling results from the [redacted] residence ([redacted])

City of Flint Samples

The City of Flint collected water samples from the [redacted] residence and analyzed them for lead. The results for each date are listed below.
February 18, 2015: 104 µg/L
March 3, 2015: 397 µg/L
April 2, 2015: 707 µg/L*

*This sample result had not been provided to the [redacted] at the time the interim report was written.

Virginia Tech Sampling Results (provided courtesy of Virginia Tech)

Samples were collected from the [redacted] home following an extended stagnation period (April 3, 2015 to April 27, 2014) after the water at the [redacted] residence had been shut off. The water was turned back on and three sets of sequential samples were collected on April 28, 2015, at different flow rates (low, medium and high).

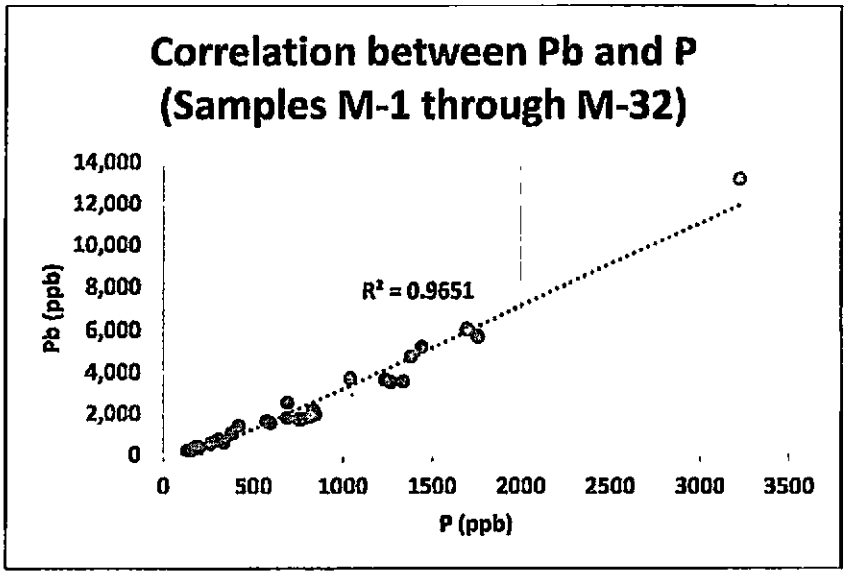
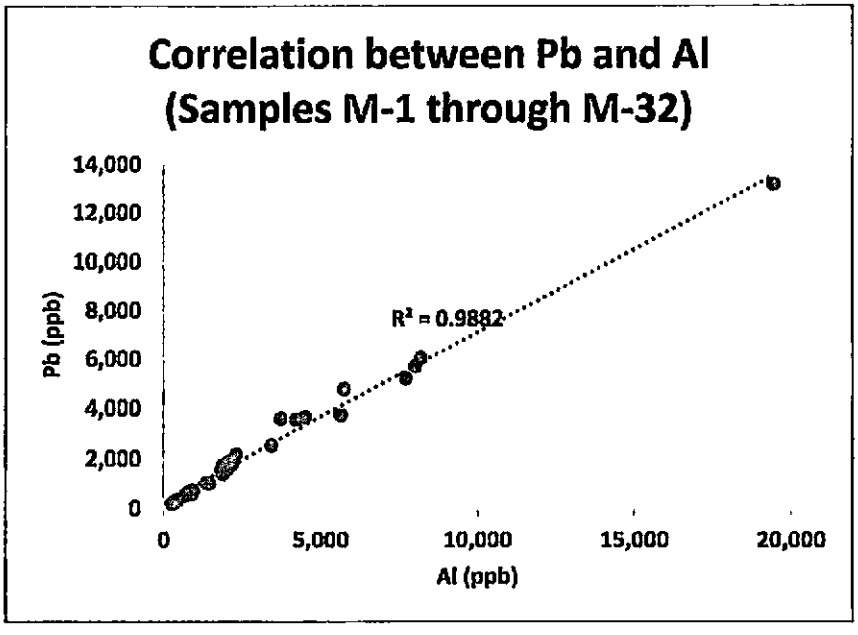
Correlation between lead, phosphorus and aluminum

The correlation of lead and phosphate, as well as lead and aluminum, indicate that the samples were captured scale and sediment that had formed inside the pipes while the City of Flint was purchasing water from Detroit. The absence of these chemicals in the current treatment provided by Flint indicate that these elements were not in the water passing through the pipes, but came from the scales inside the service line which had disintegrated into the water or were dislodged into the water.

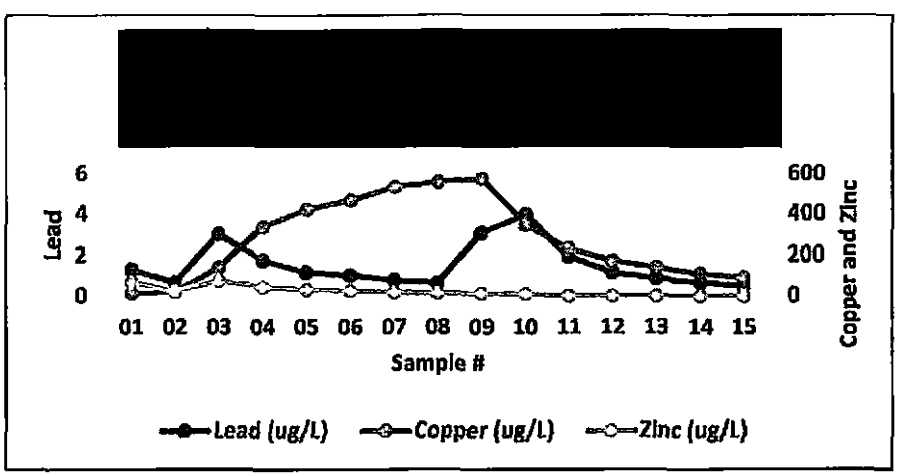




U.S. EPA Region 5 sampling

[redacted] residence (following replacement of service line)

Following the replacement of the [redacted] original service line, a series of 15 sequential samples were collected from the kitchen tap to measure the lead levels and other parameters to ensure that the high lead from the original service line had not contaminated the interior plumbing at the [redacted] home. With the exception of two areas, lead levels were low throughout the [redacted] plumbing following the service line replacement. The two sources of lead that were still detected in the plumbing are likely the water meter (Sample 3) and the new external service shut-off valve (Samples 9-11). Although new brass plumbing components must be lead-free, there can still be some lead that is released from these components.



[redacted]. ([redacted] home)

After Service Line Replacement

Sample #	Site Description	Copper (ug/L)	Lead (ug/L)	Zinc (ug/L)	Cadmium (mg/L)	Iron (mg/L)	Phosphorus (mg/L)

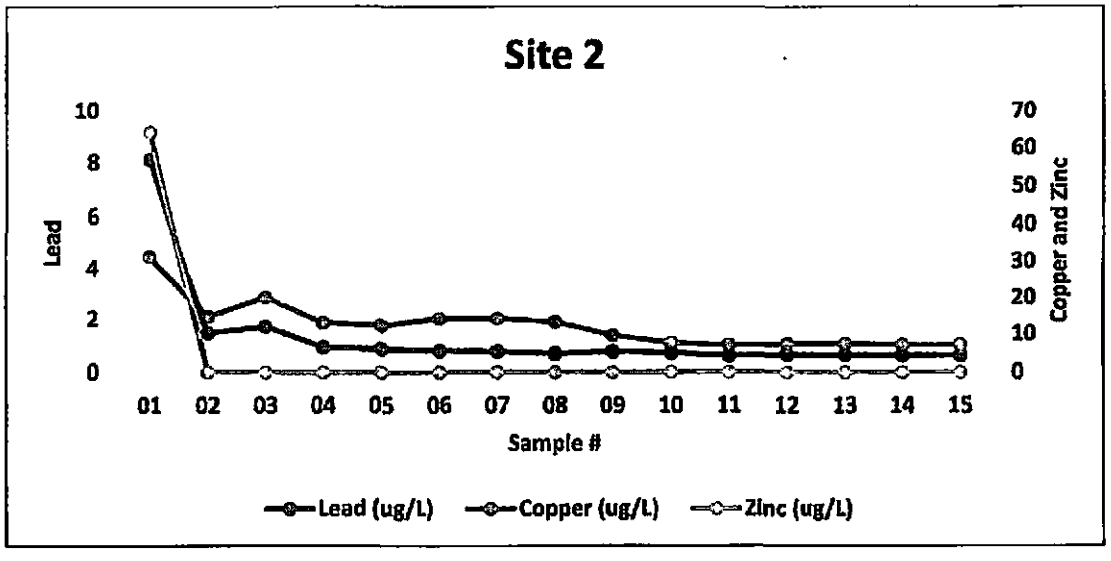
17	Water Heater	70.4	31.7	883	U	0.540	0.0877
18	Water Heater	35	9.74	346	U	0.0870	U

Site #2 (Bryant Street)

Based on the results found at this home, it does not appear that any portion of the service line is made of lead, and as a result, the lead levels are low in most samples. The exception is in Sample 1 which reflects water within approximately 15 feet of the kitchen tap and is likely due to brass components in the faucet, underlying valves and fixtures.



Site 2

(Note: U for Zinc replaced with 0 to show on graph)

Sample #	Copper (ug/L)	Lead (ug/L)	Zinc (ug/L)	Cadmium (mg/L)	Iron (mg/L)	Phosphorus (mg/L)

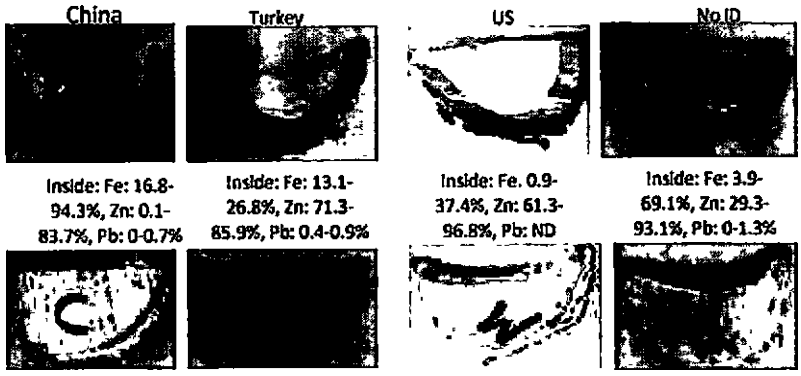
Analysis of [redacted] original service line pipe (galvanized iron portions)

Lead can also be found in galvanized pipe coatings as a contaminant in the zinc that is used to coat the surface of iron pipe in the galvanizing process. As such, two sections of the [redacted] original service line were analyzed for lead content.

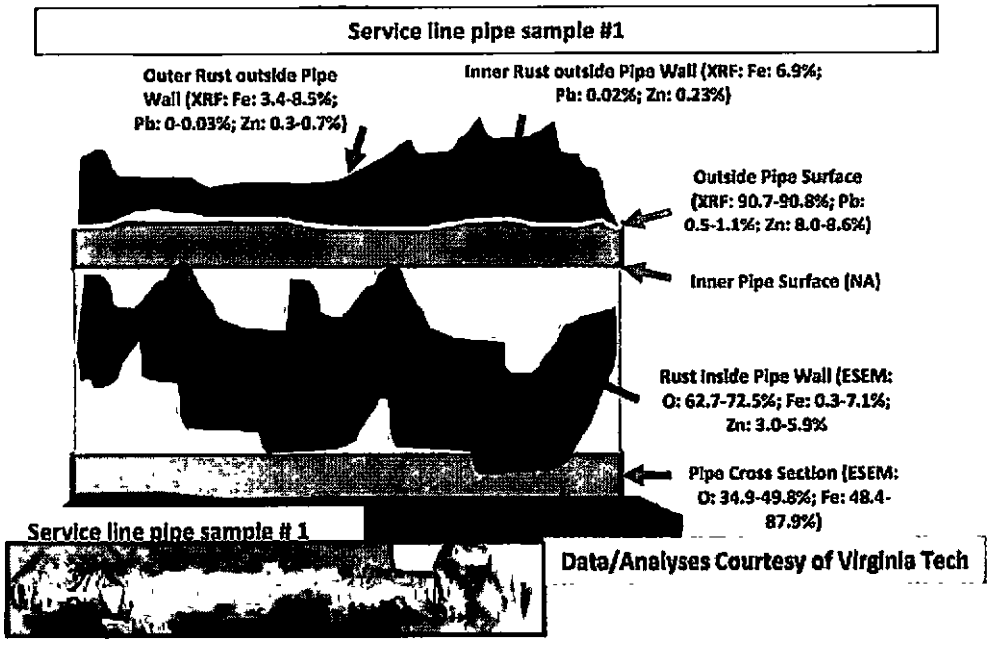
The images and data presented below are for a typical range of galvanized iron pipe.

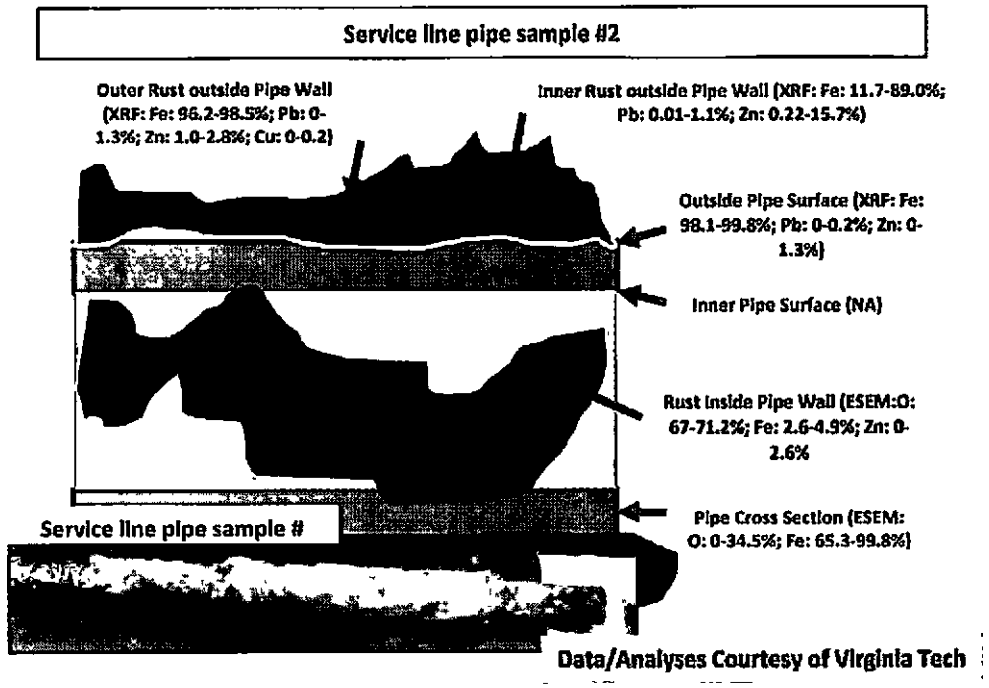
Lead Content of Galvanized Iron Pipe - Examples



Data/Analyses Courtesy of Virginia Tech

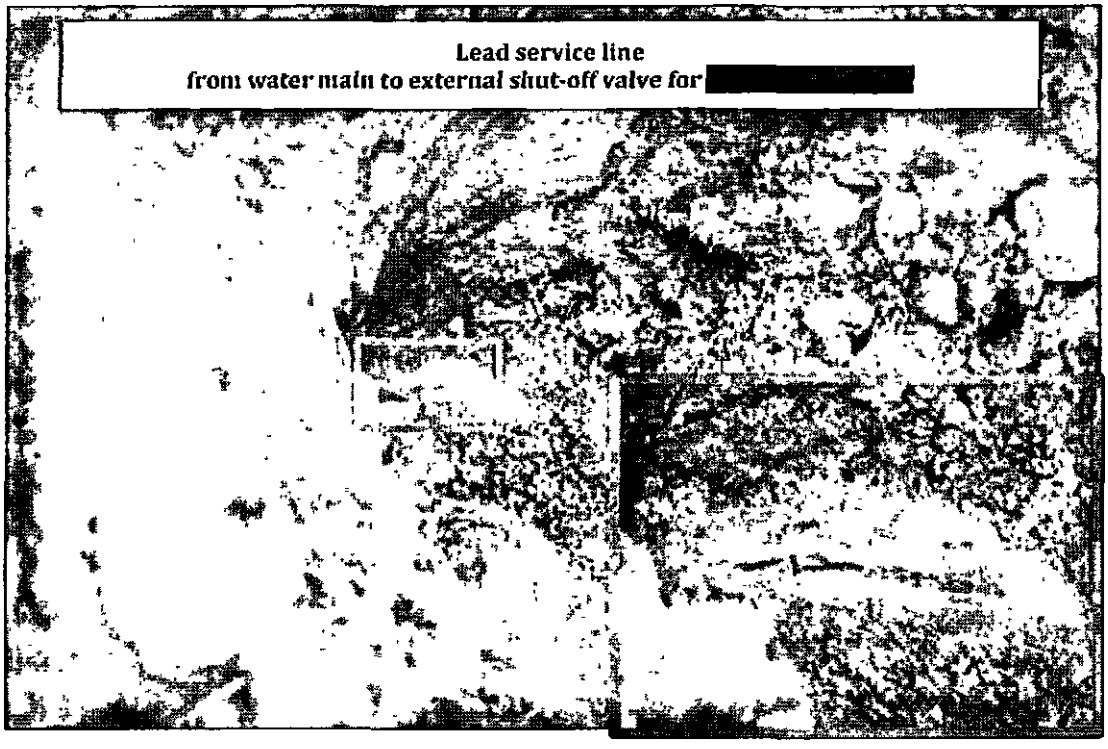
Below are the results of the galvanized pipe analyses conducted by Virginia Tech on the two sections of galvanized iron pipe from the [redacted] original service line. The analyses indicate that the [redacted] original service line was a typical galvanized iron pipe.





Lead portion of the [redacted] original service line

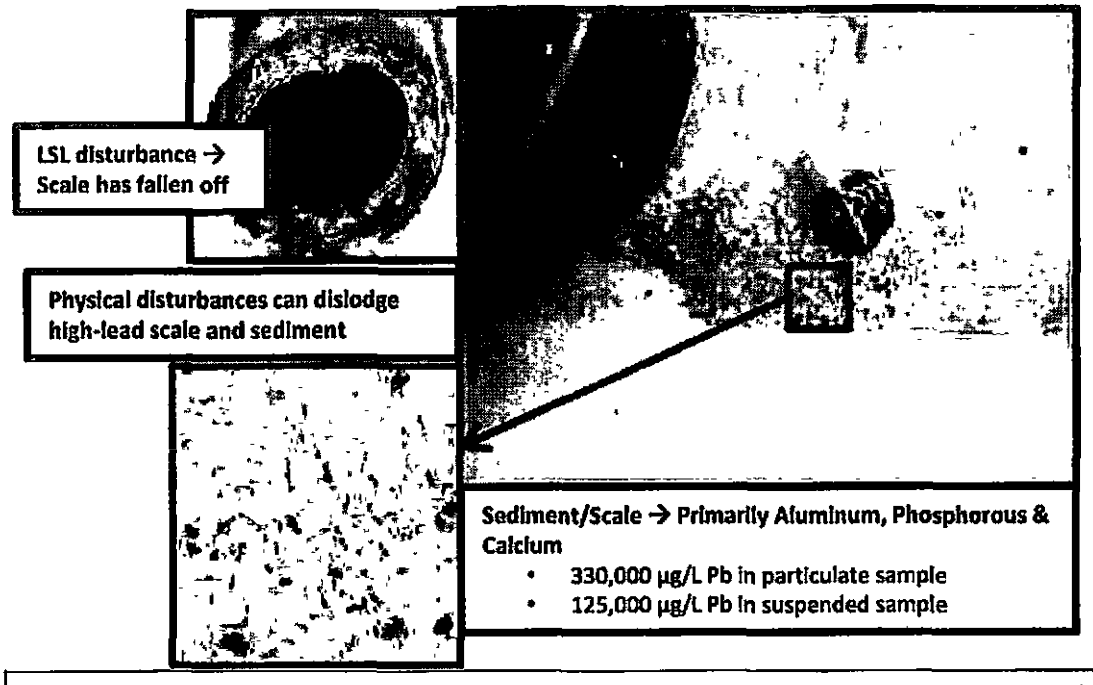
Lead service lines can contribute up to 75 percent of the total mass release into the water. The portion of the [redacted] original service line from the water main to the external shut-off valve at the corner of [redacted] and Bryant Street is made of lead and is estimated to be approximately 25 feet in length.



Appendix C – Additional Information

Physical disturbance of lead service lines

A recent EPA study indicates that physical disturbances to lead service lines or in proximity to lead service lines can cause the dislodging of the protective scales from within the lines. The photograph below shows the scale that was dislodged from inside a lead service line during routine maintenance work in another city due to a physical disturbance of the line. The dislodged scale and sediment contained a very high concentration of lead.



Lead service line disturbances were found to be a common factor for the majority of sites with high lead levels. It is also possible that low water usage may play a role in sites with the highest lead levels.

Lead service line scale analyses conducted by EPA's Office of Research and Development or obtained from peer-reviewed published literature from cities across the U.S. and in Canada (summarized below) show that scales within lead service lines can contain very high concentrations of lead. The yellow highlighted column in the table below shows the percentage of lead that has been found within different scales inside of lead service lines.

Lead & Element Percentages in Important Corrosion Byproduct Solids

Mineral Name	Formula	% Pb	%C	%O	%S	% P	%Cl

Subject: RE: Flint Orders
Attachments: Capture.PNG

Thanks Drew!

This is really helpful, I was looking online (Flint's website) before I called you, and I had a concern. They appear to be posting many of the EM orders on their site, but if the orders are listed in succession and sequential, then I am guessing that there are some missing from the site (I assume we are missing orders 9-19), please examine the attachment. Am I missing key information here, or do these documents not exist?

With regard,

Alexandr Heimann
Municipal Anlayst

Subject: Flint Orders

Alex,

Well the final order is available on our site HERE, but I think you really what to look at order 3 (attached). You will note that the mayor has some roll in the appointment of a few department heads. We should have a binder of all the flint orders somewhere, maybe in the overhead file in the cube between Eric and Randy. I suspect that the final order and order 3 will answer much of your question, but you might wish to peruse all the other orders just to make sure.

Call me if you have questions,
Drew

He's looking at order No.3. The EM order is No.20. Correct? He is asking questions about the police chief and fire chief as well. Which in Order No.3 says are all subject to the Mayors approval.

Ed-

I took a call from a reporter at ABC 12 who had some questions about the City administrator.

Last night the new mayor said that they wanted to bring in a new city administrator. What is that process? Is it a majority vote by the City Council and the RTAB? They also wanted to know the length of Tasha Henderson's contract.

Any assistance you could provide would be appreciated. Thank you.

EMERGENCY MANAGER
CITY OF FLINT
GENESEE COUNTY MICHIGAN

ORDER No. 3

CITY ADMINISTRATOR

BY THE POWER AND AUTHORITY VESTED IN THE EMERGENCY MANAGER ("EMERGENCY MANAGER") FOR THE CITY OF FLINT, MICHIGAN ("CITY") PURSUANT TO MICHIGAN'S PUBLIC ACT 436 OF 2012, LOCAL FINANCIAL STABILITY AND CHOICE ACT, ("PA 436"); GERALD AMBROSE, THE EMERGENCY MANAGER, ISSUES THE FOLLOWING ORDER:

Pursuant to PA 436, the Emergency Manager has broad powers in receivership to rectify the financial emergency and to assure the fiscal accountability of the City and its capacity to provide or cause to be provided necessary services essential to the public health, safety and welfare; and

Pursuant to PA 436, the Emergency Manager acts in place of local officials, specifically the Mayor and City Council, unless the Emergency Manager delegates specific authority; and

Pursuant to PA 436, the Emergency Manager has broad power to manage the local government, and may issue orders to elected and appointed officials necessary to accomplish the purpose of the Act. An Order issued under PA 436 is binding on the person to whom it is issued; and

IT IS HEREBY ORDERED:

The City Administrator shall serve as the City's Chief Administrative Officer at the pleasure of the Mayor, City Council and Emergency Manager or Receivership Advisory Transition Board (hereinafter "Board"), in accordance with the provisions of her contact with the City of Flint

dated February 23, 2015, and is charged with implementing executive and legislative directives and policies of the Mayor and City Council, subject to oversight of the Board, including strategic planning and budgeting, and with directing the management of day-to-day-administrative activities and appointed staff officials.

Consistent with the City Administrator Employment Agreement and Position Description, and subject to the approval and directives of the Board, the City Administrator shall have the following authority, duties and responsibilities notwithstanding any provision of the City Charter or Code of Ordinances:

1. Serve, advise and report to the Mayor with respect to the Mayor's executive functions, as set forth in Charter §4-101.

2. Serve and advise the Council with respect to the Council's legislative functions, as set forth in Charter §3-101.

3. Serve, advise and report to the Emergency Manager, as required by Public Act 436, so long as an Emergency Manager is in place.

4. Serve, advise and report to the Board, including:
    a. Advise and report to the Board as required by Public Act 436;
    b. Fully comply and assist the Board in meeting all duties assigned to it by the governor pursuant to MCL 141.1563(h);
    c. Provide all budgetary information requested by the Board;
    d. Serve as the primary contact between the Board and the City, including any department heads, officers, attorneys, accountants, employees, and any other contractors or consultants hired by the City to assist the City Administrator or the City in the discharge of powers, duties, functions, and responsibilities;
    e. Promptly and effectively communicate with the Board regarding any matter that may have a significant financial impact on the City.

5. Direct City department heads in carrying out the daily activities of the City, in the assembly of financial and management information; and in the gathering and assembly of pertinent data and information and recommendations for the Mayor and City Council's consideration in making executive determinations and policy.

6. Translate executive decisions and policies of the Mayor into administrative procedures for the cost effective and efficient operation of the City.

7. Implement legislative action of the City Council.

8. Monitor and manage the administrative inter-activity of the City departments so the delivery of public services represents an efficient, effective, and coordinated effort.

9. Interact with other governmental agencies as requested by the Mayor or City Council.

10. Prepare and review correspondence, reports, speeches, resolutions, and other material for public relations purposes. Answers citizen and official inquiries regarding City policy matters.

11. In consultation with the Mayor, direct the assembly of information and items for consideration by the Council, and provide them to the City Clerk for inclusion on the appropriate agendas.

12. Regularly consult with the Mayor in the development of actions with respect to the Mayor's executive functions, and with matters relating to the daily administrative functions of the City, including the evaluation of the performance of department heads, and the resolution of customer service issues.

13. Except to the extent prohibited by or in material conflict with applicable laws and authorities, the City Administrator or designee shall attend all meetings of the City Council, both public and closed, with the exception of those closed meetings devoted to the consideration of any action or lack of action on, or pursuant to, this Agreement, or any amendment thereto, or the City Administrator's evaluation. The City Administrator shall advise members, and make recommendations consistent with policy objectives, strategic planning and administrative activities.

14. Attend public meetings and events; give presentations and information to the public regarding matters of City business.

15. Manage and oversee all department heads, division heads, managers and non-elected City employees. This shall include an annual written performance evaluation of all department heads, including those identified in paragraphs 15, 16 and 17.

16. Recommend, subject to the Mayor's approval, the following appointments:

    a. Chief of Police;
    b. Fire Chief;
    c. Director of Finance;
    d. Planning & Development Director;
    e. Director of Department of Public Works;
    f. Chief Legal Officer;
    g. Chief Personnel Officer.

17. Recommend, subject to the Council's approval, the following appointments: City Clerk and City Auditor.

18. With the exception of those positions set forth in paragraphs 16 and 17, appoint all department heads, division heads and management positions, including the City Treasurer, Purchasing Director and the City Assessor, subject to any collective bargaining agreement(s) that may be applicable.

19. Ensure that all appointment processes, whether by the Mayor, Council or City Administrator, are open, competitive, and administered by the Human Resources Department or a qualified recruitment firm, with selection of the most qualified candidate to be based on defined education, experience, and professional standards appropriate to the position.

20. All appointments made pursuant to paragraphs 15, 16 and 17 shall serve at the pleasure of the City Administrator based on performance review.

21. Review current and potential litigation and labor disputes with the City Attorney and Mayor, and as needed the Board, and have complete decision making authority on behalf of the City, on all matters of litigation and labor disputes, including the ability to settle or initiate lawsuits and resolve labor disputes. The Mayor and City Council shall be consulted on such matters prior to implementation.

22. Negotiate all collective bargaining agreements on behalf of the City.

23. Work collaboratively with the City Council, the Mayor, other City or State officials and the Board to successfully transition to the termination of receivership for the City by supporting, implementing, and maintaining the financial and operating plans and the reforms instituted by the City's emergency managers, including but not limited to, the financial and operating plan for the city under Section II Act 436, and by providing appropriate training and explanation of City operations.

24. Serve as an official City representative before the Board, State departments and agencies, and the Michigan Legislature, with assistance from the Finance Director and the Mayor.

25. Be responsible for and vested with full authority necessary to effectively direct and supervise the day-to-day operations of the City by seeing that all laws and ordinances are faithfully executed, preparing the proposed annual budget as recommended by the Finance Director and any accounting firm retained by the City, and supervising the expenditures of all sums appropriated to and the attainment of all objectives established for departments of the executive branch of the City and working collaboratively with all officers and officials to effectively execute daily operations.

26. Ensure that a rolling six-year capital improvement plan is annually prepared in accordance with applicable law and the City's Code of Ordinances. Coordinate with the Mayor on the annual preparation of a rolling two-year budget

27. Review, approve and co-sign with the Mayor all contracts on behalf of and entered into by the City and modify or terminate any current contract with the City.

28. Approve all financial policies, City policies and procedures, job descriptions and personnel policies for the City, after consultation with the Mayor and City Council.

29. Designate check signers on all City bank accounts.

30. Refer City Council communications to the appropriate City employee or investigate such matter(s) and inform the City Council of the results of such efforts. Provided, however, when responding to City Council referrals, the City Administrator shall have discretion to utilize the personnel and resources the City Administrator deems reasonable and so as to avoid unnecessary interruption of services or incurrence of unnecessary costs.

31. Any investigation by the City Council, as contemplated by Charter §3-205 and §3-206, including the power to subpoena witnesses, shall be subject to the City Administrator's review and approval, so as to avoid unnecessary interruption of services or incurrence of unnecessary costs.

32. In the event the Mayor or Council fails to perform any duty or take any required action after having been afforded a reasonable opportunity to do so, the City Administrator may perform the duty or function of the Mayor or Council upon approval of the Board.

This Order may be amended, modified, repealed or terminated by any subsequent Order issued by the Emergency Manager.

Flint Water Optimization Plan Receives Go Ahead from MDEQ for Additional Corrosion Control

Flint, Michigan – November 05, 2015 – The City of Flint's Department of Public Works (DPW) has received approval from the Michigan Department of Environmental Quality (MDEQ) for its plan to introduce additional corrosion control agents to water it buys from Detroit. It is expected that the additional corrosion control agents will further reduce the damage caused to water mains and service lines by water corrosion. While using the Flint River as a water source, the City was not required to use corrosion control as part of its Water Optimization Plan. That decision led to accelerated damage to underground pipes due to the corrosiveness of Flint River water.

"We are trying to reverse the effects of the more corrosive river water and better protect our underground infrastructure from deteriorating, and in turn protect our families and our children from exposure to metals such as lead and copper," said DPW Director Howard Croft. Older houses built before 1986 have the likelihood of having plumbing and services lines containing lead and copper.

Last month Flint resumed buying treated water from Detroit after it was learned that elevated levels of lead had been found in children living in the City. Flint also worked with local aid agencies to provide water tap mounted filters to every water customer in the City. Tests on water hardness throughout the City have confirmed that Detroit water has made its way to every customer.

Hello Eric,

Attached is my analysis outlining the powers of the City Administrator and the May and City Council for the City of Flint as described by Emergency Manager Orders. The orders were fairly concrete but I did identify some gaps (many of which might be explained in the City Charter and other documents), that left some unanswered questions.

Let me know if you need anything else.

City of Flint Emergency Manager's Orders Analysis

11/04/15

Summary of Emergency Manager's Order #20 (EMO 20) also referred to as the "EM Final Order", and Emergency Manager's Order#3 (EMO 3) also referred to as "City Administrator"

City Administrator's Powers

Management of Key City Staff

- City Administrator directs all Department Heads[1] in carrying out daily activities (EMO 3 p.2), and manages all department heads, division heads, and managers via written performance evaluations (EMO 3 p.3), these positions serve "at the pleasure of the City Administrator" (EMO 3 p.4)
- City Administrator must regularly consult with the Mayor on the daily administrative functions of the City Administrator
- EM Order Expressly prohibits the City Council[2] from interfering with the employees of the City (EMO 20 p.3).
- *Sole authority on compensation of City Staff and appointed officers (EMO 20 p.6)*
- Terminates department heads with approval of the board (EMO 20 p.7)

Participates in the hiring process for Key City Staff[3] (EMO 3 p.3, 4)

- City Administrator Recommends candidates to the Mayor:
    - Chief of Police
    - Fire Chief
    - Director of Finance
    - Planning and Development Director
    - Director of Public Works
    - Chief Legal Officer
    - Chief Personnel Officer
- City Administrator recommends the following positions to the City Council:
    - City Clerk
    - City Auditor
- City Administrator appoints all other Department headers, division heads, and management positions including:
    - City Treasurer
    - City Assessor
    - Purchasing Director
- Ensures that all appointment processes are open, competitive, and administered by the HR department with selection of the most qualified candidate

---

[1] EMO 3 does not state that City Manager solely performs this task, leaves some room for interpretation

[2] Is in the section of the EMO named "Mayor and City Council", but section only expressly calls out the City Council

[3] This language defines a process, but does not define it as the sole process, or that City Council, or the Mayor have to choose a candidate recommended by the City Administrator

Under certain circumstances, may perform the duty or function of the Mayor and City Council subject to the approval of the Board (EMO 3 p.5)

Mayor and City Council Powers

Mayor and City Council Hiring and Firing Powers (EMO 20 p.3)

- Mayor and City Council must fill any vacancies in the office of the City Administrator (only position mentioned) within 120 days, with the approval of the Board
- The Mayor and City Council cannot terminate any employee without Board approval[4]
- The Mayor and City Council may make changes to the job description of the City Administrator, not to go into effect without approval of the Board

Process for removal of City Administrator

- The City Administrator may only be removed in accordance with the provisions set forth by EM orders[5] (EMO 20 p.7)
- Complaints against the City Administrator from the Mayor or City Council must be made available to the City Administrator in writing (EMO 20 p.7)
- Administrator may not be terminated, suspended, or placed on administrative leave without the approval of the Board (EMO 20 p.6)

Revisions, or modifications to EM orders (EMO 20 p.11)

- City Council and Mayor shall not revise any order made by EM prior to one year after the termination of receivership

Unanswered Questions (in addition to those footnoted)

1. What is the process for modifying the roles, and powers of the Department Heads? The EM orders do not appear to specifically address this

2. What is the process for removal of a Department Head? It does not appear to be clearly outline in the EM orders.

3. What are the provisions by which a City Administrator can be removed? Language references EM orders, but it is unclear which is to be referenced.

---

[4] The statement in the EM order may imply that they have some hiring and firing powers of positions other than City Administrator subject to the approval of the board

[5] EMO 3 does not appear to have provisions for the removal of a City Administrator

++++**Weekly Critical Issues —November 6, 2015**

- **Allen Park**—Status of bond tender and successful road millage proposal.
- **Benton Harbor**—Finance Director search will need RTAB approval, I plan to be involved in the process. Darwin has not been contacted by the mayor elect as of yesterday suggested that the RTAB should stay another two years or else the City will revert back to problematic ways. I will be scheduling a meeting with Wayne, mayor elect and Darwin in the coming weeks. Are we going to revise the RTAB evaluation for Benton Harbor?
- **Ecorse** – Wayne should have an easier time to manage now with the election results. Status of their five year financial plan review. We should move forward on reducing scope of RTAB authorities. One additional RTAB member is needed (Joan Brophy).
- **Flint** – Meeting in Flint with the new mayor is being scheduled for early next week. City has reinstituted their water shutoff program which help to increase revenues. Lead issue was known to City, DEQ, and EPA in April. Waiting on word from Carla on the latest FOIA request. Fred wants to have the RTAB meeting on Thursday. I plan to attend the RTAB meeting and work in Flint in the afternoon.
- **Hamtramck-** the interim Police Chief will be appointed as the Police Chief. Phase 3 of the pension study can we begin or should I wait for Wayne to sigh the signature sheet? The City auditors, Greg Terrell have started the audit process. The Court filled the City Council vacancy with the candidate that Katrina thought should have the seat. Katrina released a Confidentiality Agreement with the former Police Chief due to a FOIA request. Possible election irregularities may result in an investigation.
- **Highland Park-**The collection firm that has begun to collect past due ($7M) water and sewer bills. Cathy has indicated that the City has over 500 aged payables including a DTE bill of $200K for the water pumping station. The City has successfully reduced their OPEB costs to the prescribed level stated in the Plan of Adjustment. The City has purchased new water meters and will be installing them. There is a problem with the cell towers for the new meter read system. A conference call on Tuesday has been scheduled with Cathy to discuss the way forward.
- **Lincoln Park-**His exit will be December 18th. I have a revised EM Final Order. We are hoping to find several RTAB candidates soon. E-Loan may be necessary? I will be scheduling a call with MERS for early next week do you want to be invited?
- **Inkster-** Mark indicated that some of the new council members may be difficult. Millages for senior and parks were approved by voters. Senior services should see an improvement due to additional funding. I am hoping to schedule a meeting with the new mayor and Mark soon.
- **Pontiac-** the mayor wants to hire an executive secretary. I am planning to visit Pontiac to meet with the Mayor and Jane. The Mayor would like to do a study of the Phoenix Center. Problem with the GERS Board financial advisor. Six million may be in jeopardy. One RTAB member is needed.
- **River Rouge**—Drew's memo on the exit.
- **Royal Oak Township-** We may receive a proposal from Oak Park for police service. We have received a draft 2016 budget from Robert. Montgomery and Co. the accounting firm has

submitted an invoice for $17,000. He has hired Mr. Fedewa for accounting. According to Robert, he is doing a good job and is well liked by the Clerk and Treasurer.

- **Miscellaneous Items**—the draft of the November Governor's Memo has been revised with election results and sent to Angela. FOIA request is on hold until word from Carla. Meeting with Ken Sikkema, Tom and Wayne on Monday regarding Flint water. I would like to discuss questions with you regarding yesterdays discussion.

Westward ho: KWA pipeline groundbreaking starts new path for water

By Ron Fonger | rfonger1@mlive.com
on June 28, 2013 at 6:00 AM, updated July 03, 2013 at 9:34 AM

Tweet Pin it Reddit Email

Part of the construction site for the Karegnondi Water Authority water pipeline is shown in this submitted photo.

(This story has been updated to correct an error.)

GENESEE COUNTY, MI – When dignitariescut the ribboninear Lake Huron on the new Karegnondi Water Authority pipeline today, June 28, they won't have to look far to imagine the project's initial path back toward Genesee County.

Drain Commissioner Jeff Wright said plans call for the pipeline to be buried in the public right of way under Fisher Road, a gravel road that borders Sanilac and St. Clair counties, most of the way to Lapeer County.

Talked about for decades, the water pipeline will put Flint and Genesee County into the water supply business and end its time as a customer of the Detroit Water and Sewerage Department.

Detroit water prices have increased an average of more than 9 percent annually for the last 12 years, according to the county.

The county and city are the key members or the KWA and officials in Sanilac and Lapeer counties have expressed interest in future raw water purchases from the authority. Wright said the city of Lapeer is still considering membership in the KWA.

Flint emergency manager Ed Kurtz has said the city of Flint alone has the potential to save at least $100 million during the next 25 years by using KWA water.

Friday's ceremony at Fisher Road and M-25 marks the start of construction of the intake portion of the pipeline and heavy equipment is already at the site, laying the foundation for that work, much of which will be done in Lake Huron.

While that work gears up this summer, talks are continuing over the design of the pipeline and the firming-up of the exact route it will be built on.

"About 95 percent of the pathway has been set," Wright said. "The other 5 percent -- we're looking at some options ... potentially a cost savings" by using some private property.

The drain commissioner said he expects to contact about 10 owners of farmland in Lapeer County as early as next week about his interest in using their land. Talks with road commissions in Sanilac and St. Clair counties about Fisher Road started about six months ago, he added.

Sanilac County Road Commission Engineer/Manager Robb Falls said he's already getting questions from Fisher Road residents about the $274-million pipeline project, which will require detours.

"A lot of people, I think, are happy for the project," Falls said. "They figure maybe the road will actually be improved (as a result). A couple of people have been upset (but) hopefully, maybe the pipeline would allow some industry in the area."

The potential for attracting new businesses with a need for raw water is certain to be one of the subjects of speeches kicking off the pipeline ceremony, which starts at 10 a.m. Friday.

Several officials, including Wright, Flint Mayor Dayne Walling, state Reps. Pam Faris and Charles Smiley, and county Board of Commissioners Chairman Jamie Curtis are among scheduled speakers.

Wright said visitors to the ground-breaking site might be surprised by how much preparation work, including construction of a service road, has already started.

"It's amazing ... I'm surprised myself (about) how much they have gotten done," including about 100 feet of road, drainage work, and the creation of a 3-acre staging area for the intake project work, he said.

Construction of the water intake will require tunneling under the floor of Lake Huron and the use of divers, who will connect sections of 72-inch diameter pipe underwater.

The work is expected to take 30 months to complete and to bring an estimated 250 workers to the construction zone, located on 230 acres, including 40 acres of shoreline, which is owned by the county.

L. D'Agostini & Sons Inc., a Macomb-area contractor, won the right to build the intake for $24.6 million, and the job, including engineering, is expected to cost $26.7 million.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

Flint Water Timeline (11-06-15)

1. **June 26, 2012** – Letter from Flint EM Mike Brown to DWSD for permission to begin blending Flint River water with treated water from DWSD. The letter indicates that the DEQ is supporting this option and its implementation would save the City between $2M and $3M annually.

2. **September 20, 2012** – Letter from Flint EM Ed Kurtz to DWSD requesting written permission to implement the blending option. Approval is requested by October 1, 2012.

3. **October 31, 2012** – Analysis by the Flint Finance Director suggests that the annual cost to purchase water from DWSD will steadily increase to $23M per year by fiscal year 2020.

4. **November 2012** – Treasury retains Tucker, Young, Jackson and Tull (TYJT) to evaluate the KWA proposal to the City of Flint.

5. **November 6, 2012** – Letter from Flint Emergency Manager Ed Kurtz to State Treasurer Dillon that a proposal from DWSD is expected but that the initial assessment is that switching to KWA is in the best interest of the City of Flint.

6. **February 6, 2013** – TYJT issues a final report to Treasury on the comparison between Karegnondi Water Authority (KWA) and DWSD. Analysis suggests that the KWA option is the cheaper option for the City of Flint.

7. **March 2013** – DWSD contacts the City of Flint to begin direct negotiations on a contract extension. Multiple options are provided to the Flint Emergency Manager (EM) Ed Kurtz.

8. **March 25, 2013** – The Flint City Council endorses joining KWA.

9. **April 11, 2013** – State Treasurer Andy Dillon authorizes Flint EM Ed Kurtz, pursuant to Section 12(3) of P.A. 436 of 2012, to enter into a contract with KWA if a final offer from DWSD is either not received for rejected in good faith based upon specific objections.

10. **April 15, 2013** – DWSD provides a best and final offer to the City of Flint. Analyses by Flint EM Ed Kurtz, the Department of Environmental Quality and Treasury's Office of Fiscal Responsibility independently conclude that the KWA option is cheaper for the City of Flint.

11. **April 16, 2013** –Flint EM Ed Kurtz informs the State Treasurer that the City will join KWA. This decision was officially announced May 1, 2013.

12. **April 17, 2013** – DWSD transmits a letter to Flint EM Ed Kurtz terminating service to the City of Flint, effective April 17, 2014.

13. **June 26, 2013** – Groundbreaking for the Karegnondi Water Authority. Flint also requests full time use of the Flint Water Treatment Plant with Flint River water as a source.

14. **June 28, 2013** – Financing Contract between the City of Flint and KWA is approved. Effective August 1, 2013. This document was signed by EM Mike Brown.

15. **July 08, 2013** – The City retains Lockwood, Andrews & Newman engineering firm to get the City's water plant up and running while the KWA pipeline is built.

16. **February 19, 2014** – The KWA Board of Directors adopts Resolution 2014-01, authorizing KWA to bond for water line construction on-behalf of the City of Flint.

17. **April 17, 2014** – Water service from DWSD officially ends. The City of Flint also conducts two separate public forums regarding the use of Flint River water, upgrades to the City's water system and the overall cost of the switch to KWA.

18. **April 25, 2014** – City conducts public event marking the transition to the use of Flint River water. DEQ information shows that transition complete by May 2015.

19. **January 2, 2015** – The City issues a public notification stating the City water system exceeds the TTHM maximum contaminant level.

20. **March 3, 2015** – Flint EM Jerry Ambrose provides a memorandum to Deputy State Treasurer Wayne Workman stating that a reconnection to DWSD will cost the City $10.1M/year and that water purchases could be as high as $1M/month.

21. **March 12, 2015** – Veolia issues the final operational evaluation of the City's water system.

22. **November 4, 2015** – The EPA issues its final report on high lead levels at three residences in the City.

Hey Terry,

Don't know if you've listened to my lengthy voice mail yet. In reviewing some materials re Flint that I FOIA'd from MDEQ, there's a 2013 report commissioned by then-Treasurer Dillon about the advisability of Flint switching to the Karegnondi Water Authority. The report actually finds that Karegnondi is a risky proposition and could wind up costing a lot more, and says DWSD is the better option. So why was the decision made to go with the KWA?

Need an answer ASAP. This is for Sunday.

Nancy

>
> First Nancy Kaffer of the Freep is writing a column for Sunday to do with Flint and the choice of KWA over DWSD. She had FOIA'd a doc from MEDQ that had a 2013 report from Andy Dillion that says that KWA is a risky proposition and that DWSD was a better option. I let her know that the report was just a starting point in the process and as more information became available a joint decision was made by the EM, council and other key city leaders.
>
> Second Matt Dolan from the Freep called and said that he was doing a one year wrap up on Detroit coming out of Bankruptcy and he wanted to speak to Ron Rose. I offered up Nick instead (with his permission) Nick did a 15 minute phone interview with him. After a few softballs about a year later Matt opened a line of questions about possible pension liabilities in 2024. NK did a good job of staying high level. I believe that Matt reached out on his own and spoke to Ron as well as John Hill.

Weekly Conference Call Notes – Nov. 09, 2015

Allen Park –Nov. 6 –Mayor Matakas, M. Kibby, B. Cady E. Cline, P Dostine

Election commentary

- Road millage. 10-year millage passed ($1.43M). Meetings will begin with engineering, DPW, to create a list of roads for the next four years. Plan is to get bid specs out Dec/Jan, thus locking in lower rates. With the city bundling the millage, with Act 51 ($1.9M) with $500K general fund, it will have approximately $3.8M annually to do reconstruction, crack sealing, street sectioning. Allen Park can also use the millage as a match for the county's FAC program (20% match).
- The success of the millage as well as the mayor winning by a large margin and incumbent councilpersons winning are all seen as a vote of confidence in a way, the mayor stated.
- The city is offering MML training to the entire council.

Bond update

- BAML dropped the ball, Cady said. BAML wouldn't give AP a guarantee to buy the new issuance.
- Allen Park got an extension till Nov. 19 to make final the recent bond tender. Meanwhile, Allen Park is looking elsewhere for another institution.
- S & P gave a below grade rating to Allen Park (CCC+ up from CCC-).
- City Administrator Kibby sent Treasury a letter requesting financial help.

Order 29

- Kibby requested Order 29 be amended to offer new hires a choice of the 20% or the hard cap. Currently, Order 29 mandates the 20% premium cost, hard cap is not an option.

Benton Harbor –Nov. 5 – D. Watson, R. Widigan, E Cline, A. Heimann, D. Hudson

- **Weekly Priorities**
  - City approved a contract with AFSCME.
  - City attorney will update the commission on the ongoing lawsuits, no major changes on the Lange, O'Brien, Unruh lawsuits.
    - Two new lawsuits: wage and hour claim and a wrongful termination/first amendment claim.

- **Update on Vacant Positions:**
  - **Finance Director:** MML search approved by commission 9-0
    - Darwin will speak with the MML and get the process going, vote is subject to RTAB approval.

- **Water Department Superintendent:** Fleis & VandenBrink Engineering has started working with the city.
  - Still looking to fill the superintendent position.

- **Assistant City Manager/Community Development Director:** City has some potential interim individuals to fill the position, short term while the city looks for someone to fill the position.

- **Assessor:** Assessor is on board and beginning work, a lot of work to do.
  - None of the building permits found have been recorded.
  - None of the new construction have been updated (roughly $12M in new contraction).
  - Meeting with BS&A to develop a plan of attack.
  - A letter will be submitted to the state and the assessors division regarding what the past assessor has done.

- **City Manager Evaluation Discussion**: Already rumors to replace Darwin with individuals friends of the city commissioners.
  - Staff is very concerned that if Darwin is gone they will all be fired.

- **E-Loan Payment**: City has made the payment.

- **Election/Atmosphere @ City Hall:** Newly elected Commissioner, Bryan Jones is a supporter of the emergency manager law.
  - Commissioner Muhammad will have to vacate his commission seat to become mayor.
  - Mayor-elect Muhammad has not reached out to Darwin.
  - Mood is very somber at city hall.
  - Darwin stated if the RTAB left today, the city would be under emergency manager within 2 years, likely sooner.
    - Commissioners are very upset and if there was no state oversight they would blow through the budget.
    - Likely to be multiple attempts to change/fire staff.
    - He stated that there are rumors the state is looking to pull the RTAB, Darwin stated that would be a grave mistake.
    - After election results were in, Commissioner Seats entered the building and removed a photo of Mayor Hightower off the wall

Ecorse – Oct. 20 – W. O'Neal, R. Byrne, D. Van de Grift, P. Dostine, A. Heimann

Priorities

- Water audit. Ecorse is in the process of doing a water audit. The city found that 24 % of the bills are estimates. Ecorse loses approximately $940K worth of water annually. The city has discovered the use of straight pipes in 3 houses. O'Neal believes there are more in the city.
- O'Neal reported that the Water and Sewer fund currently has a positive cash flow.
- O'Neal said there is a lack of communication between the water billing department and the DPW. Broken or defective meters are not being reported to DPW. O'Neal also said the city will be raising the minimum water rate.

Fire Dept.

- Firemen are campaigning for Mayor Pro Tem Miller for mayor. O'Neal said at least three department heads have said they will resign if Miller is elected mayor.

OPEB benefit audit

- O'Neal said that the OPEB benefit audit has been completed. "Some discrepancies were found. But overall, it's wasn't bad," O'Neal said. A deceased female was still receiving BCBS coverage. Ecorse is going to request a refund from BCBS.

DPW Business Plan

- O'Neal said the potential savings from taking DPW in-house is approximately $57K annually. But this would depend on the wages Ecorse would pay workers. O'Neal said he is finding it difficult to find even part-time workers for DPW. O'Neal said it's unlikely the in-house plan will be implemented at this point.

Flint – Nov. 4 – Mayor Walling, N. Henderson, J. Freeman, F. Headen, W. Lamphiery, E. Cline, P. Dostine, D. Hudson, A. Heimann

Elections

- Mayor Walling – Reiterate a few things already shared, hopes that this group can continue to meet, and involve City Council, Council presence has been essential. Saying that we are going to be met with an entirely different approach, one of "anger and resentment". Will need to be much more "Hands On".
- Called for additional investments to help deal with the elevated lead levels in high risk people's blood
- Believes that the new administration will be very destructive
- We "have his number"

- ALL- Nervous about new administration, and are looking for the State to be more involved to ensure that the atmosphere does not become too destructive.
- N Henderson – Suggested that all department heads are at risk because new mayor has made promises to people for these department head jobs.
- J Freeman – Not likely going to be elected for City Council president

Priorities

- Grants: Received three grants from the Ruth Mott Foundation
- $1.5M (three yr) from the Ruth Mott foundation for Police work in the North End of the City. Not for operational policing, but for public safety programs.
- Neighborhood planning grant $300K, can work with previous grant, and are waiting on agreements
- Park Grant $70K

Devil's Night / Halloween report

- No Major issues
- One fire, basement fire. Two more brush fires, nothing major. Sat it rained

Water System Update

- Switched to DWSD
- Waiting on a finalized permit, to add more phosphate to the water. Already have phosphate in water, but they believe that more is needed, and special permit is needed to add more. Recommendation from that there is substantially more Phosphate in the water.
- Technical advisory committee meeting on November 9th
- N Henderson will have a private EPA Meeting
- EPA will have a task force meeting on Tuesday (Not public information)

KWA bond payment date

- November 2016 - Working on it now (called Jodi? While we were on call to find date)

Planning Director Start-date

- First day will be November 9th

Miscellaneous

- RTAB vacancy – The Governor's office is taking names and then they will be making the decision. Unclear how long that process will take.
- Veterans Day – will not be having a phone call with Veteran's day being Wednesday, Thursday will be the RTAB meeting not Wednesday, confirmed that they had posted the RTAB meeting appropriately.

++++**Weekly Critical Issues —November 12, 2015**

- **Allen Park**—Status of bond tender.
- **Benton Harbor**— I will be scheduling a meeting with Wayne, mayor elect and Darwin. Are we going to revise the RTAB evaluation for Benton Harbor?
- **Ecorse** – Wayne should have an easier time to manage now with the election results. Status of their five year financial plan review. We should move forward on reducing scope of RTAB authorities. One RTAB member is going to be appointed (Joan Brophy).
- **Flint** – Meeting in Flint with the new mayor and Natasha next week. Telephone call with Natasha yesterday. City still has not added additional phosphate at water plant hopefully by Thanksgiving. City has reinstituted their water shutoff program which help to increase revenues. Lead issue was known to City, DEQ, and EPA in April. Waiting on word from Carla on the latest FOIA request.
- **Hamtramck-** the interim Police Chief will be appointed as the Police Chief. Phase 3 of the pension study can has begun. Possible election irregularities may result in an investigation. Katrina wants to purchase DPW equipment for in-house snow removal.
- **Highland Park-**The Judge has ordered a meeting on November 19th to reach a possible settlement in the DWSD lawsuit. Cathy has indicated that the City has over 500 aged payables including a DTE bill of $200K for the water pumping station. The water pumping station needs approximately $250K of repairs. The City has successfully reduced their OPEB costs to the prescribed level stated in the Plan of Adjustment. The City has purchased new water meters and will be installing them. There is a problem with the cell towers for the new meter read system. A conference call on Tuesday has been scheduled with Cathy to discuss the way forward.
- **Lincoln Park-**His exit will be December 18th. I have a revised draft EM Final Order that will be reviewed by the AG's office early next week. We are hoping to find several RTAB candidates soon. E-Loan may be necessary? I have a call with MERS today to discuss pension contribution options. MSHDA meeting on November 20th.
- **Inkster-** Mark indicated that some of the new council members may be difficult. Millages for senior and parks were approved by voters. Senior services should see an improvement due to additional funding. A meeting with the new mayor and Mark will be scheduled.
- **Pontiac-** the Mayor wants to hire an executive secretary. I am planning to visit Pontiac to meet with the Mayor, Joe, and Jane. The Mayor would like to do a study of the Phoenix Center. Problem with the GERS Board financial advisor. Six million may be in jeopardy. Mr. Bernstein may be the new RTAB member.
- **River Rouge**—*Drew's memo on the exit.*
- **Royal Oak Township**- We may receive a proposal from Oak Park for police service. We have received a draft 2016 budget from Robert. Montgomery and Co. the accounting firm has submitted an invoice for $17,000. The cash flow is nearly completed. Meeting with MSHDA on housing development discussion soon. Potential judgement against Township for $100,000.

- **Miscellaneous Items**— FOIA request is on hold until word from Carla. Meeting with Ken Sikkema, Tom and Wayne on Monday regarding Flint water. Problem with the Baird invoice for the HP High School project. I would like to discuss questions with you regarding OFR discussion.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

Flint Water Timeline (11-09-15)

1. **June 26, 2012** – Letter from Flint EM Mike Brown to DWSD for permission to begin blending Flint River water with treated water from DWSD. The letter indicates that the DEQ is supporting this option and its implementation would save the City between $2M and $3M annually.

2. **September 20, 2012** – Letter from Flint EM Ed Kurtz to DWSD requesting written permission to implement the blending option. Approval is requested by October 1, 2012.

3. **October 31, 2012** – Analysis by the Flint Finance Director suggests that the annual cost to purchase water from DWSD will steadily increase to $23M per year by fiscal year 2020.

4. **November 2012** – Treasury retains Tucker, Young, Jackson and Tull (TYJT) to evaluate the KWA proposal to the City of Flint.

5. **November 6, 2012** – Letter from Flint Emergency Manager Ed Kurtz to State Treasurer Dillon that a proposal from DWSD is expected but that the initial assessment is that switching to KWA is in the best interest of the City of Flint.

6. **February 6, 2013** – TYJT issues a final report to Treasury on the comparison between Karegnondi Water Authority (KWA) and DWSD. Analysis suggests that the KWA option is the cheaper option for the City of Flint.

7. **March 2013** – DWSD contacts the City of Flint to begin direct negotiations on a contract extension. Multiple options are provided to the Flint Emergency Manager (EM) Ed Kurtz.

8. **March 25, 2013** – The Flint City Council endorses joining KWA.

9. **April 11, 2013** – State Treasurer Andy Dillon authorizes Flint EM Ed Kurtz, pursuant to Section 12(3) of P.A. 436 of 2012, to enter into a contract with KWA if a final offer from DWSD is either not received for rejected in good faith based upon specific objections.

10. **April 15, 2013** – DWSD provides a best and final offer to the City of Flint. Analyses by Flint EM Ed Kurtz, the Department of Environmental Quality and Treasury's Office of Fiscal Responsibility independently conclude that the KWA option is cheaper for the City of Flint.

11. **April 16, 2013** –Flint EM Ed Kurtz informs the State Treasurer that the City will join KWA. This decision was officially announced May 1, 2013.

12. **April 17, 2013** – DWSD transmits a letter to Flint EM Ed Kurtz terminating service to the City of Flint, effective April 17, 2014.

13. **June 26, 2013** – Groundbreaking for the Karegnondi Water Authority begins. Flint also requests full time use of the Flint Water Treatment Plant with Flint River water as a source.

14. **June 28, 2013** – Financing Contract between the City of Flint and KWA is approved. Effective August 1, 2013. This document was signed by EM Mike Brown.

15. **July 08, 2013** – The City retains Lockwood, Andrews & Newman engineering firm to get the City's water plant up and running while the KWA pipeline is built.

16. **February 19, 2014** – The KWA Board of Directors adopts Resolution 2014-01, authorizing KWA to bond for water line construction on-behalf of the City of Flint.

17. **April 17, 2014** – Water service from DWSD officially ends. The City of Flint also conducts two separate public forums regarding the use of Flint River water, upgrades to the City's water system and the overall cost of the switch to KWA.

18. **April 25, 2014** – City conducts public event marking the transition to the use of Flint River water. DEQ information shows that transition complete by May 2015.

19. **January 2, 2015** – The City issues a press release stating the City water system exceeds the TTHM maximum contaminant level.

20. **March 3, 2015** – Flint EM Jerry Ambrose provides a memorandum to Deputy State Treasurer Wayne Workman stating that a reconnection to DWSD will cost the City $10.1M/year and that water purchases could be as high as $1M/month.

21. **March 12, 2015** – Veolia issues the final operational evaluation of the City's water system.

22. **September 3, 2015** – MDEQ testing of the City's water shows TTHM levels are below the required action level.

23. **September 25, 2015** – Genesee County Health Department and the City of Flint issues a lead advisory for residents to be aware of lead levels in drinking water after hearing concerns from the medical community.

24. **October 16, 2015** – The City of Flint reconnects to Detroit Water.

25. **November 4, 2015** – The EPA issues its final report on high lead levels at three residences in the City.

Flint Water Advisory Task Force

November 12, 2015

Ms. Karen Weaver, Mayor
Ms. Natasha Henderson, City Administrator
City Hall
1101 S. Saginaw St.
Flint, MI 48502

Dear Mayor Weaver and Administrator Henderson:

As you are aware, Governor Snyder has appointed a Flint Water Advisory Task Force to review what led to the problem of high lead levels in drinking water, review the related regulatory framework, and make appropriate recommendations to prevent reoccurrence in Flint or elsewhere in Michigan. Members of the Task Force are Dr. Lawrence Reynolds, Dr. Matthew Davis, Eric Rothstein, Chris Kolb, and Ken Sikkema.

As part of our review, we would like to talk with appropriate individuals who are or were responsible for Flint Water Treatment Plant operations and capital planning during the past few years. We think these discussions are important for us to understand how the source water conversion was planned and implemented, how challenges in treating water from the Flint River were managed, and how water quality in the distribution system was monitored and addressed.

Individuals we would like to meet with include (1) Howard Croft, (2) DPW Staff – Daugherty Johnson, Brent Wright, Mike Glasgow and (3) Warren Green with the LAN engineering firm. We are requesting your assistance in securing the availability of these individuals in the afternoon of Monday, November 23 or anytime on Tuesday, November 24. If preferable, we can contact these individuals directly for scheduling purposes and would request your assistance in ensuring this scheduling is appropriately prioritized.

Please feel free to contact us through email or by telephone. Thank you for your assistance and cooperation in this important matter.

Sincerely,

Chris Kolb

Hi there Ron –

Sure – can do now.

We haven't been served yet so can't comment on specific details. What would say is that we're focused on moving forward and ensuring public health and clean, safe drinking water. The governor has outlined a detailed multiple step action plan for both immediate, mid and long term. He has also appointed a task force doing a very important job of reviewing all past actions. They are a bipartisan group of people of the highest integrity, experts in their fields and widely respected who are going to do a very thorough, objective review.

Just let me know if anything more needed at all.

Thanks and best,
SW

Sara:

Dave Murray said you would be handling any comment on the lawsuit filed in U.S. District Court Friday.
Do you have an estimated time when you will be available or have a comment?
I'm putting the story together now.
Thanks,

Ron Fonger

COMPLAINT FOR INJUNCTIVE AND DECLARATORY RELIEF MONEY DAMAGES AND JURY DEMAND

INTRODUCTORY STATEMENT

1. This class action is pursued on behalf of tens of thousands of residents ("Class") of the City of Flint ("Flint"), who from April 25, 2014 to the present, have experienced and will continue to experience serious personal injury and property damage caused by Defendants' deliberate decision to expose them to the extreme toxicity of water pumped from the Flint River into their homes, schools, hospitals, workplaces and public places.

2. Defendants, who are all state of Michigan ("State") or Flint government employees, acting under the color of law, deliberately deprived Plaintiffs and the Plaintiff Class of the rights and guarantees secured by the 14th Amendment to the United States Constitution in that they deprived Plaintiffs of life, liberty and property without due process of law when they took from Plaintiffs safe drinking water and replaced it with what they knew to be a highly toxic alternative solely for fiscal purposes.

3. "For more than 18 months, state and local government officials ignored irrefutable evidence that the water pumped from the Flint River exposed the

Plaintiffs and the Plaintiff Class to extreme toxicity, causing serious and dire injury and health hazards, and property damage to the Flint water users. These state and local officials, Defendants herein, regularly assured the Flint water users that the water supplied from the Flint River was being properly treated, monitored and tested and was safe to consume and use. Information obtained through the Freedom of Information Act establishes that many of these assurances were known to be false when uttered: state and local officials were not properly monitoring or sampling the Flint River water and delayed in notifying the public of serious safety and health risks in a knowing and deliberate effort to conceal the truth from those who were being poisoned. The deliberately false denials about the safety of the Flint River water was as deadly as it was arrogant."

4. The massive personal and property injuries experienced by Plaintiffs and the Class, and the ensuing environmental disaster, reaches constitutional proportions because defendants, acting under the color of law, both created and increased the risk of prolonged serious and life threatening dangers to Plaintiffs and the Class where none existed before.

5. The state and local government officials, Defendants herein, who made the decision to replace safe water with an alternative that created toxic water, violated the constitutional rights of Plaintiffs and Plaintiff Class members by acting

in a manner that shocks the conscience and was deliberately indifferent to the those constitutional rights, as well as to the health and well-being of the Plaintiffs.

JURISDICTION AND VENUE

6. This is a civil action brought pursuant to 42 U.S.C. § 1983 seeking injunctive and declaratory relief together with monetary damages against Defendants for violation of Fourteenth Amendment of the United States Constitution.

7. This Court has jurisdiction pursuant to 28 U.S.C. § 1331, which authorizes federal courts to decide cases concerning federal questions; 28 U.S.C. § 1343(a)(3) and (4), which authorizes federal courts to hear civil rights cases; and 28 U.S.C. § 2201, the Declaratory Judgment Act. This Court has personal jurisdiction over Defendants named herein as public officials of the State of Michigan sued in their individual capacities and public officials, employees of the City of Flint sued in their official and individual capacities and the City of Flint for violations of plaintiffs' constitutional rights. Similarly, the Court has jurisdiction over the Governor of the State of Michigan, in his official capacity, for prospective relief, exclusively.

8. Venue is proper in this Court as Defendants conduct their business in the Eastern District of Michigan.

PARTIES

A. PLAINTIFFS

9. Plaintiff representatives are citizens of the United States and at all relevant times were residents of Flint – individuals, home owners, parents and minors – who, since April 25, 2014, were and continue to be exposed to highly dangerous conditions created, caused and prolonged by Defendants' deliberate decision to replace safe drinking water supplied by the City of Detroit's water system with the extreme toxicity resulting from water pumped from the Flint River; and these Defendants continued failure to remediate these dangers notwithstanding their knowledge thereof. Plaintiffs bring this action on behalf of themselves and a Class of individuals who were injured in their persons or their property after April 25, 2014 because of their exposure to the toxic water pumped from the Flint Rivers.

B. **DEFENDANTS**

10. All individual Defendants are sued in their individual and/or official capacities as indicated below.

11. Defendant Rick Snyder is the Governor of the State of Michigan and is invested with executive power pursuant to Art. V, Section 1 of the Michigan Constitution. The Governor, is responsible for the management of state government for the health and welfare of its citizens and residents and is sued by plaintiffs and the Class in his official capacity exclusively for prospective equitable relief to correct the harm caused and prolonged by state government and to prevent future injury.

12. Defendant State of Michigan operates its Department of Environmental Quality ("MDEQ"), which is responsible for overall management of the state department responsible for the environmental safety and health of Michigan citizens and residents. The State is sued because, acting through MDEQ, it made the final decision that deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

13. Defendant Daniel Wyant ("Wyant") currently is and at all relevant times was Director of MDEQ and is sued by Plaintiffs and the Plaintiff Class in his individual capacity because he was aware of and participated in the decisions that deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

14. Liane Shekter Smith ("Smith") was at all relevant times Chief of the Office of Drinking Water and Municipal Assistance for MDEQ, holding that position until October 19, 2015 when she was removed because of "mistakes" in the manner in which the Flint water crisis was handled. Smith is individually liable because during her term, as Chief of Drinking Water for MDEQ, she approved of, and thereby participated in, the decisions that deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

15. Adam Rosenthal ("Rosenthal") was at all relevant times a Water Quality Analyst assigned to the Lansing District Office of the MDEQ. Rosenthal is individually liable because, as Water Quality Analyst for MDEQ, he approved of, and thereby participated in, the decisions that deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

16. Stephen Busch ("Busch") was at all relevant times District Supervisor assigned to the Lansing District Office of the MDEQ. Busch is individually liable because as District Office Supervisor of MDEQ he deliberately created, increased and prolonged the hazards by falsely reporting that anti-corrosive agents had been used to treat the highly corrosive Flint River water thereby enhancing the threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

17. Patrick Cook ("Cook") was at all relevant times Water Treatment Specialist assigned to the Lansing Community Drinking Water Unit of the MDEQ. Cook is individually liable because, as Water Treatment Specialist District of MDEQ, he approved of, and thereby participated in, the decisions that deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

18. Michael Prysby ("Prysby") was at all relevant times Engineer assigned to District 11 (Genesee County) of the MDEQ. Prysby is individually liable because

as Engineer assigned to District 11 because he approved of, and thereby participated in, the decisions that deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

19. Bradley Wurfel ("Wurfel) was at all relevant times was the Director of Communications for MDEQ. Wurfel is individually liable because as Director of Communications he was responsible for the deliberate misleading and inaccurate communications that increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

20. Darnell Earley ("Earley") was the Emergency Manager appointed by the Governor on November 1, 2013 and served in this capacity until January 12, 2015. Earley is individually liable because during his term as Emergency Manager of Flint he deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

21. Gerald Ambrose ("Ambrose") was the Emergency Manager appointed by the Governor on January 13, 2015 and served in this capacity until April 28, 2015. Ambrose is individually liable because during his term as Emergency Manager of Flint he deliberately increased and prolonged the hazards, threats and dangers that

arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

22. Dayne Walling ("Walling") was at all relevant times Mayor of Flint from August 4, 2009 until November 9, 2015 when he was unseated by Karen Weaver. Walling is individually liable because, as Mayor, he approved of, and thereby participated in, the decisions that deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

23. Howard Croft ("Croft") was at all relevant times Director of Public Works for the City of Flint. Croft is individually liable because as Director of Public Works, he approved of, and thereby participated in, the decisions that deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

24. Michael Glasgow ("Glasgow") was at all relevant times Utilities Administrator for the City of Flint. Glasgow is individually liable because as Utilities Administrator, he deliberately created, increased and prolonged the hazards of using Flint River water because he provided the MDEQ with misleading and inaccurate reports about the threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

25. Daugherty Johnson was at all relevant times the Utilities Administrator for the City of Flint. Johnson is individually liable because, as Utilities

Administrator, he approved of, and thereby participated inthe decisions that deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

26. The City of Flint is a municipal corporation, so authorized by the laws of the State of Michigan that operates Department of Public Works and provides water to its residents and property owners as part of its responsibilities and services. The City of Flint is liable because, despite the protests of a number of elected and appointed officials within the organization, the municipal corporation itself, through its policy makers, deliberately created, increased and prolonged the hazards, threats and dangers that arose by replacing of safe drinking washing and bathing water with a highly toxic alternative.

STATEMENT OF FACTS REGARDING THE MAYS FAMILY

27. Plaintiff Melissa Mays, age 37, is married to plaintiff Michael Mays, age 40 and is mother and next friend of three minor children, ages 17, 12, and 11.

28. The Mays family at all relevant times lived in a single family home built around 1910 on Beecher Street in Flint.

29. Melissa and Michael Mays were the equitable owners of the home located on Beecher Street.

30. From April 18, 2014 until approximately September, 2014, members of the Mays family, unaware of the toxic nature of the tap water supplied by Flint,

regularly used the water for drinking, cooking, washing, bathing and clothes washing.

31. In September, 2014 the Mays family, in response to an advisory to boil all drinking water coming from their taps, discontinued drinking or cooking with the water supplied by Flint. The family was led to believe that the water would still be safe for washing, bathing and clothes washing. The family continued to wash, bathe and wash clothing with the water until the summer of 2015 when the family became aware ofthe highly toxic and deleterious nature of the supplied water.

32. As a proximate result of Defendants actions, as set forth herein, members of the Mays family have experienced serious physical and emotional injury due to their exposure to the toxic water, including but not limited to:

a. High levels of lead and copper in their bloodstreams, brains, bones and other organs;

b. Skin lesions and hair loss;

c. Chemical induced hypertension;

d. Autoimmune disorder;

e. Neurological disorders such as "brain fog", seizure like convulsions, vision loss, memory loss;

f. Psychological disorders such as depression, chronic anxiety, post-traumatic stress disorder and an inability to cope with normal stress.

33. Melissa and Michael Mays have experienced property damage in the nature of irreparably damaged service line pipes resulting from Flint's use of Flint

water without use of an anti-corrosive agent; as well, they have sustained substantial loss in the value of their property.

STATEMENT OF FACTS REGARDING THE PEMBERTON FAMILY

34. Keith John Pemberton and Jacqueline Pemberton are 67 and 66 years old and live on Custer Street in Flint.

35. The Pembertons own the home on Custer Street.

36. As a proximate result of Defendants actions, as set forth herein, the Pembertons have experienced property damage in the nature of irreparably damaged service line pipes resulting from Flint's use of Flint water without use of an anti-corrosive agent, as well as the substantial loss in the value of their property. They have experienced serious physical and emotional injury due to their exposure to the toxic water, including but not limited to:

a. High levels of lead and copper in their bloodstreams, brains, bones and other organs;

b. Skin lesions and hair loss;

c. Neurological disorders such as "brain fog", seizure like convulsions, vision loss, memory loss;

d. Chronic and acute abdominal and stomach discomfort;

e. Psychological disorders such as depression, chronic anxiety and an inability to cope with normal stress.

STATEMENT OF FACTS REGARDING ELNORA CARTHAN

37. Elnora Carthan is a 70 year old widow who lives alone at, a home she owns in Flint and where she has lived since 1976.

38. In April, 2014, after the actions of these Defendants caused her water to become highly toxic, when it had once been safe and nourishing, Ms. Carthan began to boil her water but also continued to cook with it and to wash and bathe with it.

39. Finally, in August, 2015, the opportunity arose for her to have her water tested for the presence of lead and other metals. This opportunity arose due to the efforts of Virginia Polytechnic Institute and State University ("Virginia Tech"), notwithstanding the continuous denials and roadblocks to such testing posed by these Defendants. As a result, she determined that the lead levels in her water vastly exceeded anything close to acceptable and were, in fact, extremely dangerous.

40. As a proximate result of Defendants actions, as set forth herein, Ms. Carthan has suffered property damage as well as a loss in the value of her property.

41. As a proximate result of Defendants actions, as set forth herein, Ms. Carthan has experienced serious physical and emotional injury due to her exposure to the toxic water, including but not limited to:

a. Skin lesions and dermatologic pathology;

b. Neurological disorders, including but not limited to constant exhaustion and memory loss;

c. Chronic and acute respiratory disorders including, but not limited to, chronic rhinitis;

d. Psychological disorders such as depression, chronic anxiety, post-traumatic stress disorder and an inability to cope with normal stress.

STATEMENT OF FACTS REGARDING THE KELSO FAMILY

42. Rhonda Kelso is a 52 year old woman who suffers from several disabilities, including the results of a stroke, spastic paraparesis and bi-polar disorder. She owns her home located in Flint. She and her family have lived in that home since 1993.

43. As a result of the toxicity in the water, these Defendants have caused massive damage to the water pipes in the Keslo home, causing extreme disruption, inconvenience, discomfort and emotional distress.

44. Ms. Kelso lives at the aforementioned home with her minor daughter "K.E.K." who is 12 years old. K.E.K. is a special needs student in school and suffers from a number of disabilities including, but not limited to hearing impairment, cardiac problems, and developmental delays involving speech and language.

45. Both Rhonda Kelso and K.E.K. drank the toxic water from April, 2014 until the Autumn of 2014. They bathed, washed and cooked with the water until at least January, 2015.

46. As a proximate result of Defendants actions, as set forth herein, Ms. Kelso has suffered a loss in the value of her property.

47. As a proximate result of Defendants actions, as set forth herein, Ms. Kelso has experienced serious physical and emotional injury due to her exposure to the toxic water, including but not limited to:

a. Skin lesions and dermatologic pathology, including hair loss;

b. Chronic throat and respiratory disorders, including aggravation of asthma;

c. Aggravation of the pre-existing conditions and disabilities, referenced above;

d. Psychological disorders such as depression, chronic anxiety, post-traumatic stress disorder and an inability to cope with normal stress, all due in part to the injuries and damage caused to her daughter K.E.K., as set forth below.

48. As a proximate result of Defendants actions, as set forth herein. K.E.K. has experienced serious physical and emotional injury due to her exposure to the toxic water, including but not limited to:

a. Heightened levels of lead in her blood;

b. Inability to overcome her developmental disorders, particularly speech and language development and, to some extent, a worsening of those disorders;

c. Aggravation of the pre-existing conditions and disabilities, referenced above;

d. Psychological and emotional problems.

STATEMENT OF FACTS REGARDING DEFENDANTS' DECISION TO REPLACE SAFE DRINKING WATER WITH A TOXIC ALTERNATIVE

49. From 1964 to 2014, Flint water users received their water from Lake Huron via the Detroit water system.

50. During this 50 year span, the Flint water users enjoyed safe, clean, fresh water in their homes, businesses, hospitals other places of public services.

51. In 2011, Flint government officials commissioned a study to determine if the Flint River could be safely used by the city as the primary source of drinking water for its more than 31,000 users.

52. According to recent media reports, the report stated that the water from the Flint River was highly corrosive and could not be used safely without an anti-corrosive agent to prevent lead, copper and other heavy metals from leaching from lead, copper and iron based water lines.

53. According to recent media reports, in 2013, Flint government officials delivered to MDEQ the report that stated and warned that the Flint River water was highly corrosive and could not be used as a primary source of drinking water unless treated with anti-corrosive agents.

54. In March, 2013, the Flint City Council approved a resolution to secure future water service from a regional water authority known as the Karegnondi Water Authority ("KWA") scheduled to become operational in 2016.

55. In April 2014, although safe water from Detroit remained available on a temporary basis until the KWA became operational two years later, Flint Emergency Manager at the time Defendant Earley ordered Flint to draw water from

the Flint River, even though he knew that the water was highly corrosive and dangerous to people and property when distributed without proper anti-corrosive treatment.

56. According to recent media reports, defendants had been informed by the 2011 report that use of the Flint River water, without a proper anti-corrosive treatment, would create a condition dangerous to health and property.

57. Beginning in April 2014, Defendants were fully aware that the required and necessary anti-corrosive was not being used in during the distribution of Flint River water to Flint residents, families and home owners.

58. It has been estimated that the daily cost of the anti-corrosive agent would have been $60.

59. Flint water users, having enjoyed decades of safe, clean and fresh water via the Detroit water system, knew almost immediately after the switch to Flint River water that something was not right about this new water supply.

60. Within days after the switch, Defendants began receiving complaints from water users that the water was cloudy and foul in appearance, taste and odor.

61. During the next 8 months, Flint water users expressed their concerns about water quality in a multiple of ways including letters, emails and telephone calls to Flint and MDEQ officials, the media and through well publicized demonstrations on the streets of Flint.

62. After 8 months of undertaking this failed "experiment," the only reasonable response to the mounting complaints would have been to reconnect the Flint water system to the Detroit water system. Instead, Defendants ignored the protests, went into deliberate denial mode, offered ineffective solutions and continued to falsely reassure and insist that the water was safe even though they knew that the foul taste, odor and appearance probably was the result of using highly corrosive Flint River water, untreated with the proper anti-corrosive agents, which caused particulate lead to contaminate the water.

63. Beginning almost immediately after the Flint River became the primary source of water for the Flint users, the MDEQ and Flint officials were aware of elevated levels of Trihalomethanes ("TTHM") in the water and that these levels were above the legal limit.

64. After about 7 months of elevated TTHM levels, Flint water users received a notice in January, 2015 from Flint stating that the water was not in compliance with the federal Safe Drinking Water Act because unlawful levels of TTHMs.

65. Within a few weeks of the issuance of the TTHM notice, Flint City Council members approached Emergency Manager Defendant Earley demanding that a reasonable response to the health risks would be that Flint should reconnect with Detroit water. Earley refused to act as requested by members of the City Council.

66. At this same time, representatives of the Detroit water system expressed interest in re-establishing a relationship with Flint and offered to waive the $4 million re-connect fee in order re-establish the relationship. Defendant Earley rejected this initiative, and deliberately continued to mislead Flint residents to believe that their water was safe.

67. On January 20, 2015, citizen protests mounted, fueled in part by encouragement from environmental activist Erin Brockovich and her associate, water expert Bob Bowcock. These advocates offered advice and assistance to the protesting Flint water users who were now very concerned about the health risks they faced by this toxic water.

68. On January 13, 2015, Earley left his position as Emergency Manager and was replaced by Emergency Manager Ambrose. On January 29, 2015, Detroit Director of Water offered to Emergency Manager Ambrose another opportunity to protect Plaintiffs and the Plaintiff Class from known dangers and to use Detroit water. Notwithstanding Detroit's overture, Emergency Manager Ambrose rejected this offer, and deliberately continued to mislead Flint residents to believe that their water was safe.

69. On February 17, 2015, Flint water users staged public demonstrations demanding that Flint re-connect with Detroit. Once again Ambrose refused to restore Detroit water for Flint water users and deliberately continued to endanger Plaintiffs and Plaintiff Class.

70. In the meantime, and according to emails received via the Freedom of Information Act, the MDEQ (including named Defendants from that agency) knew that Flint residents were being exposed to particulate lead on a daily basis. Moreover, MDEQ representatives, including named Defendants, knew that inaccurate test results were providing false assurance to residents about the true lead levels in the water.

71. On March 25, 2015, Flint City Council voted to re-connect to Detroit's water system. Ambrose rejected this vote and continued to refuse to re-connect the Flint system back to the Detroit water system.

72. In June of 2015, EPA representative Miquel Del Toral wrote a detailed memo outlining numerous dangerous problems with the water being pumped from the Flint River including unacceptable levels of lead. This report was shared with MDEQ defendants Shekter-Smith, Cook, Busch and Prysby.

73. During the spring and summer of 2015, Professor Marc Edwards ("Professor Edwards") and other experts from Virginia Tech tested 277 drinking water samples and found that 10% of the samples had lead levels of 25 parts per billion (ppb), substantially in excess of the federal action level of 15 ppb.

74. Professor Edwards also determined that the Flint River water was 19 times more corrosive than the water pumped from Lake Huron by the Detroit water system.

75. When Professor Edwards published the results of his studies, demands for the re-connecting to the Detroit water system started to be made to the Defendants. These demands came from national and regional public interest groups such as the ACLU of Michigan, the Natural Resources Defense Council and local public interest groups such as the Michigan Chapter of the National Conference Black Lawyers, NAACP-Michigan State Conference, Michigan Nurses Association, Democracy Defense League Water Task Force, Water You Fighting For, Concerned Pastors for Social Action, Coalition for Clean Water and other similar public interest groups.

76. At this time, public interest groups investigating the growing crisis noted that Flint did not have records of which user had or did not have lead service pipes or plumbing. Flint was required by Federal law to maintain these records so that Flint and the MDEQ could alter those users who were most at risk and that proper testing could be carried out. The absence of these required records was increasing the risk of harm to many Flint water users.

77. In addition, Dr. Mona Hanna-Attisha MD of Hurley Hospital demonstrated a dramatic and dangerous spike in elevated blood lead levels in a large cohort of Flint children corresponding with the time of exposure to the highly corrosive Flint River water. Her disturbing results were published in August of 2015.

78. Faced with overwhelming evidence that the water was unsafe to drink and a source of lead poisoning for the children of Flint and other vulnerable persons,

Genesee County Health Officials, on October 1, 2015, issued a public health emergency advising Flint residents not to drink the tap water.

79. Although reconnecting to the Detroit water system was the only reasonable option to protect the health and safety of the Flint water users, and this option should have been exercised within weeks of the appearance of the foul water, Defendants deliberately chose not to do so. Instead, on October 2, 2015, state officials announced that the State would provide water filters to Flint water users in a useless effort to ameliorate the problem.

80. On October 8, 2015, Defendant Snyder recognized that he could no longer pretend that the water from the Flint River was safe. He finally ordered Flint to re-connect with the Detroit water system.

81. However, based on information and belief, due to the prolonged exposure of contaminated water without adequate anti-corrosive agents, Plaintiffs and Plaintiff Class members continue to be exposed to toxic water until such time that pipes and services lines that were damaged by corrosive water from the Flint River can be replaced.

CLASS ALLEGATIONS

82. This action is brought by the named Plaintiffs on behalf of individuals who from April 25, 2014 to present were exposed to toxic Flint water and experienced an injury to their person or property or who in the future will be so injured.

83. The number of injured individuals who have been injured by exposure to toxic Flint water is in the tens of thousands. The number of class members is sufficiently numerous to make class action status the most practical method for Plaintiffs to secure redress for injuries sustained and class wide equitable relief.

84. There are questions of law and fact raised by the named Plaintiffs' claims common to, and typical of, those raised by the Class they seek to represent.

85. The violations of law and resulting harms alleged by the named Plaintiffs are typical of the legal violations and harms suffered by all Class members.

86. Plaintiff Class representatives will fairly and adequately protect the interests of the Plaintiff class members. Plaintiffs' counsel are unaware of any conflicts of interest between the class representatives and absent class members with respect to the matters at issue in this litigation; the class representatives will vigorously prosecute the suit on behalf of the Class; and the class representatives are represented by experienced counsel. Plaintiffs are represented by attorneys with substantial experience and expertise in complex and class action litigation involving personal and property damage.

87. Plaintiffs' attorneys have identified and thoroughly investigated all claims in this action, and have committed sufficient resources to represent the Class.

88. The maintenance of the action as a class action will be superior to other available methods of adjudication and will promote the convenient administration of justice. Moreover, the prosecution of separate actions by individual members of the

Class could result in inconsistent or varying adjudications with respect to individual members of the Class and/or one or more of the Defendants.

89. Defendants have acted or failed to act on grounds generally applicable to all Plaintiffs, necessitating declaratory and injunctive relief for the Class.

COUNT I-CAUSE OF ACTION: VIOLATION OF 42 U.S.C. § 1983 SUBSTANTIVE DUE PROCESS – STATE CREATED DANGER PLAINTIFFS V ALL DEFENDANTS

90. The due process clause of the 14th Amendment provides that the state may not deprive a person of life, liberty or property without due process of law.

91. These Defendants deliberately withdrew water that was safe for drinking, cooking, washing and bathing from Plaintiffs and the Plaintiff Class. They deliberately exposed Plaintiffs and the Plaintiff Class to dangerous, unsafe and untreated (or inadequately treated) Flint River water knowing that it could and would result in widespread permanent serious damage caused by the toxic water including the irreversible lead poisoning of children and other vulnerable persons. This conduct was culpable in the extreme.

92. Plaintiffs and Class Members were foreseeable victims of the decision to replace safe water with a toxic alternative.

93. The decisions and actions to deprive Plaintiffs and the Plaintiff Class of clean and healthy water and to replace that water with toxic, unhealthy and unsafe water constituted affirmative acts that caused and/or increased the risk of harm, both

property damage, as well as physical and emotional injury, to Plaintiffs and Plaintiff Class.

94. At all times herein Defendants acted under color of law.

95. The unconstitutional acts of Earley and Ambrose as Emergency Managers executes a policy statement or decision officially adopted by the City of Flint.

96. As a direct and proximate result of the unconstitutional acts of Defendants as alleged in this complaint, Plaintiffs and Plaintiff Class members have experienced serious and in some cases life threatening and irreversible bodily injury; Plaintiffs and Plaintiff Class members have and will incur substantial economic losses in the nature of medical expenses, lost wages; Plaintiffs and Plaintiff Class members are entitled to an award of non-economic damages in the nature of pain and suffering, embarrassment, outrage, mental anguish, fear and mortification, and stress related physical symptoms such as sleepiness, gastro-intestinal discomfort, neuropathy and similar symptoms.

97. Plaintiffs and Plaintiff Class members have experienced property damage to the homes and places of business in the nature of lost property value and seek damages to remediate the permanent damage caused by the use of corrosive water without proper anti-corrosive treatment.

98. The conduct of Defendants was reckless and outrageous, entitling Plaintiffs and Plaintiff Class members to an award of punitive damages.

COUNT II -CAUSE OF ACTION: VIOLATION OF 42 U.S.C. § 1983
SUBSTANTIVE DUE PROCESS – BODILY INTEGRITY
PLAINTIFFS v ALL DEFENDANTS

99. The due process clause of the 14th Amendment includes an implied right to bodily integrity.

100. Defendants violated Plaintiffs' and Plaintiff Class members' right to bodily integrity, insofar as:

a. Defendants a duty to protect Plaintiffs and Plaintiff Class members from a foreseeable risk of harm from contaminated water;

b. Defendants knew of the serious medical risks associated with exposure to contaminated water;

c. Defendants failed to protect Plaintiffs and Plaintiff Class members from the known risks associated with exposure to contaminated water; and

d. Plaintiffs and Plaintiff Class members suffered bodily harm as a result of their exposure to contaminated water.

101. Defendants' conduct in exposing Flint residents to toxic water was so egregious and so outrageous that it shocks the conscience. Defendants had time for deliberation in their decisions to expose Flint residents to toxic water, and their decision to do so was made with deliberate indifference to the serious medical risks.

102. As a direct and proximate result of the unconstitutional acts of Defendants as alleged in this complaint, Plaintiffs and Plaintiff Class members have

experienced serious and in some cases life threatening and irreversible bodily injury; Plaintiffs and Plaintiff Class members have and will incur substantial economic losses in the nature of medical expenses, lost wages; Plaintiffs and Plaintiff Class members are entitled to an award of non-economic damages in the nature of pain and suffering, embarrassment, outrage, mental anguish, fear and mortification, and stress related physical symptoms such as sleepiness, gastro-intestinal discomfort, neuropathy and similar symptoms.

103. The conduct of Defendants was reckless and outrageous, entitling Plaintiffs and Plaintiff Class members to an award of punitive damages.

RELIEF REQUESTED

Accordingly, plaintiffs request the following relief from the court:

a. An order certifying this case as a Class Action;

b. An order declaring the conduct of defendants unconstitutional;

c. An order of equitable relief to remediate the harm caused by defendants unconstitutional conduct including repairs or property, establishment of as medical monitoring fund and appointing a monitor to oversee the water operations of Flint for a period of time deemed appropriate by the court;

d. An order for an award of compensatory damages;

e. An order for an award of punitive damages;

f. An order for an award of actual reasonable attorney fees and litigation expenses;

g. An order for all such other relief the court deems equitable.

Howard Croft, Flint official responsible for water oversight, resigns

Flint Department of Public Works Director Howard Croft is shown in this Flint Journal file photo *Flint Journal file photo*

FLINT, MI — Howard Croft, the department head responsible for oversight of Flint water operations, has resigned his position effective immediately.

Croft, in a letter to City Administrator Natasha Henderson on Monday, Nov. 16, said he is leaving his position at the city Department of Public Works to regain public trust following a lead-in-water crisis.

"It is with deep sadness that I tender my immediate resignation" as public works director, the letter says. "With the city engaged in transition and working to regain public trust, I believe that now is the right time for me to step down from this position."

Croft, a lifelong resident of Flint, has been in charge of the city's DPW operations since he was appointed to the position by former emergency manager Mike Brown in December 2011.

After his hiring, Croft said he would emphasize responsibility among those who worked for him.

"The one word we are going to try and push for is accountability," Croft said nearly four years ago. "That goes for every employee, accountability for every employee."

The DPW is responsible for Flint's utilities and transportation divisions, but Croft's oversight of city-owned facilities, specifically the drinking water division, put him in the center of what has become a public health emergency because of rising levels of lead in city drinking water.

The city began using the Flint River as its source of drinking water in April 2014, and Croft defended the quality and safety of the water even as the city struggled with bacteria, total trihalomethanes (TTHM) and lead levels.

Faced with mounting evidence of rising lead levels in Flint's drinking water, the city abandoned its use of the river last month, reconnecting to the Detroit water system until the completion of the Karegnondi Water Authority pipeline, which is expected in 2016.

Croft inherited an aging water distribution system that was built to serve twice as many residents as it does now and which was prone to transmission line breaks, leaks and broken valves.

In an email to Mayor Karen Weaver and the City Council, Henderson said Croft will consult the city on an interim basis "as we recruit for a new public works director to make this as seamless as possible."

"Mr. Croft will be missed as he transitions from the director position. ... He has made valuable contributions during his time with the city, and I truly thank him for his service," Henderson's email says.

Weaver said the city will "do what we need to do to have a qualified person in place" to replace Croft.

"I definitely will be having input," she said.

Sworn into office just last week after her election Nov. 3, Weaver has said she expects Henderson to respect her wishes on executive appointments.

Although the city charter gives the mayor the authority to appoint an executive staff, an emergency manager order signed in April transferred that authority to the city administrator.

Croft's letter of resignation says he made every effort to serve with honesty, dignity and integrity.

"I am proud of the many accomplishments that I have been a part of over the years," including assisting in the development of a 50-year master plan, a multi-year capital improvement plan and a prioritized plan to deal with aging infrastructure.

Croft praised DPW employees, "who by no fault of their own have encountered drastic changes in staffing, equipment, and work environment, yet they continue to provide daily services to the absolute best of their ability."

++++**Weekly Critical Issues —November 19, 2015**

- **Allen Park**—Status of bond tender, finally reaching a temporary conclusion!
- **Benton Harbor**— I will be scheduling a meeting with Wayne, Mayor- elect and Darwin in early December. Are we going to revise the RTAB evaluation for Benton Harbor?
- **Ecorse** – Status of their five year financial plan review. We should move forward on reducing scope of RTAB authorities. Wayne spoke again about the FDCVT grant applications.
- **Flint**–We had an interesting meeting in Flint with the Mayor Weaver and Natasha. Issues include communication, staffing, extension of DWSD water, water infrastructure, and legal representation internal and external. City still has not added additional phosphate at water plant hopefully by Thanksgiving. City has reinstituted their water shutoff program which help to increase revenues. Lead issue was known to City, DEQ, and EPA in April. I will be finalizing the FOIA information today.
- **Hamtramck**- the interim Police Chief will be appointed as the Police Chief. Phase 3 of the pension study can has begun. We will be having a meeting in Hamtramck to discuss progress on the pension study. Possible election irregularities may result in an investigation. Katrina wants to purchase DPW equipment for in-house snow removal.
- **Highland Park**-The parties are meeting today in Federal Court to discuss reaching a possible settlement in the DWSD lawsuit. Cathy has indicated that the City has over 500 aged payables including a DTE bill of $200K for the water pumping station. The water pumping station needs repairs. I have a meeting at 8:00 a.m. in Highland Park tomorrow to discuss the condition of the pump house. The City has extremely low water pressure. The State may have to provide funding for engineering and/or repairs. The new water meters are being installed. There is a problem with the cell towers for the new meter read system.
- **Lincoln Park**-His exit will be December 18th. The draft EM Final Order has been sent to Brad, we will need to have it reviewed by the AG's office ASAP. E-Loan may be necessary? Brad said that he should have the FY15 numbers by the end of the week. MSHDA meeting on November 20th, Pat will be attending.
- **Inkster**- Mark indicated that some of the new council members may be difficult. A meeting with the new mayor and Mark will be held on December 1.
- **Pontiac**- the Mayor wants to hire an executive secretary. I will be in Pontiac to meet with the Mayor, Joe, Jane, and Nevrus tomorrow afternoon. The study of the Phoenix Center has been approved. Problem with the GERS Board financial advisor. Six million may be in jeopardy. Mr. Bernstein may be the new RTAB member.
- **River Rouge**—Drew's memo on the exit. Wayne wanted the bond issue and their 'A' rating mentioned in the document. I have advised Drew. General Fund Balance issue.
- **Royal Oak Township**- We may receive a proposal from Oak Park for police service. The draft budget review will be sent to Robert. Montgomery and Co. has submitted an invoice for $17,000. The cash flow has been completed. Meeting with MSHDA on housing development is set for November30, Pat will be attending. Potential judgement against Township for $100,000. We need to consider a replacement for Robert soon.

- **Miscellaneous Items**— FOIA request is on hold until word from Carla. Problem with the Baird invoice for the HP High School project.

GOVERNOR

NICK A. KHOURI
STATE TREASURER

Flint Water Timeline (11-09-15)

1. **June 26, 2012** – Letter from Flint EM Mike Brown to DWSD for permission to begin blending Flint River water with treated water from DWSD. The letter indicates that the DEQ is supporting this option and its implementation would save the City between $2M and $3M annually.

2. **September 20, 2012** – Letter from Flint EM Ed Kurtz to DWSD requesting written permission to implement the blending option. Approval is requested by October 1, 2012.

3. **October 31, 2012** – Analysis by the Flint Finance Director suggests that the annual cost to purchase water from DWSD will steadily increase to $23M per year by fiscal year 2020.

4. **November 2012** – Treasury retains Tucker, Young, Jackson and Tull (TYJT) to evaluate the KWA proposal to the City of Flint.

5. **November 6, 2012** – Letter from Flint Emergency Manager Ed Kurtz to State Treasurer Dillon that a proposal from DWSD is expected but that the initial assessment is that switching to KWA is in the best interest of the City of Flint.

6. **February 6, 2013** – TYJT issues a final report to Treasury on the comparison between Karegnondi Water Authority (KWA) and DWSD. Analysis suggests that the KWA option is the cheaper option for the City of Flint.

7. **March 2013** – DWSD contacts the City of Flint to begin direct negotiations on a contract extension. Multiple options are provided to the Flint Emergency Manager (EM) Ed Kurtz.

8. **March 25, 2013** – The Flint City Council endorses joining KWA.

9. **April 11, 2013** – State Treasurer Andy Dillon authorizes Flint EM Ed Kurtz, pursuant to Section 12(3) of P.A. 436 of 2012, to enter into a contract with KWA if a final offer from DWSD is either not received for rejected in good faith based upon specific objections.

10. **April 15, 2013** – DWSD provides a best and final offer to the City of Flint. Analyses by Flint EM Ed Kurtz, the Department of Environmental Quality and Treasury's Office of Fiscal Responsibility independently conclude that the KWA option is cheaper for the City of Flint.

11. **April 16, 2013** –Flint EM Ed Kurtz informs the State Treasurer that the City will join KWA. This decision was officially announced May 1, 2013.

12. **April 17, 2013** – DWSD transmits a letter to Flint EM Ed Kurtz terminating service to the City of Flint, effective April 17, 2014.

13. **June 26, 2013** – Groundbreaking for the Karegnondi Water Authority begins. Flint also requests full time use of the Flint Water Treatment Plant with Flint River water as a source.

14. **June 28, 2013** – Financing Contract between the City of Flint and KWA is approved. Effective August 1, 2013. This document was signed by EM Mike Brown.

15. **July 08, 2013** – The City retains Lockwood, Andrews & Newman engineering firm to get the City's water plant up and running while the KWA pipeline is built.

16. **February 19, 2014** – The KWA Board of Directors adopts Resolution 2014-01, authorizing KWA to bond for water line construction on-behalf of the City of Flint.

17. **April 17, 2014** – Water service from DWSD officially ends. The City of Flint also conducts two separate public forums regarding the use of Flint River water, upgrades to the City's water system and the overall cost of the switch to KWA.

18. **April 25, 2014** – City conducts public event marking the transition to the use of Flint River water. DEQ information shows that transition complete by May 2015.

19. **January 2, 2015** – The City issues a press release stating the City water system exceeds the TTHM maximum contaminant level.

20. **March 3, 2015** – Flint EM Jerry Ambrose provides a memorandum to Deputy State Treasurer Wayne Workman stating that a reconnection to DWSD will cost the City $10.1M/year and that water purchases could be as high as $1M/month.

21. **March 12, 2015** – Veolia issues the final operational evaluation of the City's water system.

22. **September 3, 2015** – MDEQ testing of the City's water shows TTHM levels are below the required action level.

23. **September 25, 2015** – Genesee County Health Department and the City of Flint issues a lead advisory for residents to be aware of lead levels in drinking water after hearing concerns from the medical community.

24. **October 16, 2015** – The City of Flint reconnects to Detroit Water.

25. **November 4, 2015** – The EPA issues its final report on high lead levels at three residences in the City.

Importance: High

All—

Please see below from Egan. This is essentially the same "?" Nancy Kaffer asked of Jeremy a couple weeks back. Intend to say something along the lines of the following...please advise.

The Tucker-Young report offered an initial perspective on the situation, but as additional information was received and considered by the city, city officials determined that KWA offered the best long-term solution for Flint. As has been noted previously, all involved, the mayor and city council, believed the move to KWA was appropriate and supported the move.

As we have discussed previously, consideration of the development of a Flint-area/Genesee County water system had been on-going since the early 2000's and the City of Flint had been in discussions about joining a new system for much of that time.

Subject: Flint water

Terry attached is the City of Flint Water Supply Assessment, a February 2013 study commissioned by the state treasurer and carried out by Tucker, Young, Jackson, Tull Inc.
Why did the state and city opt to split with DWSD and go with KWA when this study found it would be more costly to do so?

(From p. 17) "Based on the analysis, it is prudent to assume the KWA water supply option costs would be somewhere between the KWA-1 and KWA-2 options. Therefore, the analysis indicates that the two DWSD options of supplying 8 MGD on a maximum day and up to 8 MGD on average are the least cost options for Flint. These options allow Flint to maximize the use of existing assets; the City of Flint's (the Flint WTP) and DWSD's (the existing 72-inch main)."

Hi Andy: Why did the state and city opt to go with KWA for Flint water supply when the study you commissioned from Tucker, Young, Jackson, Tull found that going with KWA would be more costly than staying with DWSD? (Here is excerpt from p. 17):

"Based on the analysis, it is prudent to assume the KWA water supply option costs would be somewhere

between the KWA-1 and KWA-2 options. Therefore, the analysis indicates that the two DWSD options

of supplying 8 MGD on a maximum day and up to 8 MGD on average are the least cost options for Flint.

These options allow Flint to maximize the use of existing assets; the City of Flint's (the Flint WTP) and

DWSD's (the existing 72-inch main)."

How would you describe your role in the chain of decisions that led to Flint drawing its water supply from the Flint River?

The Flint City Council opted to go with the KWA on the evening of March 25, 2013. Your schedule shows you had a 5 p.m. phone conversation at 5 p.m. that day with Dennis Muchmore "regarding Flint Water Supply alternatives."

The next day, March 26, 2013, your schedule shows a 9 a.m. meeting at Treasury "regarding Flint water, a 1:30 p.m. phone call with Dan Wyant "regarding Flint/KWA," and a w p.m. meeting in Lansing with Flint Mayor Dayne Walling?

What do you recall about these conversations/meetings? Did Muchmore sign off on the switch to KWA on behalf of the governor?

Thanks, Paul Egan

July 9, 2015	DEQ informed that EPA draft internal memo is on ACLU website	33
July 14, 2015	DEQ issues construction permit to Flint for Granular Activated Carbon filter media W151055	34
July 21, 2015	Conference call with EPA (LCR implementation and Flint) during which it informs DEQ its interpretation of LCR	35
July 24, 2015	DEQ e-mail and draft letter 90th percentile lead determination = 11 parts per billion and City of Flint requirement to add corrosion control treatment	36
July 28, 2015	DEQ received blood lead level information from DHHS indicating that results since the switch to the Flint River are consistent with past years seasonal variations	37
Aug 4, 2015	Meeting with city representatives at Governor's office	38
Aug 17, 2015	DEQ notifies Flint of lead/copper monitoring results and requires City to install corrosion control treatment	39
Aug 23, 2015	DEQ notified by an external party that a water quality study was about to begin in Flint	40
Sept 2, 2015	Disinfection Byproducts return to compliance	43
Sept 11, 2015	EPA e-mail confirming that DEQ was never sent the draft June 24, 2015 memo	44
Sept 21, 2015	Meeting with Congressional representatives, legislators, EPA and DEQ to discuss issues with water quality in Flint	45
Sept 22, 2015	Meeting/Conference call with DHHS, GCHD, and DEQ to discuss lead education/outreach	46
Sept 24, 2015	Hurley Children's Hospital data reveals elevated blood lead levels in Flint children	47

FLINT DRINKING WATER EVENTS TIMELINE
ATTORNEY CLIENT PRIVILEGE – DRAFT 11/6/2015

Date	Event	Attachment
Sept 24, 2015	DHHS response affirms State blood lead level data is more comprehensive than Hurley Hospital data	None
Sept 25, 2015	Flint issues Lead Advisory regarding drinking water	48
Oct 1, 2015	State Chief Medical Officer confirms Hurley blood lead level data	None
Oct 1, 2015	GCHD issues "Do Not Drink" Advisory	49
Oct 2, 2015	DEQ and DHHS press conference. Governor's Flint Action Plan announced.	50
Oct 2, 2015	GCHD school screening water samples collected for lead analysis	51
Oct 8, 2015	Governor Press Conference: Flint to reconnect to Great Lakes Water Authority/Detroit Water and Sewerage Department	52
Oct 15, 2015	State Legislature authorizes a $9 million to assist the City of Flint to pay for the return to the Detroit water system and to fund staff at schools to gauge lead exposure	None
Oct 16, 2015	First weekly coordination meeting held between the City of Flint and state agencies	None
Oct 16, 2015	DEQ meets with Flint Schools Superintendent and Genesee County Health Department	None
Oct 16, 2015	Flint switches back to DWSD for water	53
Oct 21, 2015	Governor Snyder announces formation of Flint Water Task Force to complete an After-Action Review	None
Oct 28, 2015	DEQ issues construction permit for additional corrosion control treatment W151104	54
Oct 30, 2015	DEQ letter to Flint regarding corrosion control treatment operation	55
Mid-Late 2016	Planned connection to Karegnondi Water Authority (Lake Huron water to Flint WTP)	None

City of Flint Drinking Water
Outline prepared by the
Michigan Department of Environmental Quality for the
Flint Water Task Force

I. INTRODUCTION

This document is intended to provide an overview of Michigan's implementation of the Safe Drinking Water Act, 1976 PA 399, as amended (Act 399), with respect to events in the city of Flint (City), Michigan.

II. BACKGROUND

1. How has Flint historically obtained its drinking water?

The water system in the City was organized and built under private ownership in 1883 as the Flint Water Works Company to pump raw water from the Flint River to their consumers. In 1903, the system was converted to a municipally-owned corporation which supplied drinking water to the City. In 1967, the City became a customer of the Detroit Water and Sewerage Department (DWSD) system.

After the switch to DWSD, the City operated its water treatment plant as a standby plant for purposes of reliability in the event of an emergency, such as an interruption in service of the single pipeline from DWSD. In the last ten years, the water treatment plant was used as an emergency backup during two weeks in 2009: June 18 through June 20 and September 10 through September 13.

As a backup emergency water treatment plant, the City was required to operate the water treatment plant quarterly to demonstrate the capability to produce drinking water in accordance with Act 399 and to keep mechanical equipment (such as valves, rubber seals, etc.) in good working order. Each quarter, the water treatment plant was test run and samples were taken of both raw water and finished water (post-filters). Since the water treatment plant was upgraded in the early 2000s, monitoring showed that the water treatment plant was performing as designed.

Contractual obligations with DWSD did not allow treated water to be put into the City's distribution system during these test runs. Treated water was discharged to the Flint River in accordance with a National Pollutant Discharge Elimination System (NPDES) Permit. The test runs were for demonstration purposes, to keep the water treatment plant operational. and staff familiar with operation in the event it was needed in an emergency.

2. What State and Federal laws or rules exist to ensure safe drinking water is provided to City residents?

The federal Safe Drinking Water Act (federal SDWA) is the primary law that ensures the quality of Americans' drinking water. Under the federal SDWA, the United States Environmental Protection Agency (USEPA) sets standards for drinking water quality and oversees the states, localities, and water suppliers who implement those standards.

The federal SDWA was originally passed by Congress in 1974 to protect public health by regulating the nation's public drinking water supply. The law was amended in 1986 and 1996 and requires many actions to protect drinking water and its sources: rivers, lakes, reservoirs, springs, and ground water wells. (The federal SDWA does not regulate private wells which serve fewer than 25 individuals.)

Originally, the federal SDWA focused primarily on treatment as the means of providing safe drinking water at the tap. The 1996 amendments greatly enhanced the existing law by recognizing source water protection, operator training, funding for water system improvements, and public information as important components of safe drinking water. This approach ensures the quality of drinking water by protecting it from source to tap.

The most direct oversight of water systems is conducted by state drinking water programs. States can apply to the USEPA for "primacy," - the authority to implement the federal SDWA within their jurisdictions - if they will adopt standards at least as stringent as the USEPA's and enforce those standards. Michigan adopted the Safe Drinking Water Act in 1976 through Act 399 and has maintained primacy for the program since that time.

3. **What is the USEPA's role as a regulatory agency in implementing the SDWA?**

Federal and state governments share responsibility for administering drinking water programs. Under the federal SDWA, the USEPA is given the responsibility for developing national standards and regulations that apply to the nation's public drinking water systems and enforcing those standards, by working with states.

Michigan's drinking water program is evaluated annually by the USEPA for compliance with the federal SDWA. Based upon these evaluations, the USEPA continues to find Michigan's drinking water program to be compliant with the federal SDWA.

4. **What is the Michigan Department of Environmental Quality's (DEQ) role as a regulatory agency in implementing the SDWA?**

The federal SDWA permits states to accept oversight of the drinking water program under an agreement with the USEPA giving states primary enforcement responsibilities (or primacy). In addition to this delegation of federal authority to the states, states also have the power to create additional regulations and programs governing drinking water suppliers through their own legislative and regulatory processes. Michigan has had regulatory authority of public water supplies since 1913 (Waterworks and Sewerage Systems, 1913 PA 98).

The DEQ has been granted primary enforcement authority in Michigan for the federal SDWA under the authority of Act 399. As such, the DEQ, Office of Drinking Water and Municipal Assistance, has regulatory oversight for all public water supplies, including approximately 1,400 community water supplies and 10,000 noncommunity water supplies. A community water supply provides year-round service to 15 or more living units (homes, apartments, dorm rooms, etc.) or 25 or more residents. A noncommunity water supply has 15 or more service connections or serves 25 or more individuals on an average daily basis for not less than 60 days per year.

The DEQ engages in a variety of activities to help water systems remain in, or return to, compliance. These activities include: conducting surveillance visits (inspections) at water systems and reviewing facilities, equipment, and operations; requiring the submission of plans and specifications for waterworks system improvements and issuing construction permits; providing for the training, examination, certification and regulation of persons operating water supplies; helping systems incorporate preventive measures; and since 1996, providing financial assistance for system improvements.

5. What is the City's role in implementing the federal SDWA and Act 399?

State and federal programs develop regulations and perform oversight and compliance activities, but do not treat or deliver water to customers. At the local level, public and private water utilities collect, treat, and deliver drinking water to consumers in compliance with state and federal regulations.

The federal SDWA and Act 399 set up multiple barriers against contamination. These barriers include: source water protection, multiple treatment components, distribution system integrity, proper operations oversight, and public information. As the owner of a public water system, the City is responsible for knowing and following all requirements under Act 399, such as ensuring proper design, construction, operations and maintenance, so that contaminants in tap water do not exceed the standards established by law. The City treats the water, and must test its water routinely for specified contaminants and report the results to the DEQ. If a water system is not meeting these standards, it is the water supplier's responsibility to notify its customers.

The federal SDWA and Act 399 recognize that customers have the right to know what is in their drinking water and where it comes from. The City, like all water suppliers, must notify consumers when there is a problem with water quality.

The City submits samples of its water for laboratory testing (monitoring) to verify the water it provides to residents meets all federal and state standards. How often and where samples are taken varies from system to system and from contaminant to contaminant. The DEQ provides an annual monitoring schedule to the City setting forth these requirements.

In addition, the City is required to employ properly certified water operators that are trained and experienced to operate the treatment and distribution systems associated with the City's water system.

6. What approvals were needed from the DEQ in order for the City to begin using its water treatment plant full time?

The City had long ago been issued construction permits for raw water pumps to withdraw water from the Flint River and the City was grandfathered under the water withdrawal program (Part 327, Great Lakes Preservation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended), as were all existing community public water systems at that time. There were no additional DEQ

permissions or authorizations required under Act 399 because the City already had approval to use the water treatment plant.

Under Act 399, there are no licenses or permits required to operate public water systems. The City did apply for and obtained two construction permits prior to the water treatment plant changing from an emergency backup plant to full-time operation. These permits were for new chemical feed equipment, changes to the electrical service, etc.

III. THE FLINT RIVER – IS IT A SAFE SOURCE OF DRINKING WATER?

Seventy-five percent of Michigan's population served by a public water supply receive their drinking water from surface water sources, the majority of which is withdrawn from the Great Lakes. However, several public water supplies in Michigan utilize water from inland rivers. All surface water sources require significant treatment in order to be safe for consumption.

While all surface water sources must receive a high level of treatment, inland river sources present a greater challenge than water withdrawn from one of the Great Lakes because of rapidly changing water quality conditions. Under most circumstances, rivers are prone to greater fluctuations in temperature, have higher amounts of organic material, greater turbidity (suspended solids), and are more vulnerable to microbiological and viral contamination than Lakes Huron, Erie, Michigan or Superior. While the water chemistry in the Flint River differs from that in Lake Huron, it can still be treated in accordance with the federal SDWA and Act 399. The waterworks industry has the technology to treat wide ranging source waters to provide potable and palatable drinking water, including direct reuse of treated wastewater. Regardless of source water quality, all public water systems must comply with the same drinking water standards in the finished water

It is not the source water that reacts with the homeowners plumbing in the distribution system, but rather the finished water quality that is important. Treated water leaving the City's water treatment plant does not contain lead. In addition, the treatment process employed by the City includes lime softening to reduce the hardness in the river water. The City includes lime softening and pH adjustment primarily to improve aesthetic water quality associated with hardness. Lime softening is not a process that water supply professionals would expect to increase corrosivity of water. The City, however, does practice recarbonation to readjust pH at the end of the softening process.

pH levels of finished water leaving the City's water treatment plant averaged 7.7. Expanded water monitoring conducted quarterly at 25 sample sites located throughout the distribution system showed the following:

July – September 2014	average pH = 7.71	range: 7.56 – 7.86
October – December 2014	average pH = 7.88	range: 7.62 – 8.10
January – March 2015	average pH = 7.81	range: 7.60 – 7.99
April – June 2015	average pH = 7.63	range: 7.48 – 7.80

The data below was obtained at ten of the sampling locations throughout the City's distribution system, while they were still purchasing water from DWSD before the City switched to the Flint River as a source:

January – March 2014 (DWSD)	average pH = 7.47	range: 7.40 – 7.54
April 2014 (DWSD)	average pH = 7.49	range: 7.42 – 7.59

Note that the pH of the treated water produced while the City was using the Flint River did not differ significantly from pH values seen in the distribution system during the time the City purchased water from DWSD. Thus, pH monitoring provided no indication of a change in water corrosivity.

IV. *E. COLI* AND TOTAL COLIFORM BACTERIA VIOLATIONS

1. What caused the *E. coli* and total coliform bacteria violations experienced by the City in August and September 2014?

A number of factors, primarily related to distribution system operation and maintenance, likely contributed to the Boil Water Advisories in the City during August and September 2014 triggered by exceedances of bacteria standards in limited areas of the distribution system. In addition, the coliform detections were confined to less than 20 percent of the water system. Had the detections been the result of a failure in treatment, detections would have been expected throughout the City rather than in such a limited geographic area.

Instead, the violations seem to have been caused by other factors such as aging infrastructure. The City's water distribution system has suffered from a lack of infrastructure investment and asset management. Most of the City's over 550 miles of water mains are now over 75 years old, and constructed of unlined cast iron piping. This cast iron pipe is subject to tuberculation, which thins and weakens the pipe walls in some areas and causes a buildup of sediment and debris on the pipe walls in other areas. Tuberculation can lead to water quality issues as well as reduced flows and pressures. Tuberculation also encourages the development of biofilms. Biofilm growth may occur more frequently in areas where little or no disinfectant is maintained.

The City has also experienced decades of a declining customer base and water use, with vacant homes, commercial businesses, and industrial property. Declining water use leads to excess residence time (water age) within the City's distribution pipes and water storage facilities, accelerating tuberculation, biofilm growth, and reductions of disinfectant concentration in the distribution system. While the City has recently seen an infusion of funding for blight removal, contractors using fire hydrants to complete this work have been known to cause hydraulic disturbances that dislodge and suspend settled debris, which may contribute to the bacterial contamination. These hydraulic disturbances were also believed to be a source of the aesthetic water quality complaints both the City and the DEQ were receiving.

The winter of 2013-2014 was also one of the coldest experienced by the water system. The City, which historically has unaccounted water losses of over 30 percent, saw even greater losses since February 2014 due to an increase in cold weather-related water main breaks and leaks (City personnel reported 400 water

main breaks in calendar year 2014, with greater than 50 percent in the winter quarter). The City has also been lacking a formal maintenance program for its more than 7,250 valves, which are critical in limiting the areas impacted during water main repairs. As an example, two valves on the transmission line used to supply the area of the 2014 Boil Water Advisories were found to be closed during the City's investigation of possible sources, causing much longer residence times, reduced disinfectant concentrations, and reduced pressures – all potential avenues for contamination to enter a distribution system.

The Boil Water Advisories also occurred during the warmest and relatively wet periods of August and September 2014. Warm weather conditions are not only more conducive to bacterial growth but also degrade disinfectant concentrations more quickly. As already explained, longer residence times, biofilms, and tuberculation contribute to lowered disinfectant concentrations. Warm, wet weather conditions also allow water contaminated with bacteria to accumulate or pond around piping that leaks and breaks.

During the summer of 2014, the City was actively repairing the distribution system (City personnel reported 29 water main breaks in June through August 2014). After the switch to the Flint River, it was discovered that there were many broken or closed valves in the distribution system (City personnel reported 120 broken valves and 239 valves in an improper position). As the City began correcting these problems, they did detect the presence of coliform organisms in the distribution system in testing conducted as a result of the repairs. This sporadic detection is not an unusual occurrence. Many communities have experienced similar issues when significant repairs are made in the system and/or they suffer water main breaks and localized pressure losses.

2. How were the violations detected? What was the DEQ's response?

Federal SDWA regulations regarding monitoring and standards for bacteria in water distribution systems are incorporated into Act 399. There are a variety of bacteria, parasites, and viruses which can potentially cause health problems if humans ingest them in drinking water. Testing water for each of these potential pathogens would be difficult and expensive. Instead, community water systems are required to test monthly for total coliform and *E. coli*. Total coliform bacteria, while not pathogenic, often originate from the same sources as many pathogens. Therefore, the presence of total coliform in drinking water indicates there may be a pathway for pathogens or other contaminants to enter the system. The absence of total coliforms in the distribution system indicates a minimal likelihood that pathogens are present. *E. coli* is itself a pathogen and its detection is considered direct evidence of a health risk.

The Boil Water Advisories which occurred in the City were associated with bacteria monitoring detections and violations of bacteria standards. These advisories were issued by the City after consultation with the DEQ.

Upon receiving information indicating total coliform and *E. coli* bacteria had been detected, the DEQ advised the City to issue a Boil Water Advisory from August 15 through 20, 2014, for the affected portion of the City. Another Boil Water Advisory was issued from September 5 through 9, 2014, due to localized detections of total

coliform bacteria in the same and adjacent portions of the City. The advisories covered an area of less than 20 percent of the water department's service area.

Once a Boil Water Advisory has been issued, time is needed to investigate potential causes and implement corrective measures. The larger the water system, the more time this may take. Once corrective measures have been taken, samples must be collected and analyzed to confirm that bacteria are no longer present. Under approved analytical methods used by the City, samples must be incubated for 24 hours before results can be obtained. In situations where the bacterial contamination has been confirmed, two consecutive rounds of safe samples collected at least 24 hours apart are normally obtained before canceling a Boil Water Advisory. Adding each of these steps together, a normal response period to rescind a Boil Water Advisory under these circumstances would be expected to take 3 to 4 days.

V. TOTAL TRIHALOMETHANES (TTHM) VIOLATIONS

1. What caused the TTHM violations experienced by the City beginning in late summer 2014?

Disinfectants are an essential element of drinking water treatment because of the barrier they provide against waterborne disease-causing microorganisms. However, disinfection byproducts form when disinfectants used to treat drinking water react with naturally occurring organic materials in the water (e.g., decomposing plant material). The formation of disinfection byproducts continues to occur as water travels throughout water distribution systems.

A major challenge for water suppliers is how to provide protection from pathogens while simultaneously minimizing health risks to the population from disinfection byproducts. Total Trihalomethanes (TTHM – chloroform, bromoform, bromodichloromethane, and dibromochloromethane) and halogenated acetic acids (HAA5 – monochloro-, dichloro-, trichloro-, monobromo-, dibromo-) are widely occurring classes of disinfection byproducts. The amount of TTHM and HAA5 in drinking water can change depending on the season, water temperature, amount of chlorine added, the amount of plant material in the water, and a variety of other factors. All community water systems that chemically disinfect or purchase water that has been chemically disinfected are required to monitor for disinfection byproducts.

The Flint River has higher levels of organic material than water in the Great Lakes and as a result, the water produced by the City developed higher disinfection byproducts than the water purchased from DWSD. Because the water treatment plant was previously operating intermittently, it was not possible to predict disinfection byproduct levels at distribution system compliance points until the City began relying on its water treatment plant continuously.

As mentioned previously, the City became aware that there were numerous broken valves and closed valves that should have been open in the distribution system. At that time, the City also began a mapping effort to identify "water age" in the distribution system. The longer the residence time or "water age" the greater the opportunity for the formation of disinfection byproducts.

2. How were the violations detected? What was the DEQ's response?

Disinfection byproducts are monitored at eight sites throughout the distribution system. A locational running annual average is calculated for each individual site. Because TTHM and HAA5 maximum contaminant levels are calculated based on a running annual average at specific distribution system locations, the actual violation of the standard did not occur until the fall of 2014. However, because it was apparent in the summer of 2014 that the standard would eventually be exceeded; the DEQ asked the City to proactively implement measures to address the problem before the violation required them to do so.

As a result of maintenance efforts undertaken by the City to repair valves and correct improperly closed valves, the City was able to improve water flow in the distribution system and thereby reduce residence time or "water age" in the system. Operational changes made to reduce the amount of storage in the system also helped reduce residence time which contributed to a reduction in disinfection byproduct formation.

In addition to operational changes to minimize residence time in the distribution system, the City added granular activated carbon to its filters in July 2015. Levels of TTHMs and HAA5s were reduced and the City returned to compliance on September 1, 2015.

VI. THE TASTE, ODOR, AND COLOR COMPLAINTS RECEIVED BY FLINT

1. What caused the taste, odor, and color complaints received by the City from residents?

Taste, odor, and color issues are very personalized. While water leaving the water treatment plant did not have any unusual taste, odor or color; during the summer after the switch to the Flint River, customer complaints increased. Construction in the distribution system, hydrant flushing, and changes in flow characteristics are all known causes of disturbances within the distribution system that can cause an increase in taste, odor, and color complaints. Aesthetics, such as taste, odor, and color, while a concern, by themselves are not a threat to public health.

2. What was the DEQ's response?

The DEQ consulted with the City regarding these complaints. The City indicated that they were offering to investigate such complaints for anyone that had issues; but City personnel informed the DEQ that they were not able to recreate these situations in the field. In addition, as a result of the repair work that was underway and the increased flushing to reduce water age in the system to help control TTHMs, it was anticipated that there would be short-term disturbances in the system that would cause color and odor complaints. All water supplies are advised to provide notice to residents prior to undertaking a flushing program because flushing (even routine flushing) often causes temporary problems as described. Based on information from City personnel, it appeared that the complaints were related to such operational activities occurring in the distribution system.

VII. LEAD ISSUES IN THE FLINT DRINKING WATER

1. What causes lead in drinking water?

Lead is rarely found in source water. Lead enters tap water through corrosion of plumbing materials. Homes built before 1986 are more likely to have lead fixtures and solder. Older homes built prior to World War II are more likely to contain lead pipes. The most common problem with newer construction is with brass or chrome-plated brass faucets and fixtures which can leach significant amounts of lead into the water, especially hot water. The amount of lead in tap water also depends on the types and amounts of minerals in the water, how long the water stays in the pipes, the amount of wear in the pipes, the pH of the water, and its temperature.

2. What is the Lead and Copper Rule?

On June 7, 1991, the USEPA published a regulation to control lead and copper in drinking water. This regulation is known as the Lead and Copper Rule (also referred to as the LCR). The treatment technique for the rule requires systems to monitor drinking water at customer taps. If the 90th percentile for lead exceeds an action level of 15 parts per billion (ppb) or the 90th percentile for copper exceeds an action level of 1.3 parts per million (ppm), the system must undertake a number of additional actions to control corrosion. If the action level for lead is exceeded, the water supply must also inform the public about steps they should take to protect their health and the water supply may have to replace lead service lines under their control.

3. What is the lead action level?

For most contaminants, the USEPA sets an enforceable regulation called a maximum contaminant level based on the maximum contaminant level goal. Maximum contaminant levels are set as close to the maximum contaminant level goals as possible, considering cost, benefits, and the ability of public water systems to detect and remove contaminants at the water treatment plant using suitable treatment technologies. Because lead contamination of drinking water often results from corrosion of the plumbing materials belonging to water system customers, the USEPA established a treatment technique rather than a maximum contaminant level for lead. A treatment technique is an enforceable procedure or level of technological performance which water systems must follow to control a contaminant. Although the maximum contaminant level goal for lead is zero, based upon the above factors, the USEPA has established the action level for lead at 15 ppb.

The treatment technique regulation for lead requires water systems that produce drinking water to control the corrosivity of the water. The regulation also requires systems to collect customer tap samples from sites served by the system that are more likely to have plumbing materials containing lead. If the 90th percentile action level for lead is exceeded, then water systems are required to take additional actions including:

- Optimizing corrosion control treatment (for water systems serving greater than 50,000 people that have not fully optimized corrosion control).

- Educating the public about lead in drinking water and actions consumers can take to reduce their exposure to lead.
- Replacing the portions of lead service lines (lines that connect distribution mains to customers) under the water system's control.

4. Did DWSD have optimized corrosion control treatment?

After the LCR passed in 1991, DWSD and all of its consecutive customer systems conducted two rounds of monitoring for lead and copper. Copper levels were well below action level limits, but lead levels exceeded the action level of 15 ppb for DWSD and many of its customer communities. As a result, DWSD installed corrosion control treatment. DWSD performed a corrosion control study and concluded that they could reduce the corrosivity of the water by the addition of an orthophosphate, a corrosion inhibitor.

5. Did the DEQ require the City to have corrosion control in place when it switched to the Flint River as its source of drinking water?

No. There are two ways under the LCR to deem a water supply as providing "optimal corrosion control" – either by sampling and determining through a calculation that the supply is "optimal" or by installing treatment if it is needed. The DEQ requested that the City perform two 6-month rounds of monitoring to demonstrate if the City was practicing optimal corrosion control treatment. According to state regulations [R325.10604f(2)(b)(iii)], a system can demonstrate optimized corrosion controls by sampling in two, consecutive 6-month monitoring periods and comparing the results of this monitoring to the lead level in the source. Optimal corrosion control under this scenario would be defined as having the 90th percentile in each of these monitoring periods lower than the sum of the lead in the source and the practical quantification limit for lead of 5 ppb. Since the source water has 0 ppb lead, the City would have been deemed optimal if its 90th percentile of lead was 5 ppb or less in these two consecutive periods. However, once a system has installed treatment, it would also be considered optimized regardless of the 90th percentile level achieved, as long as it does not exceed the action level of 15 ppb.

In this case, the City had been purchasing water from DWSD that was treated for corrosion control. It was the DWSD water system that was considered as having optimized corrosion control at that point. Since the City water system had not been the supplier of water before, the DEQ did not require the City to maintain corrosion control for which it was not responsible [R325.10604f(2)(b)]. It could not "maintain" operations undertaken elsewhere by a different entity for a different source of water. The DEQ's instructions to the City were consistent with past practices afforded to all other large water systems. At the beginning of the LCR, all large systems were initially granted the option to demonstrate optimal corrosion control treatment through full-scale monitoring under the applicable rules. For these reasons, two 6-month rounds of monitoring, as required by the LCR, were the required means to determine whether or not optimal corrosion control was being achieved.

6. How does the DEQ calculate the 90th percentile?

To determine the 90th percentile of a list of lead or copper results, the procedure below is followed:

Step 1: Place lead or copper results in ascending order
Step 2: Assign each sample a number, 1 for lowest value
Step 3: Multiply the total number of samples by 0.9 – this yields the 90th percentile sample. For example: 20 samples x 0.9 = 18th sample. This is the 90th percentile level.

Calculating the 90th percentile is easiest when a supply collects 10 samples (or a multiple of 10). Note that the 90th percentile must be interpolated if the number of samples is not a multiple of 10.

7. What was the result of the first round of monitoring conducted by the City?

The first 6-month round of lead and copper monitoring conducted by the City ended on December 31, 2014. One hundred samples were submitted and the 90th percentile lead level was calculated to be 6 ppb. The next step required by the DEQ was for the City to collect a second round of monitoring.

8. What was the result of the second round of monitoring conducted by the City?

The second 6-month round of lead and copper monitoring conducted by the City ended on June 30, 2015. Sixty-nine samples that complied with the site selection criteria were submitted and the 90th percentile lead level was calculated to be 11 ppb. The conclusion from these results was that the City, while in compliance with the action level, exceeded the level required to be deemed as having optimized corrosion control.

9. Why was the City required to collect 100 compliance samples for lead and copper in the first 6-month monitoring period of July through December of 2014 and then only 60 compliance samples in the second 6-month period of January through June of 2015?

The number of compliance samples required for lead and copper is based upon the population served by the water system as identified in the table below, taken from Rule 325.10710a of Act 399.

Supply Size (Number of People Served)	Number of Sites (Standard Monitoring)	Number of Sites (Reduced Monitoring)
More than 100,000	100	50
10,001 to 100,000	60	30
3,301 to 10,000	40	20
501 to 3,300	20	10
101 to 500	10	5
Fewer than 101	5	5

The number of samples the City was required to collect in the first round of monitoring after they began relying on the Flint River was based on the 2010 census, which listed the City's population as more than 100,000 residents. In March of 2015, the City provided updated information that indicated the City's population had decreased to less than 100,000. Therefore, they were only required to collect 60 samples. There is no rule prohibiting the collection of additional compliance samples – only establishing a minimum number necessary.

10. What actions did the DEQ order the City to undertake after the second round of monitoring?

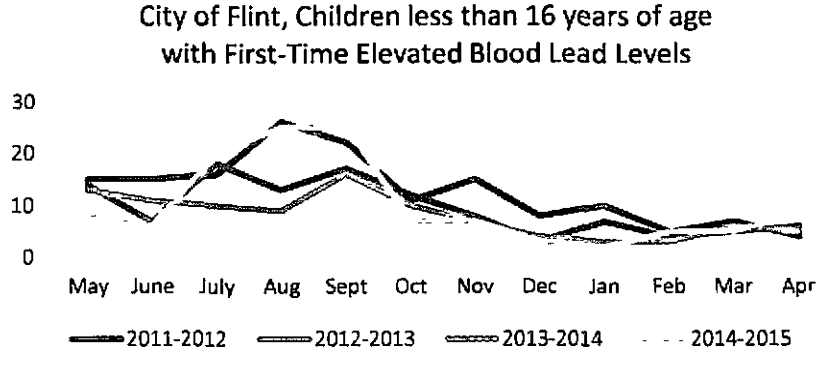
While the City's LCR compliance monitoring continued to meet action level requirements, the City exceeded the level required to be deemed as having optimized corrosion control. Following receipt of the City's compliance monitoring results, the DEQ sent a letter on August 17, 2015, requiring the City to install corrosion control treatment.

Under the LCR, the City has 6 months to let the DEQ know whether it intends to conduct a study, then 18 months to perform the study and make its recommendation, and 24 months to complete installation of the selected corrosion control. The DEQ requested the City accelerate this schedule. The City submitted plans and specifications to install corrosion control treatment and a construction permit was issued by the DEQ on October 28, 2015. The City is in the process of installing the necessary equipment and procuring the appropriate chemicals. Treatment is expected to be on-line by the end of November 2015. As of October 16, 2015, the City resumed purchasing water from DWSD that is already optimized and provides a corrosion inhibitor. The additional treatment by the City will further enhance the amount of inhibitor in the system.

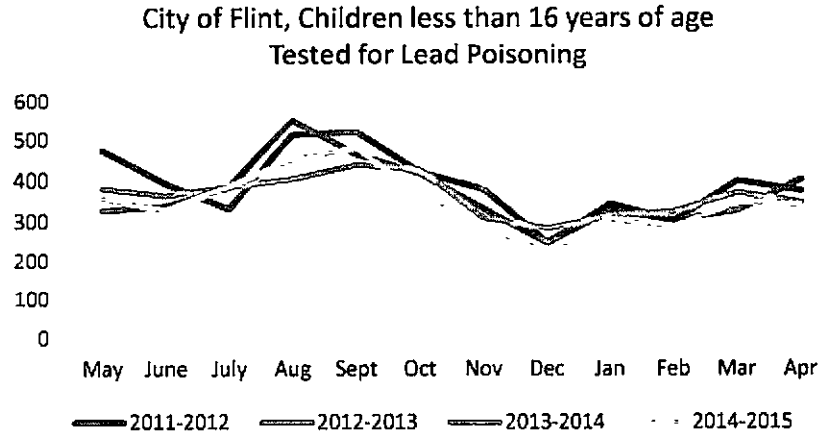
11. What had Michigan Department of Health and Human Services (DHHS) advised the DEQ regarding blood lead levels prior to the DEQ ordering the City to implement optimized corrosion control?

In an e-mail dated July 28, 2015, regarding blood lead testing, the Michigan DHHS indicated that they:

> "...compared lead testing rates and lead testing results to the same time frame for the previous 3 years, to see if there were any patterns that suggested that there were increased rates of lead poisoning after the water supply was switched. Per the attached charts –
>
> • Lead testing rates remained about the same from year-to-year...



- There was a spike in elevated blood lead tests from July-September 2014...



- However, that pattern was not terribly different from what we saw in the previous three years; especially in 2011-2012 (we are working with our Epidemiologist to statistically verify any significant differences).

- We commonly see a 'seasonal effect' with lead, related to people opening and closing windows more often in the summer, which disturbs old deteriorating paint on the windows, sills and sashes. Window fans frequently blow and spread the lead dust from the deteriorating paint to other parts of the room/house. We suspected that the summer data spike may be related to this effect.

- If the home water supply lines and/or river water were contributing to elevated blood lead tests, we expected that the increased rates would extend beyond the summer, but they drop quite a bit from September to October, stayed low over the winter, and are just starting to tail up again in the spring of 2015."

This e-mail from DHHS in concert with the completion of two 6-month rounds of lead compliance sampling data indicating that the City had not exceeded an action level for lead provided the basis for the DEQ to maintain that the water in the City continued to be in compliance with the federal SDWA and Act 399.

12. When did the DEQ first become aware of allegations of elevated blood levels being detected in certain children?

The DEQ was notified on August 23, 2015, by a professor from Virginia Tech that "over the next few months we will be studying Flint water quality issues..." Results indicating elevated lead levels in homes were reported as part of this study in late August. In September 2015, information was reported in news articles that

pediatricians in the City had data suggesting an increase in children's blood lead levels in two zip codes in the Flint area.

Prior to these dates, the City had already completed the required two 6-month rounds of monitoring and the DEQ had made a determination that the City must install corrosion control treatment as documented in correspondence dated August 17, 2015.

VIII. QUESTIONS RAISED REGARDING THE DEQ'S ACTIONS

1. **What was the DEQ's response to the USEPA's inquiry in February 2015 regarding the optimized corrosion control treatment being implemented by the City under the LCR?**

   The DEQ indicated that the City was complying with the LCR, the lead 90th percentile level was below the action level of 15 ppb, and the City was already conducting the second round of monitoring which would provide for a determination of whether additional treatment needed to be installed. It should be noted that once treatment is designated as optimal, there is no requirement in the LCR that lead results be lower than they were before treatment was installed. The 90th percentile only needs to be lower than the action level in the LCR.

2. **Did the DEQ attempt to mislead the USEPA in a February 27, 2015, e-mail responding to the USEPA's inquiry regarding Optimal Corrosion Control Treatment?**

   No. There was no attempt by the DEQ to mislead the USEPA. There is an e-mail from Steve Busch, Jackson and Lansing District Supervisor, Office of Drinking Water and Municipal Assistance, indicating that the City was practicing a corrosion control program. What was meant was that the City was performing the required monitoring to determine whether or not they were practicing optimized corrosion control. The DEQ subsequently clarified its position in follow-up e-mails and telephone conversations with the USEPA.

3. **When General Motors announced its intent to terminate water service from the City and purchase water from Genesee County, should this have been a sign that there were concerns with the quality of the water after the switch to the Flint River?**

   No. General Motors made a decision regarding the quality of water for its manufacturing processes. At the time, the company indicated that the chloride levels were above limits acceptable as part of the manufacturing facility's limit for production purposes. The level of chlorides in the water treated by the City was not a human health or aesthetic concern.

   Chloride does have a secondary maximum contaminant level established by the USEPA, not for health-related concerns but rather for taste and aesthetic concerns. Concentrations greater than the secondary maximum contaminant level of 250 milligrams per liter (mg/l) become objectionable due to taste. According to the City's records, the chloride concentration in the Flint River water is generally about 45 mg/l and the treated water chloride concentration leaving the water treatment

plant ranges between 55 and 65 mg/l. It should be noted that the City uses ferric chloride as its primary coagulant, although this does not add a significant amount of chloride to the finished water.

4. **Has the USEPA subsequently admitted that the LCR is subject to differing interpretations such as that presented by the DEQ?**

   Yes. On November 3, 2015, the USEPA issued a memorandum regarding the "Lead and Copper Rule Requirements for Optimal Corrosion Control Treatment for Large Drinking Water Systems". This memorandum addresses concerns raised about the application of the LCR, specifically the requirements pertaining to maintenance of optimal corrosion control treatment, in situations in which a large water system ceases to purchase treated water and switches to a new drinking water source. The USEPA states that this type of situation rarely arises, that the language of the LCR does not specifically discuss such circumstances, and that there are differing possible interpretations of the LCR with respect to how the rule's optimal corrosion control treatment procedures apply to this situation. The memorandum is intended to clarify, on a prospective basis, steps agencies should take or apply in the future. USEPA's new guidance provides acknowledgement that the LCR is subject to differing interpretations. The DEQ's interpretation and application of the LCR in this situation was in compliance with the federal SDWA and Act 399.

5. **Did the DEQ reject any of the samples submitted by the City?**

   Yes, samples at two locations were excluded from the compliance calculation in conformance with rules issued by the USEPA.

   According to the LCR, compliance samples must be a first draw, 1-liter sample collected from a cold water, kitchen or bathroom tap after the tap has stood unused for not less than 6 hours. Federal and state rules require community public water systems to identify a pool of targeted high-risk sampling sites, called Tier 1 sampling sites. For a municipality such as the City, the Tier 1 sampling pool must consist of single family structures that are:

   - served by a lead service line,
   - contain lead pipes, or
   - contain copper pipes soldered with lead installed after 1982 but before Michigan enacted the ban on solder containing high concentrations of lead (June, 1988).

   As long as a community has Tier 1 sites that contain lead service lines, they are required to collect at least 50 percent of their compliance samples from these lead service line sites. Finally, federal and state rules specify that "Sampling sites may not include faucets that have point of use or point of entry treatment devices designed to remove inorganic contaminants." Such treatment devices include home softeners, iron filters, etc. Samples collected from multiple family residences, commercial buildings, institutional facilities, or single family structures with point-of-use or point-of-entry treatment can only be used if the community has insufficient Tier 1 sites available.

One of the samples submitted by the City was excluded from the 90th percentile compliance calculation in the latest monitoring period because it was taken from a tap at a non-residential site (non-Tier 1). The other sample result that was excluded was collected from a single family home that has a whole house treatment system. Both of these sites are, therefore, excluded from the compliance consideration based upon federal and state rules

6. **Did the DEQ review the information submitted by the City to ensure all samples were from Tier 1 sites?**

Yes. The DEQ examined the information submitted and certified by the City that its LCR compliance monitoring sites consisted entirely of Tier 1 criteria sites, which met the requirements of this rule to maximize sampling of high-risk targeted sites.

During the initial implementation of the LCR approximately 25 years ago, water supplies were required to complete a materials evaluation of their distribution system to identify a pool of targeted, high-risk sampling sites. These sites were to be categorized into one of three Tiers (1, 2, or 3) based on risk. The DEQ created an LCR reporting template for water systems to identify each compliance sampling site by Tier, service line material, and building plumbing material.

If a water system has sufficient Tier 1 sites, they are required to sample them before using any lower Tier sites. Furthermore, if they have sufficient sampling sites with lead service lines, they are required to use them to make up at least 50 percent of their sampling pool each monitoring period. Water supplies are also required to use the same sampling sites each time or explain on their LCR reporting form why they were unable to do so. Finally, the water system is required to certify all of the information they provide on the LCR reporting form is factual.

The DEQ must rely upon the public water system to identify appropriate sampling sites for LCR monitoring. The DEQ public water supply program has no control or authority over service lines or domestic plumbing. As a result, we have no records on construction standards or materials used by customers for these components. If these records exist, they are kept by plumbing code enforcement officials.

In 2015, City employees again certified that the information submitted on their LCR monitoring reports for the two 6-month rounds of monitoring conducted after they began treating the Flint River were accurate, and DEQ staff review of that information indicated it was in compliance with the monitoring requirements. The DEQ had no reason to question the validity of the City's reports until the DEQ heard City employees revealing to the media that the City did not know for certain if its compliance monitoring was collected from homes with lead service lines. As a result, the DEQ began to investigate the City's monitoring sites. As the City began to transfer its customer information to electronic records, the DEQ determined from the information available that a significant number of these sites that had been listed as having lead service lines either did not have them or the information was unavailable. On November 9, 2015, the DEQ notified the City in writing that it would be necessary to conduct a complete assessment of its sampling pool and report back its findings by December 30, 2015. The DEQ is now awaiting the City's response.

7. Did the DEQ believe the levels of lead found at 212 Browning in April 2015 were indicative of a system-wide problem?

High levels of lead were collected in samples taken from this residence. It was determined to be coming from an unusually long lead service line. For some reason, this home was not connected to the water main that ran in front of the house, but rather to a main located on a street several houses away. The City replaced the lead service line May 6, 2015. Since the internal plumbing of the house is plastic, it was believed that replacement of the lead service line would resolve the problem, and subsequent sampling taken at this address showed that replacement of the service line did mitigate the problem. There was, therefore, no reason to believe that this was indicative of a system-wide problem.

8. Do the DEQ's sampling instructions comply with the LCR?

The DEQ continues to seek official clarification from the USEPA regarding the sampling protocols. The DEQ's sampling recommendations were developed to ensure compliance with the USEPA's guidance provided in the preamble to their lead and copper regulations that said that household use should be "typical" for a residential customer on the day before sample collection for lead and copper. Early in the implementation of the LCR, the DEQ had encountered too many situations where compliance samples had been collected from kitchen and bathroom taps that had not been used in days and in some cases, even weeks, resulting in excessively stagnated water and correspondingly high lead levels that did not represent typical exposure expected after overnight stagnation. To incorporate these results into further regulatory decision making could have led to actions that were not indicative of a true public health threat. Further complicating this issue was the USEPA's direct implementation of the LCR in Washington, D.C., where it was learned that some "valid" lead results were not always being included in compliance calculations. Subsequently, the USEPA made invalidation of samples for any reason much more difficult. In order to ensure samples were taken at customer taps representative of typical use, the DEQ devised the current recommendations for ensuring appropriate but not excessive stagnation for LCR monitoring.

The DEQ continues to believe it is appropriate to ensure that taps being sampled are representative of typical household use and are sampled during the recommended stagnation period of 6-18 hours. The LCR does not say the result should represent the "absolute worst case" condition – it talks about sampling the highest risk locations (lead plumbing, lead service lines, high lead content solder piping, etc.) after overnight stagnation and then collecting a first draw sample so as not to flush elevated lead from that tap at that point in time. There are a number of other states that share the DEQ's interpretation of the rule and the DEQ encourages the USEPA to provide official clarification directed at all states with primacy.

9. Does the DEQ require the use of small-neck bottles to obtain samples?

No. The DEQ does not mandate the use of small-neck bottles; it is the sampling method that is specified in both the federal SDWA and Act 399 Each certified drinking water laboratory provides bottles to their customers upon request for any particular analysis in accordance with the specifications in the SDWA. The bottles provided by the DEQ Drinking Water Laboratory for a lead and copper corrosion control sample meet these requirements.

Hello Mike,

Please schedule a meeting with yourself and Brent to speak with the Advisory Task Force. I will not be present for the meetings, and the meetings will be one on one. The Task Force is evaluating the water situation so this will not be very formal.

Hope you have a Happy Thanksgiving!

Thanks,

Natasha L. Henderson, City Administrator

Natasha,

Attached is a letter we sent to your and the Mayor's attention last Friday. I wondered if you had had a chance to help with our request. We have several members who are available next Monday and Tuesday to meet with the requested individuals in Flint.

Thank you for your assistance in this matter.

Sincerely,

Chris Kolb, President & CEO

Flint Water Advisory Task Force

November 12, 2015

Ms. Karen Weaver, Mayor
Ms. Natasha Henderson, City Administrator
City Hall
1101 S. Saginaw St.
Flint, MI 48502

Dear Mayor Weaver and Administrator Henderson:

As you are aware, Governor Snyder has appointed a Flint Water Advisory Task Force to review what led to the problem of high lead levels in drinking water, review the related regulatory framework, and make appropriate recommendations to prevent reoccurrence in Flint or elsewhere in Michigan. Members of the Task Force are Dr. Lawrence Reynolds, Dr. Matthew Davis, Eric Rothstein, Chris Kolb, and Ken Sikkema.

As part of our review, we would like to talk with appropriate individuals who are or were responsible for Flint Water Treatment Plant operations and capital planning during the past few years. We think these discussions are important for us to understand how the source water conversion was planned and implemented, how challenges in treating water from the Flint River were managed, and how water quality in the distribution system was monitored and addressed.

Individuals we would like to meet with include (1) Howard Croft, (2) DPW Staff – Daugherty Johnson, Brent Wright, Mike Glasgow and (3) Warren Green with the LAN engineering firm. We are requesting your assistance in securing the availability of these individuals in the afternoon of Monday, November 23 or anytime on Tuesday, November 24. If preferable, we can contact these individuals directly for scheduling purposes and would request your assistance in ensuring this scheduling is appropriately prioritized.

Please feel free to contact us through email or by telephone. Thank you for your assistance and cooperation in this important matter.

Sincerely,

Chris Kolb

Attachments: Fwd: Request from the Flint Water Advisory Task Force

Ken,
Wayne and I spoke to Natasha this morning. She is on vacation. We delivered the message quite clearly and she should understand now that the Task Force is to have open access to key City individuals. Further, we indicated she does not need to be nor should she be present during those conversations. (See attached.) I did not have your list at the time of the conversation with her; my understanding is one of the individuals may no longer be engaged with the City. The bottom line is, if you still are having trouble reaching or talking to people, just let us know and we will follow up.

Tom:

Just got off the phone with Rich Baird regarding our desire to interview individuals in Flint who had/have responsibility for various aspects of managing the Flint Treatment Plant or responsibility in the Department of Public Works. The attached letter lists the initial list prepared by Eric Rothstein, It is essential that we have unfettered and unrestricted access to these individuals.

Thank you for your assistance.

Ken

Dear Paul,

Thanks for your time yesterday. Meanwhile today we received notice of a lawsuit recently filed in regards to the City of Flint water system. As you will note, Darnell Earley is a named defendant.

We have notified the carrier and will follow up with the carrier. Meanwhile, we want to circle back on the State of Michigan defending emergency managers particularly when they are no longer the EM at the public entity. If the SOM agrees to defend a former EM's actions, then the professional liability coverage for a current EM will be more attractive to the markets and cost less. In this case Mr Earley is named in a lawsuit for his actions while at the City of Flint and there is a policy in place. We are working on the renewal for his professional liability coverage while the EM at DPS.

Does the SOM want each EM to purchase individual professional liability and charge the premium to the public entity? What public entity and how would we allocate this premium?

Sorry to bring this up, just looking for clarification.

Please call me to discuss any questions.

Brian...

See below which you should've received as a fwd a few minutes ago.

Was any of the $780 spent in fy'14? I assume there was some carryover...

And on question 2, it wasn't just Detroit correct?

Thanks...TS

Subject: RE: Tracking the appropriations on certain bills

Tom, please see below. Let me know if you want more detail.

According to the bill language, the $780K is for Treasury "to administer the provisions of this act and to pay the salaries of emergency managers."

The entire $780,000 was spent to cover the salaries of emergency managers for the following cities / school districts:

Allen Park

Benton Harbor

Detroit

Detroit Public Schools

Ecorse

Flint

Hamtramck

Highland Park Schools

Muskegon Heights Schools

And on the $5.78 M is "to administer the provisions of this act, to secure the services of financial consultants, lawyers, work-out experts, and other professionals to assist in the implementation of this act, and to assist local governments in proceeding under chapter 9."

Of the $5,000,000 appropriated $2,948,532 has been spent to cover the costs of financial consultants, legal services, operations management and other professional services. The remaining balance as of 9/30/2015 is $2,051,457. The remaining funds will continue to be used to support local distressed communities and schools.

Note:

$10,000,000 was appropriated in 2012 to cover the costs of consulting services for local units. The funds appropriated in 2012 were used until June of 2014, therefore the 2013 appropriation would not have been used until all remaining 2012 funds were expended.

From: Jacob Kanclerz [mailto:jacob@mirsnews.com]
Sent: Wednesday, November 18, 2015 1:58 PM
To: Stanton, Terry A. (Treasury) <StantonT@michigan.gov>
Subject: Tracking the appropriations on certain bills

Terry,

I'm doing some digging on some appropriations that have been tacked onto certain bills in the past

few years, and I have a few I wanted to check on that pertain to Treasury.

First, on SB 865 from 2012, I wanted to see how both the $5.78M and $780K were spent.

According to the bill language, the $780K is for Treasury "to administer the provisions of this act and to pay the salaries of emergency managers."

And on the $5.78M is "to administer the provisions of this act, to secure the services of financial consultants, lawyers, work-out experts, and other professionals to assist in the implementation of this act, and to assist local governments in proceeding under chapter 9."

I'm particularly curious about the last one, given the specific of chapter 9 bankruptcy. This bill was signed into law about half a year before the city of Detroit entered into its Chapter 9 case.

Both appropriations were made for FY 2013, but both were made work project appropriations, so I'd love to know if there were any left over funds as it pertains to this bill.

Next, I have HB 4361 from 2011. This bill had $1M appropriated to Treasury (I believe) to begin implementing the requirements of the bill. I'd like to know how it was specifically spent. Also, this also had work project account status, so if there are leftover funds, let me know.

My deadline for this is next Wednesday, 11/25, at the latest. Thank you!

- (Natasha, Mayor Walling, Wendy Lamphier (for Fred)
- Randy Eric

Watershed break

- Flint is not pressing right now
- Not pressing — coz of the cost
- Will issue a RFP

Lead Problem

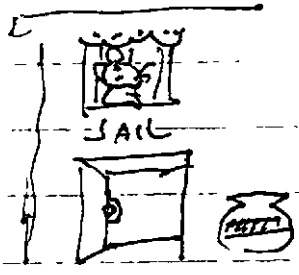
- ~~It~~ true that adding ortho phosphate reduces leaching
- Flint working with DEQ to do that.
- Not started that — Planning that out RFP out
- In compliance w Safe water drinking Act so it pertains to Lead.
- Flint will do a press conference.
- 2 related issues

1. Virtech. came in 2 yrs ago on Detroit system — test hitting water — would have found lead in samples as well.

underlying problem too much lead in system
- WATER sitting in lead pipes will always

FDCVT grant

- Agr. is complete -
- NAT → received & yest.
- spoke & submitted to



WATER lawsuits update

- No new developments
- hopeful for a stay

Working w Chatter Lorem. Now

- focusing on getting charter to the voters
Will foundation to help fund their efforts

FLINT CALL

NATASHA

- WENDY

MAYOR NATASHA

- Priorities

- Received order yesterday
- working on a plan to curtail
  1. Hiring freeze
  2. Spending freeze
- people NOT paying water bills
  3. looking at layoffs
- NO one making payments

— After this week — look to

— immediate impact for us

— Not collecting

— Plan to decrease capital projects

— Police only positions ~~#~~ to determined to be hired

* The FACO is definitely working

= When KWA is completed and Flint can connect & can you pay for the water?

NAT maybe not - because no one is paying

(PAYING on Bond KWA Systems)

* INKSTER lost class action suit — They credited all the accounts

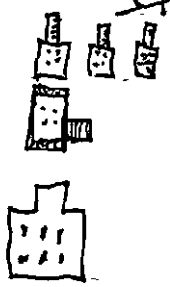
More immediately

Police hiring

— Will They have to go through academy

- 5 are ready to go, been through academy
- 5 need to go through academy

(· FLINT ·)



Council President

Great participation y teamwork — neighborhood cities Illinois, Ohio, Texas

- day to day functions
- fire stations — lines are tremendous
- Homebound / no transportation MTA has partnered w Flint —
- Takes people to water to homebound
- goes right to front door — drop off — Number they can call for water delivery.

— overall — its working — people are getting water, filters, testing on bottled water

— Volunteers is going well — momentum we need to keep

NATASHA

- work locally w State + county
- been a strain on the city using pol + fire
- get a grasp we need to be re-imbursed
- waste management contract —

- Water testing
- ~~staff~~
  - switch from River to DWSD
  - corrosion control
- DEQ, EPA – working with
- Deloitte – Volunteered to help w crisis manage
- KATRINA
  - becoming a really big share with the state – Alot of the done locally
    - PIO
    - PR
    - Finance director

EXAMPLE

Asst gets a call – Pol to direct traffic

- E.O.C where is the EOC set up
- starts on operations // Financial
- overtime costs w Fire/Police

WATER BILLING — CASH could last thru DEC 2016

- could have an additional 100 miles more of infrastructure

Public Safety FIRE / Police

FIRE - CONT TO BE distribution centers

EVENING
- Pub works Comm.
- Planning & Development

) meeting tonight

- Sheers v City of Flint update

$15.7M Council DID unanimously approve that

55 IN PIPE

FLINT 9AM

N HENDERSON, MAYOR WILLING,
J. FREEMAN, EHEADEN, R. BYRNE, E CLINE
P WIDIGAN P DOSTIE WENDY

Good morning, maybe you can bring us up-to-date with developments

- Bring us up to date
- what's are the city's priorities

Approved $2M to take
fund balance
revenue + DWSD
- Come to RTAB
- Council w Governor to
+ DWSD permission

negotiation period

- Big hiccup in the county
- how long to re-connect?

Rates DWSD offered us lower
than giving the county.

Genesee Co. balked at Low rate to city.

MAYOR WALRATH making progress on Co. negotiations

— Budget resolution

- letter from Addis.
- $2M from ~~Gen~~. Fund balance water Fund

— testing is happening on 8 mile line

— Flint cost $8 / water
— County $/4 for water

— A few days to re-connect

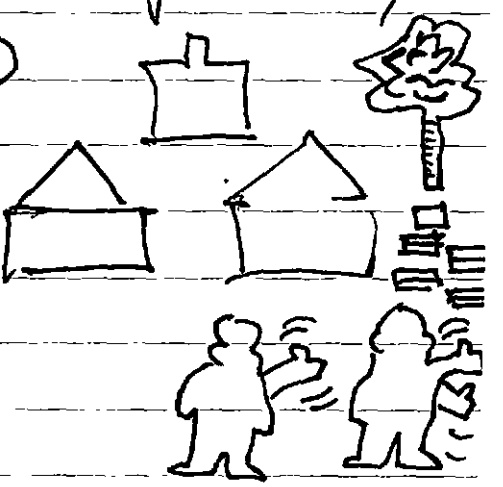
— State legislature expect

- w/o State's role
- will ask w. workman a Govt: Should Flint move ahead before State legislature finishes.
-

- once test comes backs, cleared by DEQ

- Still spoke answer about the legal fees, legal notes

- Press releases



Public Safety

x fines are down - ~~[illegible]~~ disqualifies Flint from getting grants

x down in tier 1 crimes
44 . Homicides
. rape
. armed robbery
> down overall

x Chief of Pol - participate
- Viol Reduction Network
Fed - Dept of Jus - victim services provide coordinated support to communities / high violent crime rate - higher than them natl Avg -

Mick only

- State Pol. involved in Detroit
- tech. assistance
- Site liaison - assigned to Chief Tolbert

2 reports to
: 1st Quarter budget amendments
not going to be ~~xxx~~ NOV.

- it does significantly decrease the fund balance.

- another amendment that bumps the fund balance down.

2 Resolutions
- $2M to ~~xxx~~ change
- NATASHA permission ~~to~~ execute
2 agreements / DVSD / Genesee Co.

9:30 AM FLINT

Priorities

1. Progressing and Quickly
Turn. Return to the County
for Emergency Declaration
→ next step. Mayor talk Gov tomorrow.

Emergency Declaration

Henderson

- E.O.C. NATASHA met us there yesterday.
  - MAPPING homes that have lead lines
  - Condemned homes will be noted too
  - Also collecting info on the system.
  - Most of our access to manage G.I.S. MAPPING of lines that have been affected.
- Recruitment for DPW
  - Met 2 recruiters
  - like Ms Parker from MML to search a DPW director

TJA 1st recruiter

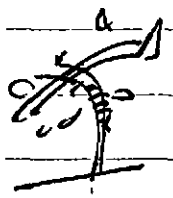
Received letter from Treasurer 75% ~~cost of~~ legal fees would be paid by Treasury for the Kincaid Lawsuit

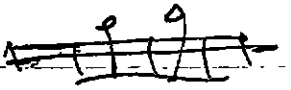
DPW topic

Timeline using MML
- 120 days
- DPW Port Huron recruited — got 25 applicants
- Flint believes Parker + MML will be successful cuz she has done recruitment recently

Septage + Lemon Law control Program
- Going quite well
- Collecting ~~samples~~ samples and testing
- Positive to reports

Still discuss w EPA & DEQ
- trying to DWSA
- Temporary water line -





WATER

TEMP. WATER LINE

see previous page

KWA - JAN 20 moved Feb 20th
- Board mtg. Moved.
- Mayor doesn't know why it was changed.
- Flint's been meeting w/ Board

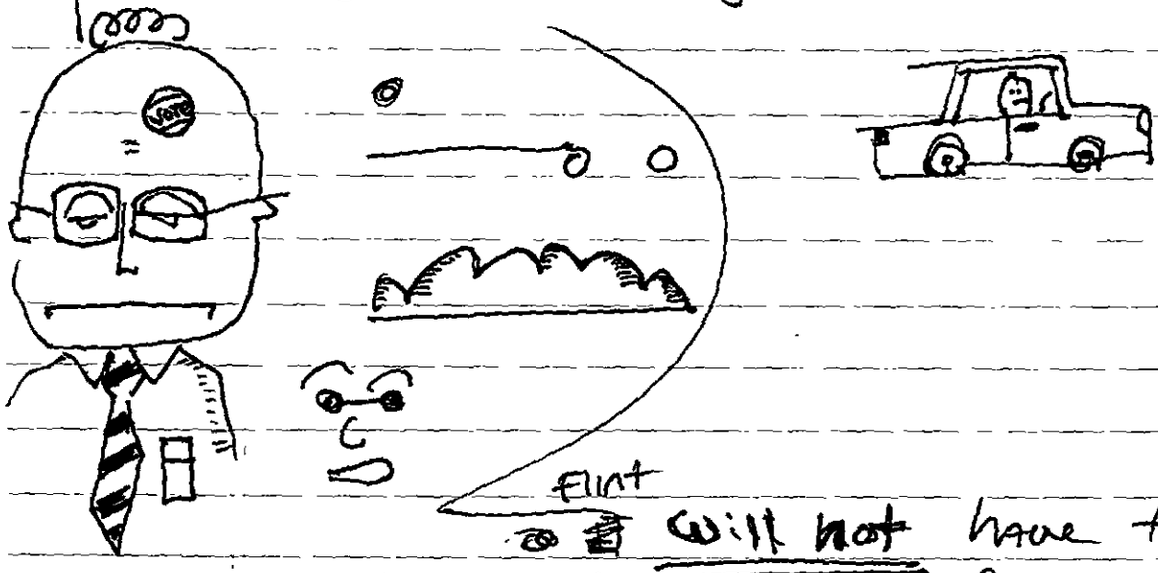
→ Flint meets w/ DEQ every Friday

WATER & SEWER RATES

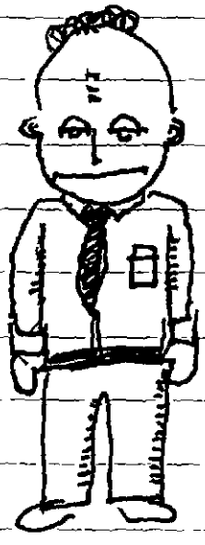
- Audit was filed
- has to be completed by Audit
- Increase rates
- All of that done by month of April
  - publishing of rates
  - this will be before budget and ~~start~~ started Jul. 2016

RTAB mtg

- Council did not meet Dec. 28
- Mtg happened Dec. 21st



- Special Mtg Dec 30
- Will not have to re-imburse the water + Sewer fund.



Council Pres:

been getting numerous calls

PA436

cuz of Eric MAPS — can PA436 have him removed?

- Fred said "that's the council decision"

Please let me know if you need anything further.

FLINT WATER TIMELINE

NOVEMBER 2015

4425 (Rev 04-15)

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A KHOURI
STATE TREASURER

Flint Water Timeline (11-09-15)

1. **June 26, 2012** – Letter from Flint EM Mike Brown to DWSD for permission to begin blending Flint River water with treated water from DWSD. The letter indicates that the DEQ is supporting this option and its implementation would save the City between $2M and $3M annually.

2. **September 20, 2012** – Letter from Flint EM Ed Kurtz to DWSD requesting written permission to implement the blending option. Approval is requested by October 1, 2012.

3. **October 31, 2012** – Analysis by the Flint Finance Director suggests that the annual cost to purchase water from DWSD will steadily increase to $23M per year by fiscal year 2020.

4. **November 2012** – Treasury retains Tucker, Young, Jackson and Tull (TYJT) to evaluate the KWA proposal to the City of Flint.

5. **November 6, 2012** – Letter from Flint Emergency Manager Ed Kurtz to State Treasurer Dillon that a proposal from DWSD is expected but that the initial assessment is that switching to KWA is in the best interest of the City of Flint.

6. **February 6, 2013** – TYJT issues a final report to Treasury on the comparison between Karegnondi Water Authority (KWA) and DWSD. Analysis suggests that the KWA option is the cheaper option for the City of Flint.

7. **March 2013** – DWSD contacts the City of Flint to begin direct negotiations on a contract extension. Multiple options are provided to the Flint Emergency Manager (EM) Ed Kurtz.

8. **March 25, 2013** – The Flint City Council endorses joining KWA.

9. **April 11, 2013** – State Treasurer Andy Dillon authorizes Flint EM Ed Kurtz, pursuant to Section 12(3) of P.A. 436 of 2012, to enter into a contract with KWA if a final offer from DWSD is either not received for rejected in good faith based upon specific objections.

10. **April 15, 2013** – DWSD provides a best and final offer to the City of Flint. Analyses by Flint EM Ed Kurtz, the Department of Environmental Quality and Treasury's Office of Fiscal Responsibility independently conclude that the KWA option is cheaper for the City of Flint.

11. **April 16, 2013** –Flint EM Ed Kurtz informs the State Treasurer that the City will join KWA. This decision was officially announced May 1, 2013.

12. **April 17, 2013** – DWSD transmits a letter to Flint EM Ed Kurtz terminating service to the City of Flint, effective April 17, 2014.

13. **June 26, 2013** – Groundbreaking for the Karegnondi Water Authority begins. Flint also requests full time use of the Flint Water Treatment Plant with Flint River water as a source.

14. **June 28, 2013** – Financing Contract between the City of Flint and KWA is approved. Effective August 1, 2013. This document was signed by EM Mike Brown.

15. **July 08, 2013** – The City retains Lockwood, Andrews & Newman engineering firm to get the City's water plant up and running while the KWA pipeline is built.

16. **February 19, 2014** – The KWA Board of Directors adopts Resolution 2014-01, authorizing KWA to bond for water line construction on-behalf of the City of Flint.

17. **April 17, 2014** – Water service from DWSD officially ends. The City of Flint also conducts two separate public forums regarding the use of Flint River water, upgrades to the City's water system and the overall cost of the switch to KWA.

18. **April 25, 2014** – City conducts public event marking the transition to the use of Flint River water. DEQ information shows that transition complete by May 2015.

19. **January 2, 2015** – The City issues a press release stating the City water system exceeds the TTHM maximum contaminant level.

20. **March 3, 2015** – Flint EM Jerry Ambrose provides a memorandum to Deputy State Treasurer Wayne Workman stating that a reconnection to DWSD will cost the City $10.1M/year and that water purchases could be as high as $1M/month.

21. **March 12, 2015** – Veolia issues the final operational evaluation of the City's water system.

22. **September 3, 2015** – MDEQ testing of the City's water shows TTHM levels are below the required action level.

23. **September 25, 2015** – Genesee County Health Department and the City of Flint issues a lead advisory for residents to be aware of lead levels in drinking water after hearing concerns from the medical community.

24. **October 16, 2015** – The City of Flint reconnects to Detroit Water.

25. **November 4, 2015** – The EPA issues its final report on high lead levels at three residences in the City.

Sue F. McCormick
Director DWSD
735 Randolph St.
Detroit, MI 48226

Dear Ms. McCormick,

In cooperation with the Michigan Department of Environmental Quality (MDEQ) and city engineers, the City of Flint has undertaken a review of the regulatory requirements necessary to supply water to our residential and commercial customers. As part of our evaluation it was determined that the Flint Water Treatment Plant is capable of successfully "blending" or "co-mingling" water sources while continuing to provide quality drinking water to citizens.

The Flint Water Treatment Plant would require approximately $1.3 million dollars in increased expenses in order to blend as much as one third (1/3) of treated river water with two thirds (2/3) of treated DWSD water. Using the 2013 DWSD rates this would result in savings of between two and three million dollars annually based on current usage data. The MDEQ has provided Flint with written documentation supporting our blending of water sources and the potential benefit.

Given this information we respectfully request written permission from DWSD to proceed with blending treated Flint River Water with treated DWSD water.

It should be understood that our goal is to deliver both high quality and economically viable water to our customers. This goal has led us to fully consider all available options including purchasing water from the Karegnondi Water Authority and use of the Flint River. We believe that in order for an option with DWSD to be successful it is essential that along with the proposed authorization to blend water that there is a guaranteed containment of the new "fixed costs" that exist in the current fee structure. The new DWSD fixed charge of $707,000 each month regardless of amount of water used is five times the original $143,000 each month instituted only two years ago. This has resulted in the cost of water from DWSD dropping in recent years as the overall fee has increased annually by millions although our usage has continued to decline. The continuation of this trend would render our request and goals invalid.

With the current Emergency Manager condition in Flint we believe that limiting an agreement to only three years is appropriate. This time frame would also serve as an evaluation period prior to any proposed long term agreement being considered.
We appreciate your consideration and look forward to working together.

Sincerely,

Michael K. Brown

Sue F. McCormick & DWSD Board
Director DWSD
735 Randolph Street
Detroit, MI 48226

Dear DWSD Board.

During the past nine months we have had several discussions with DWSD representatives regarding future water rates and other options including permission for Flint to blend treated water from DWSD. Flint currently has received written documentation from the state regulatory agency DEQ supporting the ability for Flint to safely blend treated water from Detroit.

In an effort to move forward we must have a written response from the DWSD Board that clearly states the following:

Will DWSD allow Flint to blend treated water from Detroit?

What are the rates given an estimated usage by Flint and Genesee County of:

- 23 MGD Average Daily Usage
- 40 MGD Maximum Day Usage

We are requesting this information be delivered to Flint no later than **October 1, 2012** so that we may evaluate all of our options and begin moving forward.

Sincerely,

Edward J. Kurtz

RE Cost Comparison, KWA v DWSD

Mr Kurtz

The City of Flint is considering whether joining the Karegnondi Water Authority (KWA) is a better alternative for the residents and businesses of Flint than continuing to purchase water from the Detroit Water and Sewer District (DWSD).

An important part of this consideration is the relative cost of the alternatives. We have compared the current projected costs of continuing to purchase water from DWSD to the projected costs of purchasing water from KWA.

The projected costs of purchasing water from DWSD come from our current and past experience, as well as statements from DWSD about their future costs The costs of purchasing water from KWA are based on the KWA Lake Huron Water Supply Study, as updated by its October 2012 Preliminary Engineering Report Update, Appendix 20, dated October 4, 2012

Based on the current contract with DWSD, the FY13 cost of purchasing water for the City of Flint only (excluding the sale of water to Genesee County) is budgeted at $14.4 million. Past experience indicates that it is reasonable to assume a 10% increase annually in the capacity charge from DWSD and a 5% increase in the commodity cost. It is also reasonable to assume a 5% increase in operational costs for the Flint Water Treatment Plant. Consequently, it appears that the costs for continuing to purchase water from DWSD will increase to $22 7 million by FY20.

Conversely, joining KWA and participating in the construction of infrastructure to receive water will require an up-front cost to the City of $2.3 million, to be paid over the first three years of joining. This would be paid by the City during the construction period while the City continues to purchase its water from DWSD. However, once the construction is complete and water delivery commences, the City's capacity charge will be fixed, based on the debt service necessary to finance construction. Operational costs for KWA water delivery and the Flint WTP are projected to increase by 5% annually.

Based on the assumptions in this comparison, the annual projected cost of purchasing water for the City of Flint is 15% or $2.6 million LESS using the KWA option in the first year of operation, increasing to 27% or $6.1 million LESS in the fifth year of operation. The only caveat is that in order to achieve this, the City will need to upfront KWA $3.25 million over 3 years prior to KWA beginning water delivery.

Concerns have been raised about the potential of cost overruns and delays in construction. These are reasonable concerns. An additional analysis, assuming a 15% cost overrun, and a one-year delay in construction, indicates that the gain to be achieved from participating in KWA is lessened (from $2.6 million in the first year to $2.3 million) and the City's upfront contribution is increased to $10.4 million if the City is required to make its first year's debt service payment before operations begin. The City's gain from participating in KWA is delayed, but once operations begin, the City's annual costs are less than continuing with DWSD, becoming net positive in FY20. However, given the City's precarious financial position, it is likely that the City would need to find some source of capital if such an up-front payment were necessary.

Finally, we have also analyzed what constraints DWSD would need to impose on its contract with the City of Flint in order to be a positive financial option. It would appear that if the capacity costs to Flint were to be fixed at the FY13 level and if annual operating cost increases were capped at 2.25%, then the cost to the City of Flint could be less than KWA.

Attached are the three projections summarized above. First is the "Original Projection" utilizing the KWA Study. Second is the "Worse Case Projection" with cost increases and construction delays. Third is the reduced DWSD costs associated with fixed capacity costs and capped increases in operational costs.

Please contact me if you have any questions.

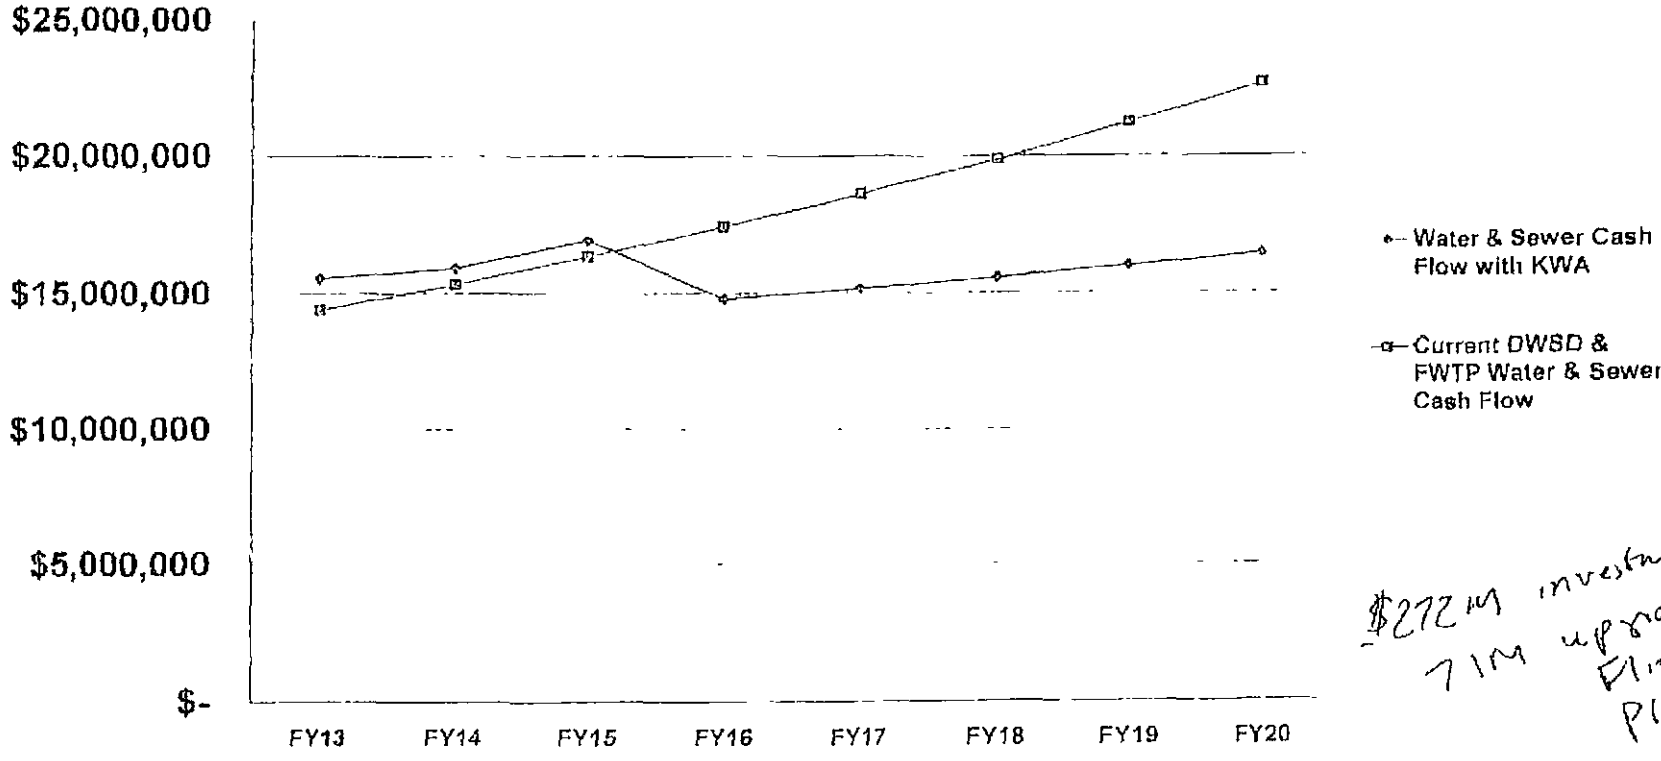
Original Projection - Summary Comparison: KWA vs DWSD



$272M investment system
71M upgrade Flint Plant

- Delivering raw water to Flint plant & new plant by G.C.

FINAL 10/31/2012

ORIGINAL PROJECTION
SUMMARY COMPARISON: KWA V DWSD

Water and Sewer Cash Flow with KWA

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,365,534	$ -	$ -	$ -	$ -	$ -
KWA Entry Fee $2,325,600	$ 1,162,800	$ 581,400	$ 581,400	$ -	$ -	$ -	$ -	$ -
KWA Debt Service	$ -	$ -	$ -	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155
FWTP Debt Service	$ -	$ -	$ -	$ 572,781	$ 572,781	$ 572,781	$ 572,781	$ 572,781
KWA operations	$ -	$ -	$ -	$ 878,669	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
FWTP operations w KWA	$ -	$ -	$ -	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Total Costs	$ 16,576,658	$ 15,936,535	$ 16,946,934	$ 14,888,149	$ 15,274,260	$ 15,679,676	$ 16,105,363	$ 16,552,334

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,356,135	$ 16,366,534	$ 17,450,717	$ 18,616,851	$ 19,870,689	$ 21,219,435	$ 22,671,185

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual Cost: DWSD - KWA	$ (1,162,800)	$ (581,400)	$ (581,400)	$ 2,562,568	$ 3,342,591	$ 4,190,974	$ 5,114,072	$ 6,118,851
Cumulative Gain with KWA	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ 236,968	$ 3,579,559	$ 7,770,533	$ 12,884,605	$ 19,003,456

(1) This projection assumes that KWA begins delivery of water to Flint starting in July, 2016. Any interest on the bonds will be capitalized until that period. The City will be obligated to begin paying its $2,325,600 entry fee in FY13. 2 payments of $581,400 in FY13, 1 payment in FY14 and 1 payment in FY15.

(2) The cost of the KWA option is projected to be $2,562,568 or 15% LESS than DWSD in the first year of operation (Year 4). This gain offsets the upfront costs of $2,325,600 by $236,968.

(3) The cost of the KWA option is projected to be $6.1 million or 27% LESS than DWSD in the 5th year of operation (Year 8).

(4) The cumulative savings by the 5th year from the beginning of the project are projected to be $19 million.

Detail of Original Cost Projections — FINAL — 10/31/2012

Cost Comparisons: Water Supply to City of Flint from DWSD and proposed KWA project

Cost of water to City of Flint (excluding Genesee) using continued service from DWSD

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
Fixed Cost (1)	$ 4,411,680	$ 4,852,848	$ 5,338,133	$ 5,871,946	$ 6,459,141	$ 7,105,055	$ 7,815,560	$ 8,597,116
Escalator	1.10	1.10	1.10	1.10	1.10	1.10	1.10	
Commodity Cost (2)	$ 7,276,640	$ 7,640,472	$ 8,022,496	$ 8,423,620	$ 8,844,801	$ 9,287,041	$ 9,751,394	$ 10,238,963
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
Flint WTP Operating Cost (3)	$ 2,725,530	$ 2,861,815	$ 3,004,906	$ 3,155,151	$ 3,312,908	$ 3,478,554	$ 3,652,482	$ 3,835,106
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	$ 14,413,858	$ 15,355,135	$ 16,365,534	$ 17,450,717	$ 18,616,851	$ 19,870,650	$ 21,219,435	$ 22,671,185

(1) Per FY13 Budget and DWSD Contract, fixed charge from DWSD for FY13 is $707,000 per month or $8.5 million total. Flint's cost is 52% or $4.4 million total

(2) *Per FY13 Budget and DWSD Contract, and based on 12 million gallons per day (mgd), cost is $7.3 million, based on $12.46/unit ($12.46x1600unitsx365).*

(3) Per FY13 Budget, annual cost of WTP is $4.1 million. Genesee County pays $1,386,000 for emergency back up service.

Cost of water to City of Flint using proposed KWA project for water supply to Flint WTP

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
KWA Entry Costs (1)	$ 1,162,800	$ 581,400	$ 581,400		$ -	$ -	$ -	$ -
Fixed KWA Construction Cost (2)				$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155
Escalator				1.00	1.00	1.00	1.00	
Fixed Flint WTP Construction Cost (3)				$ 572,781	$ 572,781	$ 572,781	$ 572,781	$ 572,781
Escalator				1.00	1.00	1.00	1.00	
Flint WTP Operating Cost (4)	$ 5,911,538	$ 6,207,115	$ 6,517,471	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
KWA Commodity Charge (5)	$ 759,200	$ 797,160	$ 837,018	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	KWA NOT AVAILABLE			$ 14,888,149	$ 15,274,260	$ 15,679,676	$ 16,105,363	$ 16,552,334

(1) The City will, upon joining, be required to pay an initial fee of $32,300 per MGD plus the same amount for each year until bonding for the project is obtained. At 18MGD, the City's cost is $581,400 annually. Since it is projected that fee will be assessed for 3 years, the City's upfront cost is projected at $2,325,600.

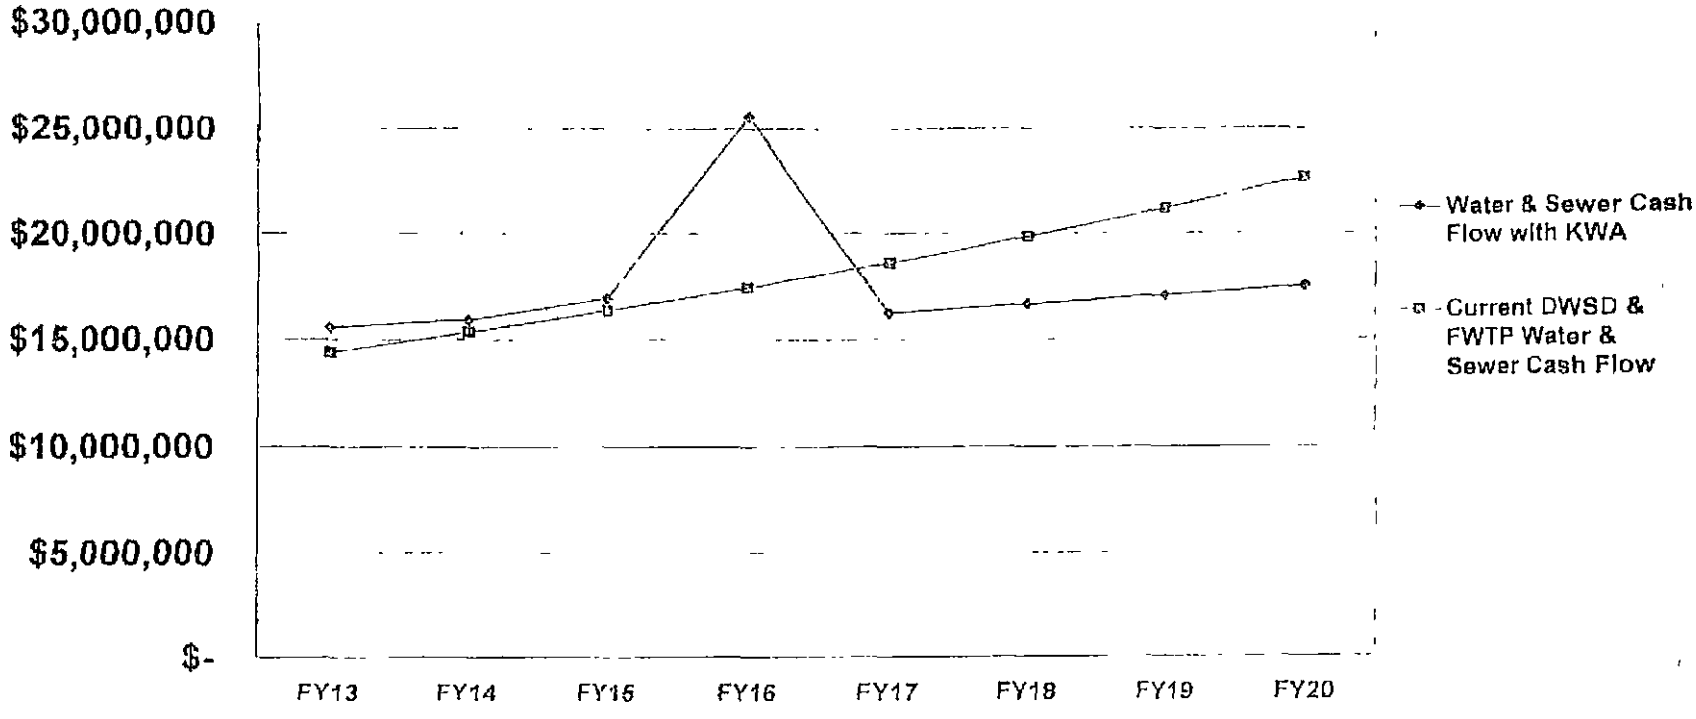
(2) Per KWA proposal, project cost is $272 million. City's fixed cost would be 30% of debt service, based on capacity design of 60mgd, of which 18MGD is for Flint. *Debt service is based on 5% interest rate @ 25 years. 5% added to principal for capitalized interest for FY13, FY14 and FY15. ($272,421,688 plus $13,621,078 for 3 years = $313,284,792)*

(3) Per KWA proposal, the cost of upgrading the Flint is $7.1 million. City's fixed cost would be100% of debt service based on 0% interest rate @ 25 years), with 5% added to cover capitalized interest for FY13, FY14, and FY15. (total principal = $8.165 million)

(4) Per FY13 Budget annual cost of WTP is $4,111,538. $1.6 million for electricity and chemicals & 2 FTE's are added. 100% City cost. 100%

(5) *Per KWA proposal, initial commodity charge would be based on $1.30/unit or 7,500 gallons. Charge is based on 12MGD*

Worst Case Scenario - Summary Comparison KWA vs DWSD (15% Cost Overrun; One year delay in Water Supply delivery)



FINAL 10/31/2012

WORSE CASE PROJECTION
SUMMARY COMPARISON: KWA V DWSD
(15% Cost Overrun; One year delay in Water Supply delivery)

Water and Sewer Cash Flow with KWA

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,366,534	$ 17,150,717	$ 18,616,861	$ 19,870,650	$ 21,219,435	$ 22,671,186

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual KWA - DWSD	$ (1,162,800)	$ (581,400)	$ (581,400)	$ (8,240,828)	$ 2,267,700	$ 3,116,084	$ 4,039,182	$ 5,043,960
Cumulative	$ (1,162,800)	$ (1,744,200)	$ (2,326,600)	$ (10,566,428)	$ (8,298,728)	$ (5,182,642)	$ (1,143,460)	$ 3,900,500

"Worse Case" scenario differs from Original in these respects:

(1) Delivery of water to Flint from KWA is delayed by one year and construction costs are 15% above the original projection. Consequently, the City is required to begin paying for debt service one year before KWA begins delivery of water. This is in addition to its obligation to pay its initial entry fee of $581,400 plus $581,400 annually for the first 3 years.

(2) Once KWA begins delivering water in year 5, the annual operating costs are less than DWSD by 13%. Considering $10.8 million in upfront costs in the first 4 years prior to KWA operation, the cumulative cost of KWA exceeds the cost of DWSD until year 8.

(3) Cumulative savings by Year 8 are projected to be $3.9 million, compared to $19 million in the original projection.

Detail of Worse Case Cost Projections FINAL 10/31/2012

(1) Per FY13 Budget and DWSD Contract, fixed charge from DWSD for FY13 is $707,000 per month or $8.5 million total. Flint's cost is 52% or $4.4 million total

(2) Per FY13 Budget and DWSD Contract and based on 12 million gallons per day (mgd), cost is $7.3 million, based on $12.46/unit ($12.46x1000unitsx365).

(3) Per FY13 Budget, annual cost of WTP is $4.1 million. Genesee County pays $1,388,000 for emergency back up service.

Cost of water to City of Flint using proposed KWA project for water supply to Flint WTP

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
KWA Entry Costs (1)	$ 1,162,800	$ 581,400	$ 581,400	$ -	$ -	$	$	$ -
Fixed KWA Construction Cost (2)				$ 7,582,128	$ 7,582,128	$ 7,582,128	$ 7,582,128	$ 7,582,128
Escalator						1.00	1.00	
Fixed Flint WTP Construction Cost (3)				$ 658,698	$ 658,698	$ 658,698	$ 658,698	$ 658,698
Escalator								
Flint WTP Operating Cost (4)	$ 5,911,638	$ 6,207,115	$ 6,517,471	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
KWA Commodity Charge (5)	$ 759,200	$ 797,160	$ 837,018	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	KWA NOT AVAILABLE				$ 16,349,150	$ 16,754,566	$ 17,180,253	$ 17,627,226

(1) The City will, upon joining, be required to pay a, initial fee of $32,300 per MGD plus the same amount for each year until bonding for the project is obtained. At 18MGD, the City's cost is $581,000, for a total of $2,325,600

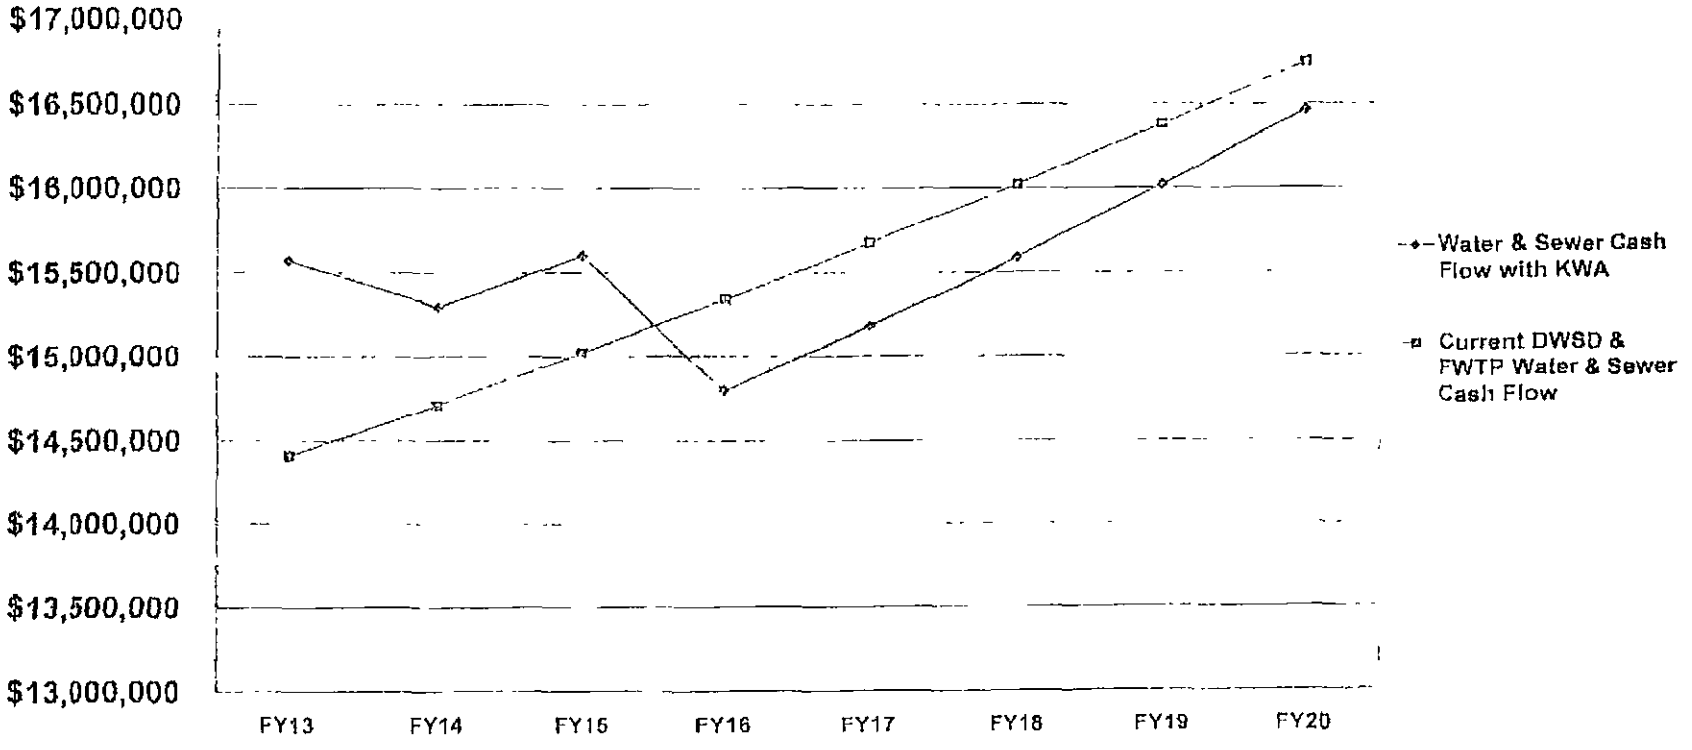
(2) Per KWA proposal original project cost is $272 million. City's fixed cost would be 30% of debt service, based on capacity design of 60mgd, of which 18MGD is for Flint. Debt service is based on 5% interest rate @ 25 years, 5% added to principal for capitalized interest for FY13, FY14, and FY15 ($272,421,586 plus $13,821,078 for 3 years = $313,284,792). The costs here are increased by 15%, debt service starts in FY16 but water is not available until FY17.

(3) Per KWA proposal the cost of upgrading the Flint is $7.1 million. City's fixed cost would be100% of debt service based on 5% interest rate @ 25 years) with 5% added to cover capitalized interest for FY13, FY14, and FY15 (total principal = $8.165 million). Again costs here are increased by 15%; debt service starts in FY16 but water is not available until FY17. Debt service is now on $9.4 million

(4) Per FY13 Budget annual cost of WTP is $4,111,638. $1.6 million for electricity and chemicals & 2 FTE's are added. 100% City cost

(5) Per KWA proposal, initial commodity charge would be based on $1.30/unit or 7,500 gallons. Charge is based on 12MGD

ALTERNATE PROJECTION - SUMMARY COMPARISON: KWA V DWSD WITH DWSD COSTS REDUCED (Fixed Costs held constant; Commodity Costs Increased by 2.25% Annually)



FINAL 10/31/2012

ALTERNATE PROJECTION
SUMMARY COMPARISON: KWA V DWSD WITH DWSD COSTS REDUCED
(FIXED COSTS HELD CONSTANT; COMMODITY COSTS INCREASED BY 2.25% ANNUALLY)

Water and Sewer Cash Flow with KWA

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 14,713,859	$ 15,024,358	$ -	$ -	$ -	$ -	$ -
KWA Entry Fee	$ 1,162,800	$ 581,400	$ 581,400	$	$ -	$ -	$ -	$ -

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 14,713,859	$ 15,024,358	$ 15,345,778	$ 15,678,562	$ 16,023,172	$16,380,091	$ 16,749,823

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual Cost: DWSD - KWA	$ (1,162,800)	$ (581,400)	$ (581,400)	$ 457,629	$ 404,302	$ 343,496	$ 274,728	$ 197,488
Cumulative Gain with KWA	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ (1,867,971)	$ (1,463,669)	$ (1,120,173)	$ (845,445)	$ (647,958)

(1) This projection assumes that DWSD fixed costs remain at 2013 levels and that operating costs increase by 2 25% annually

(2) KWA costs are as in the Original Projection

(3) In this comparison, KWA costs are still less once operations begin (by 2 9%), and cumulative gain does not occur until after year 8 Over time, DWDS costs could be less with these limitations on cost increases

Detail of Cost Projections

Summary of Construction Cost

[1]Facilities	Base Cost	Contingency	Subtotal	GC, Insurance, Bonds, Mob/Demob., Allowances	Escalation	Cost
South Transmission Main	$ 180,552,670	$ 18,055,267	$ 198,607,937	$ 36,446,873	$ 28,206,577	$ 263,261,387
North Transmission Main	$ 152,354,280	$ 15,235,428	$ 167,589,708	$ 32,284,868	$ 23,984,949	$ 223,859,525
Grand Blanc Pumping Station	$ 29,171,593	$ 2,917,159	$ 32,088,752	$ 8,738,838	$ 4,899,287	$ 45,726,877
[2] [3] Total Cost	$ 362,078,543	$ 36,207,854	$ 398,286,397	$ 77,470,379	$ 57,090,813	$ 532,847,589

[1] The Transmission Main and Grand Blanc Pumping Station shall be constructed under 3 separate construction contracts as follows:

1. Construction Contract No 1 shall include the construction of the Transmission Main from the connection to the NOTS in Orion Township to the Oakland/Genesee County line (approximately 121,100 lft). The total Contract 1 construction cost is estimated to be $ 263,261,387.

2. Construction Contract No. 2A shall include the construction of the Transmission Main from the Oakland/Genesee County line to the connection to the DWSD system near the Potter Road/Baxter Road intersection in Davison Township (approx 120,500 lft). The total Contract 2 construction cost is estimated to be $ 223,859,525.

3 Construction Contract No 2B shall include the construction of the Grand Blanc Pumping Station The total Contract 3 construction cost is estimated to be $ 45,726,877.

[2] Construction duration of the project is appoximately 3 years An escalation @ 6% per year is added to cover second and thrid year of construction.

[3] CM fee is not included in this cost estimate
